PART I

AMERICAS RIDE-HAILING DEMAND AND CONSUMPTION OVERVIEW 2019-2023

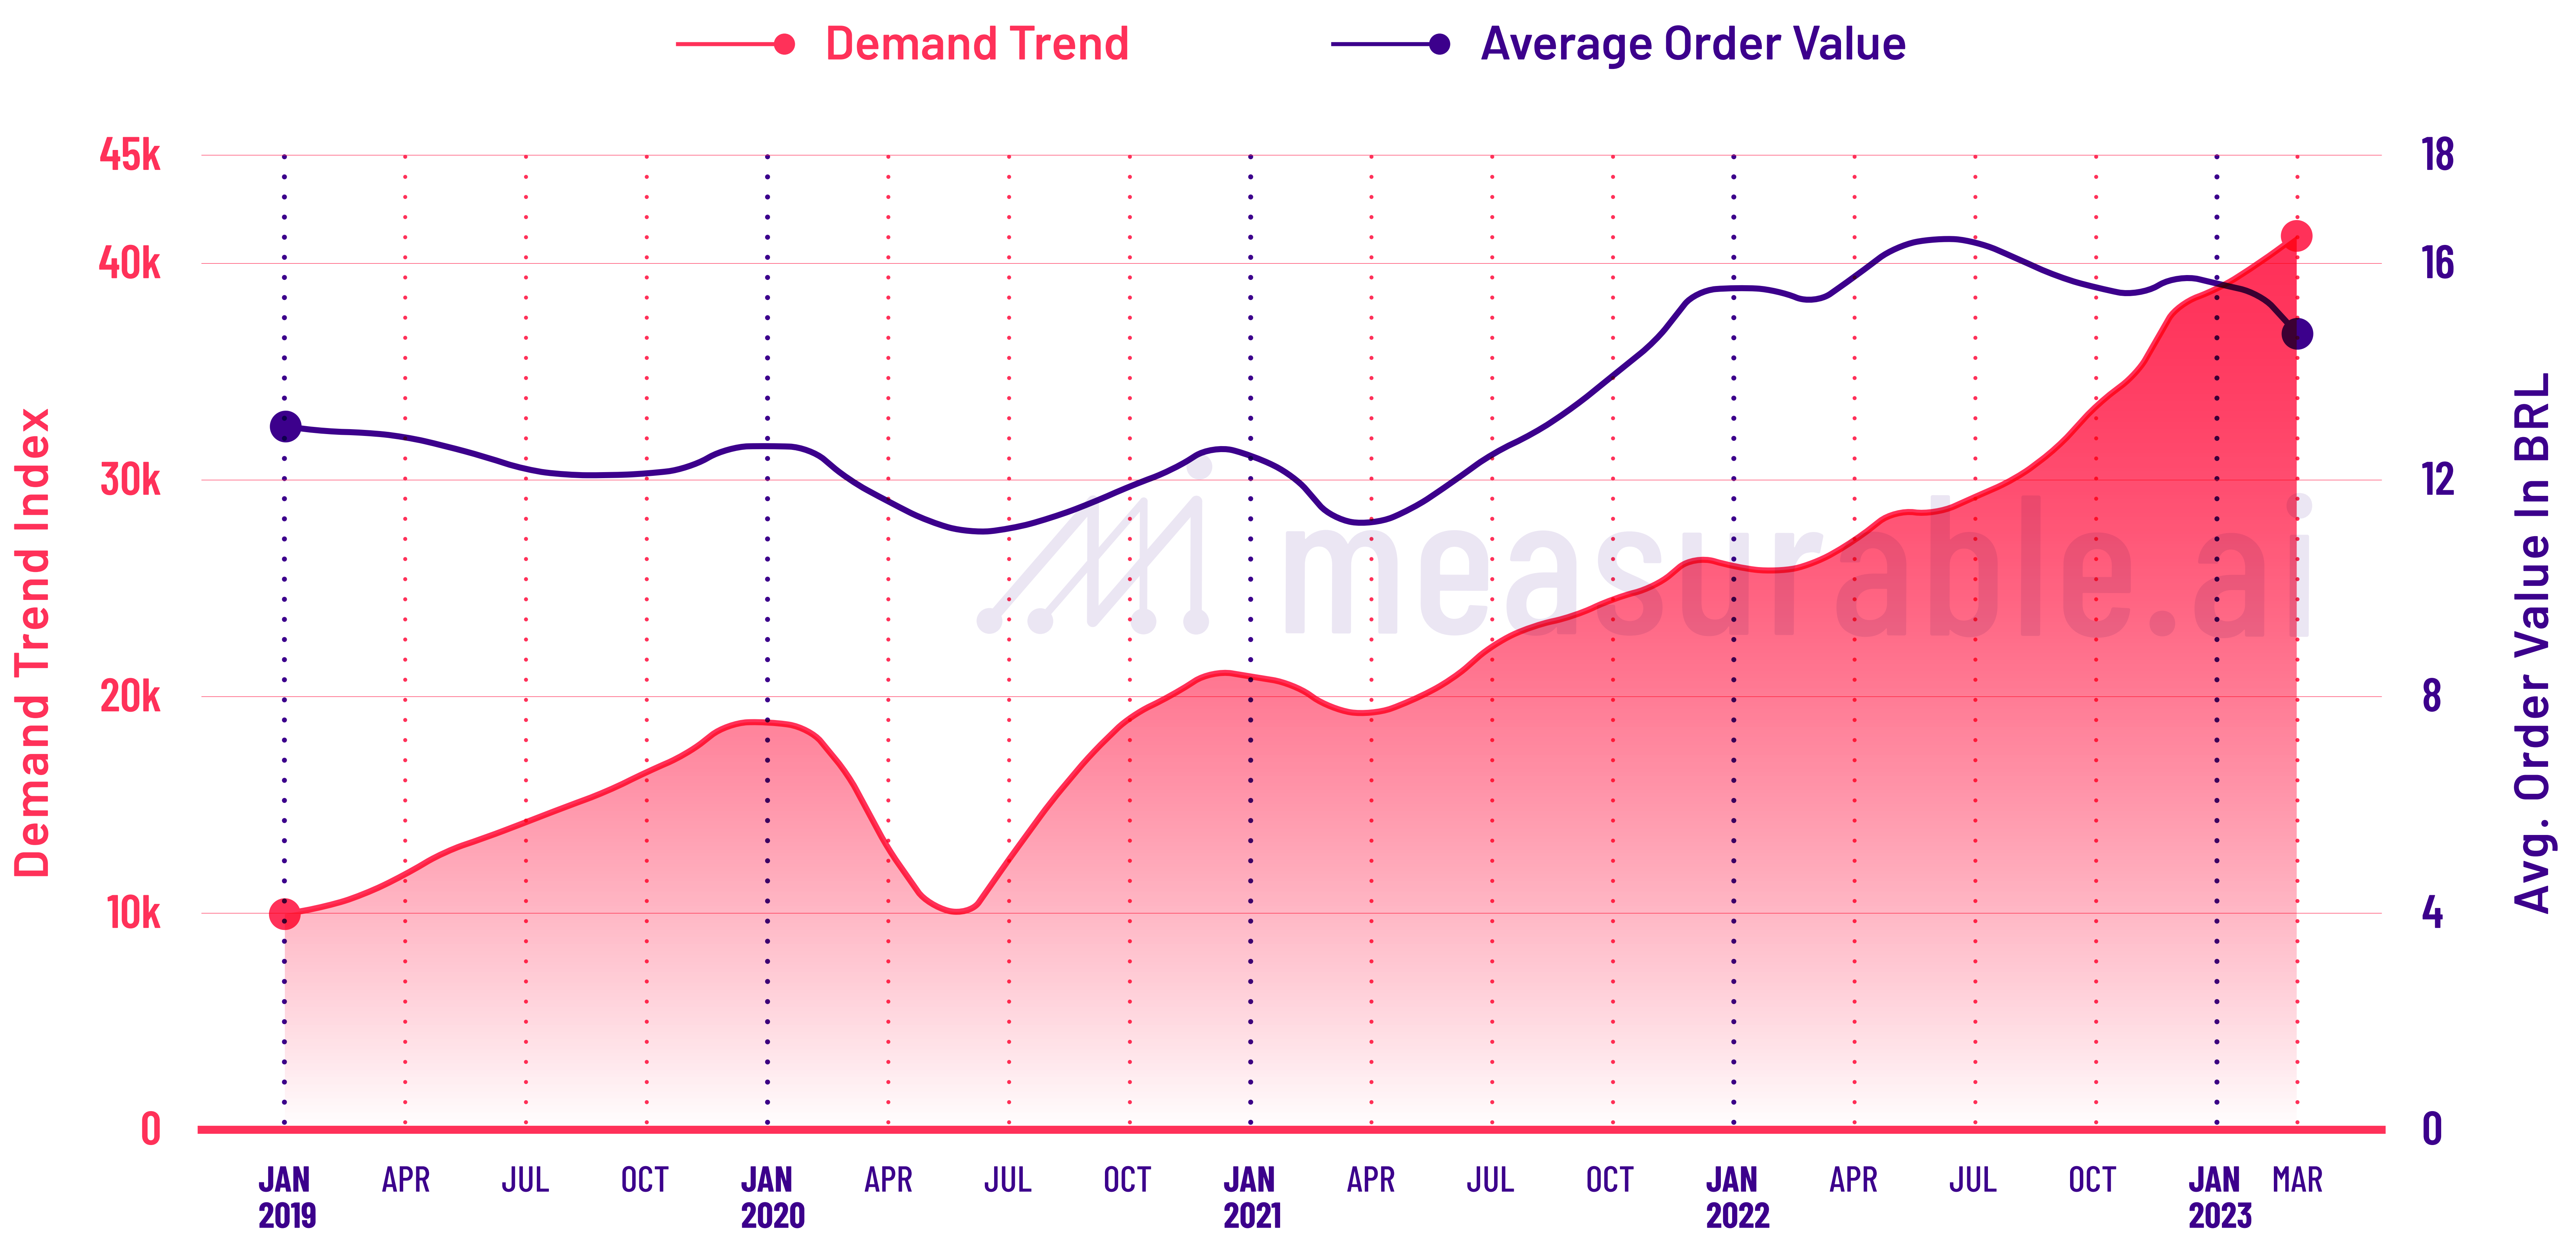
INTRODUCTION

This report aims to provide a comprehensive overview of the ride-hailing industry in the Americas over the past four years, revealing notable shifts in market demand, consumer behaviour, and the fluctuating market share.

The pandemic caused a significant decline in the ride-hailing industry in the Americas, as demand plummeted due to lockdowns and the shift to remote work. As the restrictions gradually eased, the consumption for ride-hailing services started to recover. Post-pandemic, the ride-hailing industry has shown resilience and adaptability, major players have successfully navigated the challenges and are poised for continued growth.

BRAZIL | RIDE-HAILING DEMAND & CONSUMPTION TREND

2019 2023

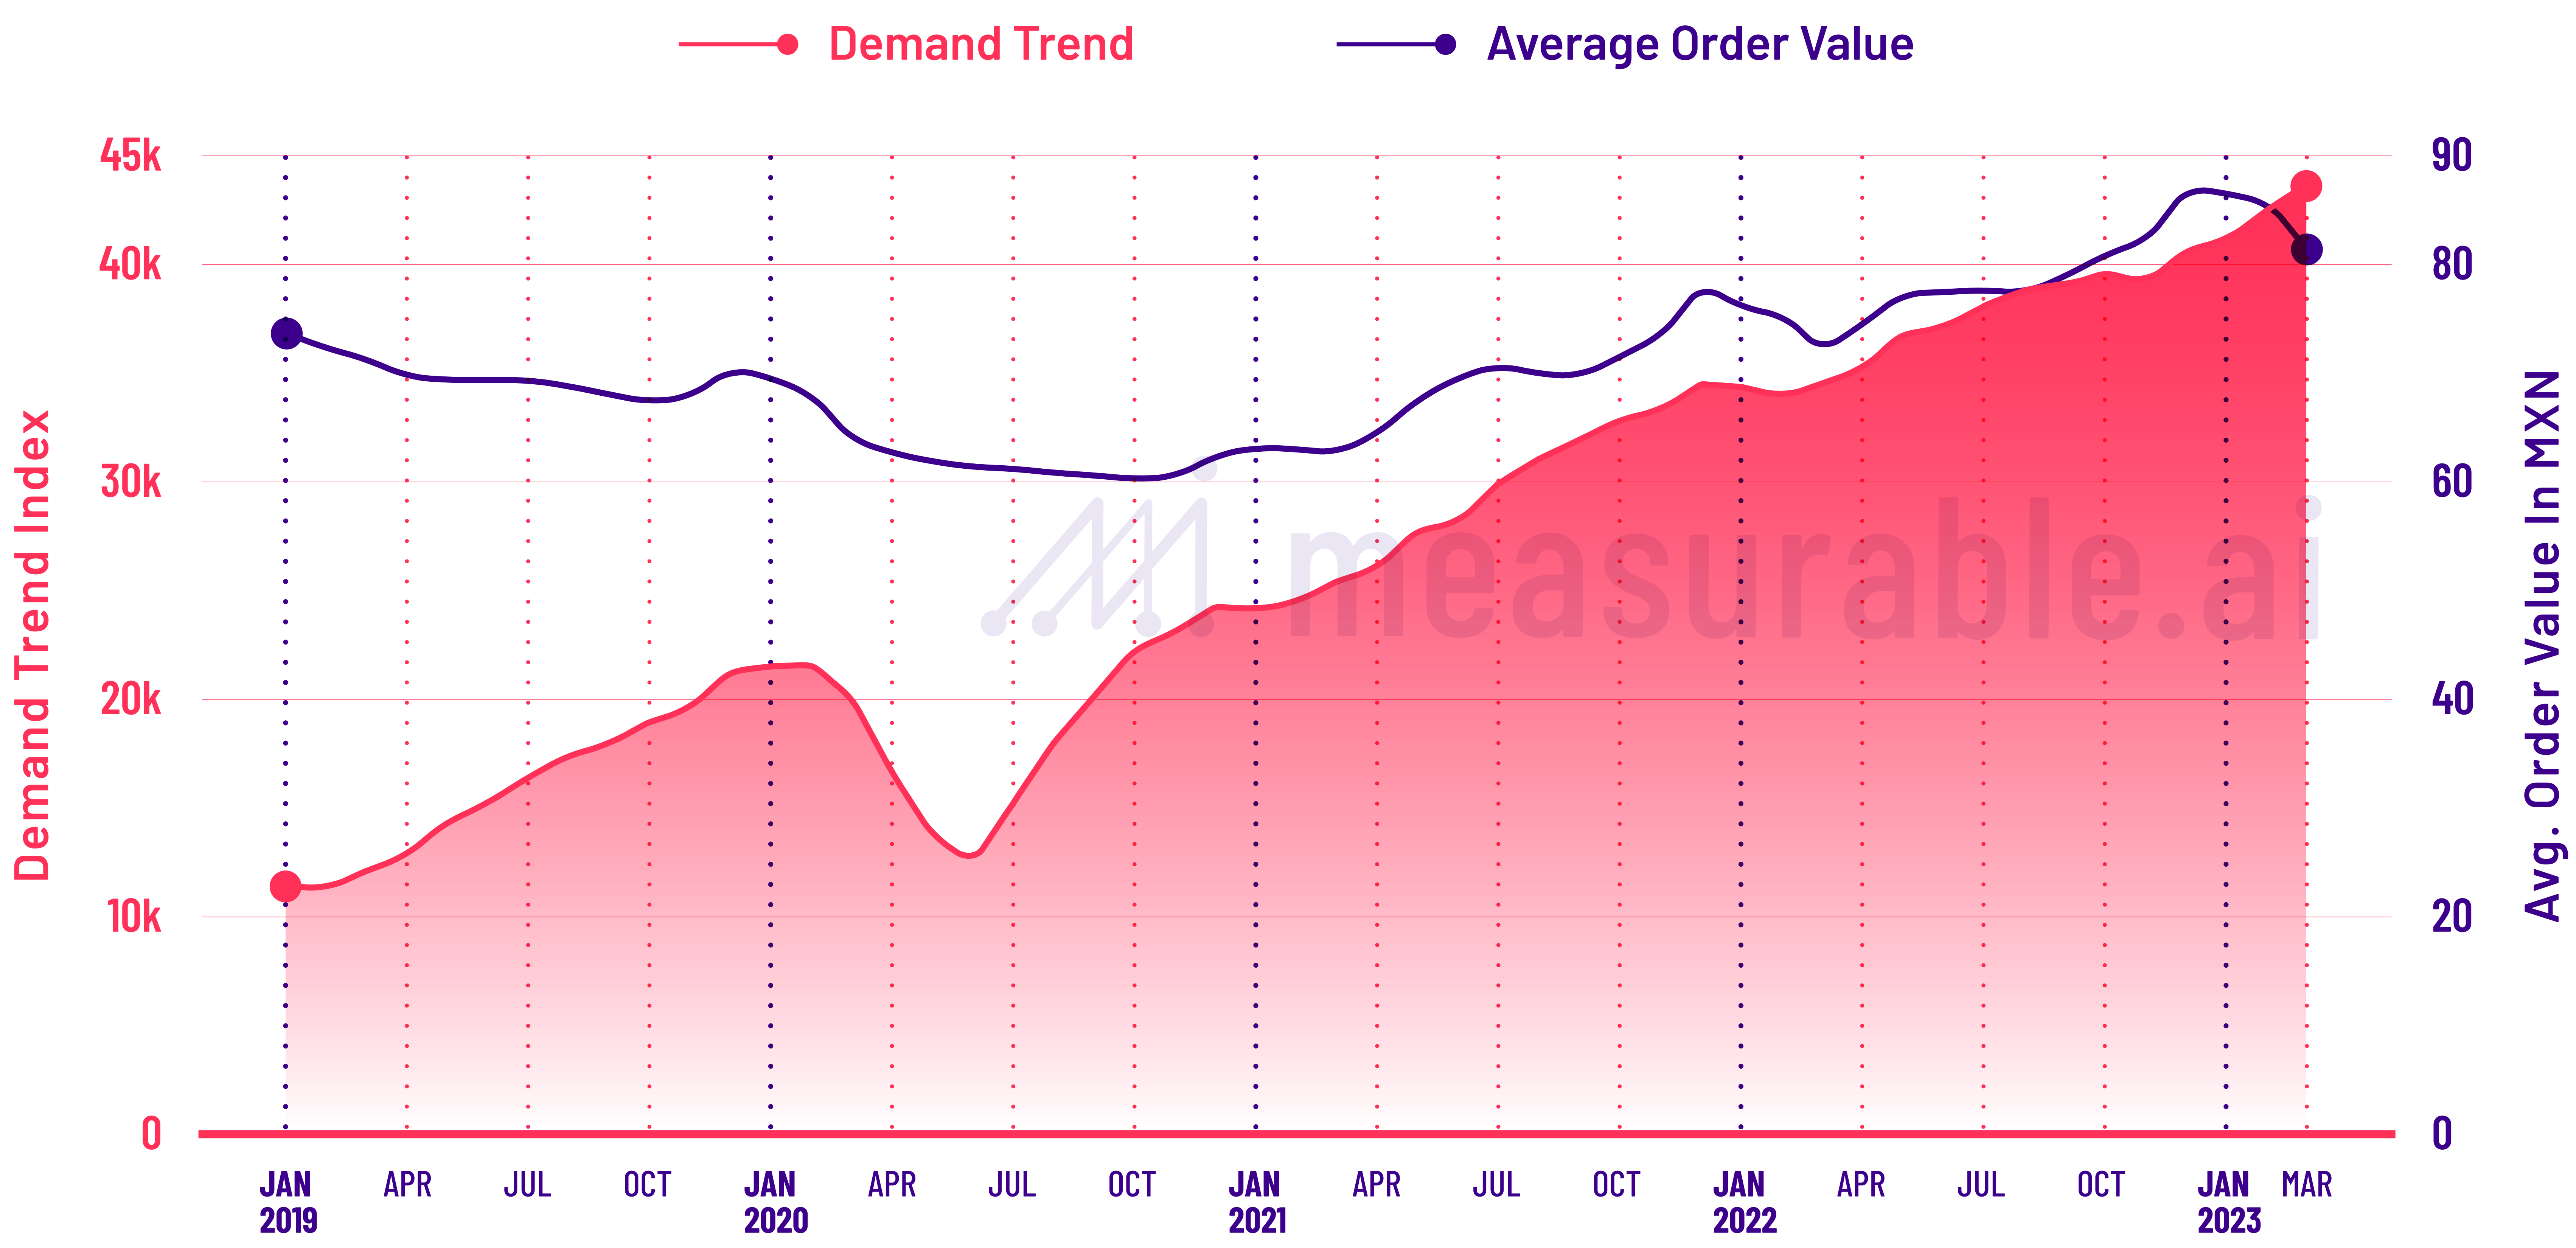


Measurable AI: Brazil Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: NinetyNine, Uber, Cabify

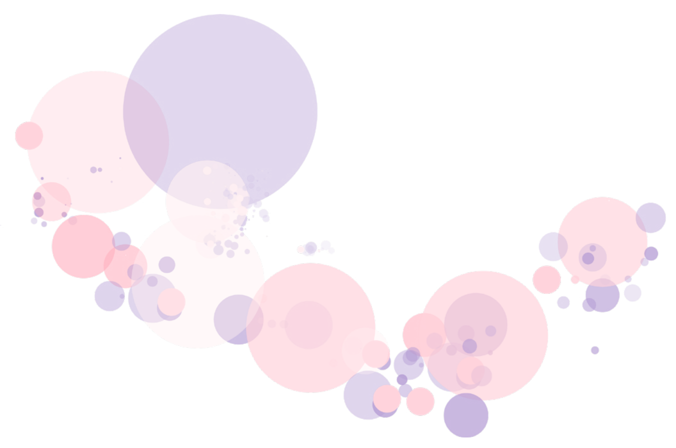
Brazil's ride-hailing demand trend saw a big drop in Q2 2020, but eventually recovered to where it was before the pandemic. The demand trend grew at a 20.6% CAGR based on order volume throughout 2019 to 2022. Brazil rider's average order value continued a steady growth from around 12 BRL to 15 BRL in Q1 2023.

MEXICO | RIDE-HAILING DEMAND & CONSUMPTION TREND

2019 2023



Measurable AI: Mexico Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify, Bolt



The Mexico ride-hailing demand trend grew at a 22.9% CAGR based on order volume throughout 2019 to 2022. Similar to Brazil, in Mexico, the overall ride-hailing demand plummeted in 2020 around Q2, before it saw rapid growth after the pandemic. Mexican riders' average order value slowly rose from 70 MXN to 77.

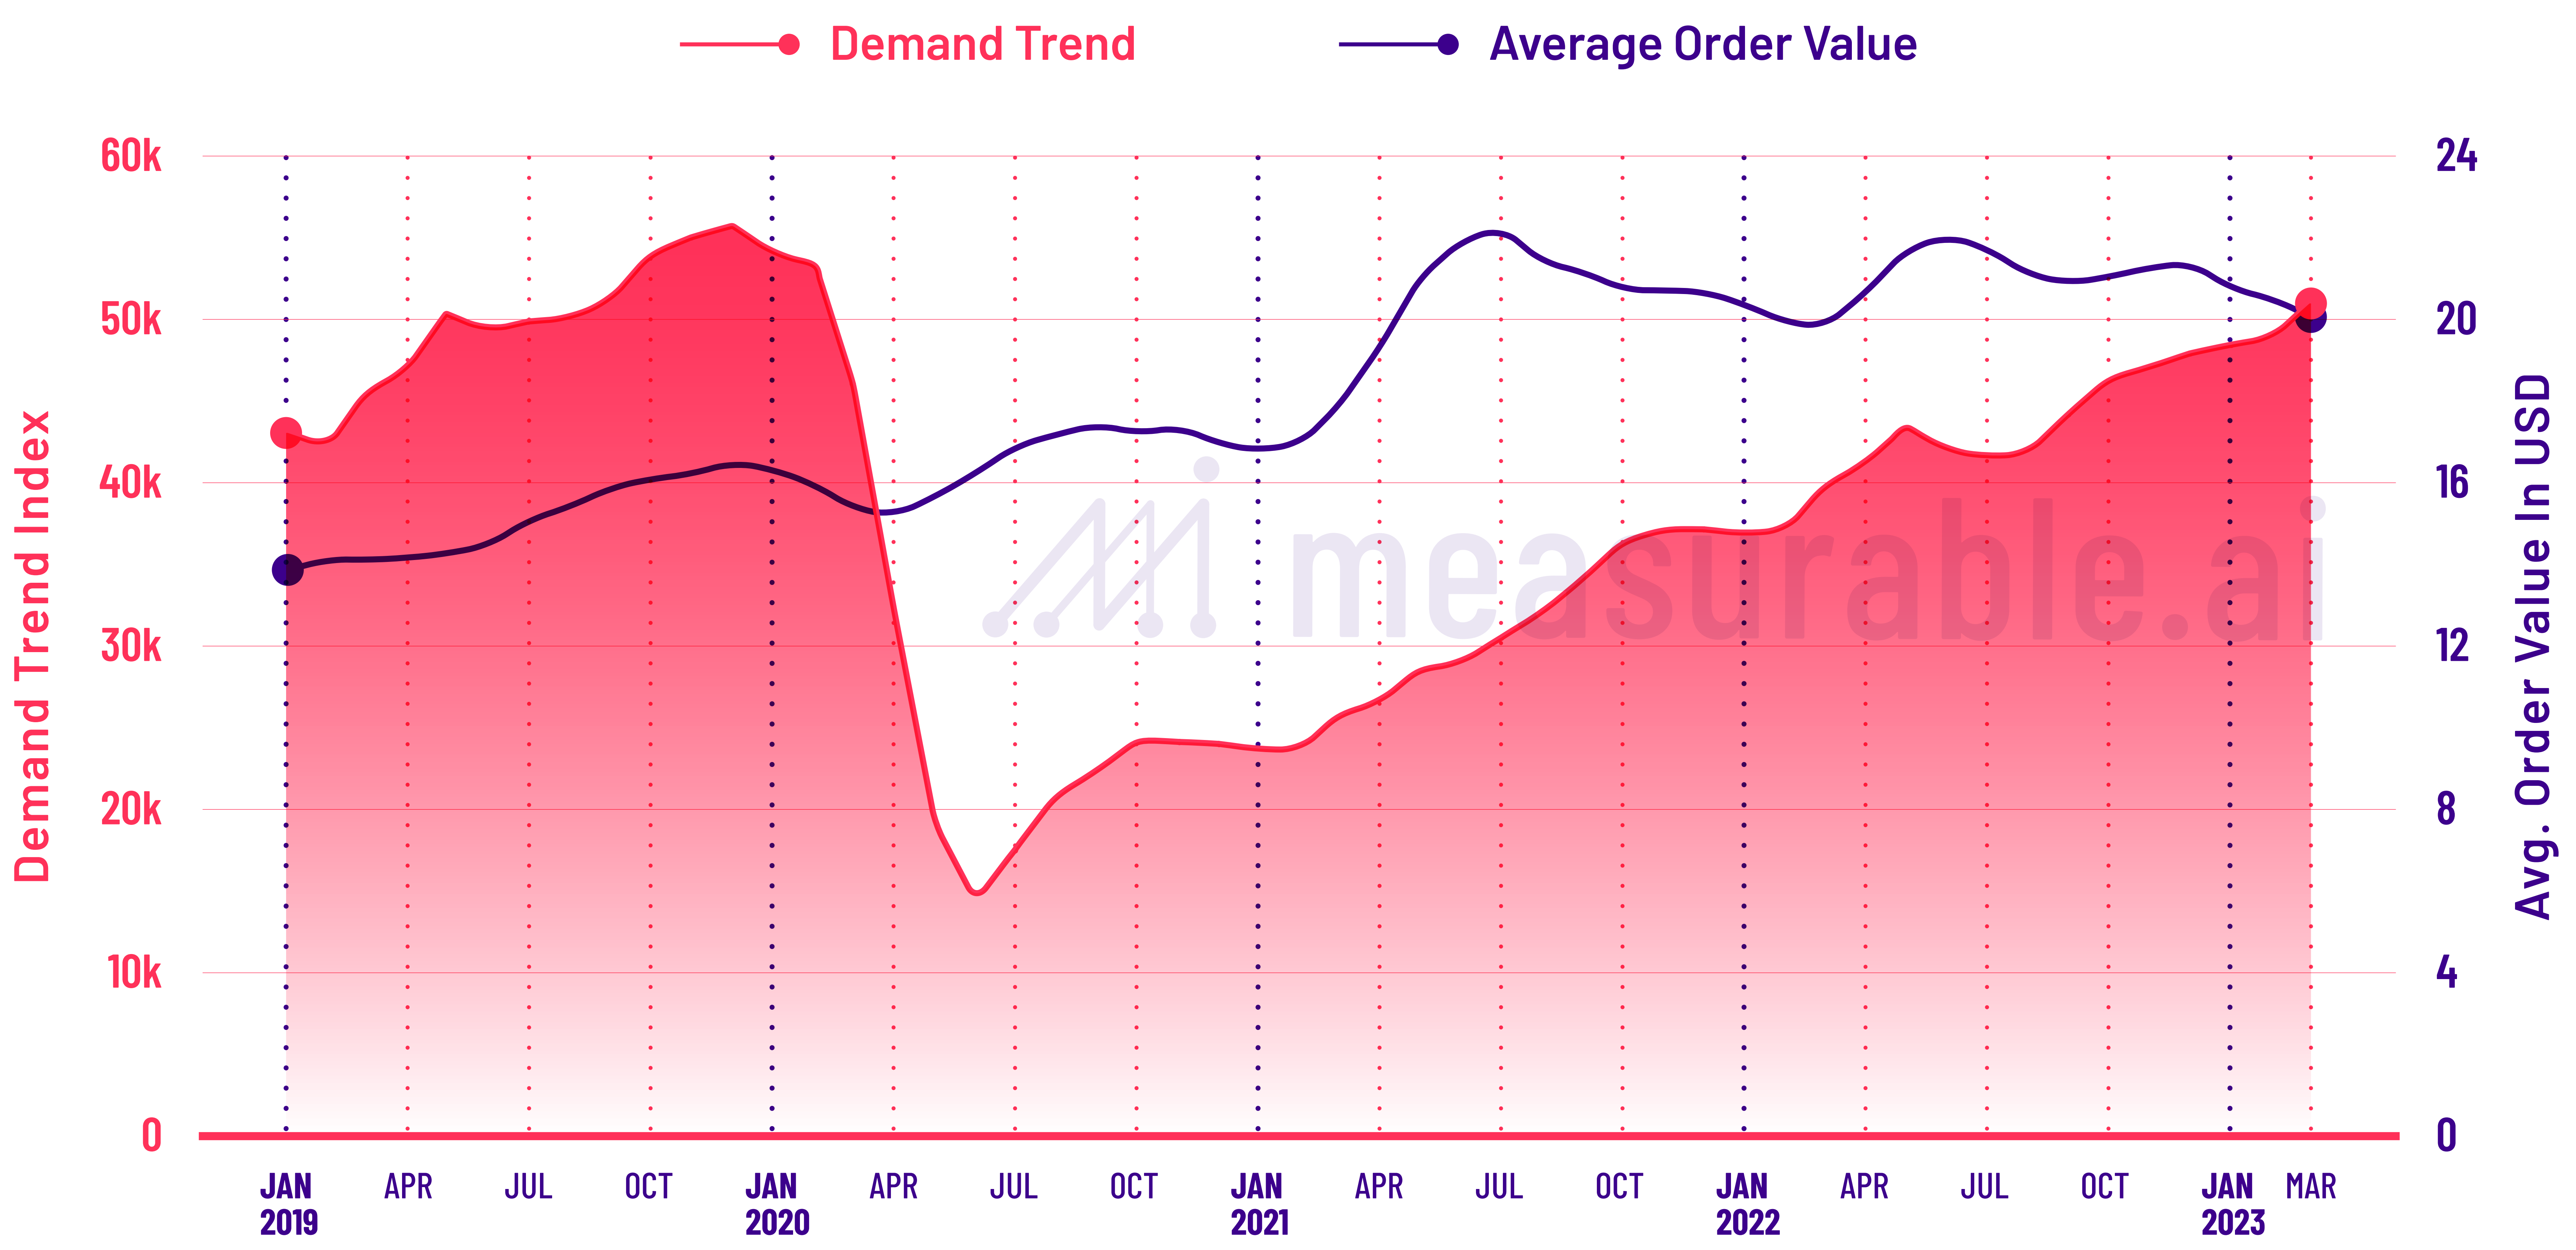
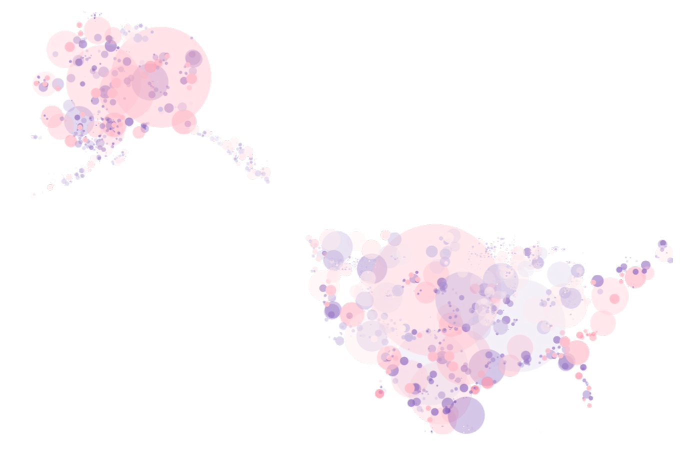
US | RIDE-HAILING DEMAND & CONSUMPTION TREND

2019 2023



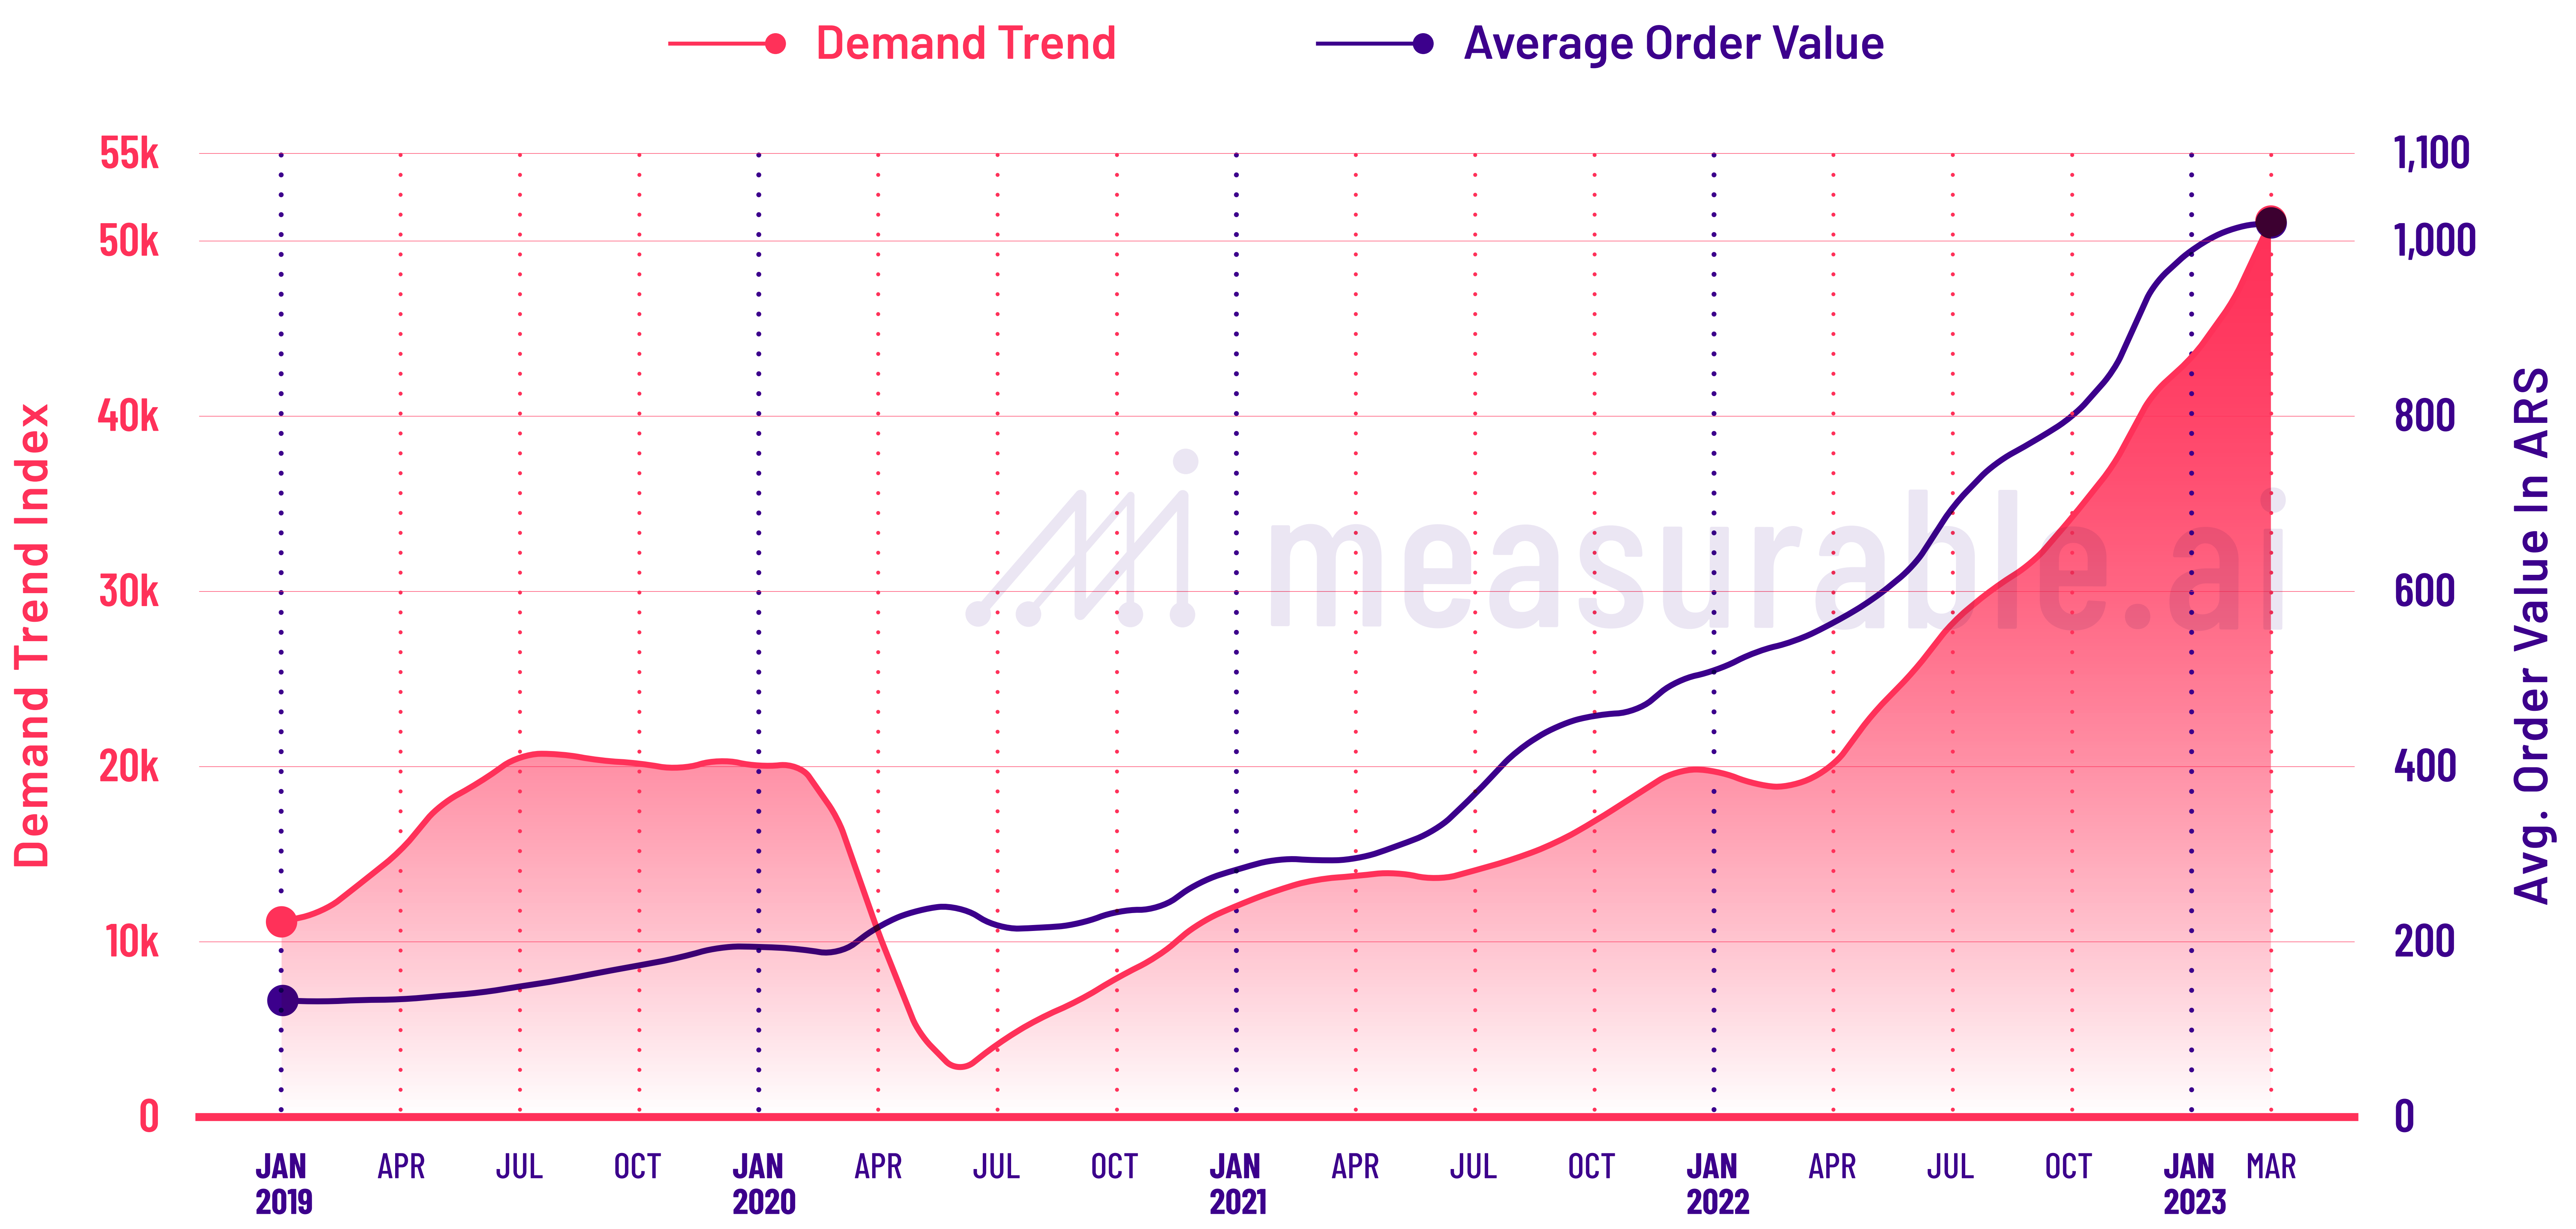
Measurable AI: US Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Lyft, Uber



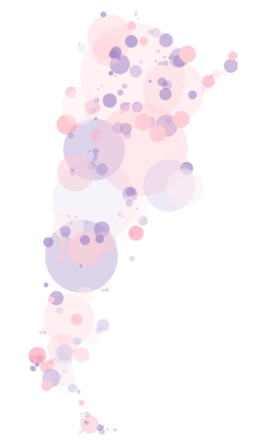
The pandemic led to a drastic decline in order volume within the U.S. ride-hailing market in 2020, followed by a gradual recovery over the next two years. As of Q1 2023, the overall monthly order volume has not fully returned to pre-pandemic levels, but is nearing that point. In terms of US Average Order Value in ride-hailing, it kept growing from 15 USD to almost 20 USD.

ARGENTINA | RIDE-HAILING DEMAND & CONSUMPTION TREND

2019 2023



Measurable AI: Argentina Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify



Following a significant downturn amidst the COVID-19 crisis, Argentina's ride-hailing industry has experienced steady expansion, with a CAGR of 12.5% from 2019 to 2022, as gauged by order volume. Concurrently, the average order value (AOV) for rides in Argentina has been on an upward trajectory, a trend largely attributed to the country's hyperinflation in recent years.

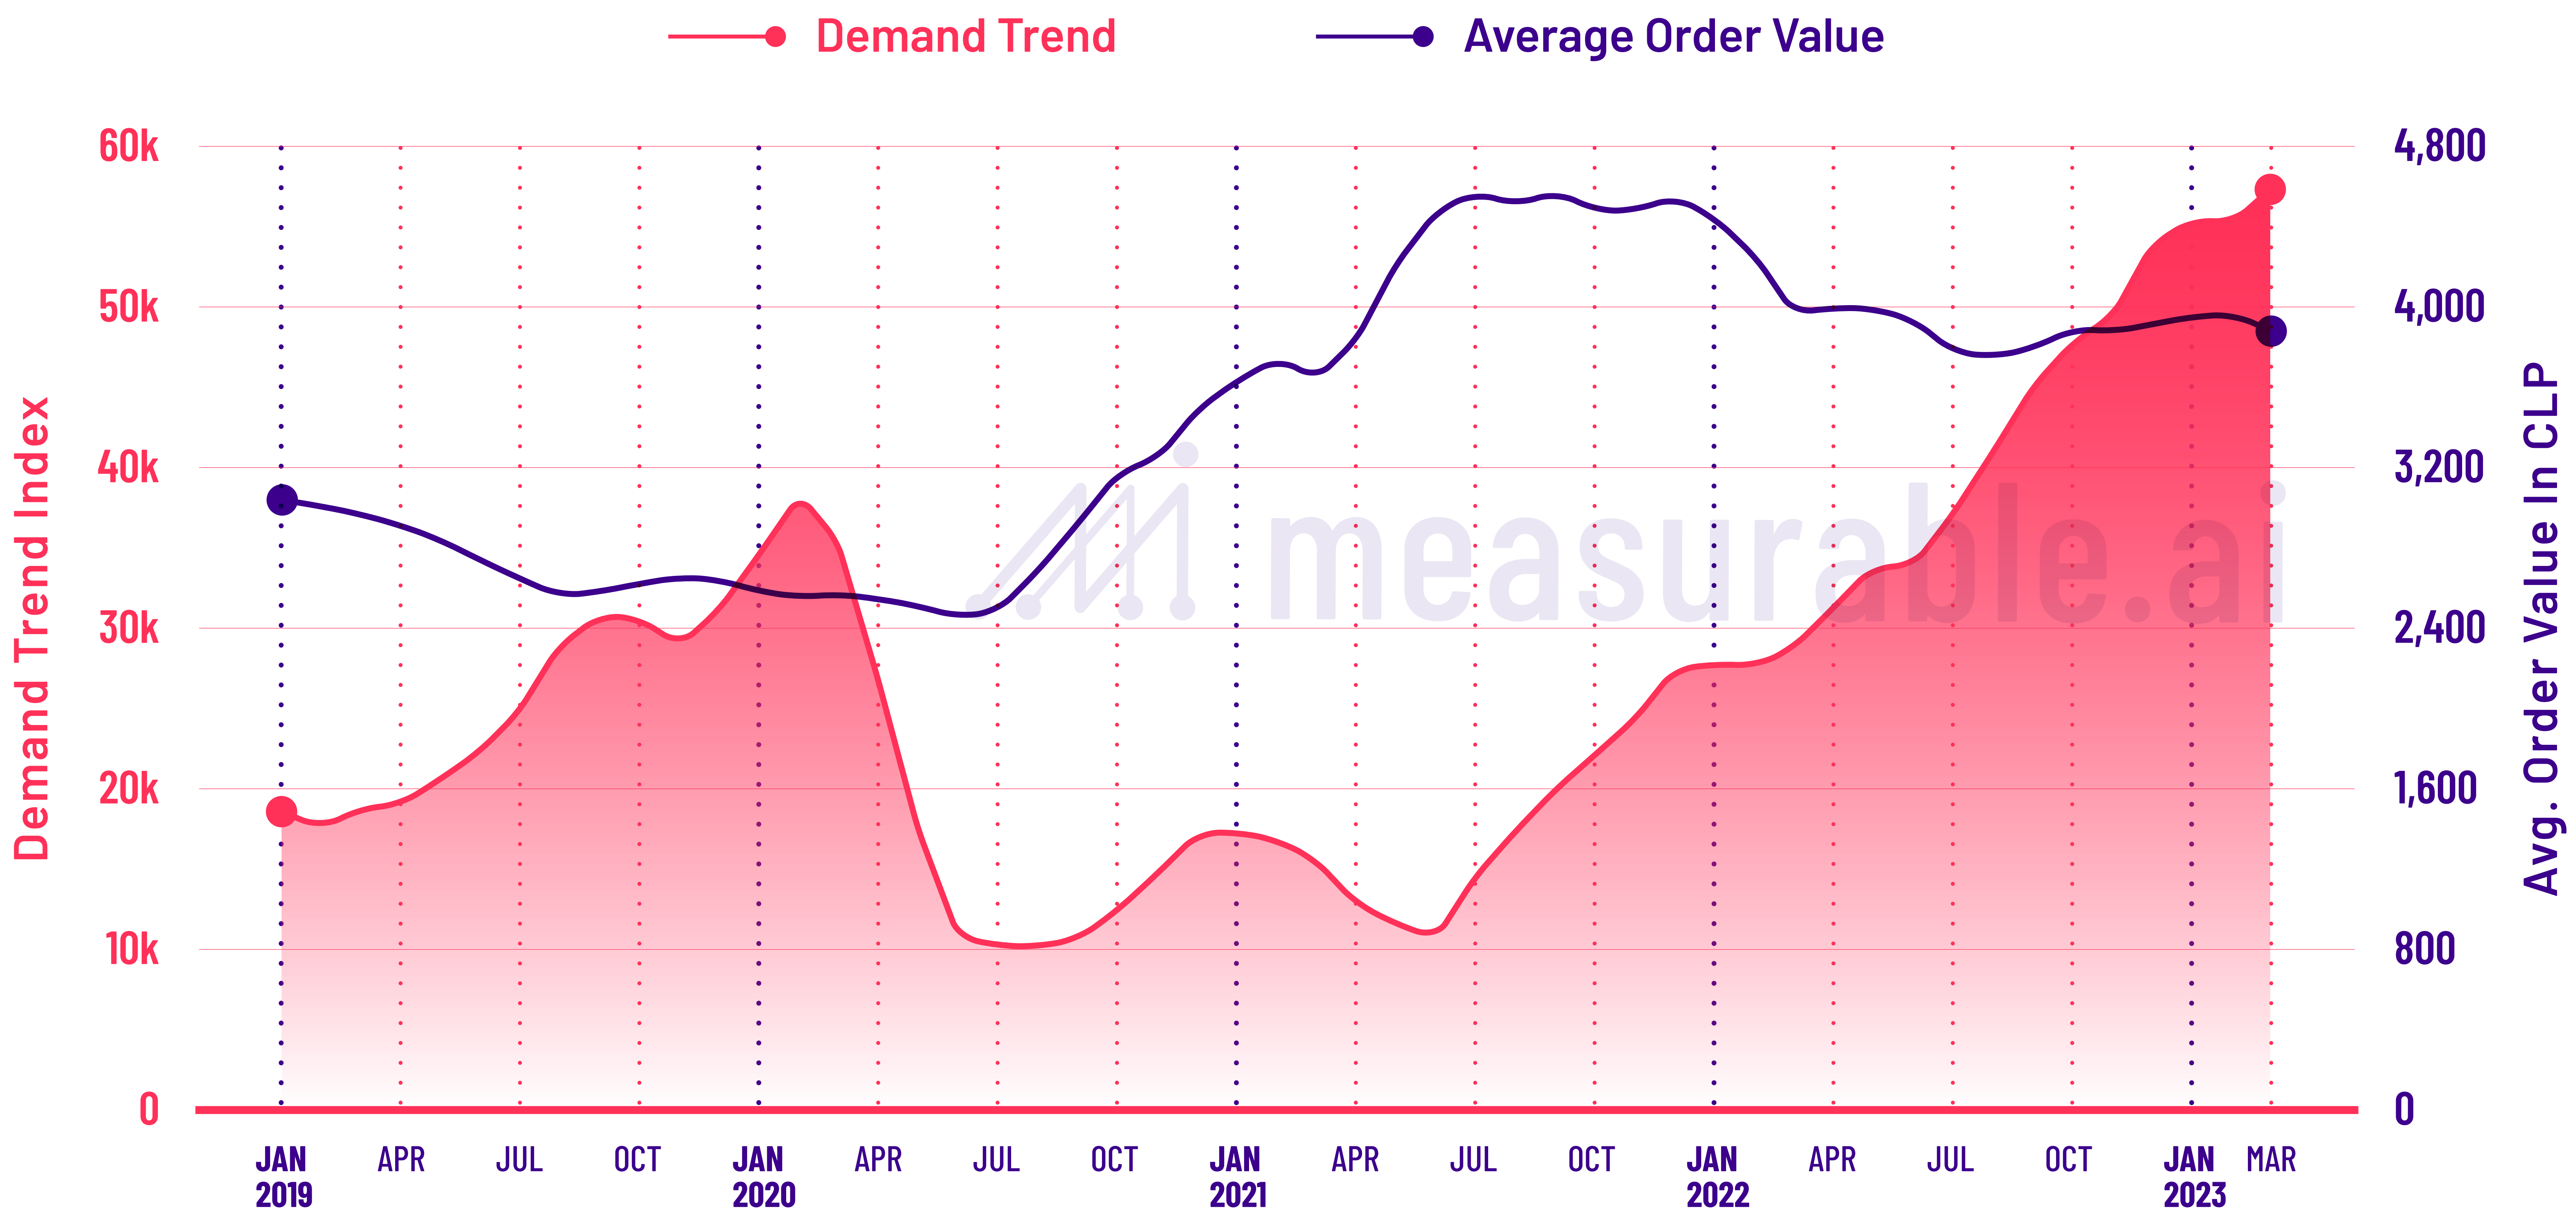
CHILE | RIDE-HAILING DEMAND & CONSUMPTION TREND

2019 2023



Measurable AI: Chile Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify

After a big drop during the pandemic, Chile's ride-hailing market has been steadily growing, with a 11.9% CAGR from 2019 to 2022, measured by the number of orders. At the same time, the average price per ride in Chile went up during 2020-2021, and then leveled off in 2022.

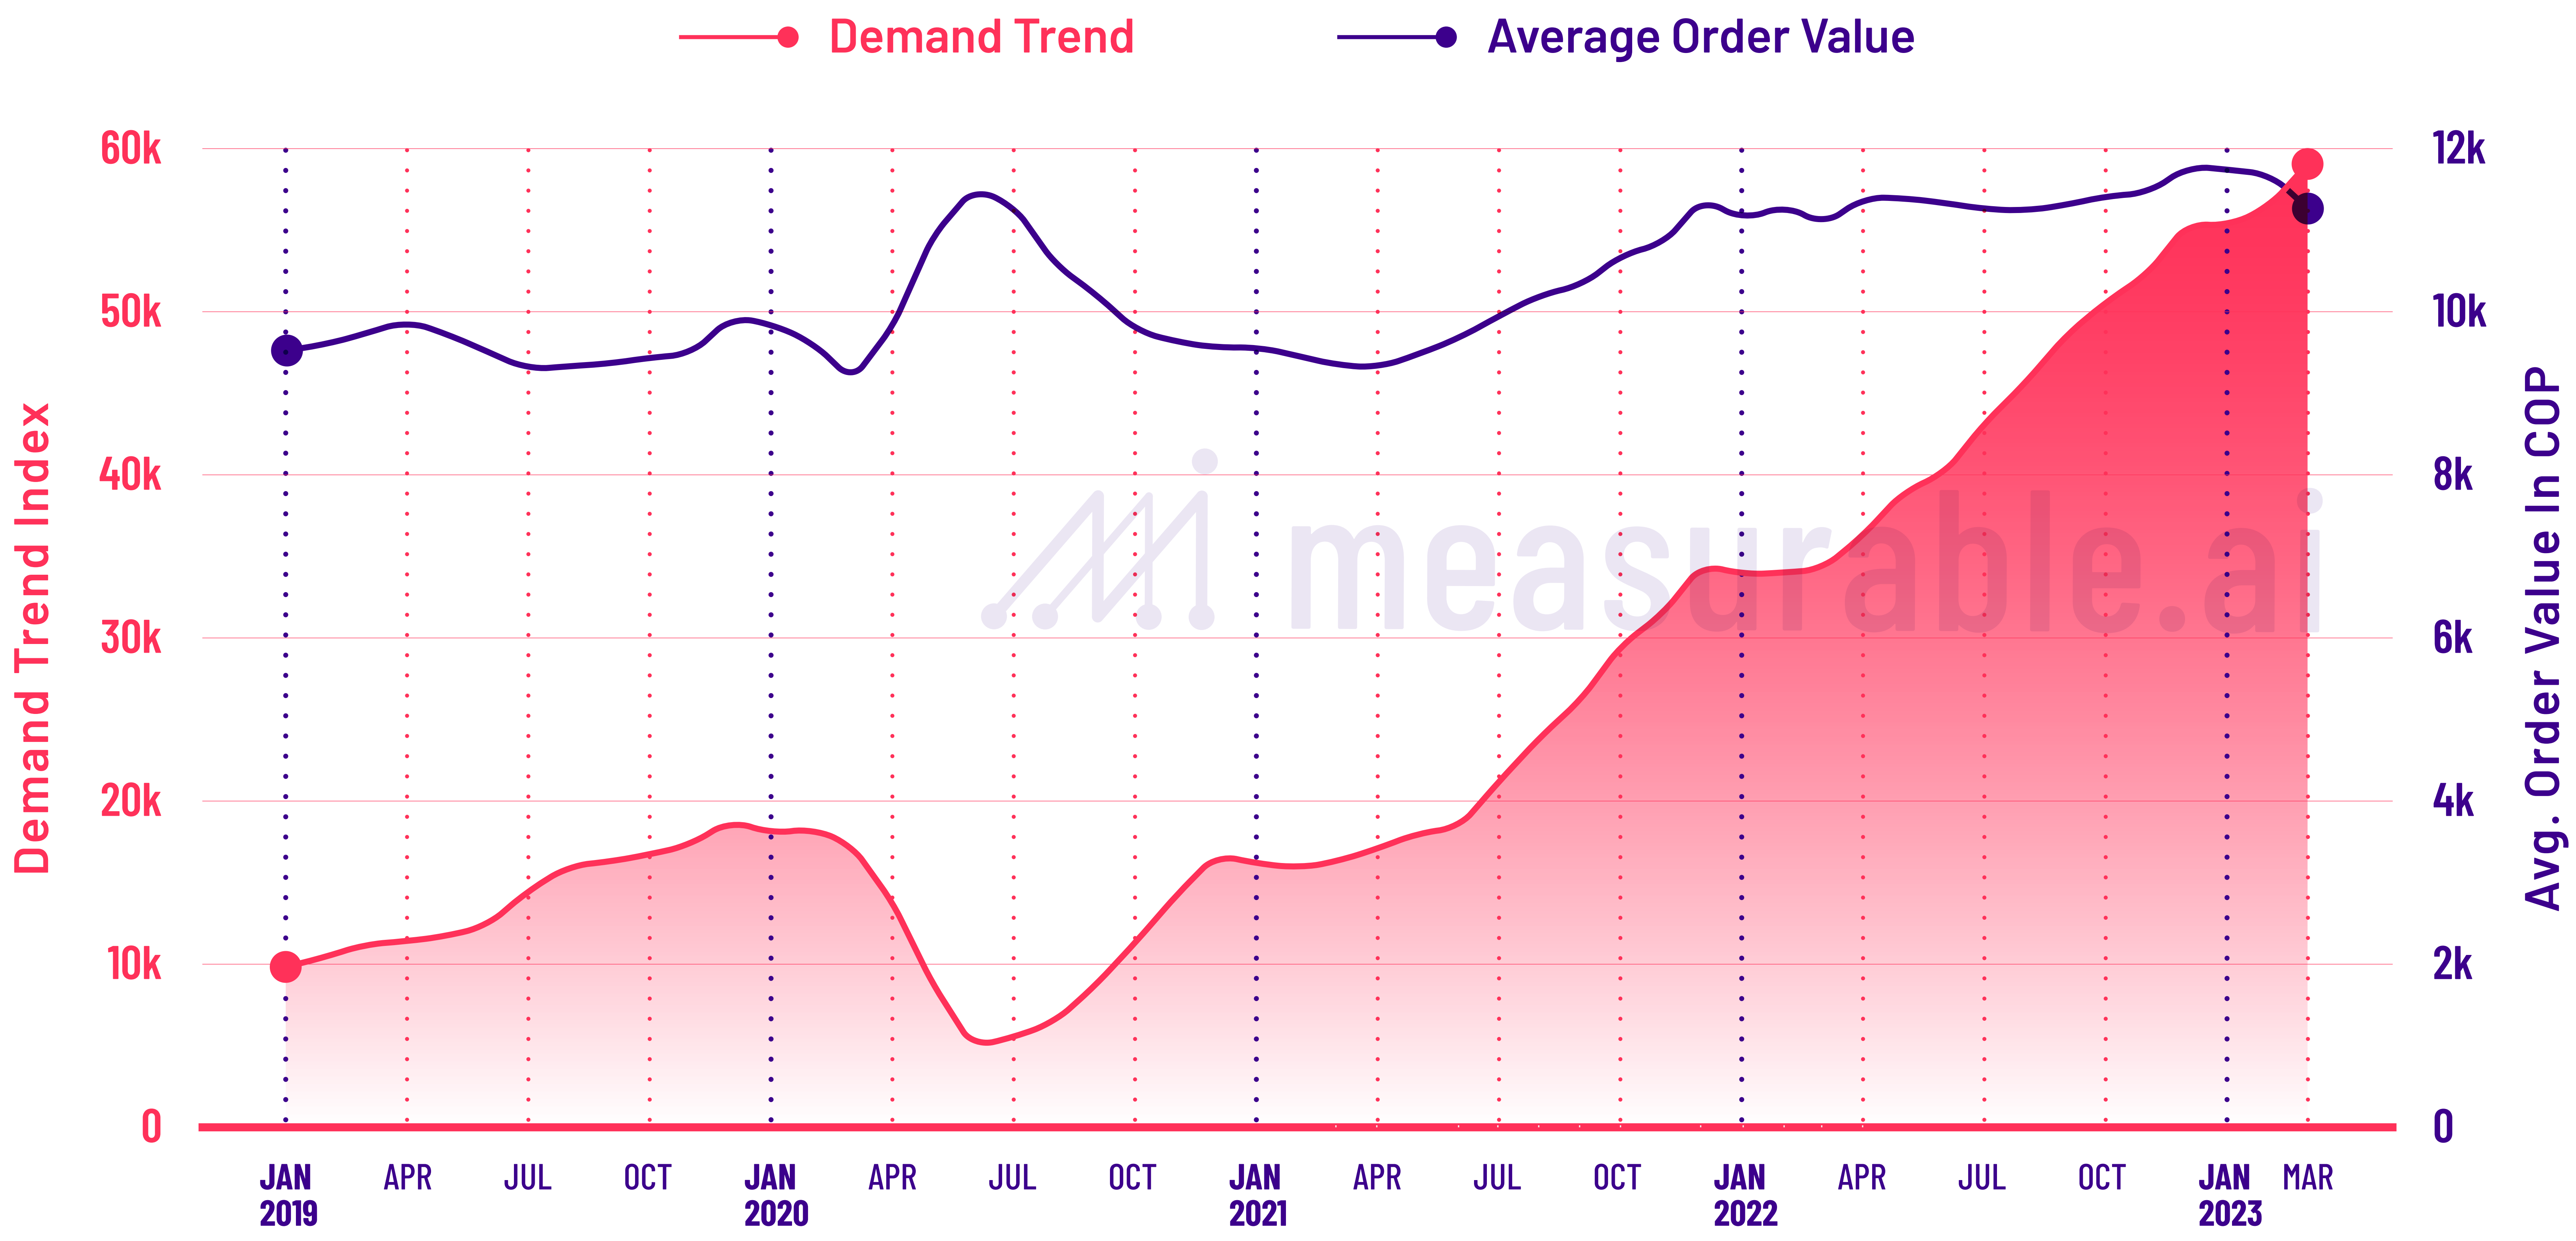
COLOMBIA | RIDE-HAILING DEMAND & CONSUMPTION TREND

2019 2023



Measurable AI: Colombia Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify

The ride-hailing industry in Colombia showcases similar trends. A notable resurgence was observed around the start of 2021, setting off a consistent upward momentum that continues to shape the market, with a 32.1% CAGR from 2019 to 2022. When examining AOV, there's a clear trajectory of steady growth over the past four years.

PART II

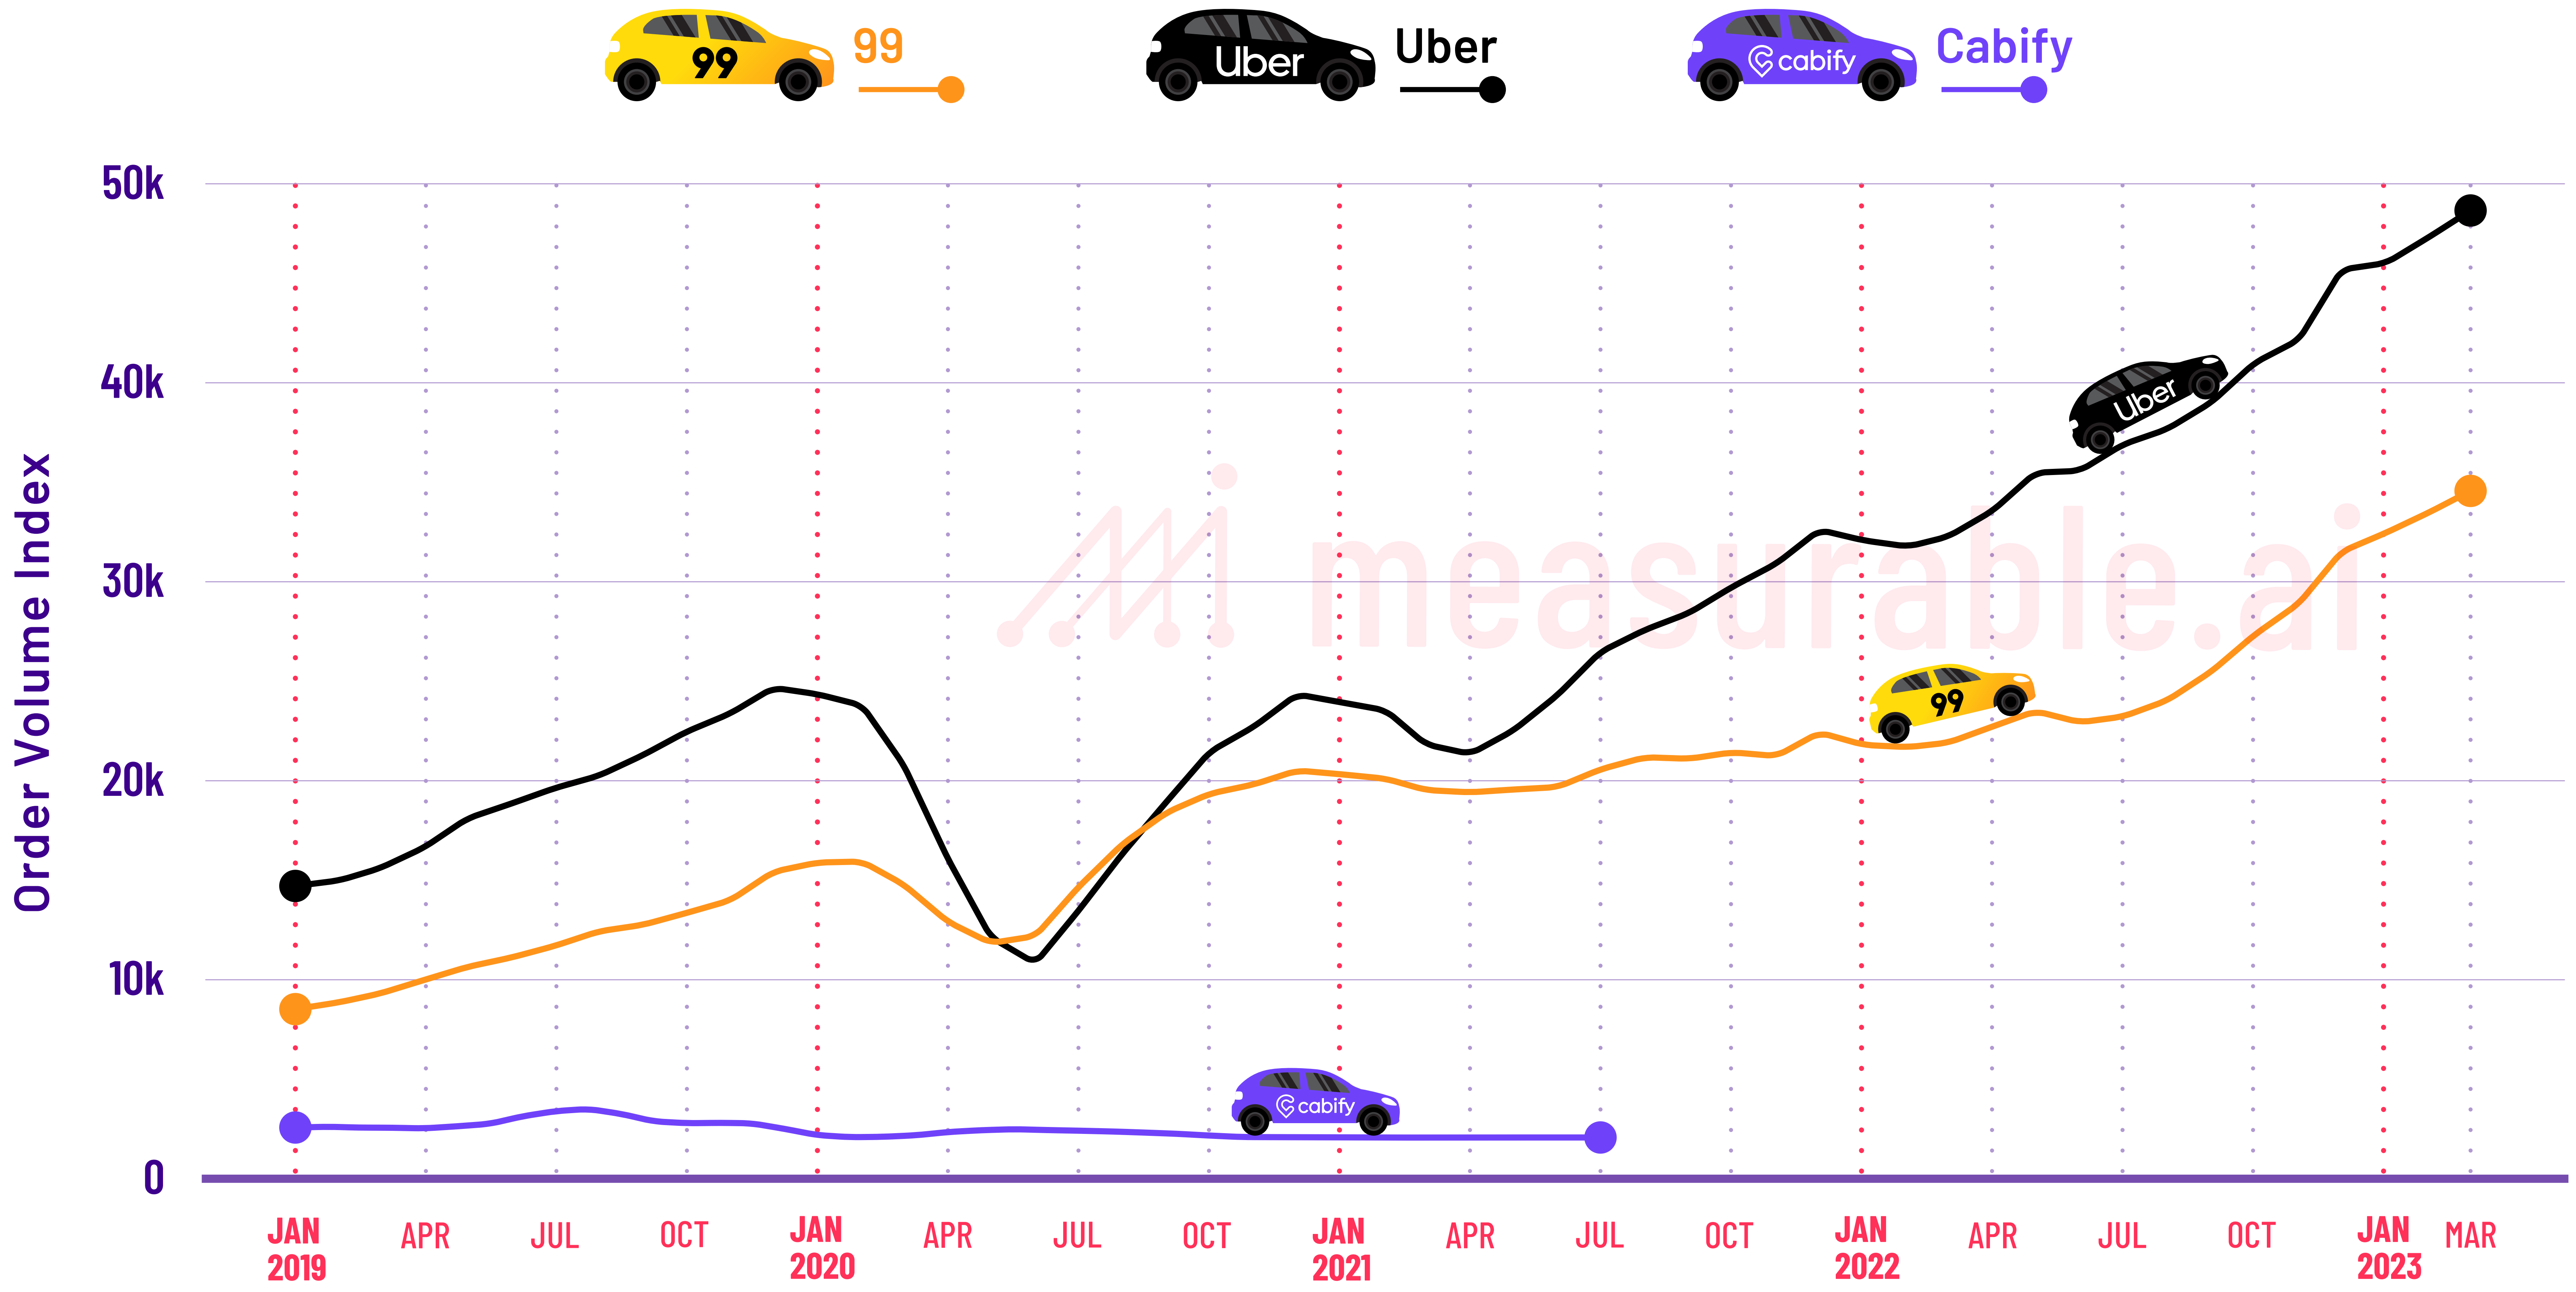
AMERICAS RIDE-HAILING MARKET SHARE OVERVIEW 2019-2023

INTRODUCTION

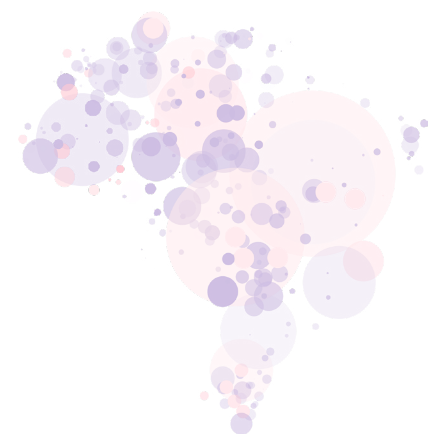
US, Brazil and Mexico continue to lead in terms of overall revenue and market size, while Argentina, Chile and Colombia exhibit more rapid growth, fuelled by increased regional demand despite the slowdown from the pandemic. After the recovery, the industry has shown resilience, adapting to new regulations and consumer needs while finding ways to maintain profitability and sustainability in the Americas. Uber, and Didi continue to be the leading companies in ride-hailing in America's major markets, as well as some smaller-sized markets.

BRAZIL | RIDE-HAILING MARKET SHARE OVERVIEW

2019 2023



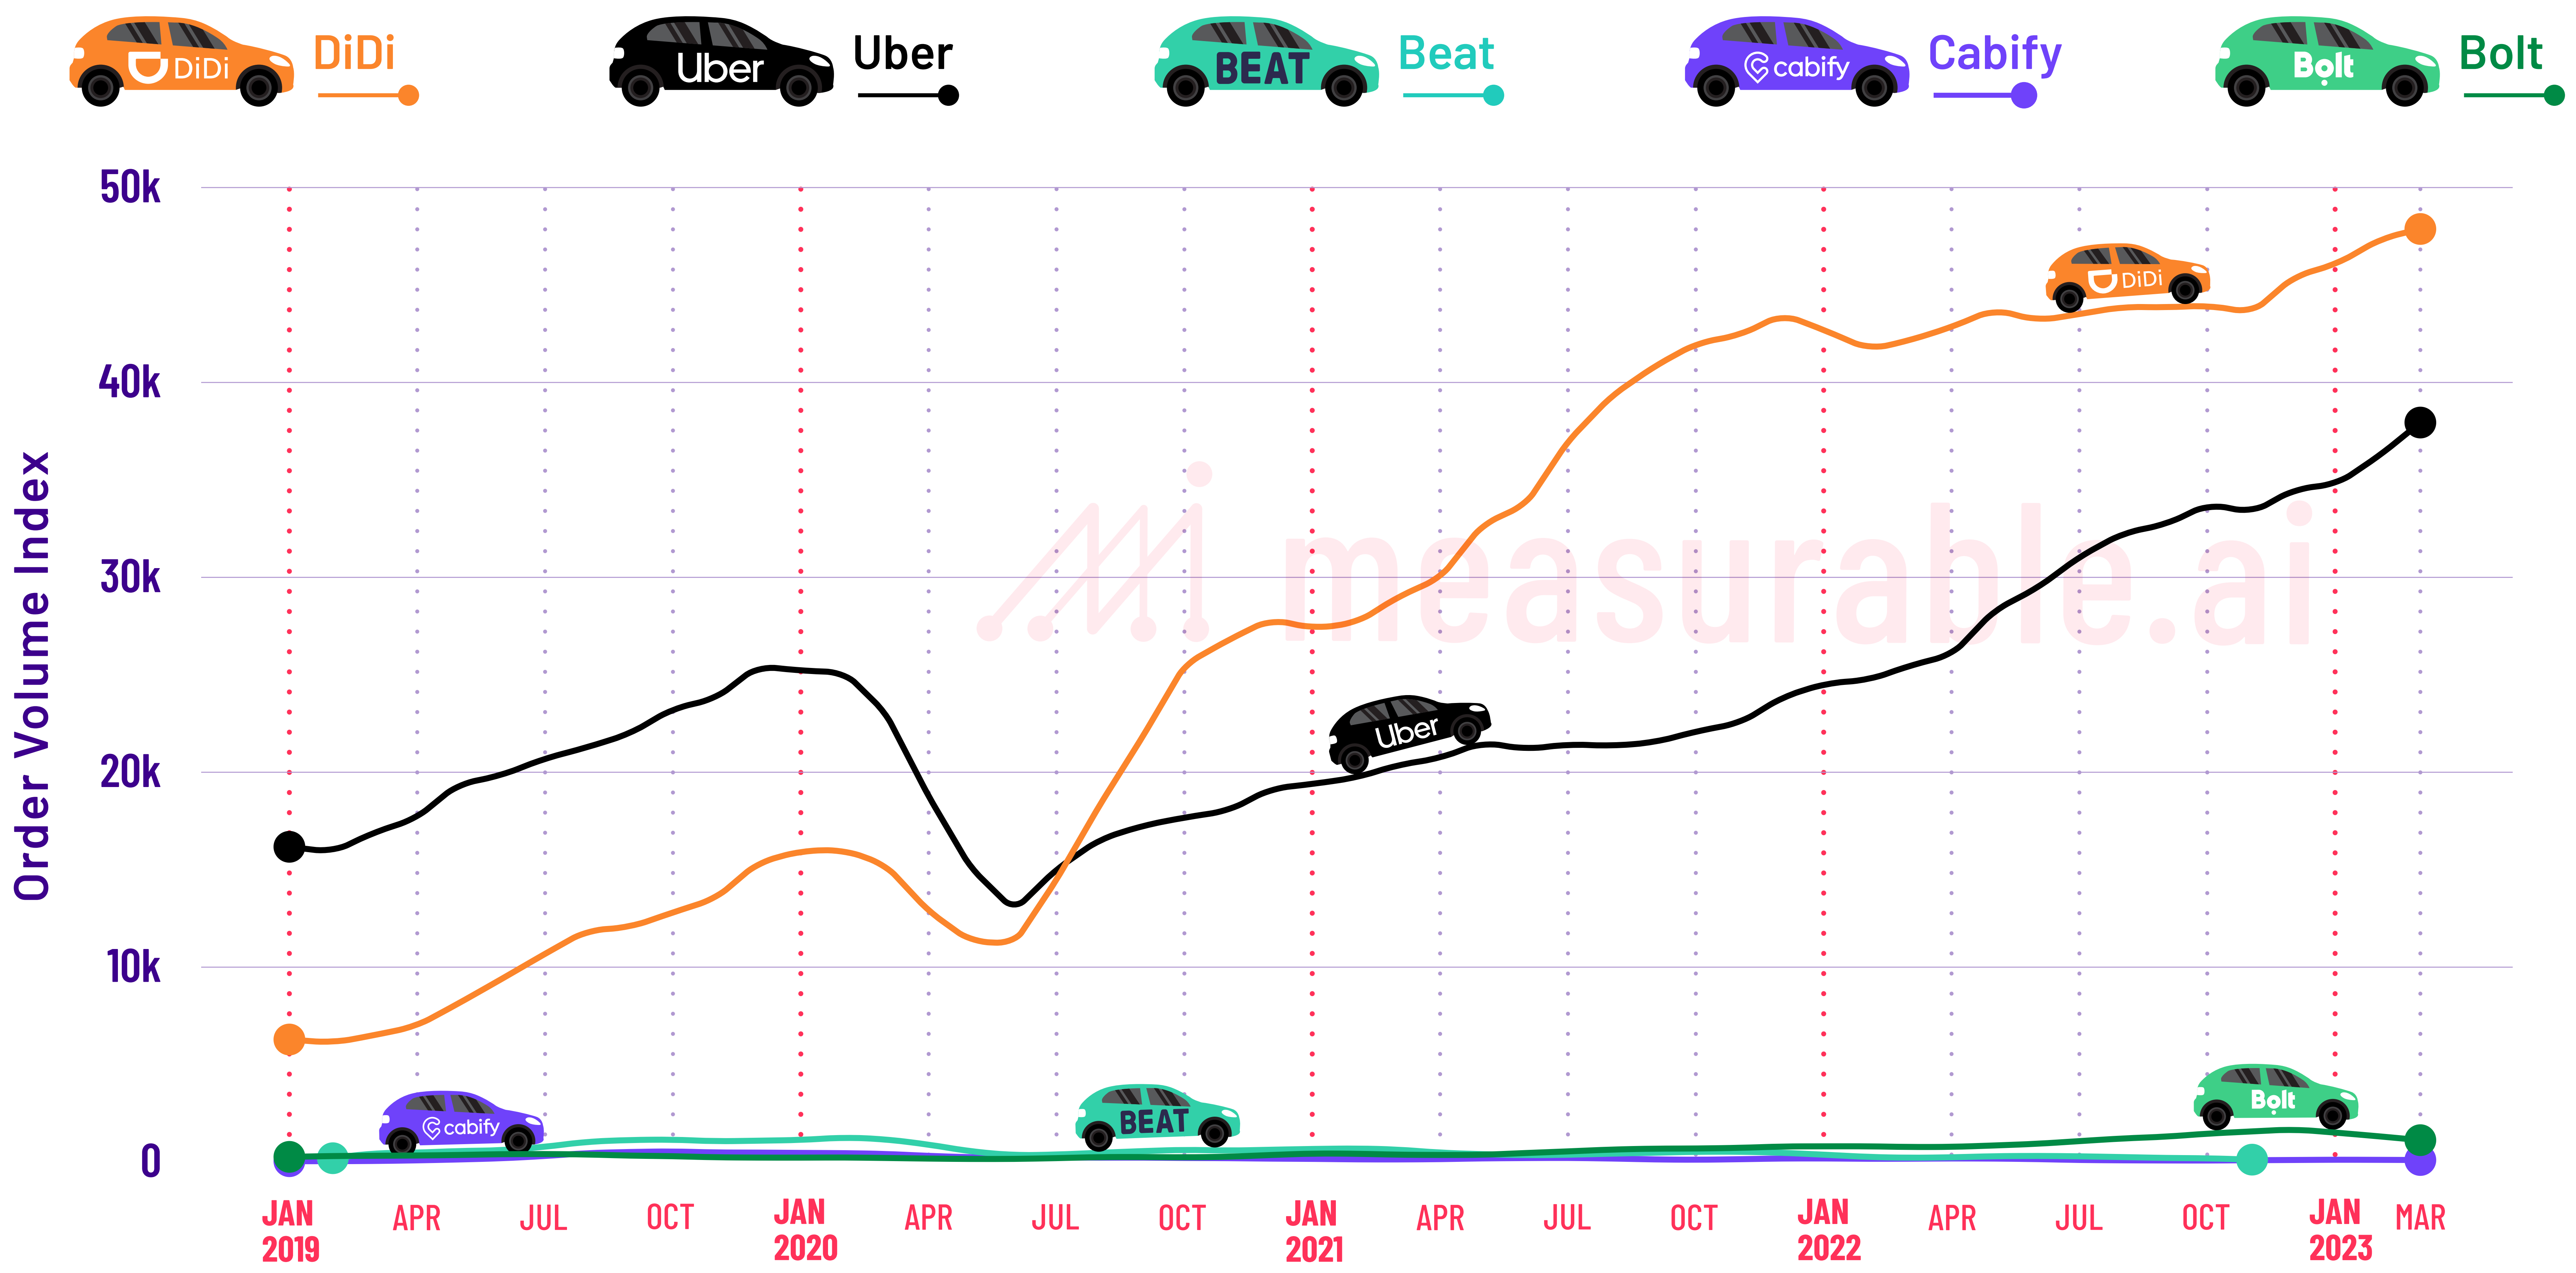
Measurable AI: Brazil Ride-hailing Market Share Overview *Order Volume = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: NinetyNine, Uber, Cabify



Uber has been leading the Brazil's ride-sharing market since 2019, during the pandemic, it suffered from huge drop in consumer demand with competitor NinetyNine, but managed to slowly pick up the market share at almost 60% by order volume. Cabify was a small player in Brazil, and left the market at the end of Q3 2021.

MEXICO | RIDE-HAILING MARKET SHARE OVERVIEW

2019 2023



Measurable AI: Mexico Ride-hailing Market Share Overview *Order Volume = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify, Bolt

In Mexico, Didi and Uber are the two major players in ride-hailing. Before the pandemic, Uber used to be leading the market, but was overtaken by Didi since Q3 2020. As of Q1 2023 Didi holds approximately 56% of the market share by order volume against Uber at 44%. Another contender, Beat, which possessed a mere sliver of the pie (less than 3%), bowed out of the market in November 2022. Lastly, Cabify and Bolt retain only a minimal market share in Mexico throughout the years.

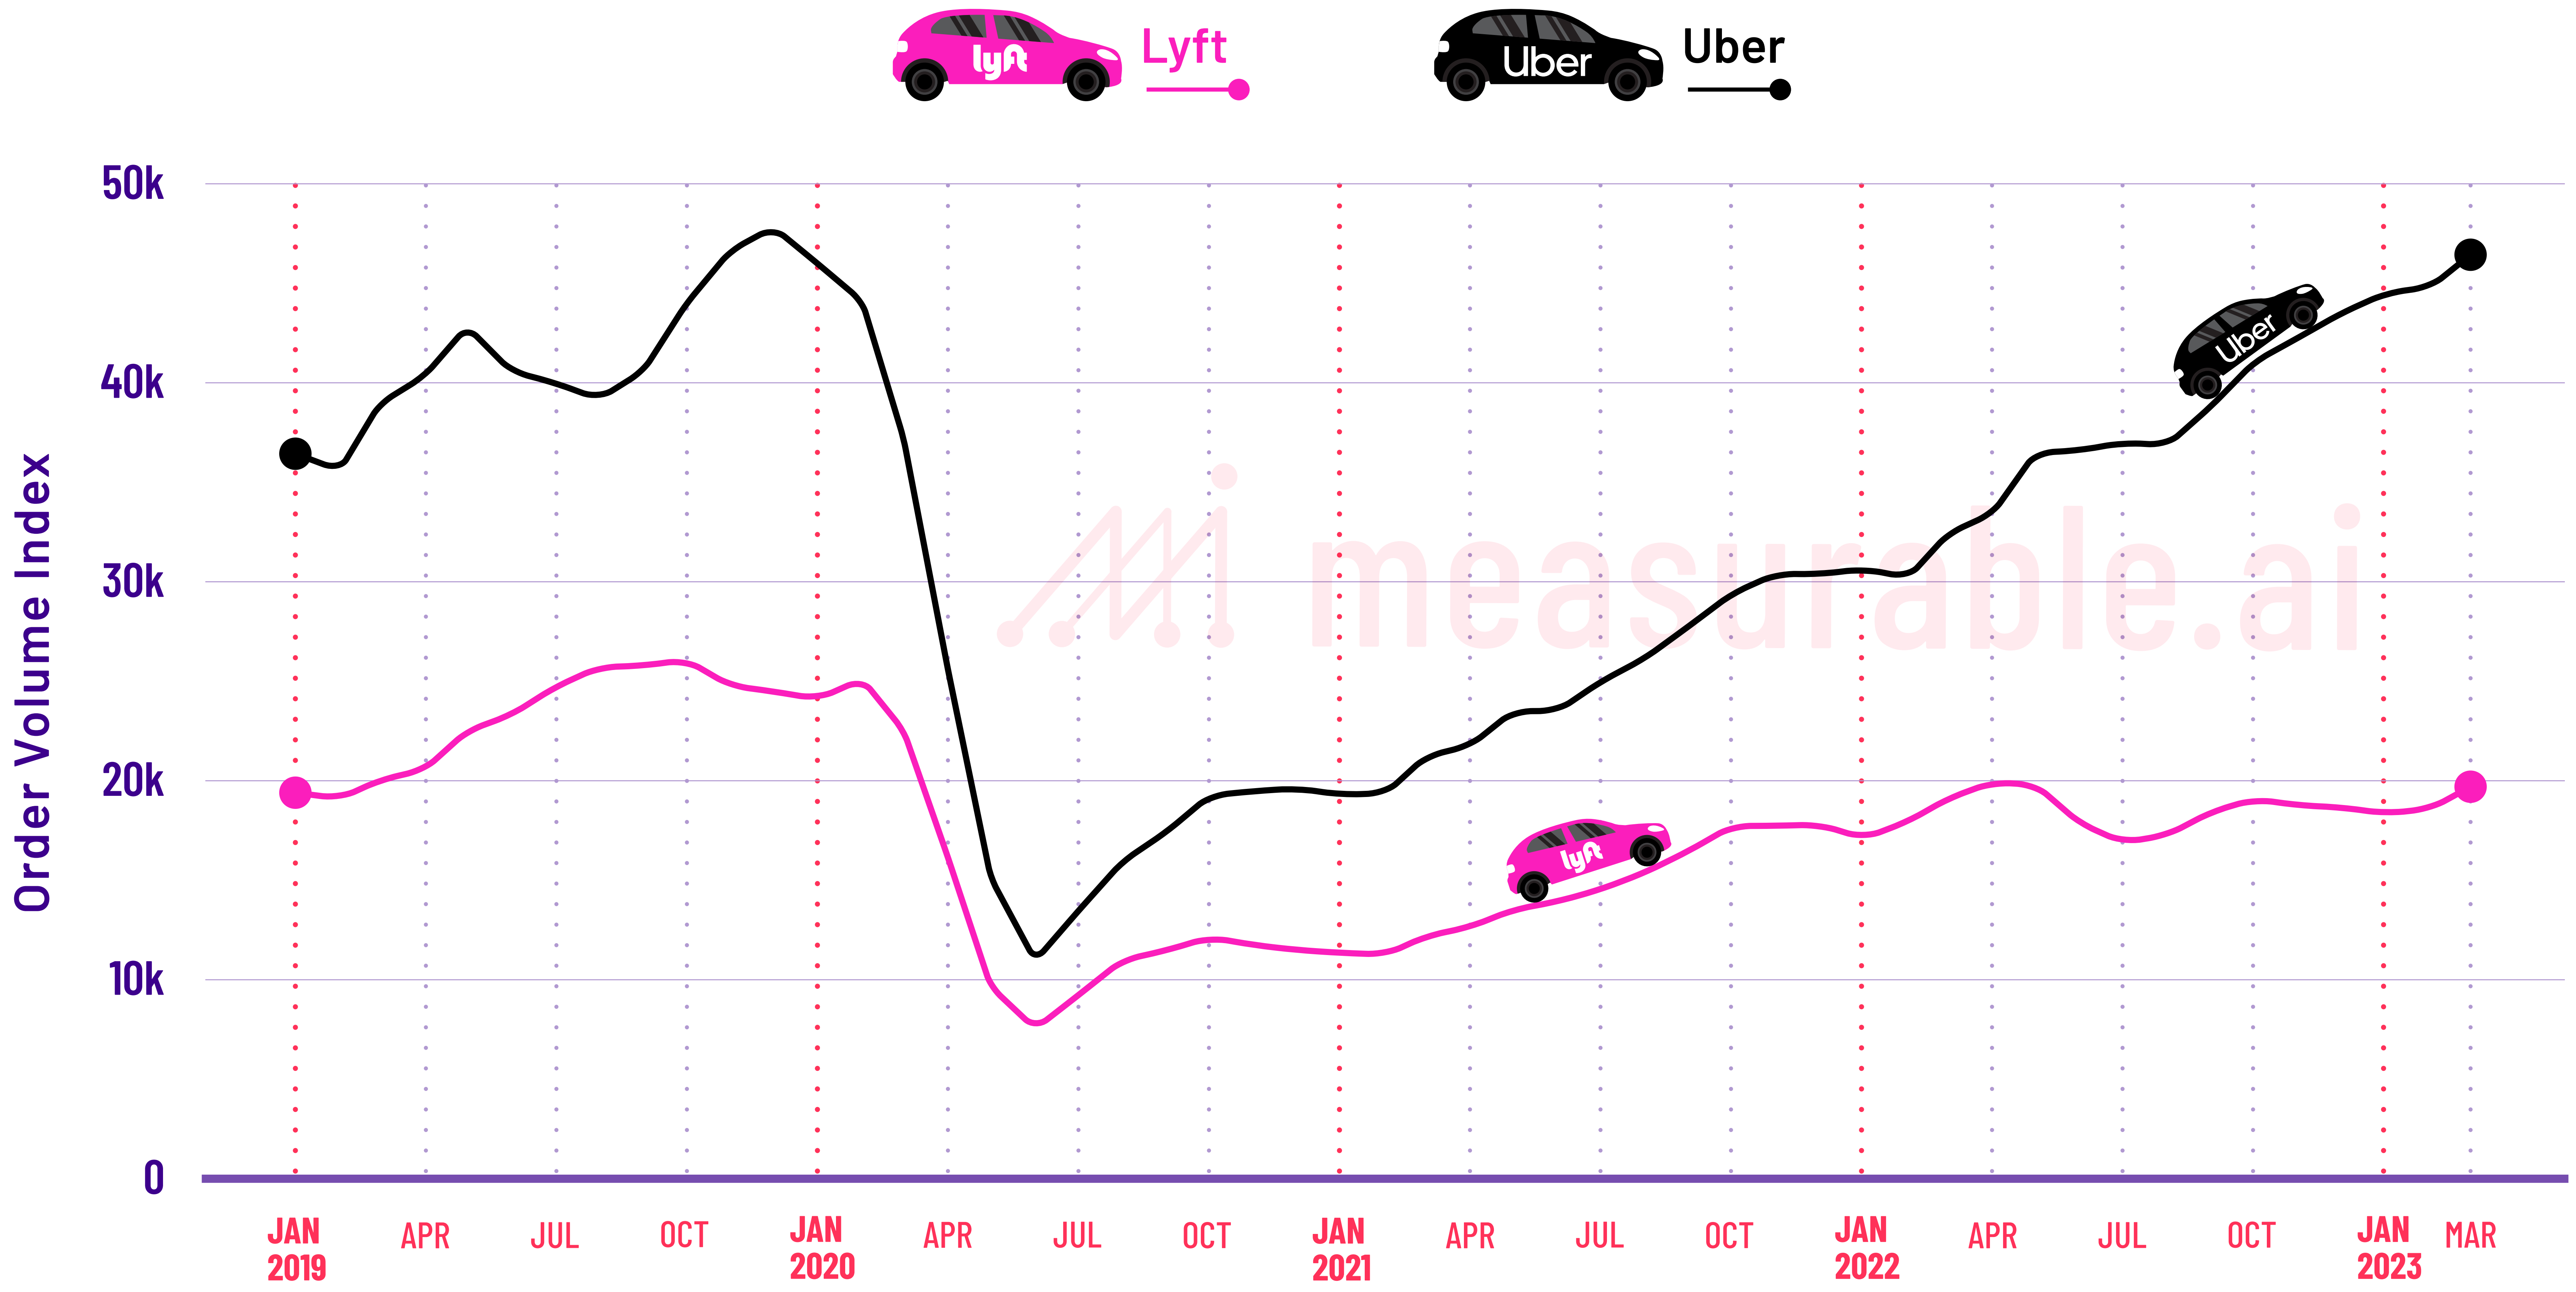
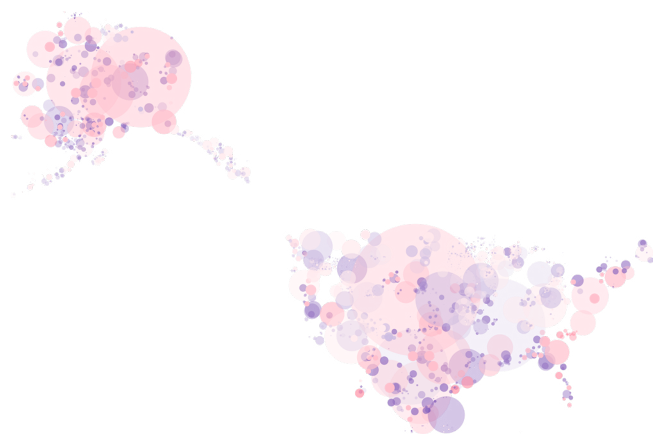
US | RIDE-HAILING MARKET SHARE OVERVIEW

2019 2023



Measurable AI: US Ride-hailing Market Share Overview *Order Volume = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Lyft, Uber



Since 2018, Lyft and Uber have held a duopoly in the U.S. ride-hailing market, with the competition between the two companies remaining relatively stable. Uber has consistently maintained a larger market share, measured by order volume. Starting with around 66% in Q1 2019, Uber experienced a gradual growth in market share, reaching 70% by Q1 2023.

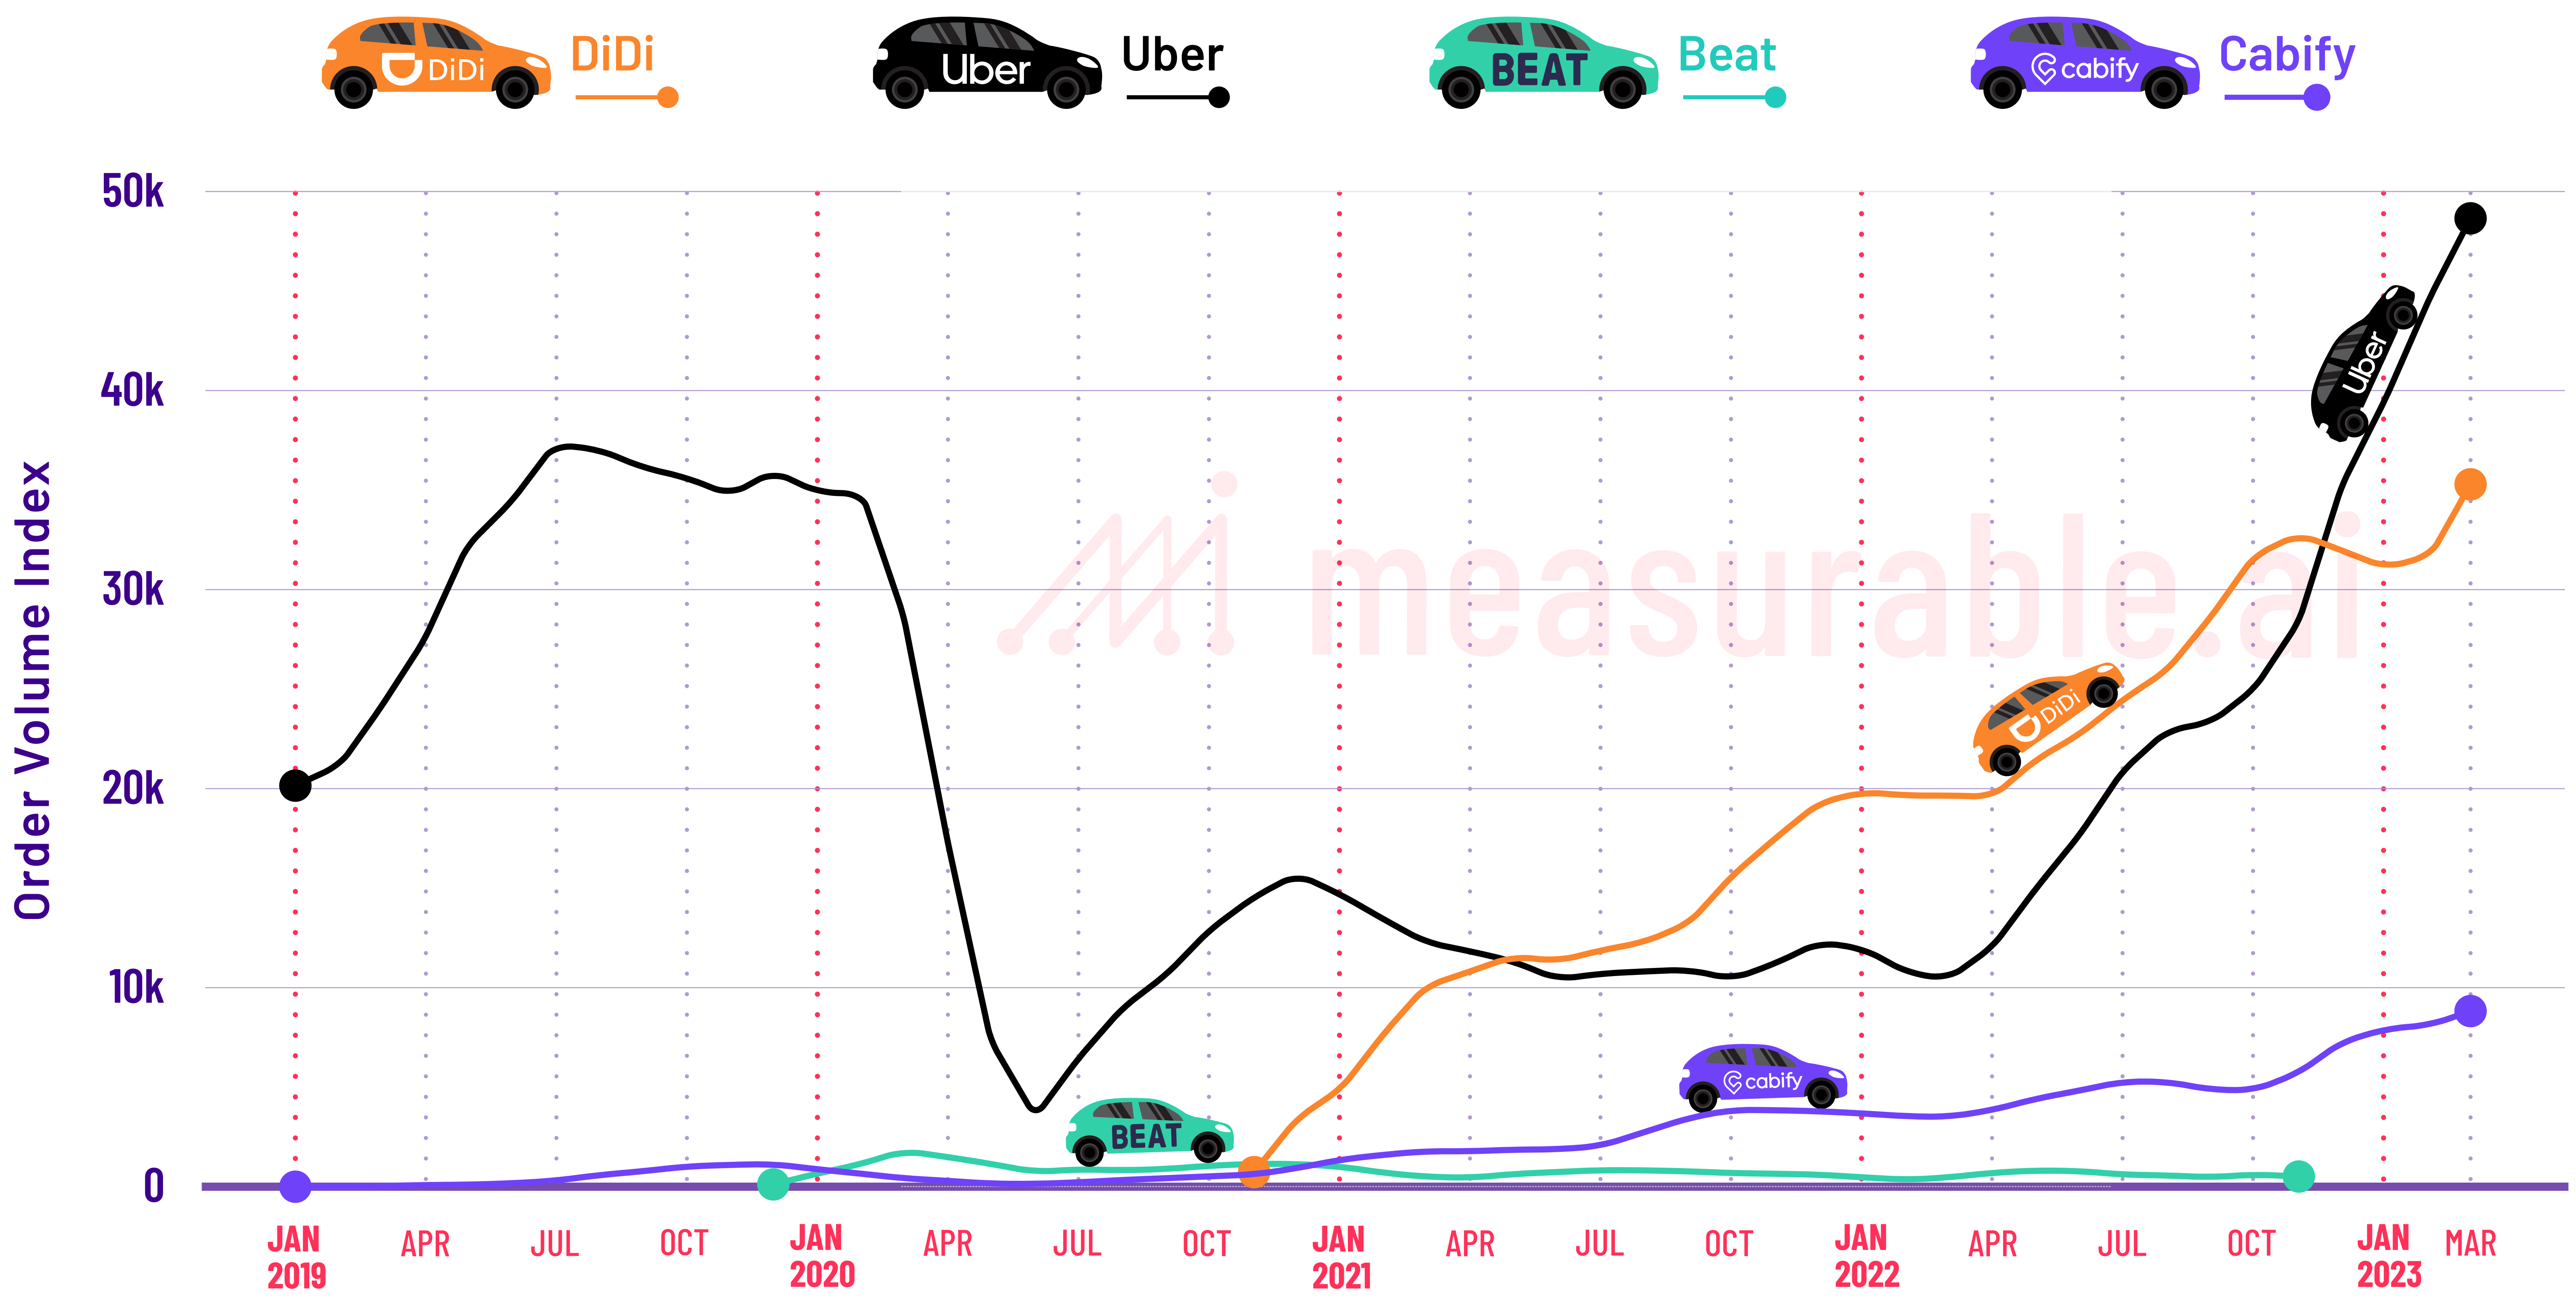
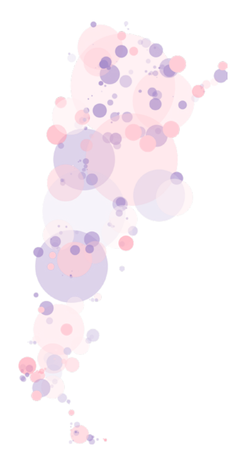
ARGENTINA | RIDE-HAILING MARKET SHARE OVERVIEW

2019 2023



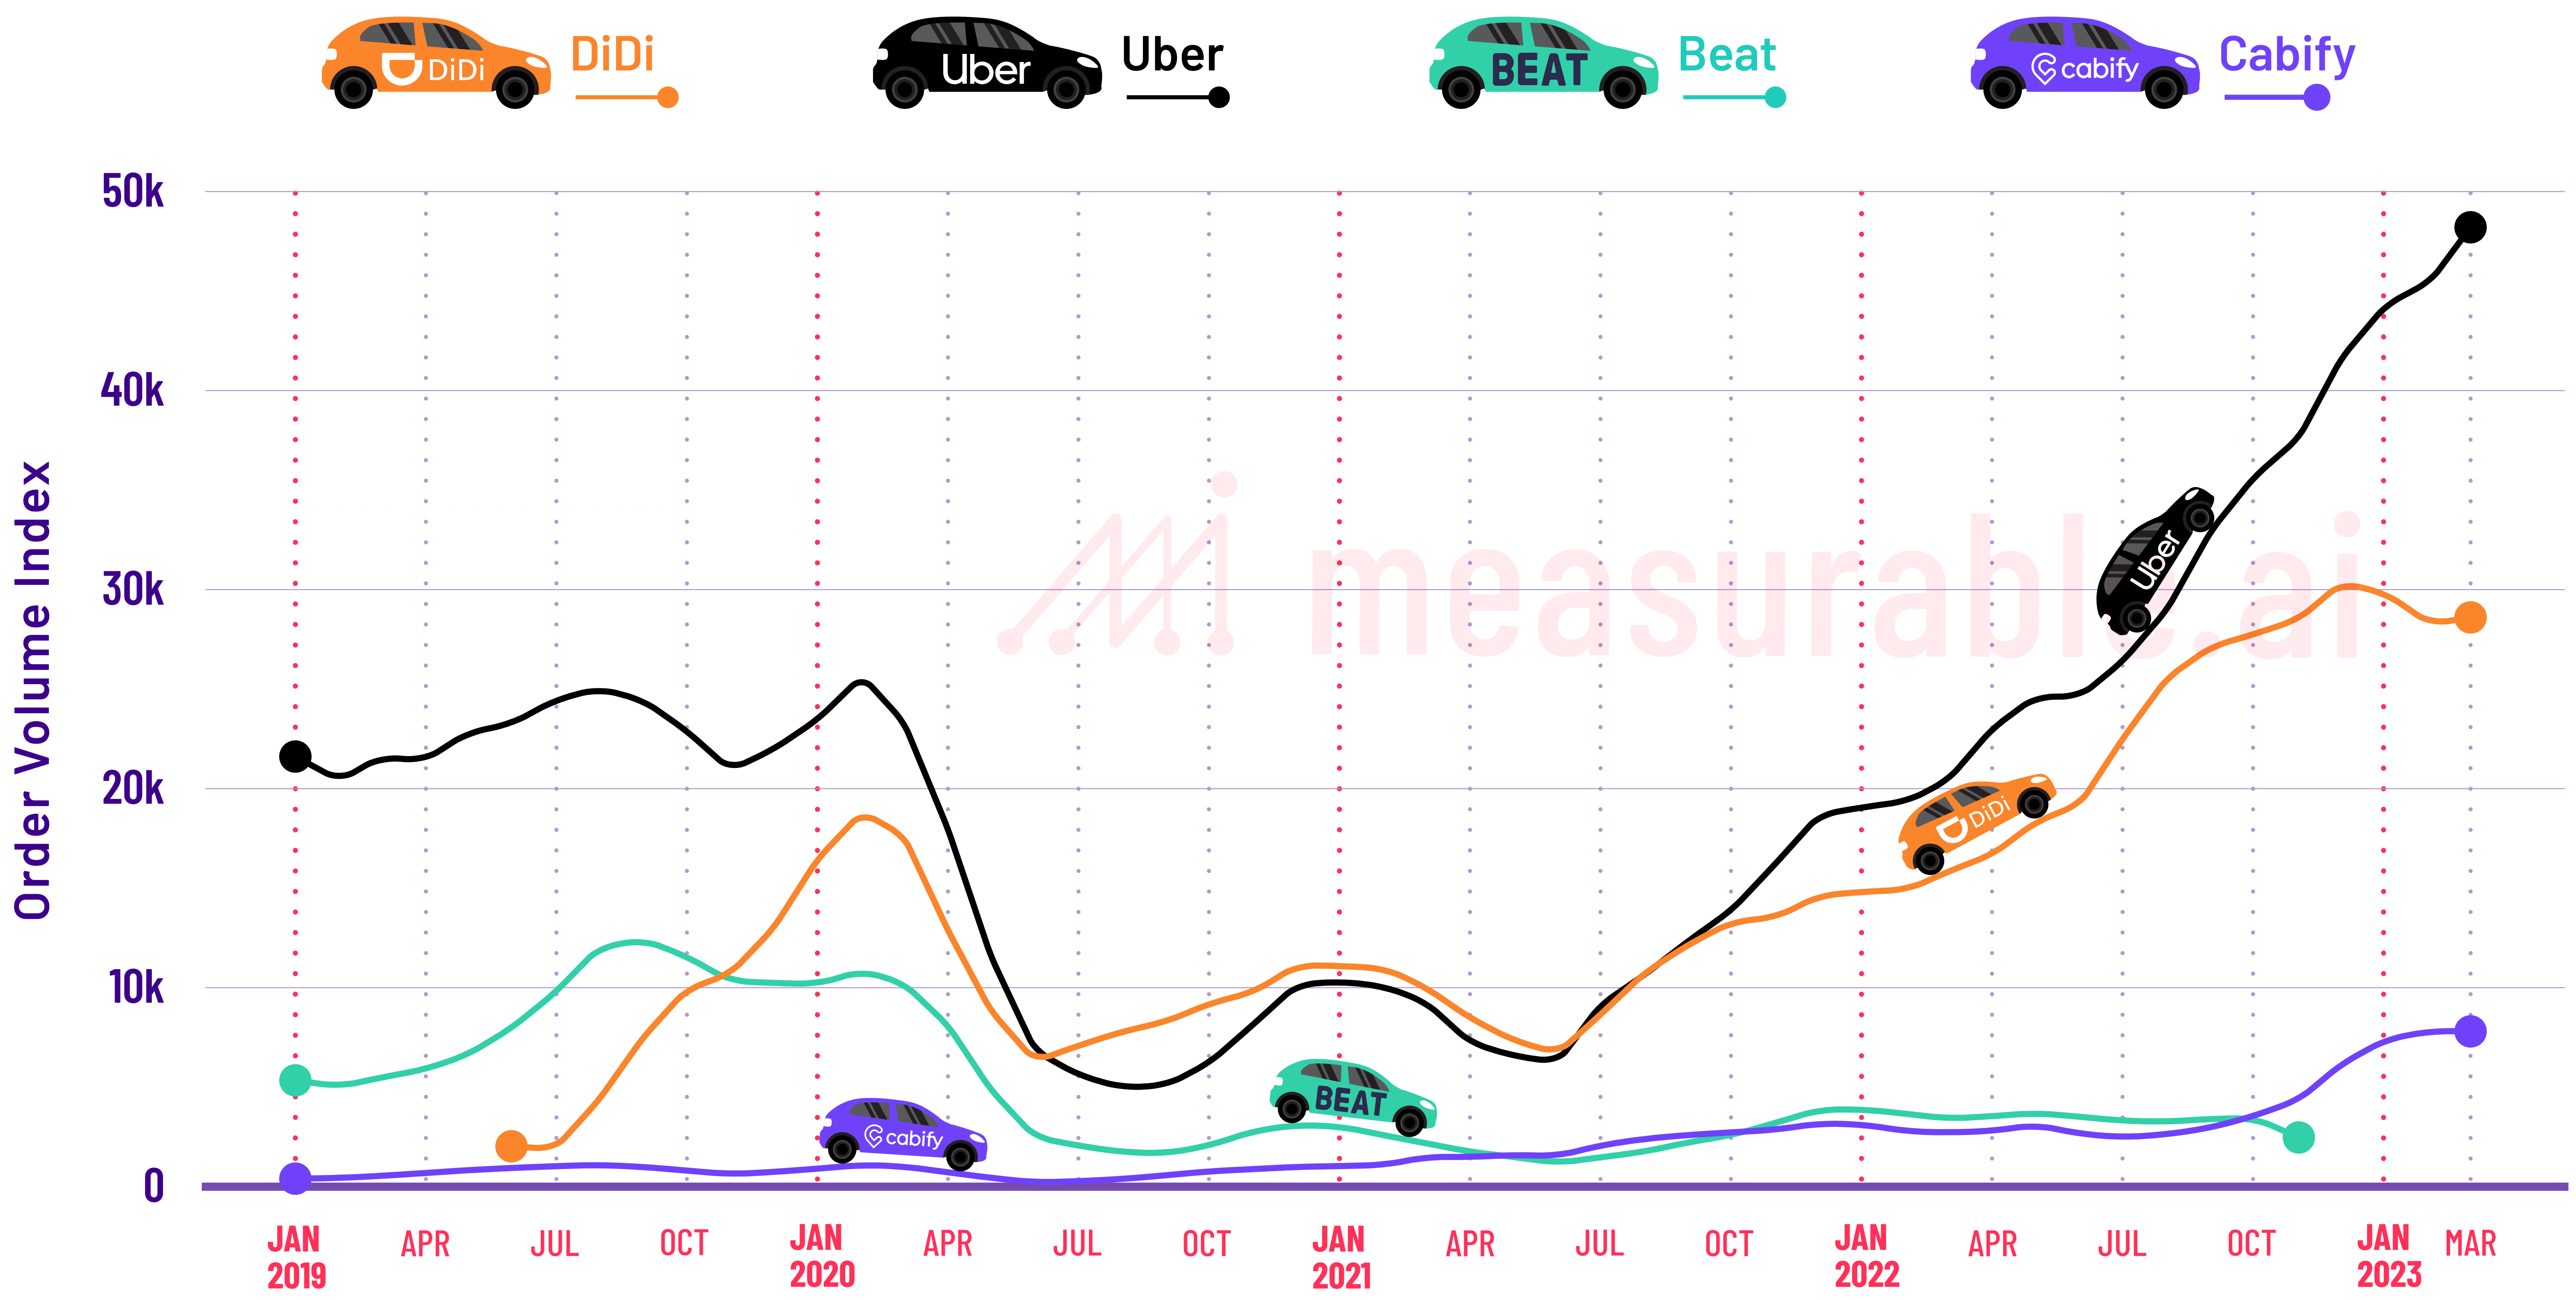
Measurable AI: Argentina Ride-hailing Market Share Overview *Order Volume = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify



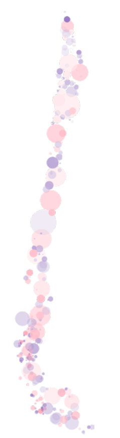
In Argentina, Uber and Didi hold the reins, followed by Cabify and Beat, the latter of which has exited. Prior to the pandemic, Uber dominated this sector, but in Q2 2021, Didi outpaced them and held onto this lead for over a year. Entering 2023, Uber demonstrated a resurgence in growth. Despite being a relatively minor player, Cabify maintains a consistent growth trajectory since COVID.

CHILE | RIDE-HAILING MARKET SHARE OVERVIEW

2019 2023



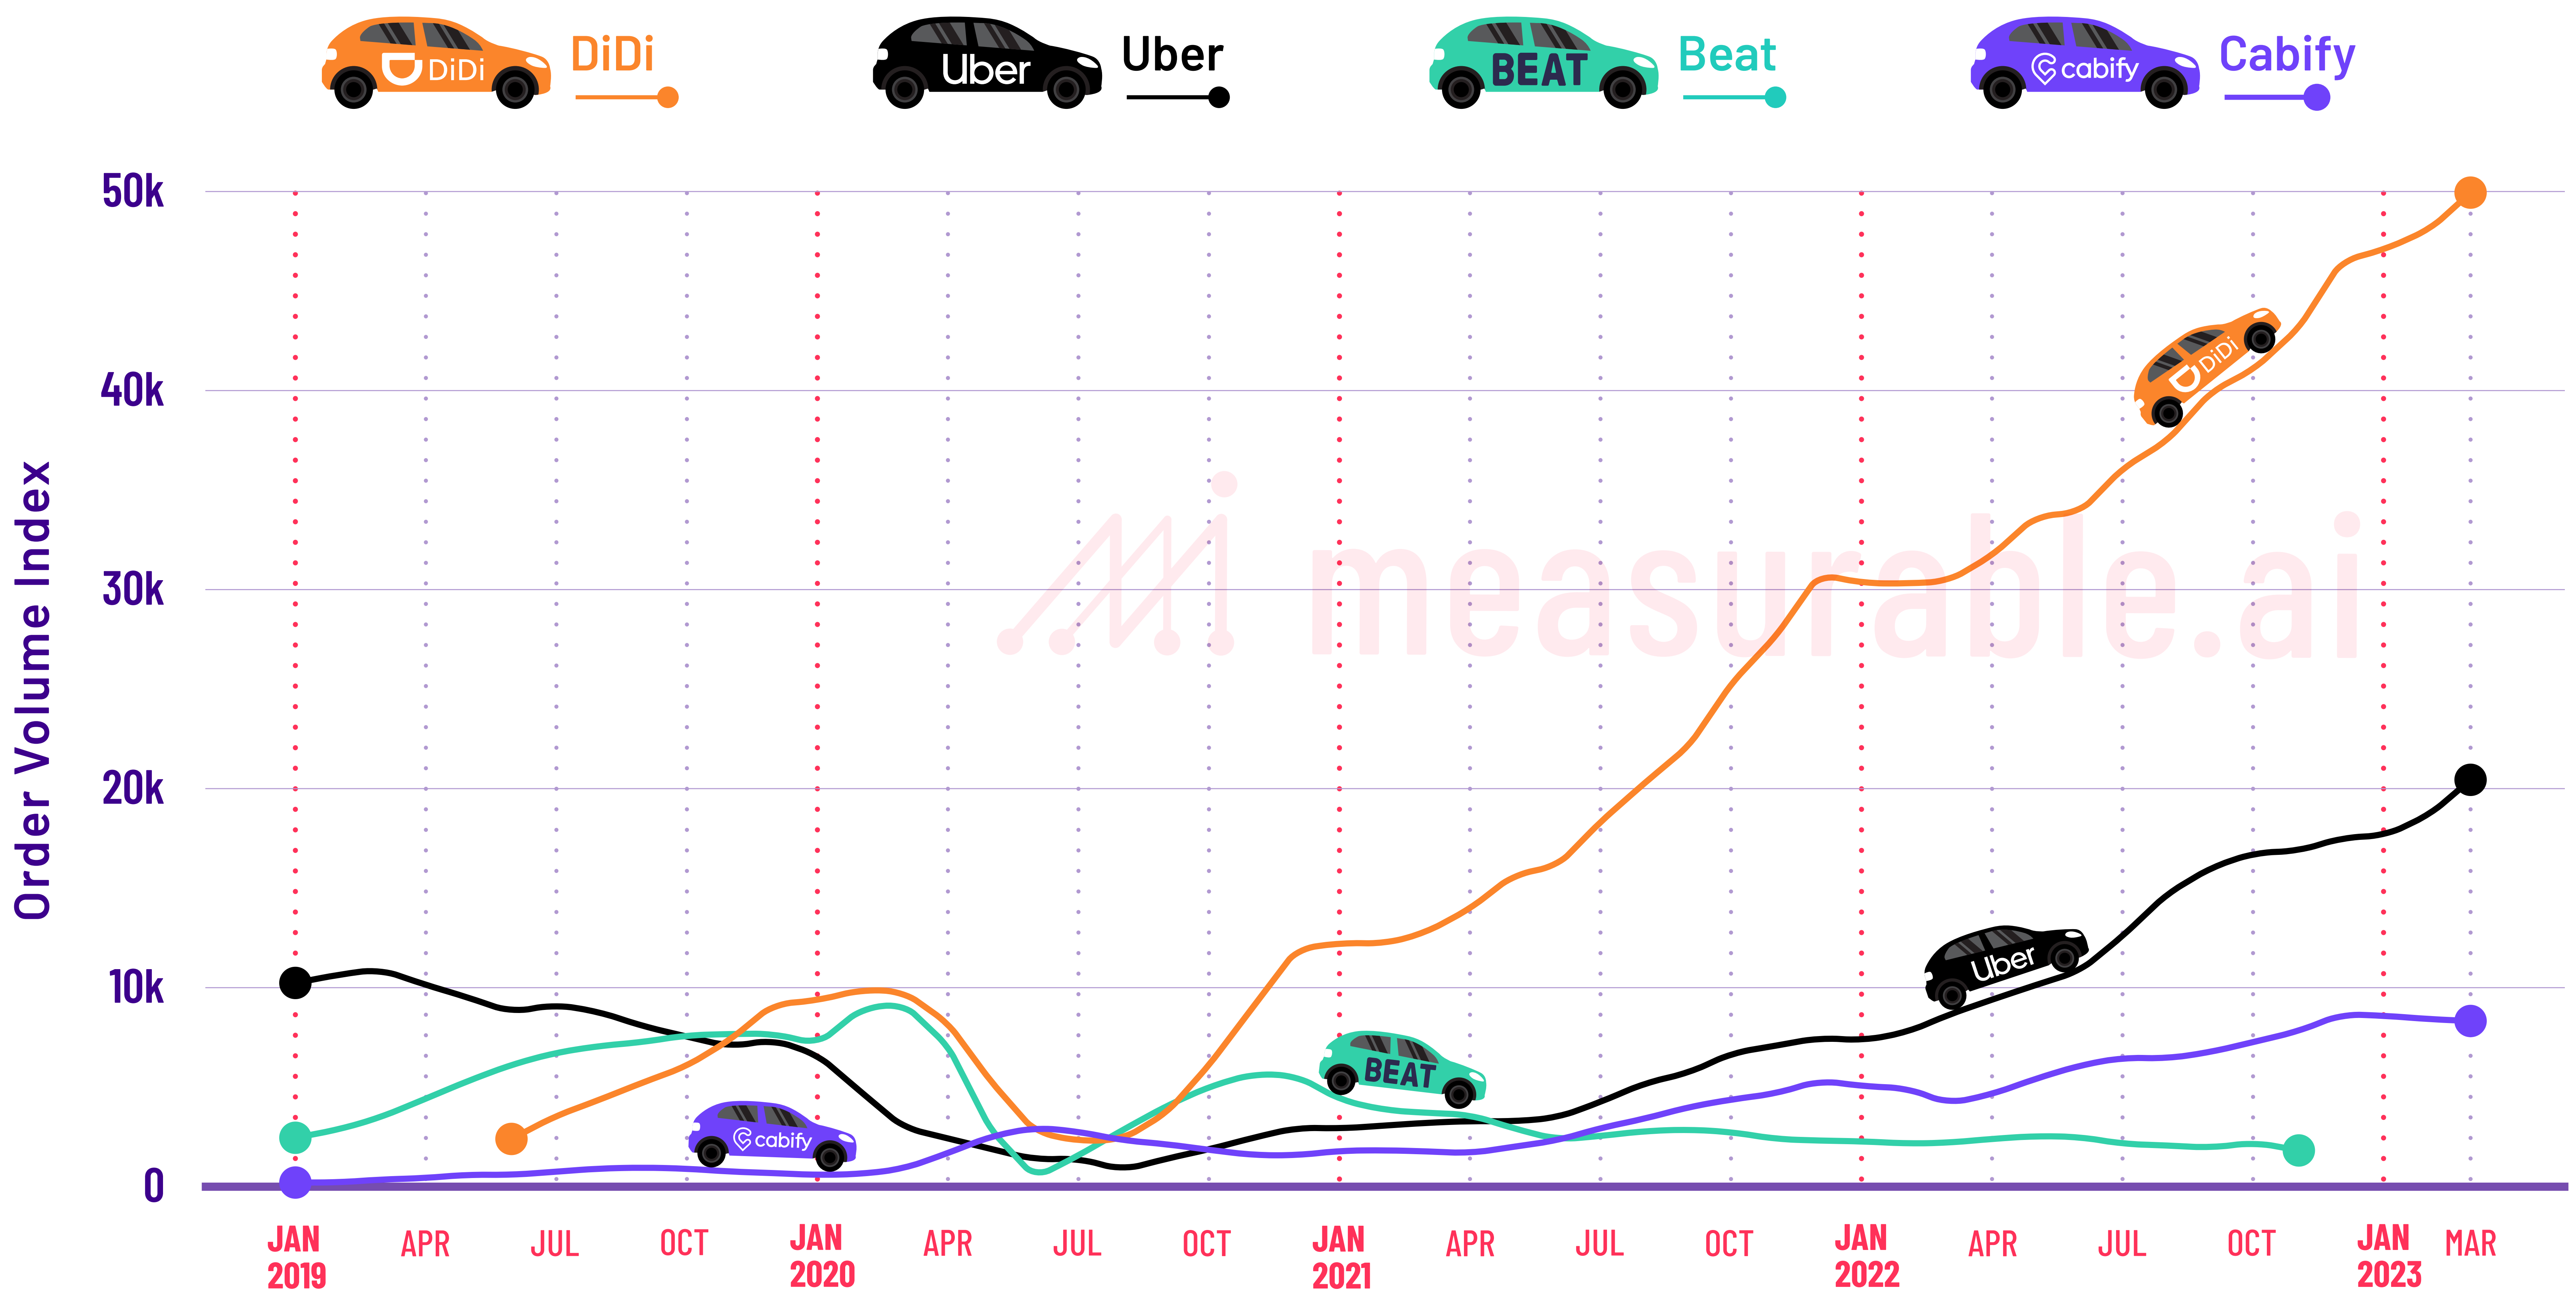
Measurable AI: Chile Ride-hailing Market Share Overview *Order Volume = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify



In Chile, the ride-hailing arena continues to be fiercely contested by Uber and Didi. As of Q1 2023, Uber has gained an edge over Didi in order volume. Over the past four years, the competition has been intensely close, with both entities sharing similar market shares. Regarding Beat and Cabify, Beat used to own a substantial market share in 2018-2019; Cabify's volume is modest, showing some growth in recent months.

COLOMBIA | RIDE-HAILING MARKET SHARE OVERVIEW

2019 2023



Measurable AI: Colombia Ride-hailing Market Share Overview *Order Volume = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify

Didi has been at the forefront of ride-hailing since the pandemic in Colombia. Before 2021, the market was bustling with four competitors vying for dominance. Didi was the first to distinguish itself by securing a significant share. It has held over 50% of the market share since Q4 2020 and has maintained an upward trajectory. Uber, as of Q1 2023 trails behind as the second, owning approximately 25% of the market. Cabify follows in third, with around 10% market share.

PART III

AMERICAS RIDE-HAILING CONSUMER BEHAVIOUR OVERVIEW 2019-2023

Contact Us : *business@measurable.ai*

measurable.ai

INTRODUCTION

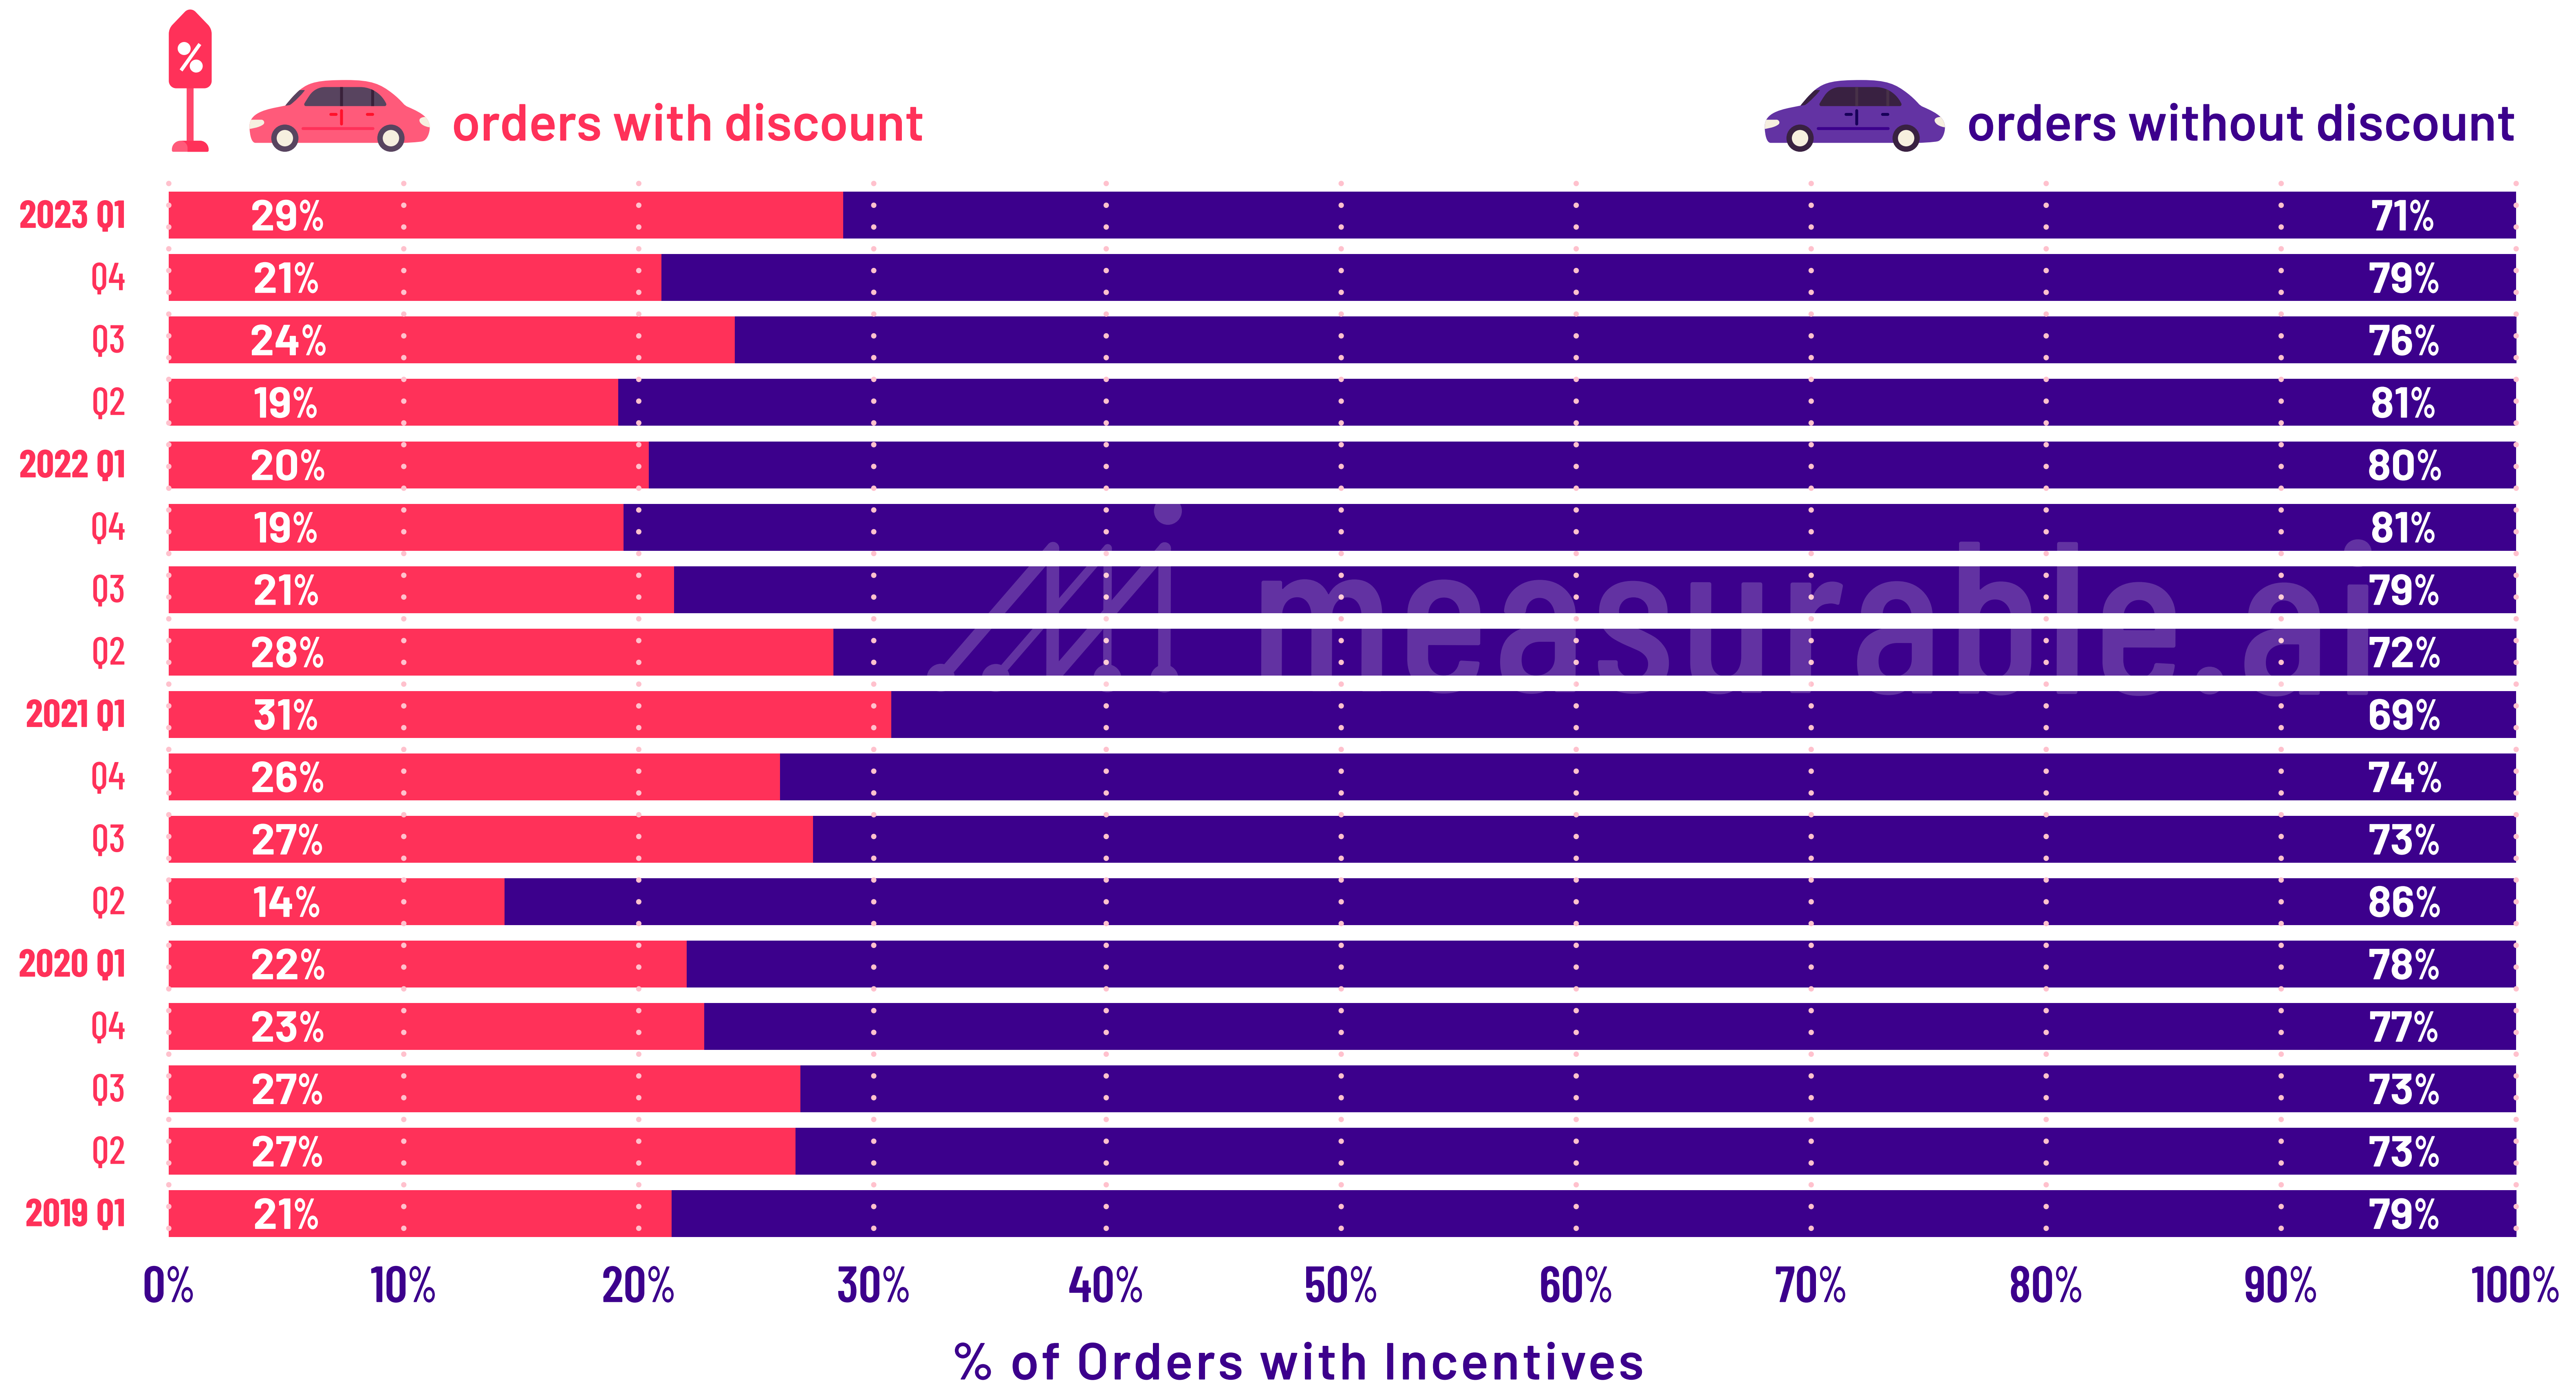
In this section, we analyze ride-hailing users in the Americas by examining two key metrics: Incentive and Promotion Trends, and User Loyalty.

Promotions and incentives play a crucial role in influencing consumer decisions in ride-hailing, particularly in a competitive market and amid slowing demand post-pandemic. How has the promotion rate for ride-hailing orders evolved over time?

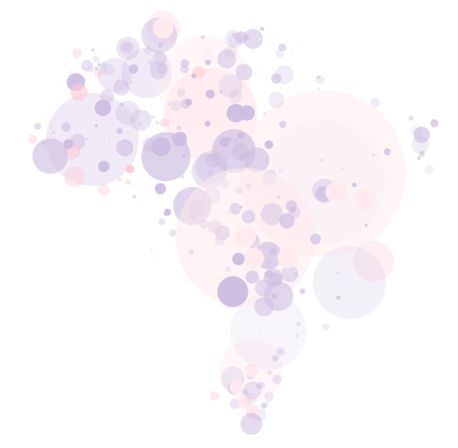
According to Measurable AI's e-receipt data, the share of orders with incentives remains high throughout the three markets, with some growth observed in Q1 2023. Regarding user loyalty, customers are increasingly becoming loyal to ride-hailing companies.

BRAZIL RIDE-HAILING INCENTIVE TREND

2019 2023



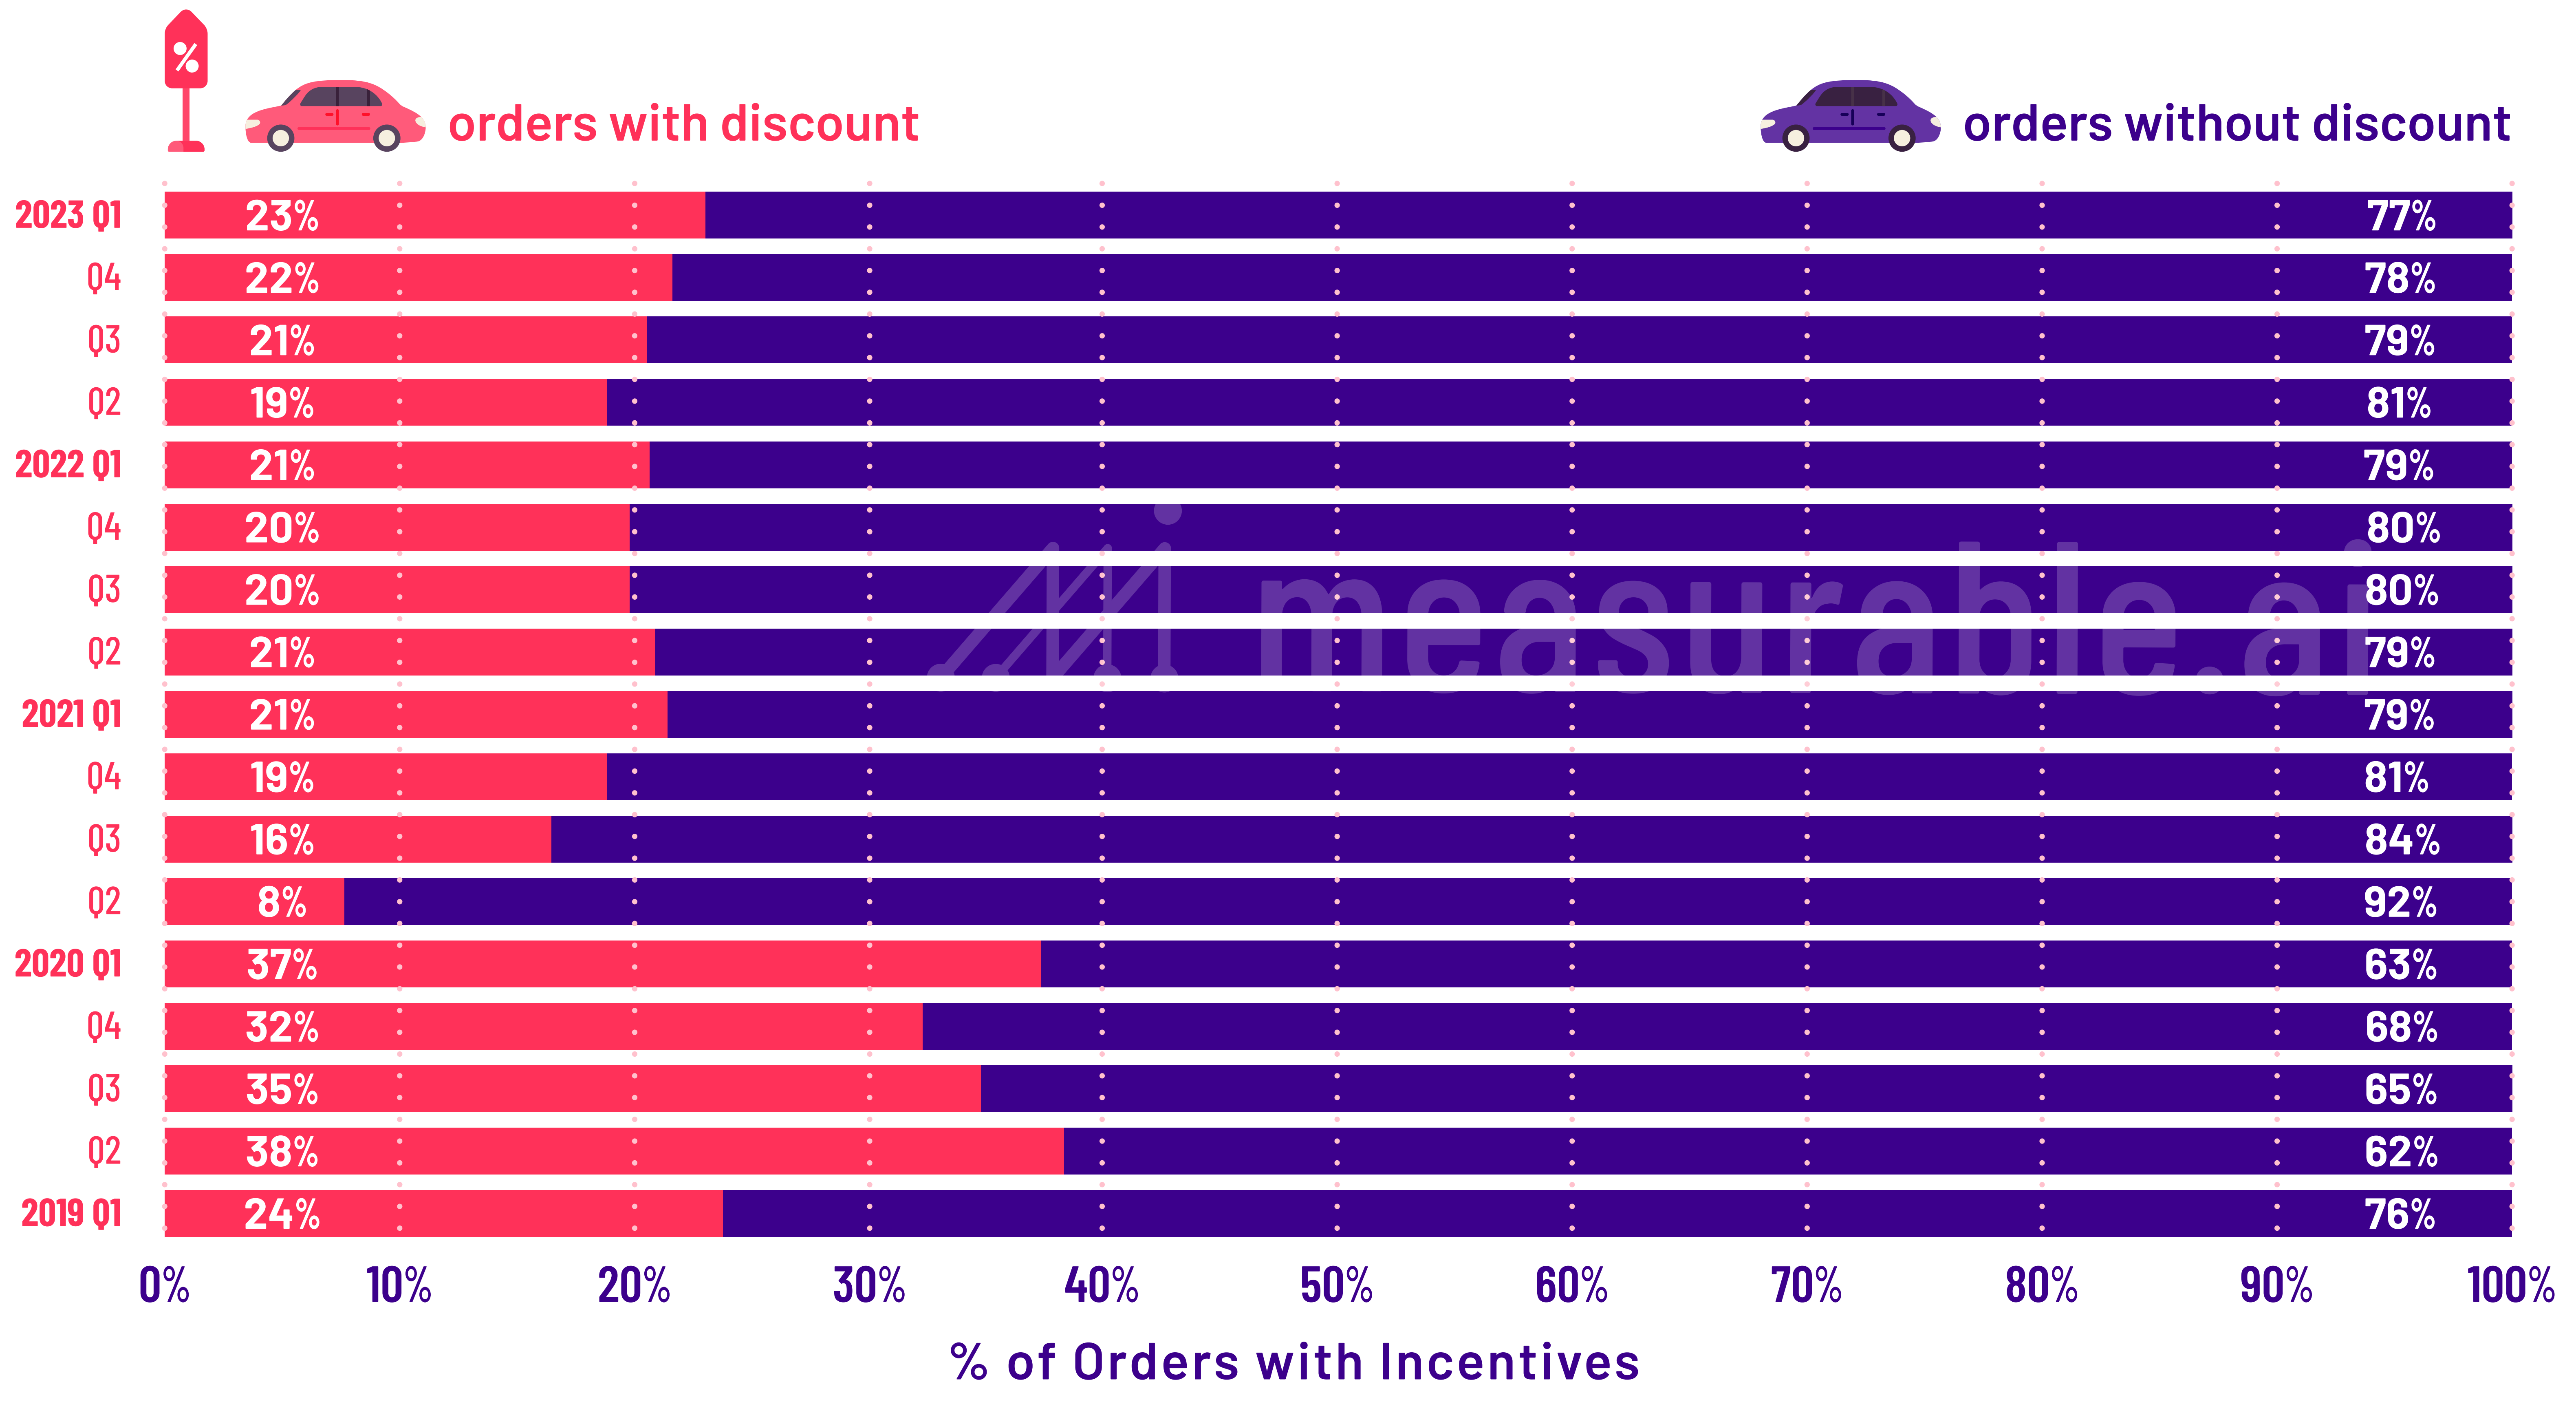
Measurable AI: Brazil Ride-hailing Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: NinetyNine, Uber, Cabify



In Brazil, the share of orders with promotions and incentives fluctuated around 24% in 2019 -2021. Post pandemic, it rose to around 29% as of Q1 2023.

MEXICO | RIDE-HAILING INCENTIVE TREND

2019 2023

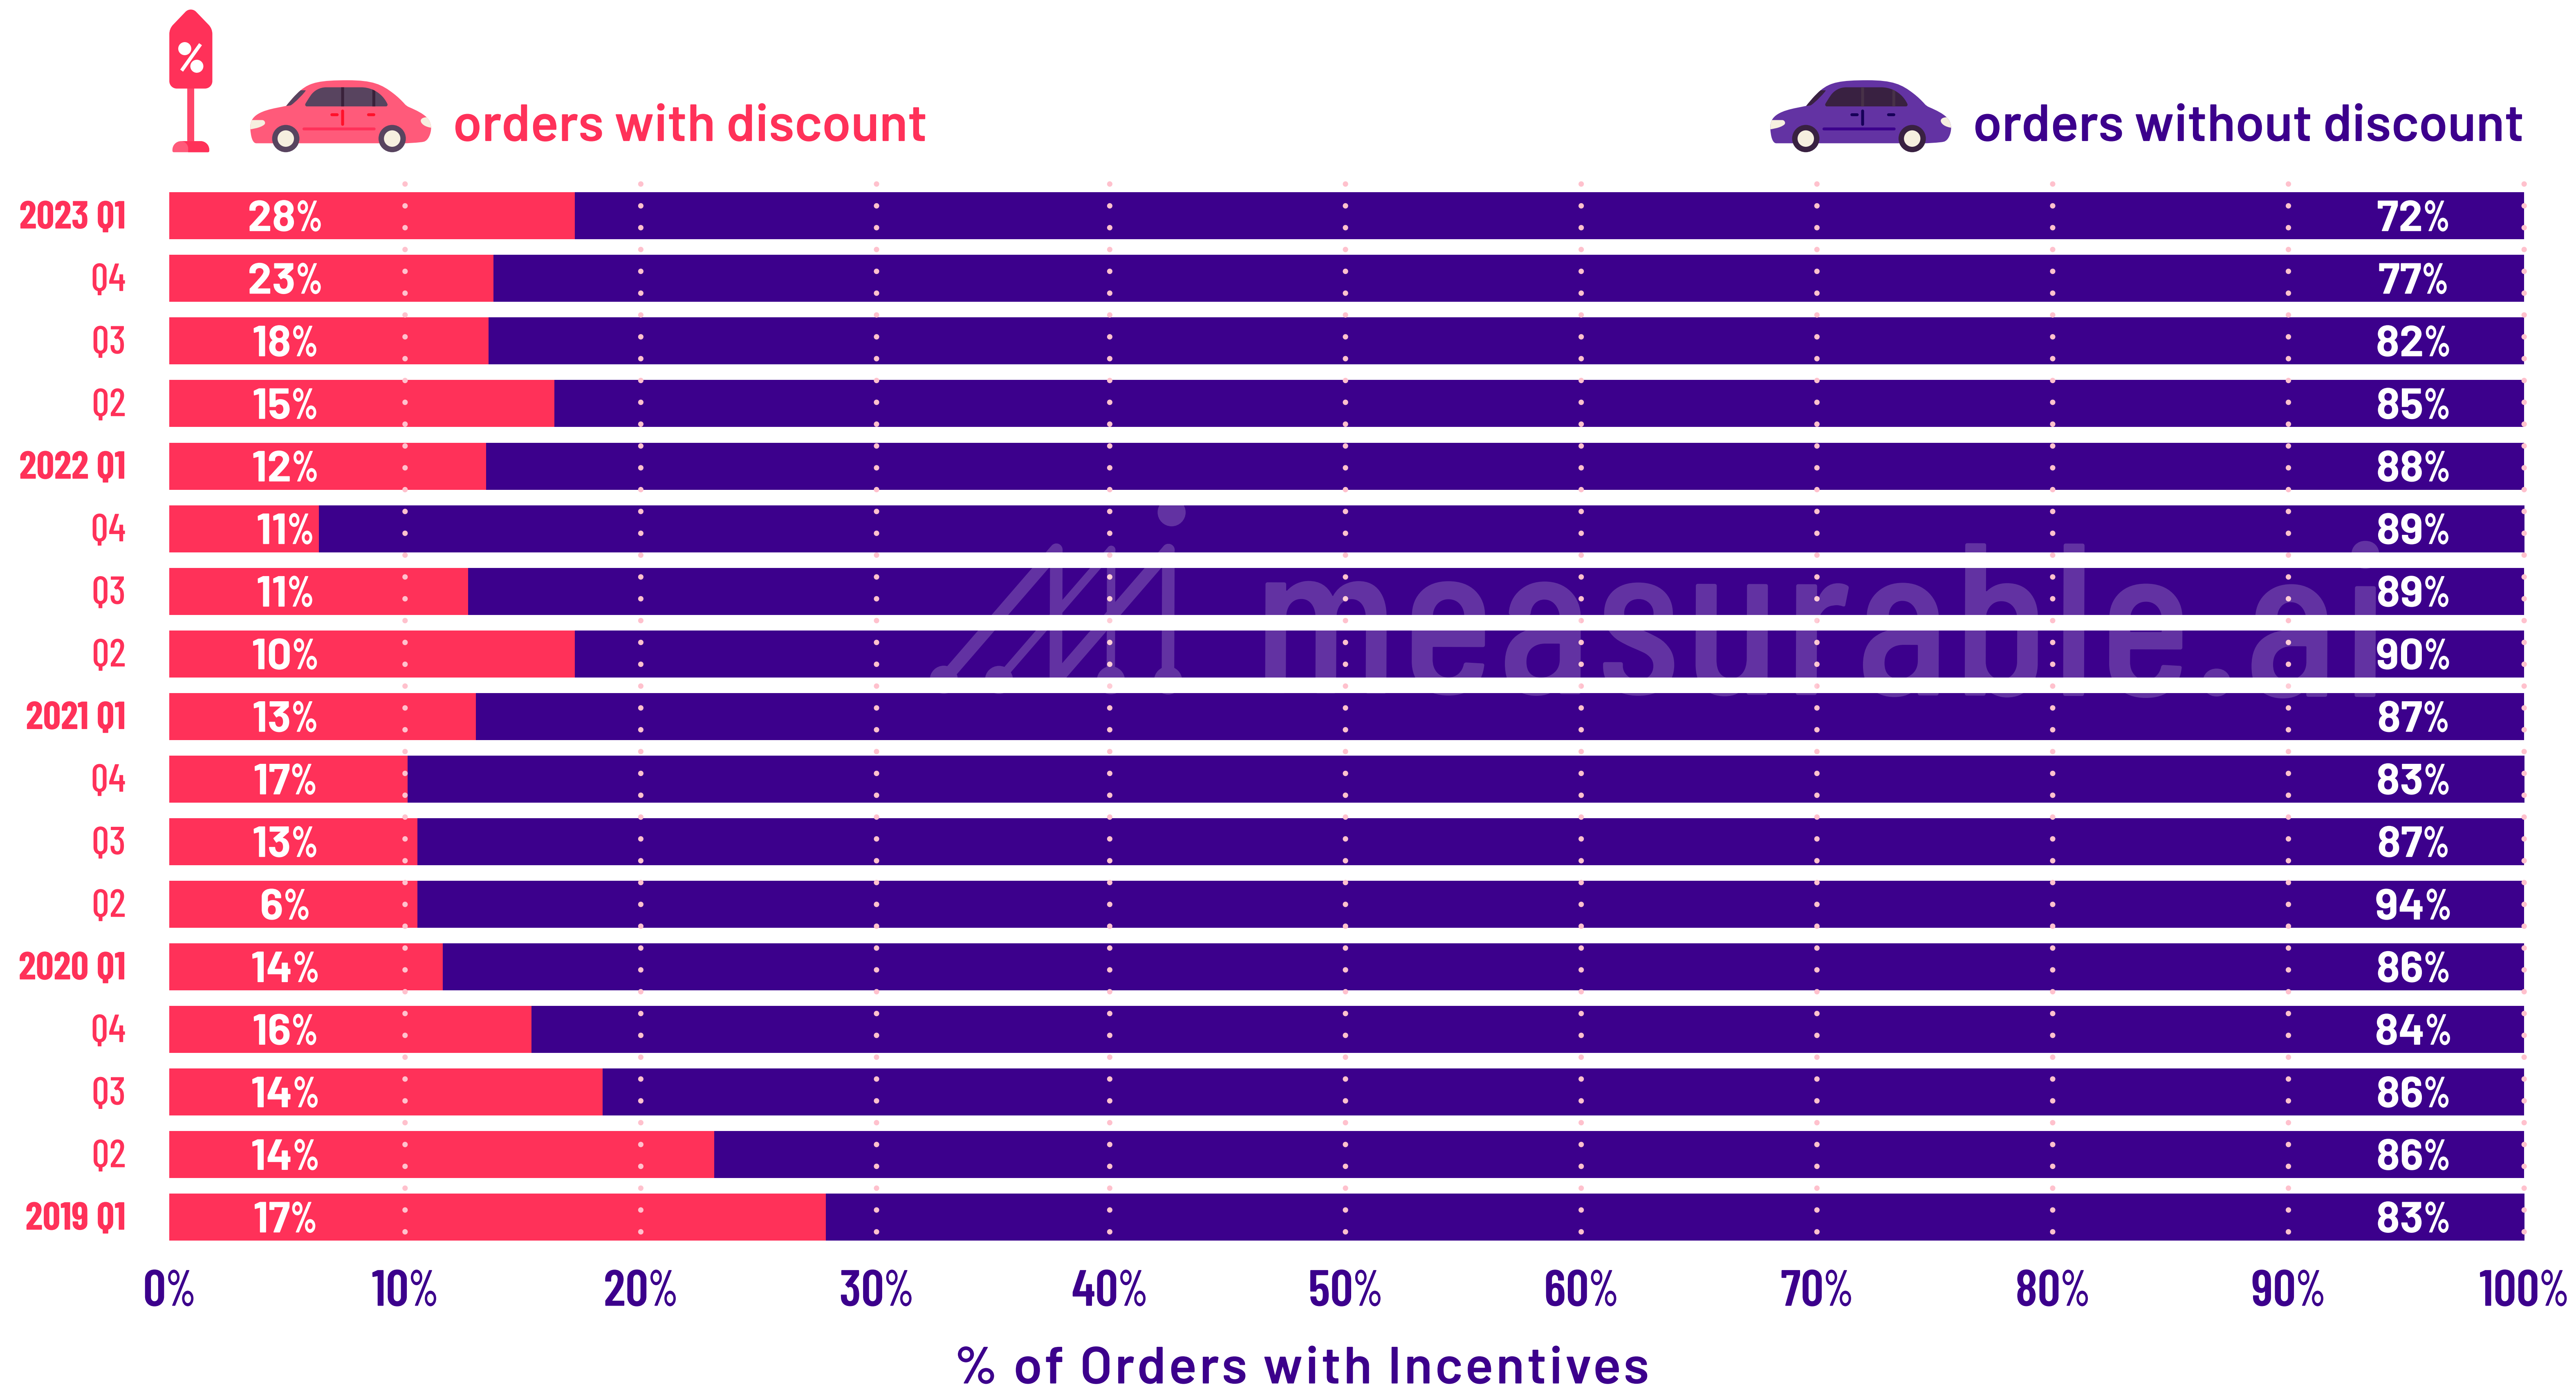


Measurable AI: Mexico Ride-hailing Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify, Bolt

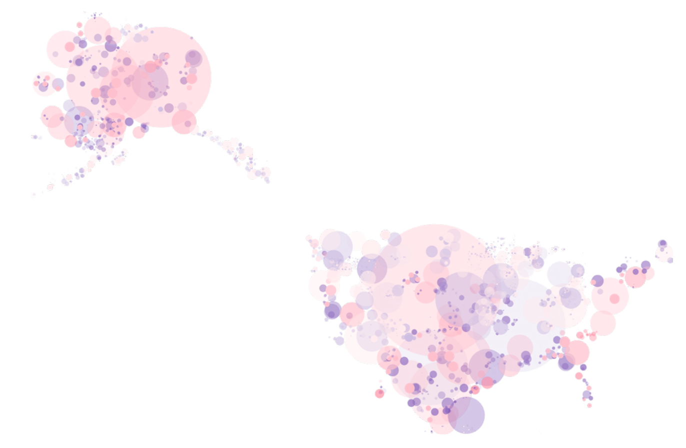
In Mexico, there's been a mild reduction in the percentage of orders that include promotions and incentives. In 2019, promotions and incentives were featured in around 33% of orders. Over the next three years, this figure gently tapered off to around 20%. As of Q1 2023, approximately 23% of ride-hailing orders in Mexico still come with promotional incentives.

US | RIDE-HAILING INCENTIVE TREND

2019 2023



Measurable AI: US Ride-hailing Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Lyft, Uber



In the US, share of rides with promotions and incentives started to rise post pandemic and reached 28% as of Q1 2023.

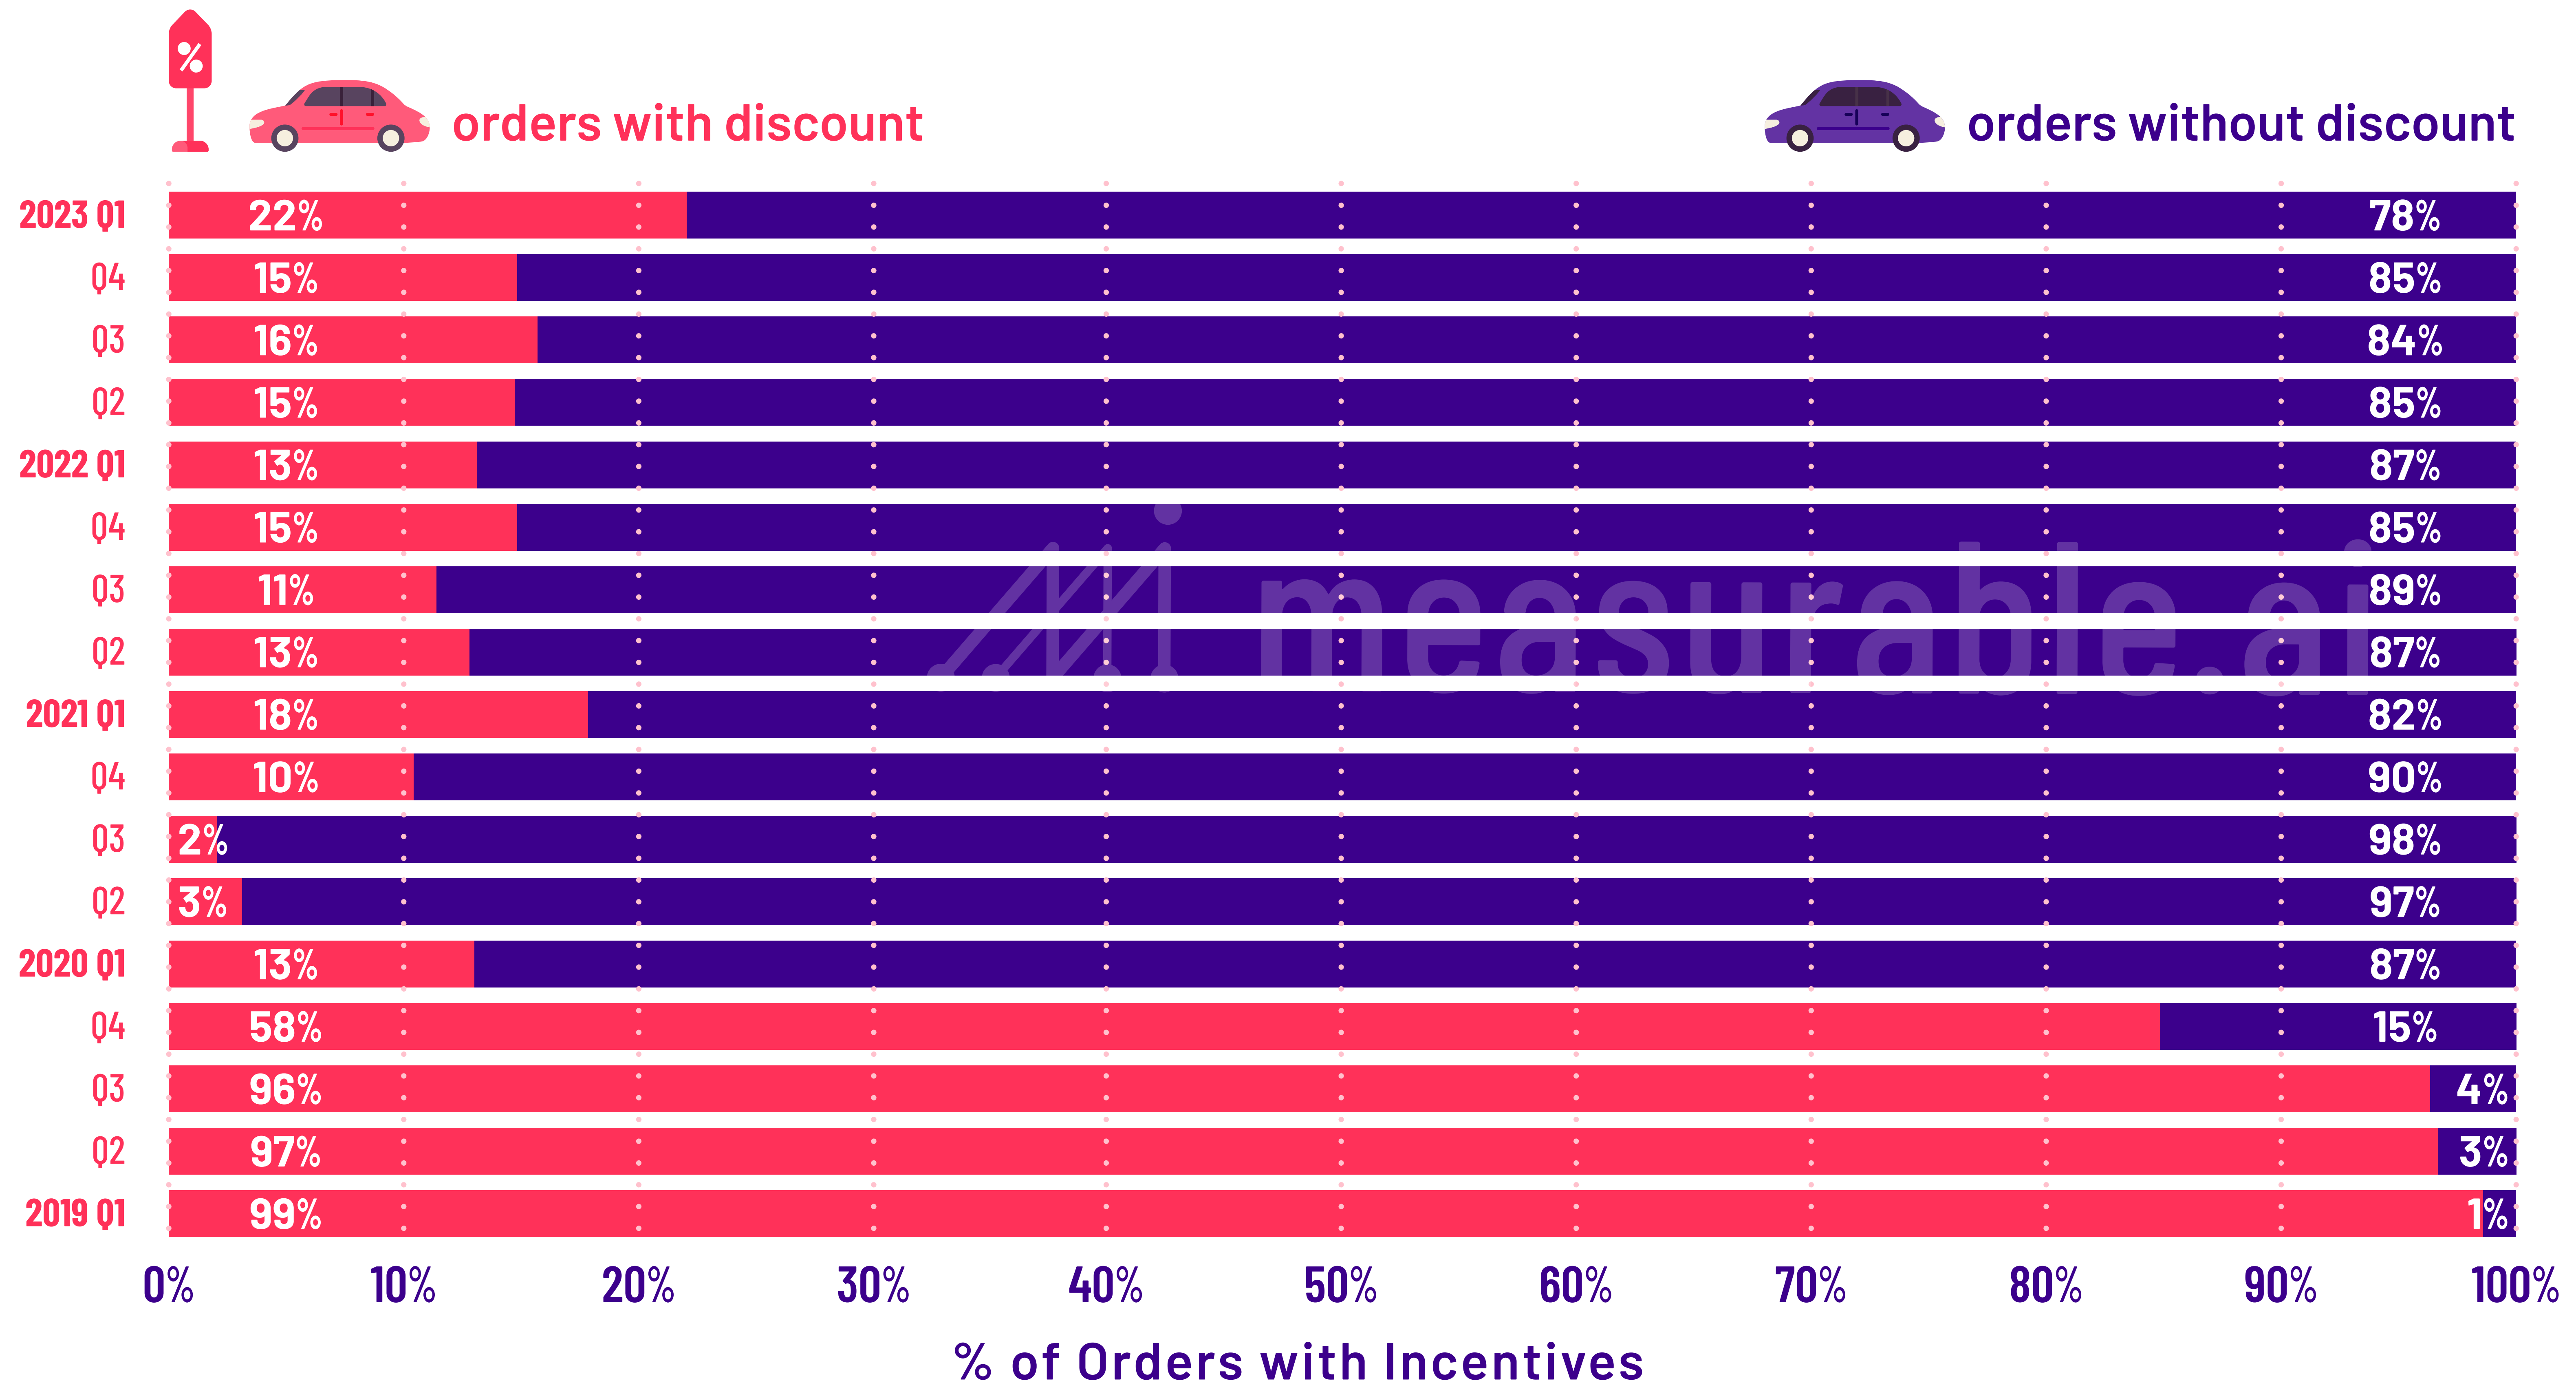
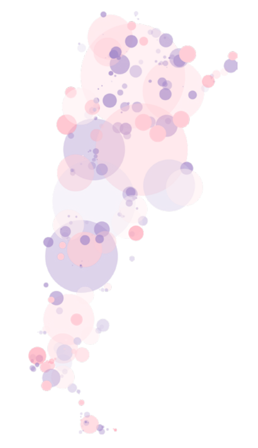
ARGENTINA | RIDE-HAILING INCENTIVE TREND



Measurable AI: Argentina Ride-hailing Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify



In Argentina, ride-hailing companies have significantly changed their incentive strategies. In 2019, the majority of orders, primarily from Uber, included promotions and incentives. However, by 2020, this number had fallen sharply to just 10%. As of Q1 2023, it has rebounded to about 23%, a figure more in line with the levels seen in other Latin American countries.

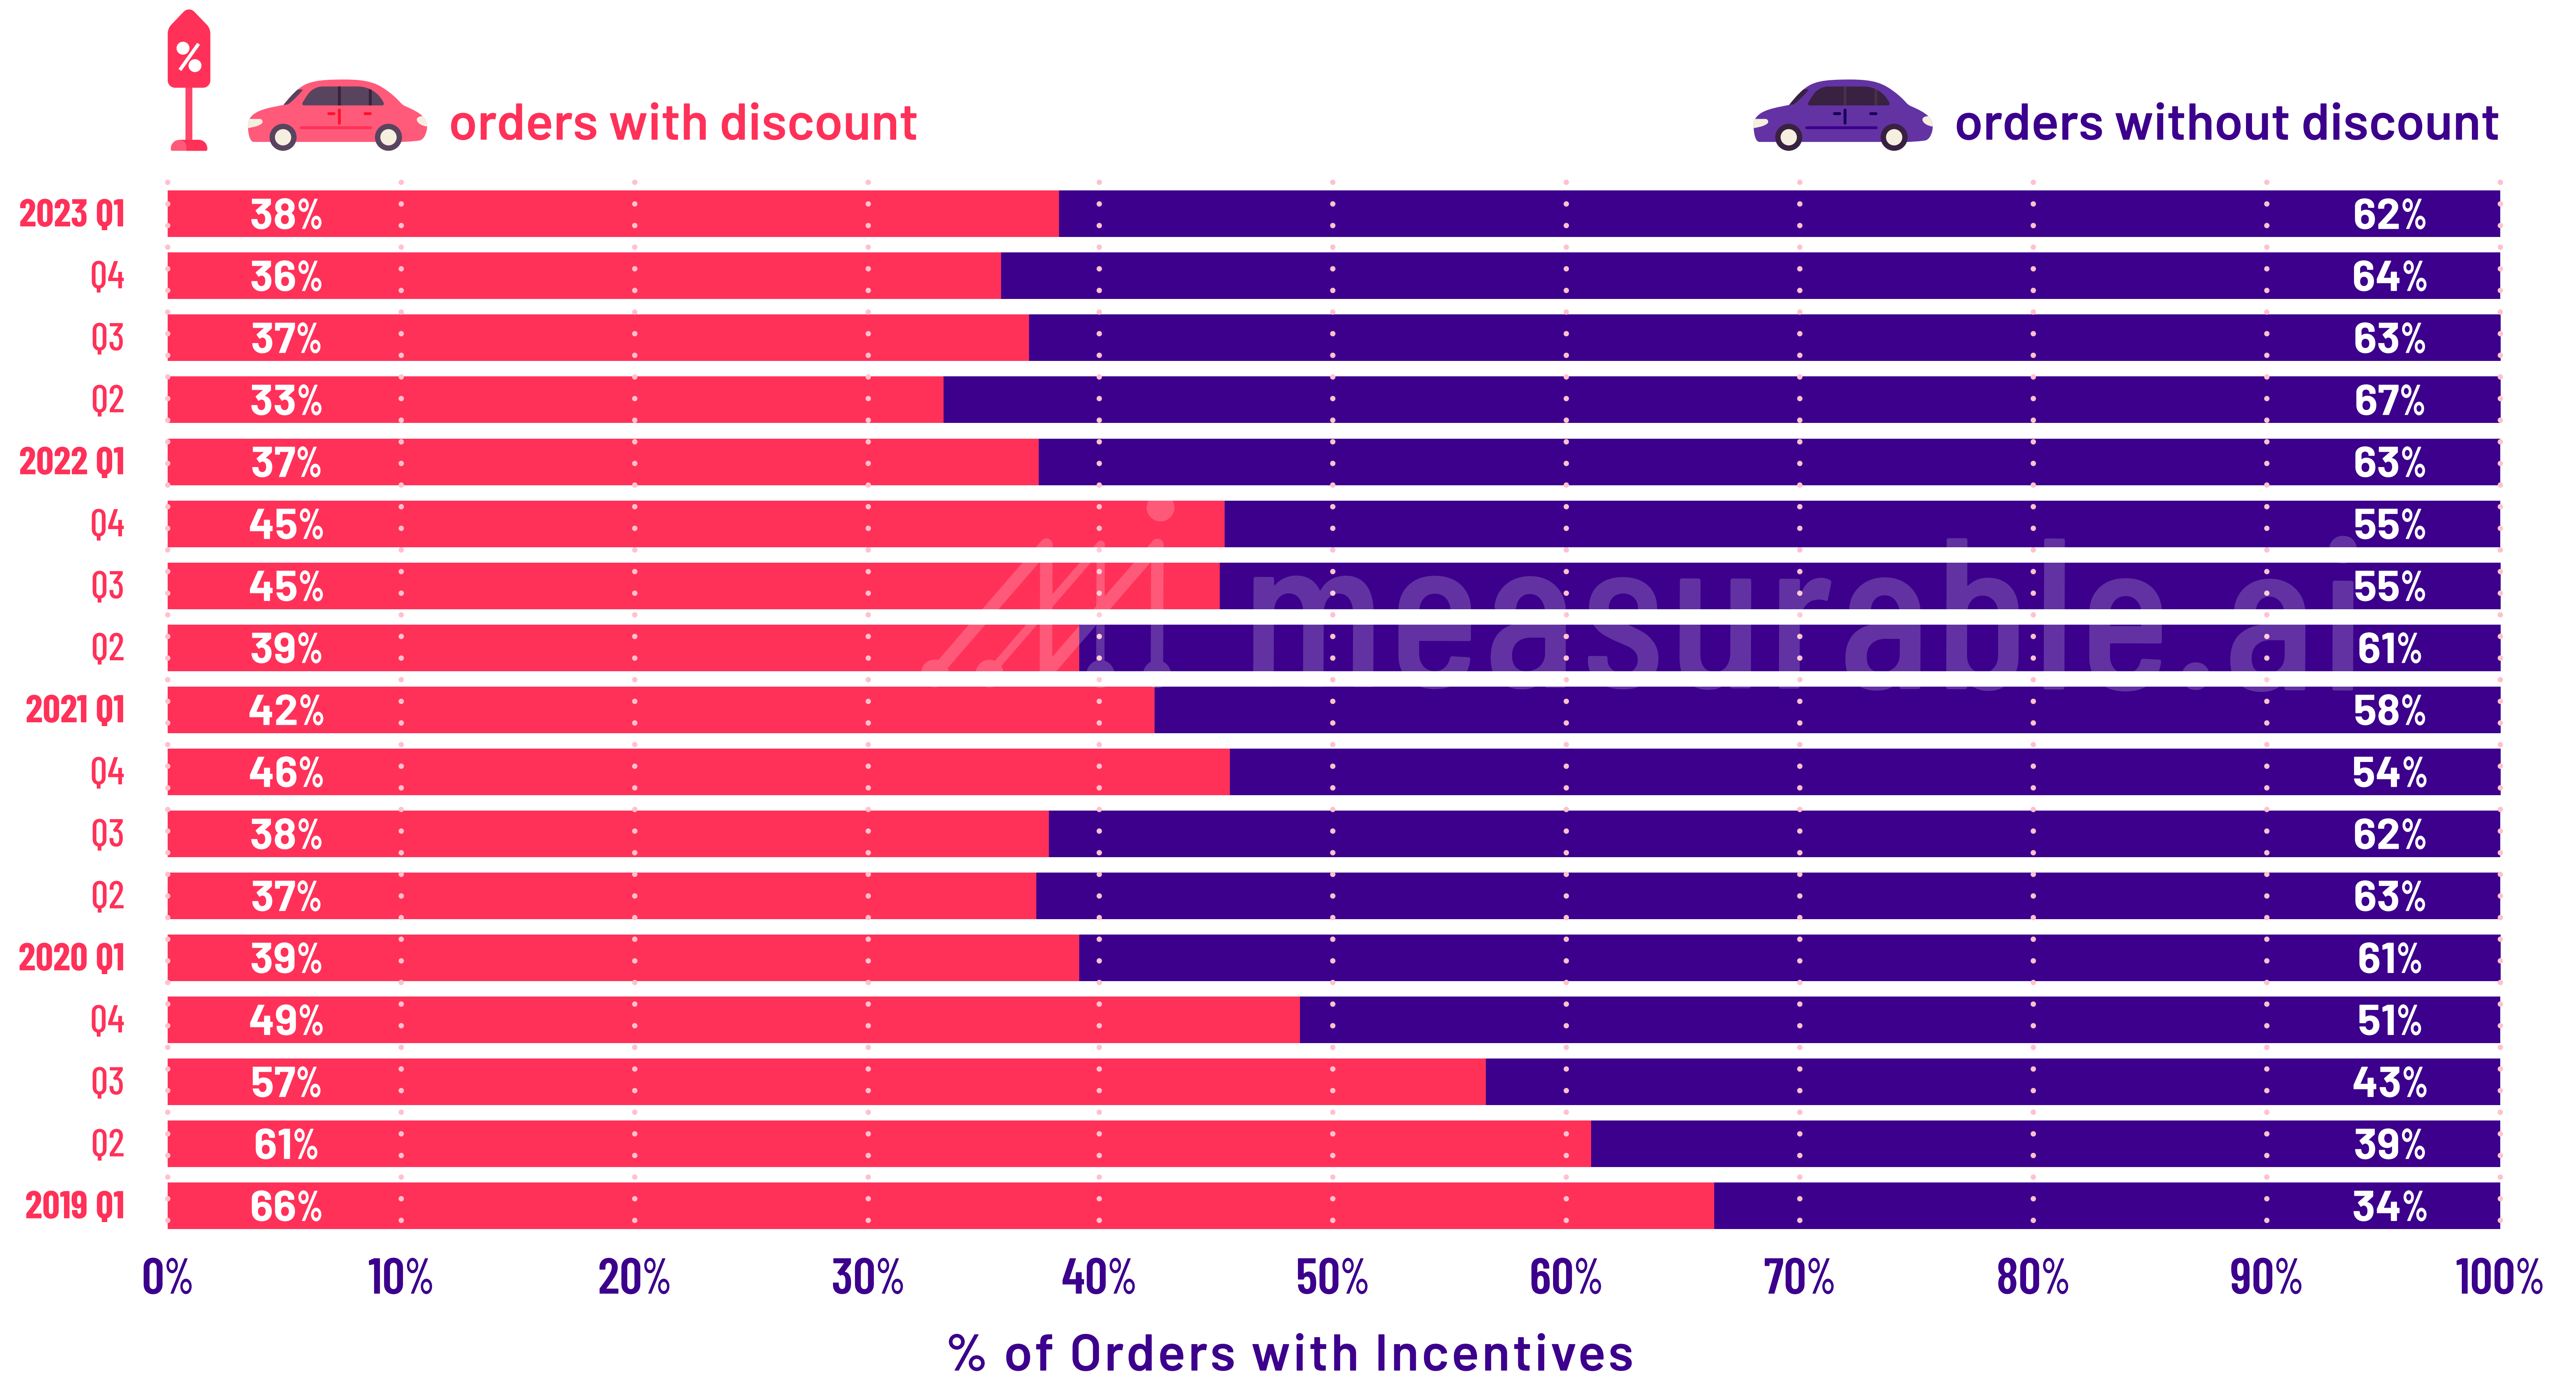
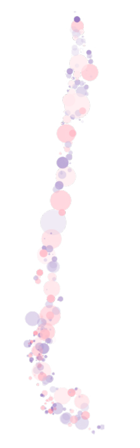
CHILE | RIDE-HAILING INCENTIVE TREND

2019 2023



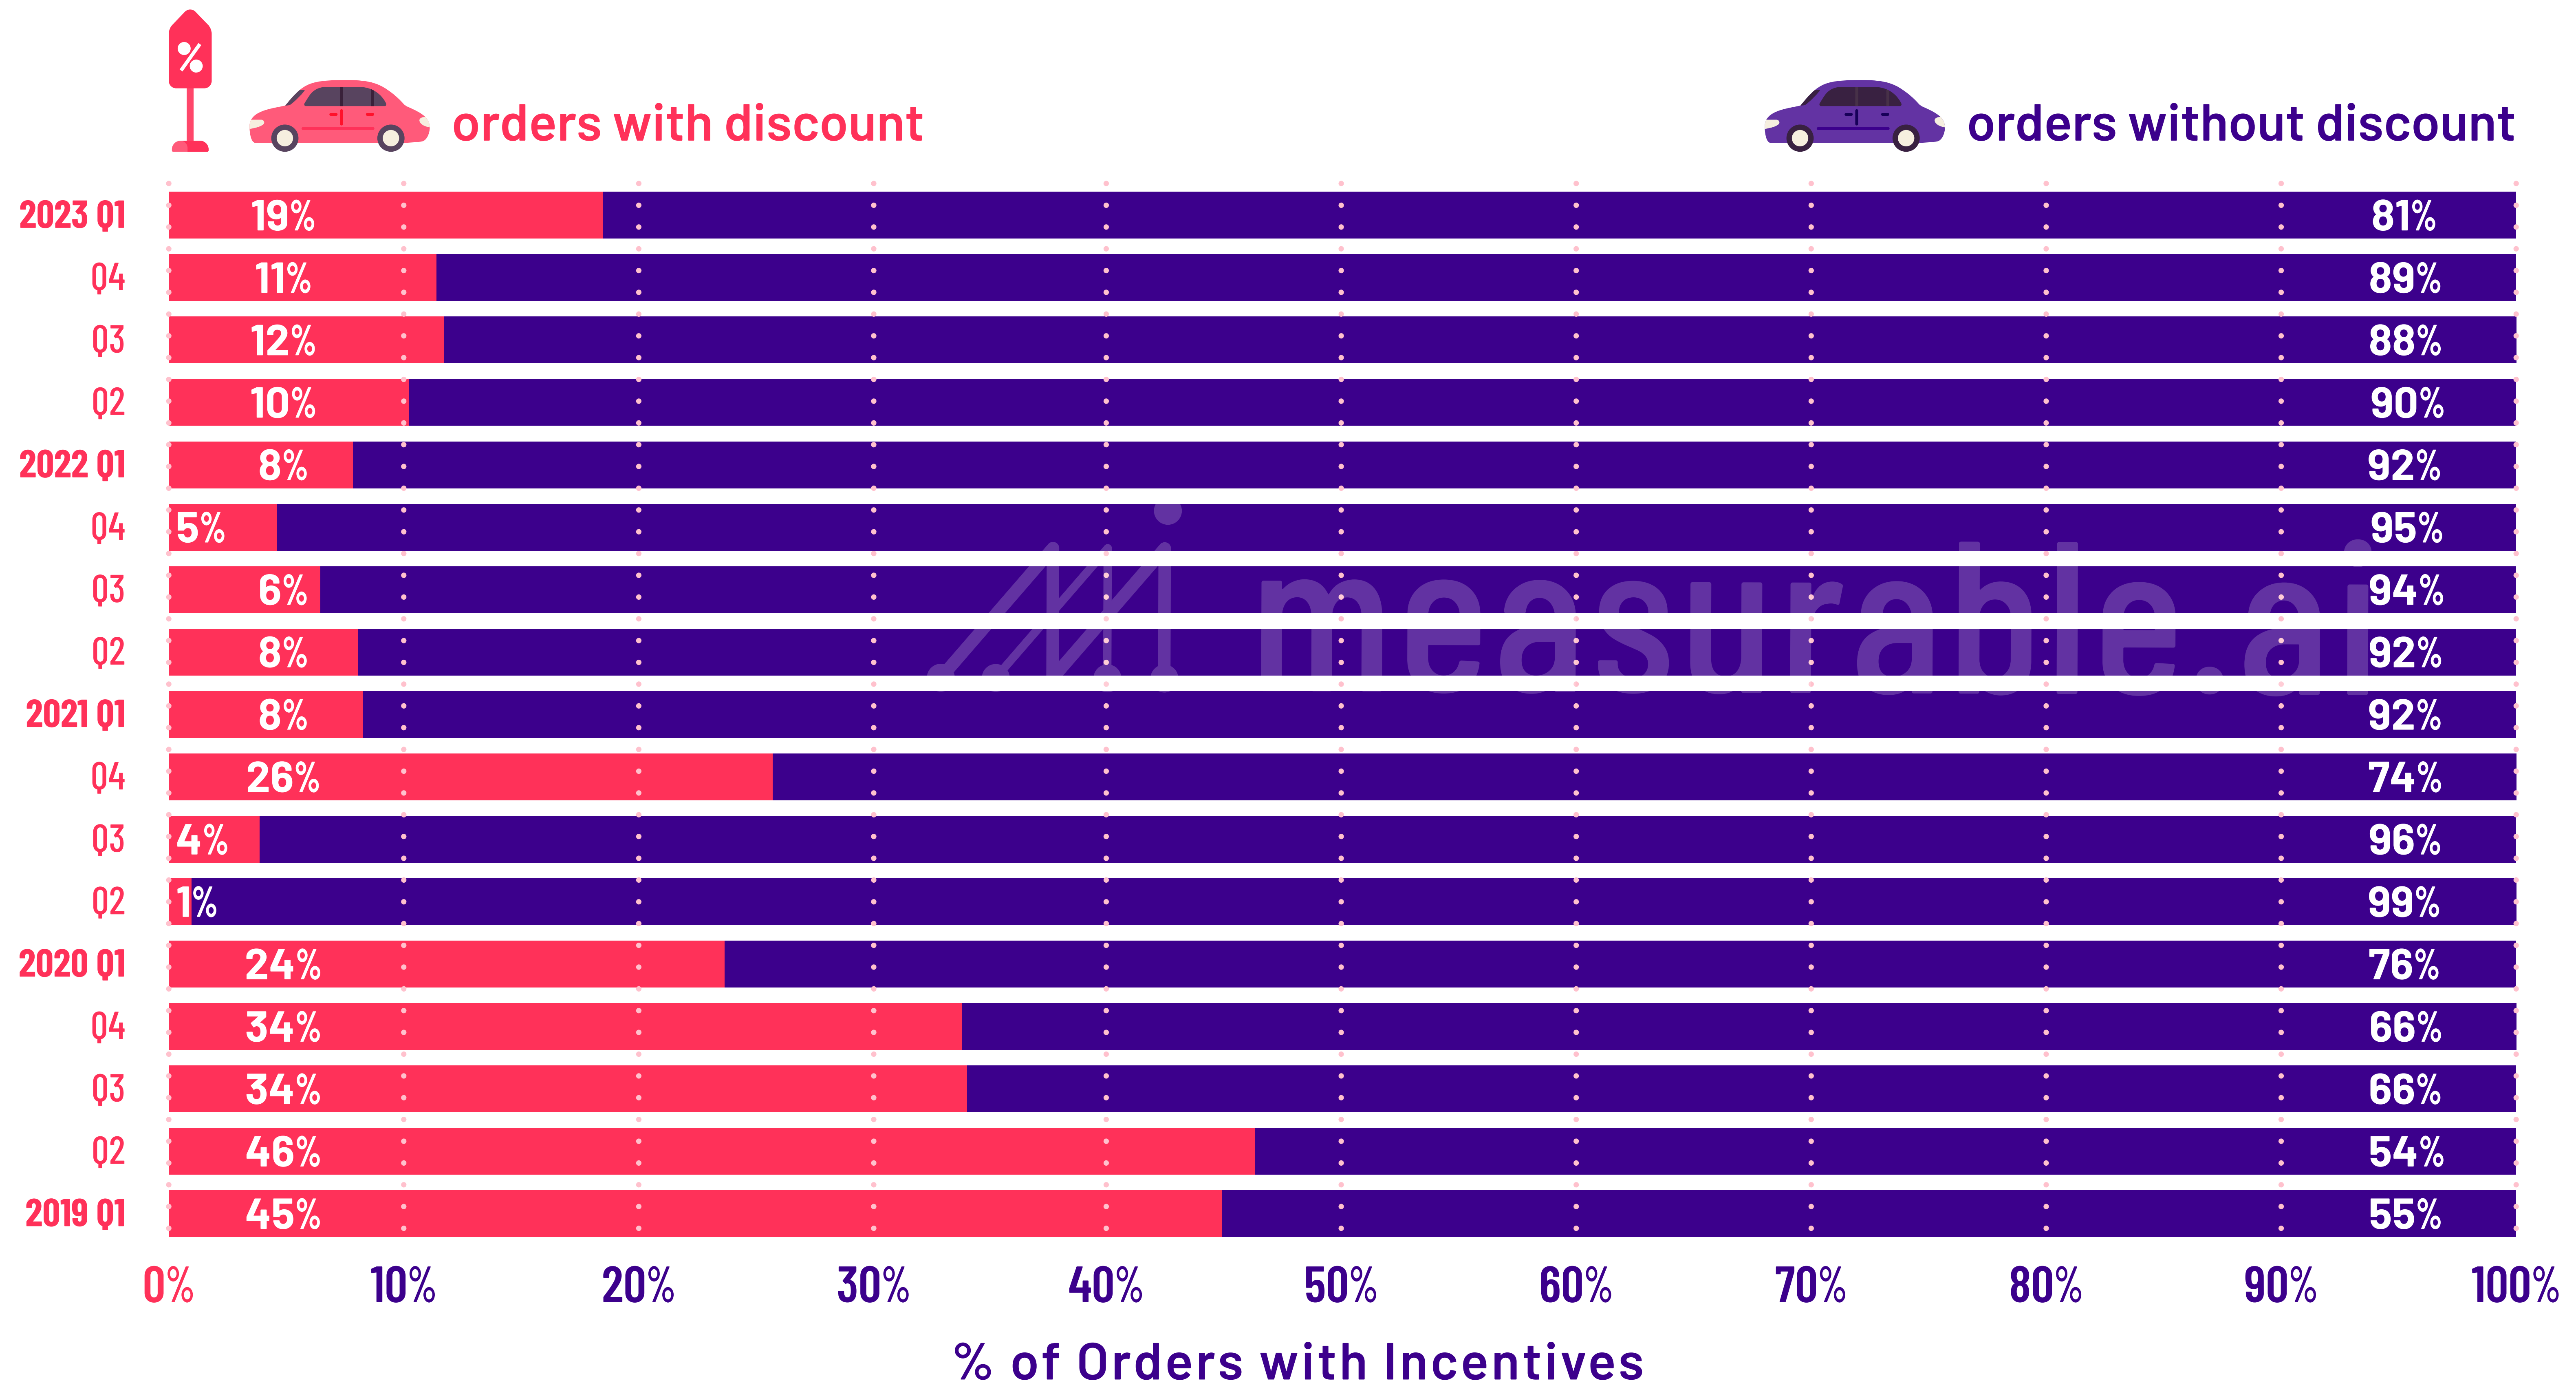
Measurable AI: Chile Ride-hailing Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify



In Chile, the proportion of orders with incentives and promotions remain high in the ride-hailing sector. In 2019, 57% of the orders included incentives, a number that gradually fell to approximately 36% in 2022. Despite the decrease, this figure remains the highest among the Latin American countries discussed in this report.

COLOMBIA | RIDE-HAILING INCENTIVE TREND

2019 2023



In Colombia, the share of ride-hailing orders featuring incentives and promotions has been on a downward trend. Back in 2019, about 39% of orders came with these incentives. However, this figure has consistently decreased over time, reaching roughly 11% in 2022.

Measurable AI: Colombia Ride-hailing Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Didi, Uber, Beat, Cabify

BRAZIL | RIDE-HAILING LOYALTY OVERVIEW
