2024 Digital Economy Outlook: Pioneering Through A Resilient Future

METHODOLOGY

Measurable AI (<https://measurable.ai>) is the leading provider of transactional e-receipt data for the digital economy across the emerging markets. Through aggregating and anonymizing real purchase e-receipts from our proprietary consumer panel, we provide actionable and timely insights for savvy investors and corporations around the world.

DATA

The information in this report is based on data points collected from Measurable AI's proprietary consumer panel, where anonymized transactional e-receipts are aggregated to create consumer insights.

This report provides an overview of the online delivery (food + grocery) market across 9 regions: Singapore, Indonesia, Thailand, Vietnam, Philippines, Malaysia, Hong Kong, Taiwan, Japan.

ADDITIONAL NOTES

Not every online delivery company in these markets are included in this report, due to the fact that some may not send transactional email communications to users. Unless with special notation, food and grocery deliveries combined are defined as Online Delivery in this report.

DISCLAIMER

The information in this report is provided on an 'as is' basis, and is subject to change. It has been prepared solely for informational purposes. You should not construe any such information or other material as investment advice.

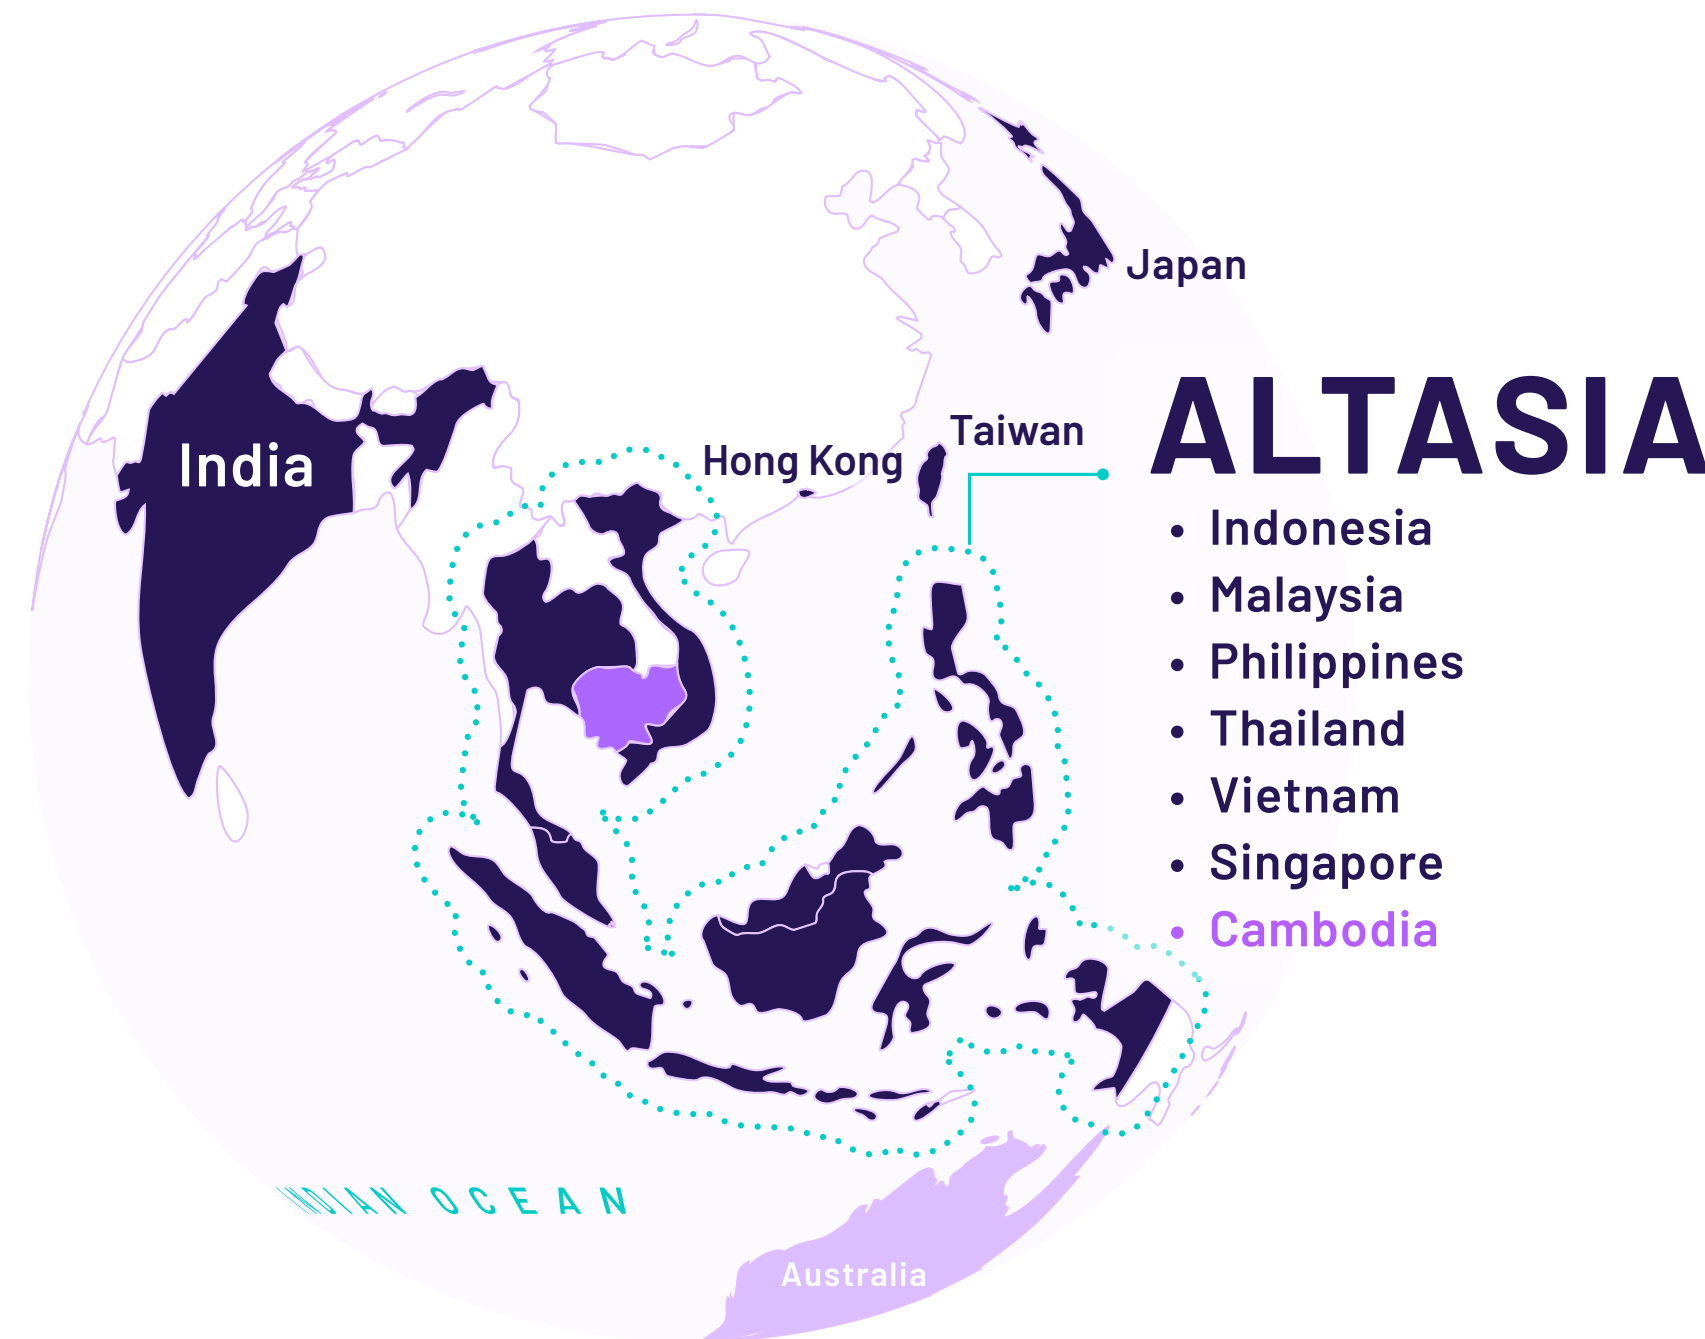

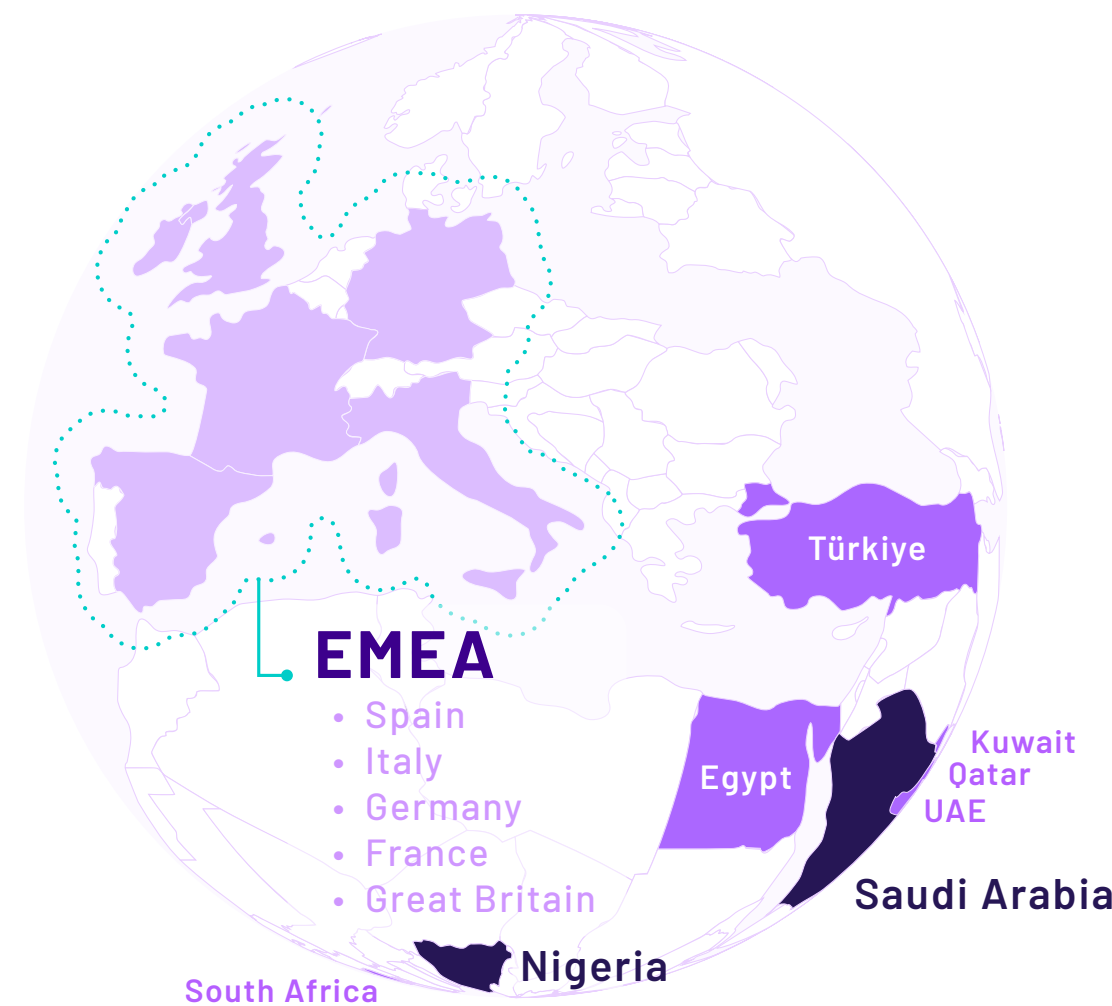

Measurable AI makes no representation or warranty, either express or implied, as to the accuracy or completeness of the information in the report, and shall not be liable for any loss arising from the use of this report.

PART I

ALTASIA ONLINE DELIVERY DEMAND & CONSUMPTION OVERVIEW 2019-2023

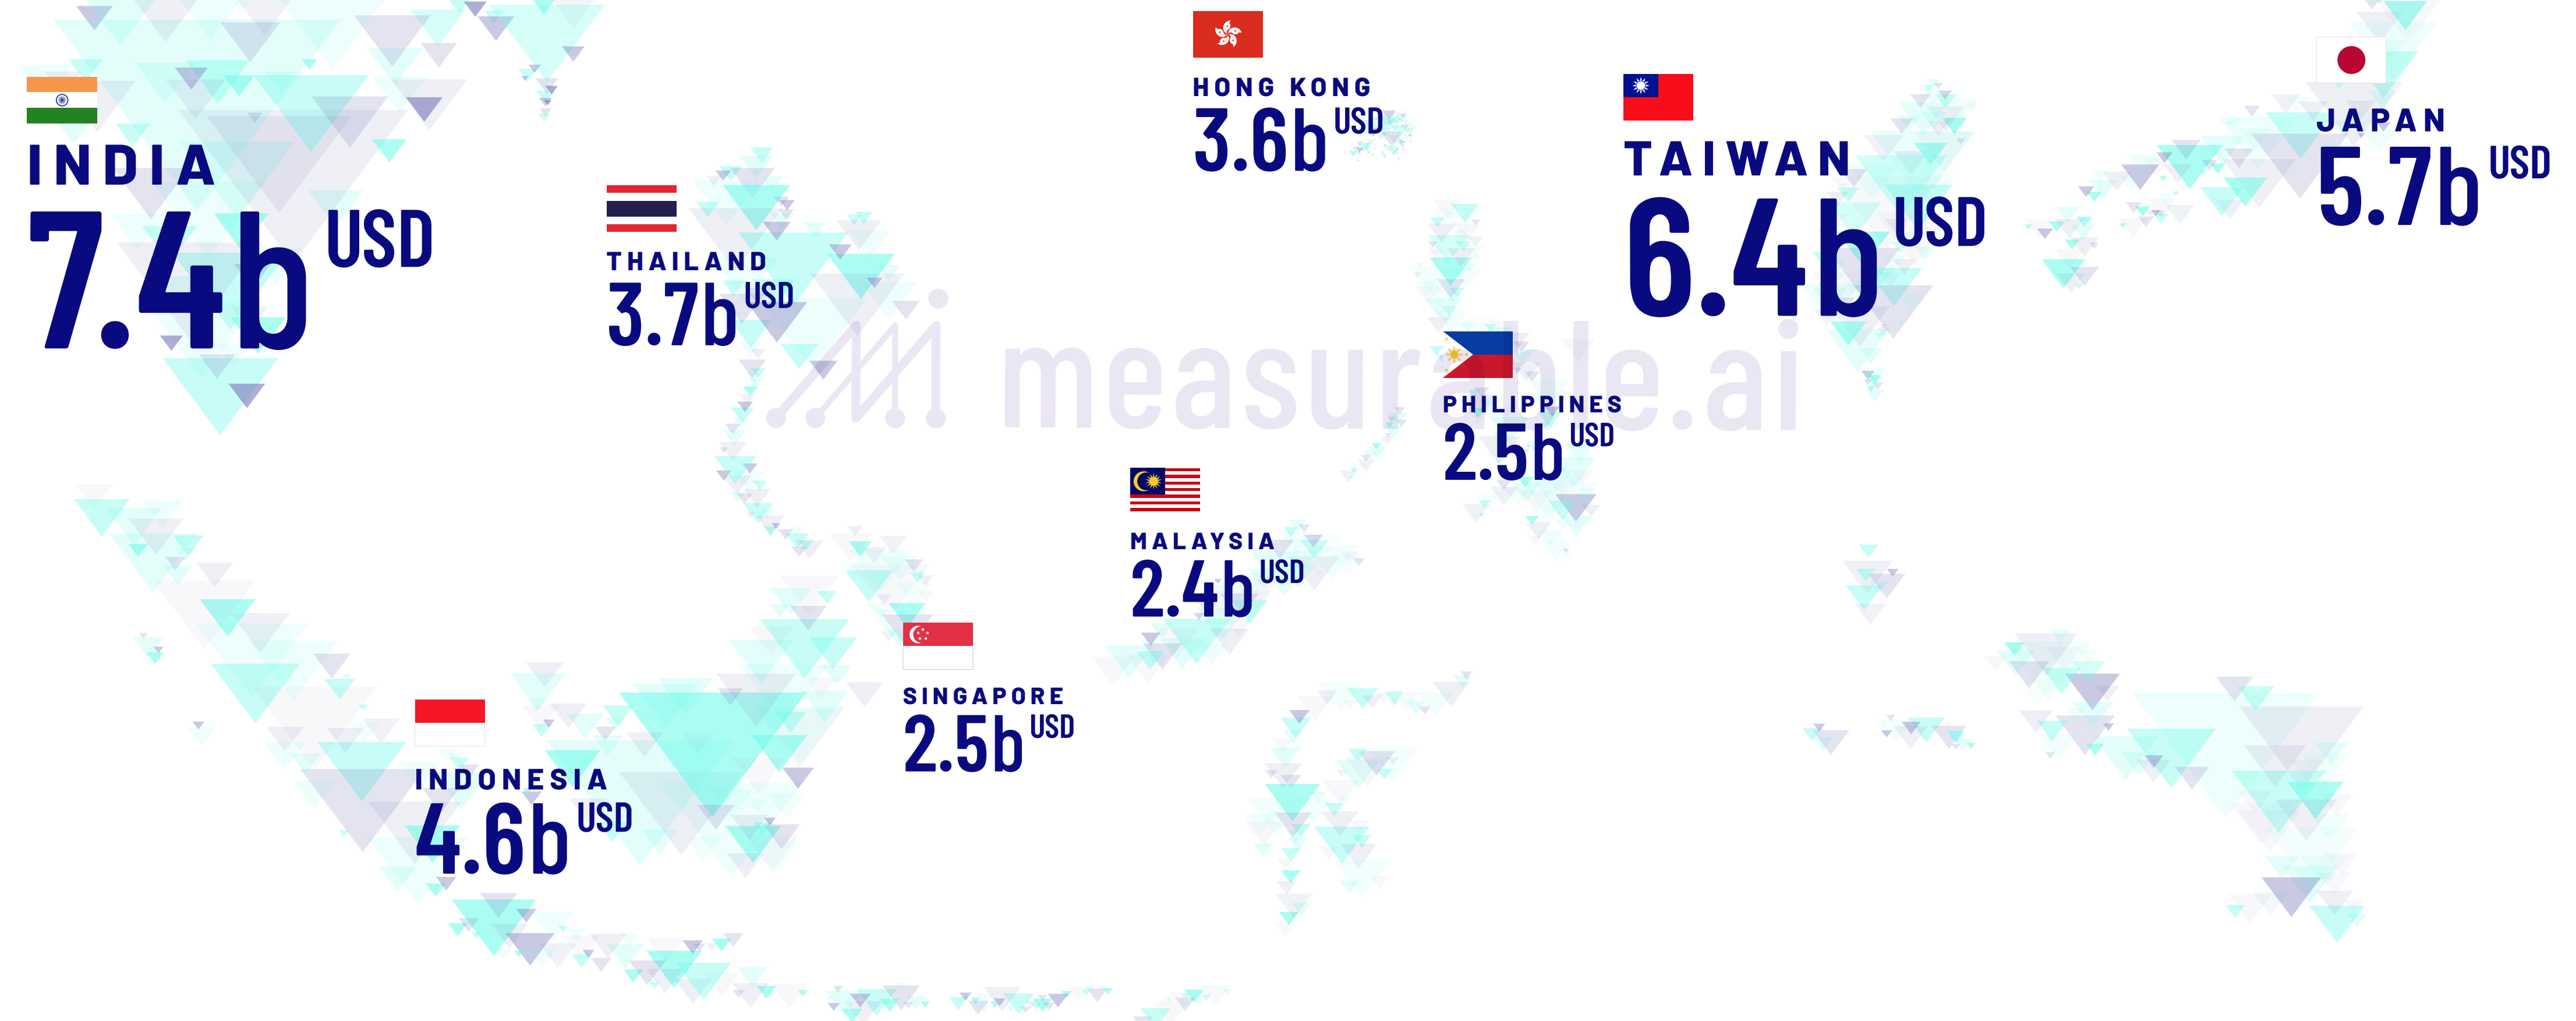

INTRODUCTION

Measurable AI's data shows that the online delivery market demand in AltAsia continues to grow steadily: Hong Kong, Taiwan and Singapore standing out as the regions with the most notable annual growth.

After market consolidation, the average order value ("AOV") per delivery has generally stabilized across most markets, showing a slight uptrend in 2023 as many companies turned towards enhancing profitability over expansion. However, Hong Kong deviated from this trend due to the entry of a new competitor in 2023, leading to a decline in AOV driven by heightened competition.

Hong Kong, Taiwan and Singapore are among the fastest growing markets in AltAsia in terms of YOY growth in market demand.

SINGAPORE ONLINE DELIVERY DEMAND & CONSUMPTION TREND

2019 2023

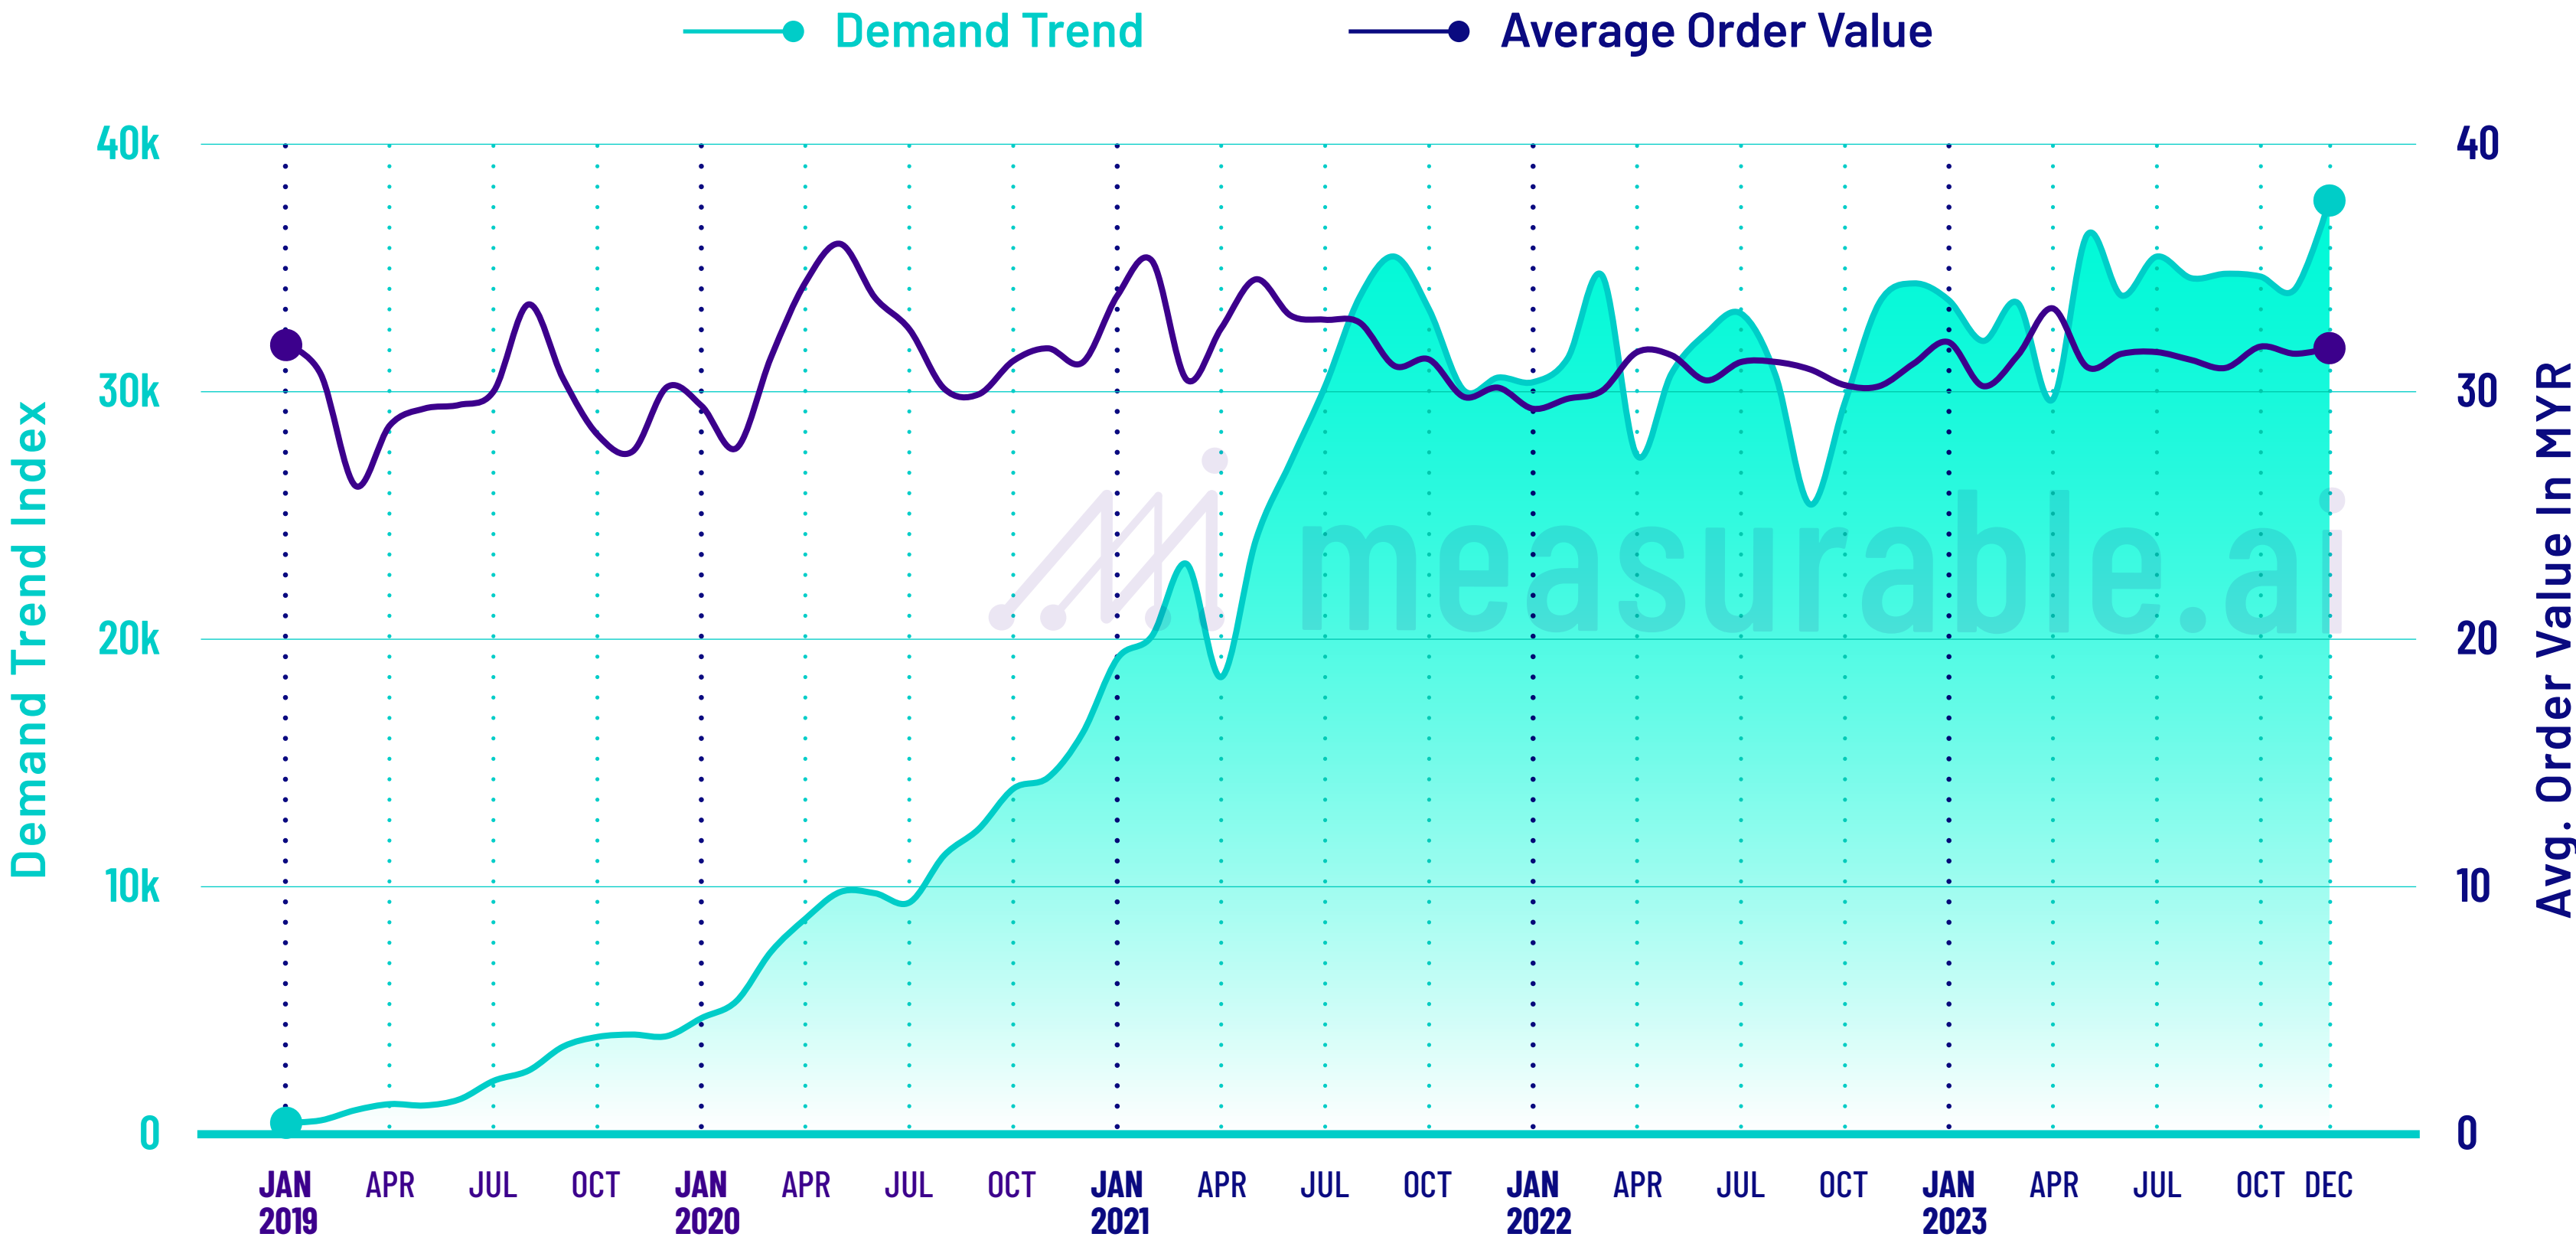

Singapore's online delivery demand trend grew at a 39.6% CAGR based on order volume throughout 2019 to 2023. Users' average spend per order on online delivery remains one of the highest in AltAsia, and continues to grow. It went from around 20 SGD in 2019 to 29 SGD in 2023, which also makes its market size one of the biggest in Southeast Asia.

Measurable AI: Singapore Online Delivery Demand Trend *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Online delivery orders include both food and grocery deliveries. Data range 2019 January to 2023 December. Food delivery companies included in this chart: Grab, Foodpanda, Deliveroo

MALAYSIA ONLINE DELIVERY DEMAND & CONSUMPTION TREND

2019 2023

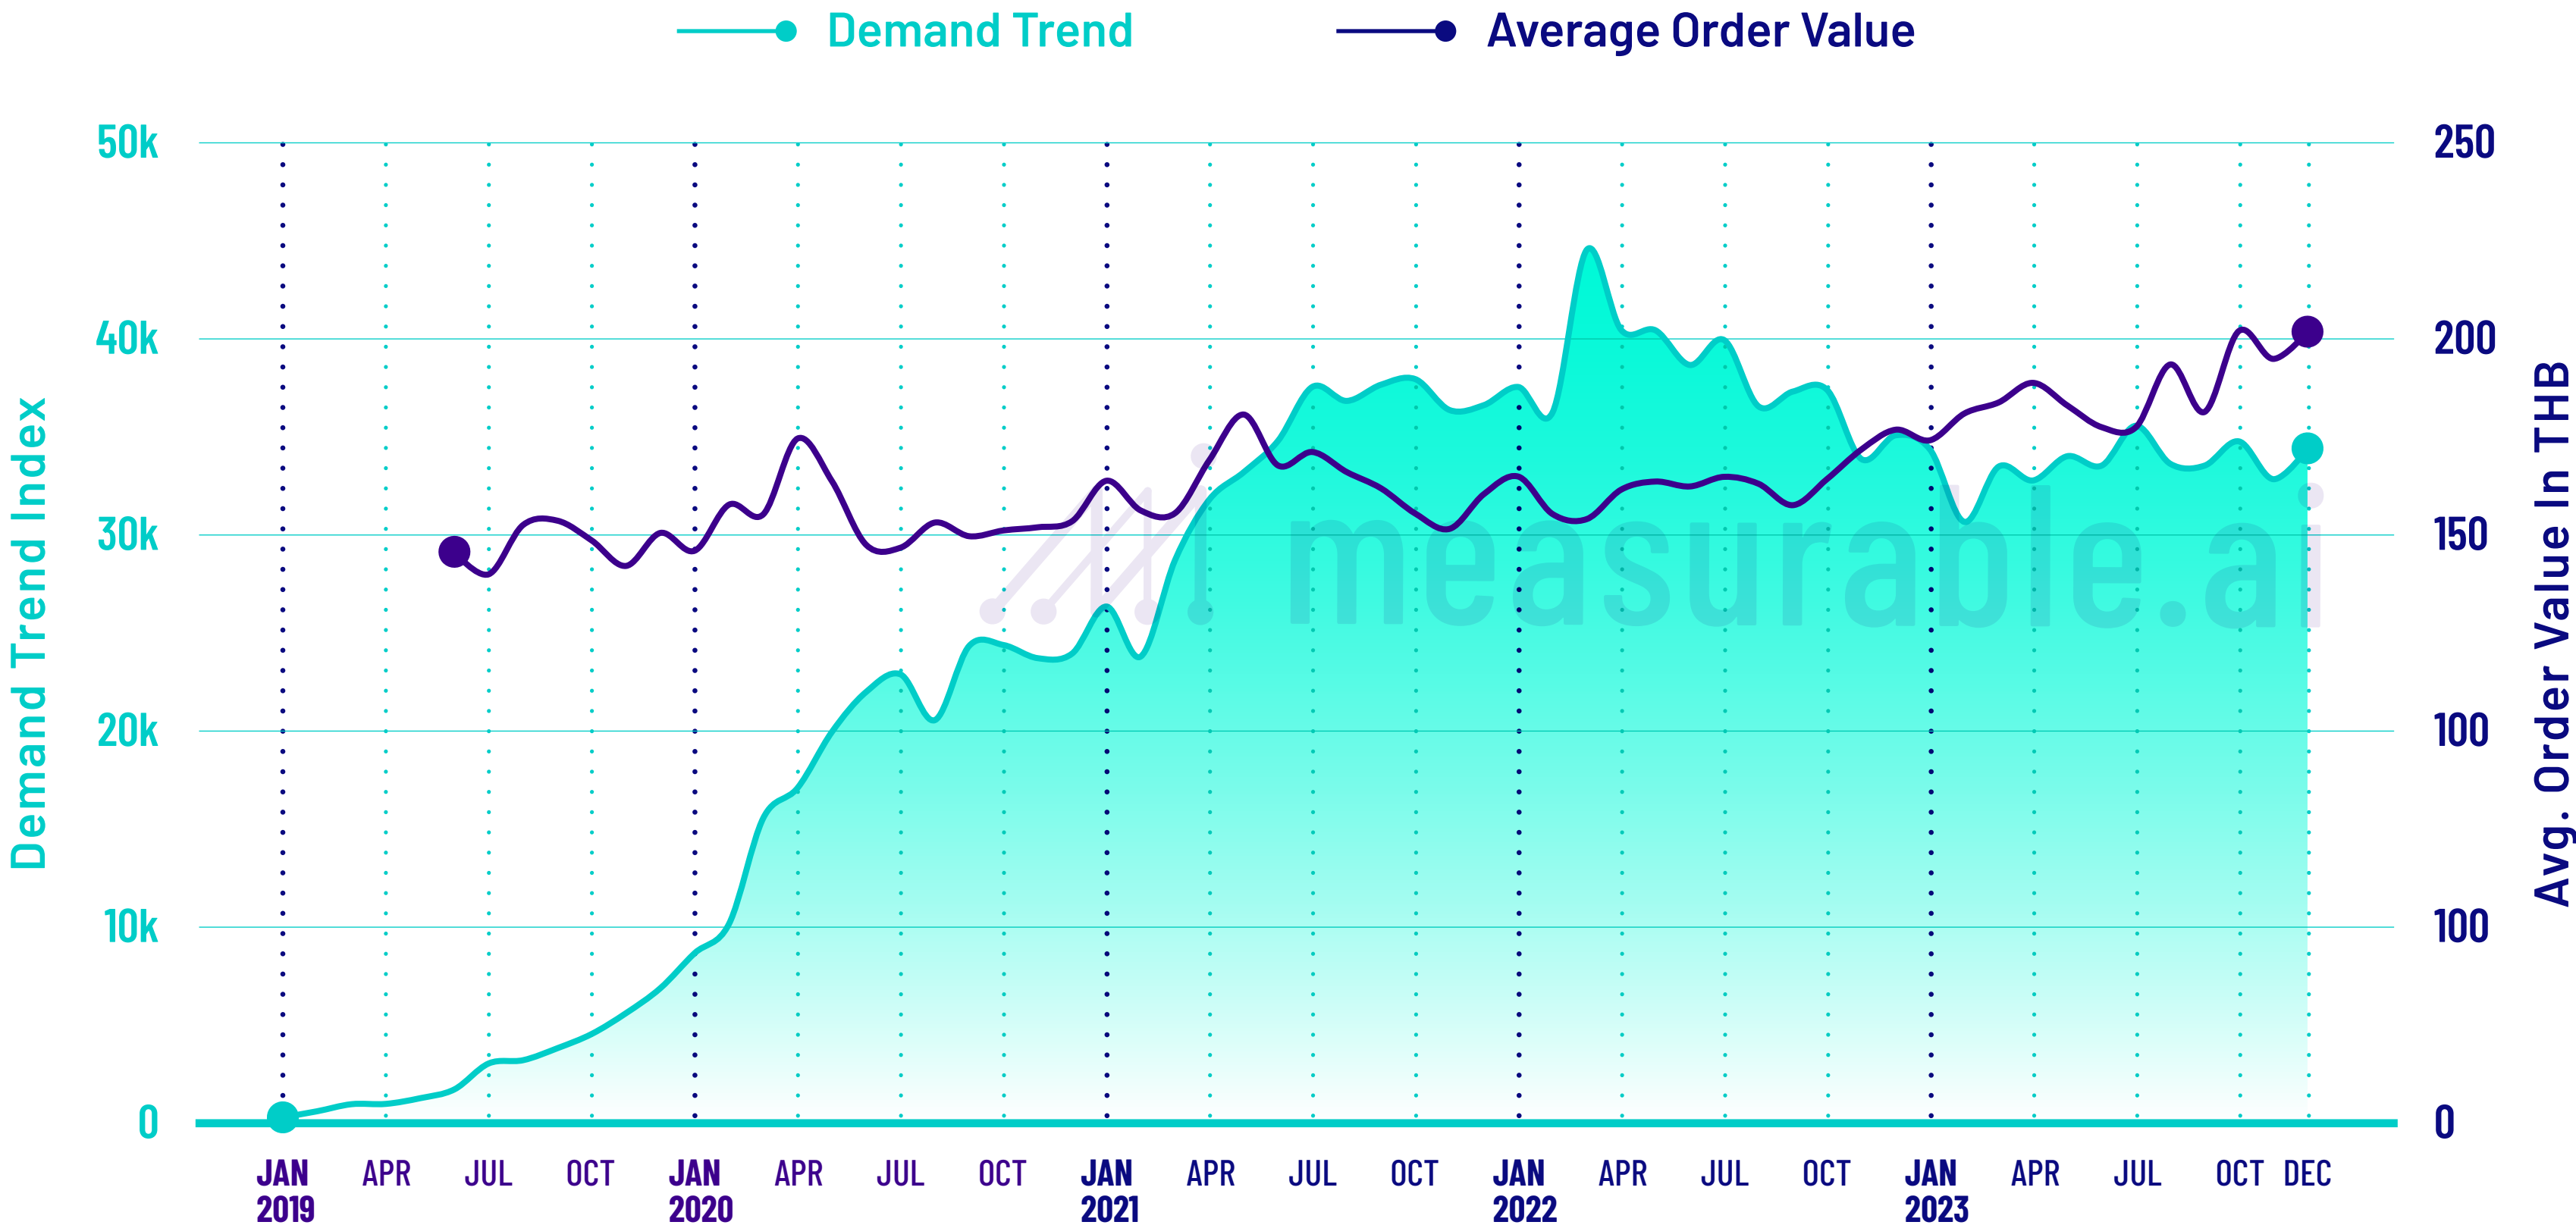

Malaysia's online delivery demand trend slowed down a bit in the last year, with only around 9.8% YOY growth in order volume. In terms of Average Order Value, it has been quite stable in the past 5 years, Malaysian users spend on average 30 MYR per order.

Measurable AI: Malaysia Online Delivery Demand Trend *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Online delivery orders include both food and grocery deliveries. Data range 2019 January to 2023 December. Food delivery companies included in this chart: Grab, Foodpanda

THAILAND ONLINE DELIVERY DEMAND & CONSUMPTION TREND

2019 2023

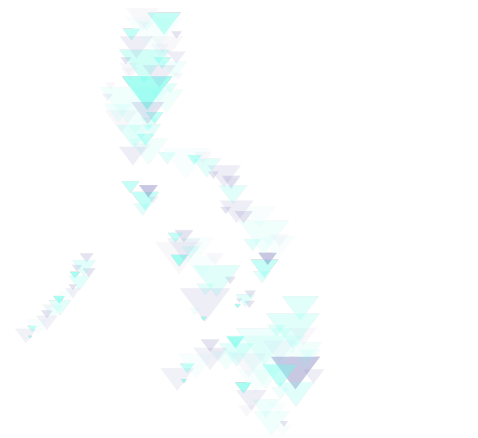

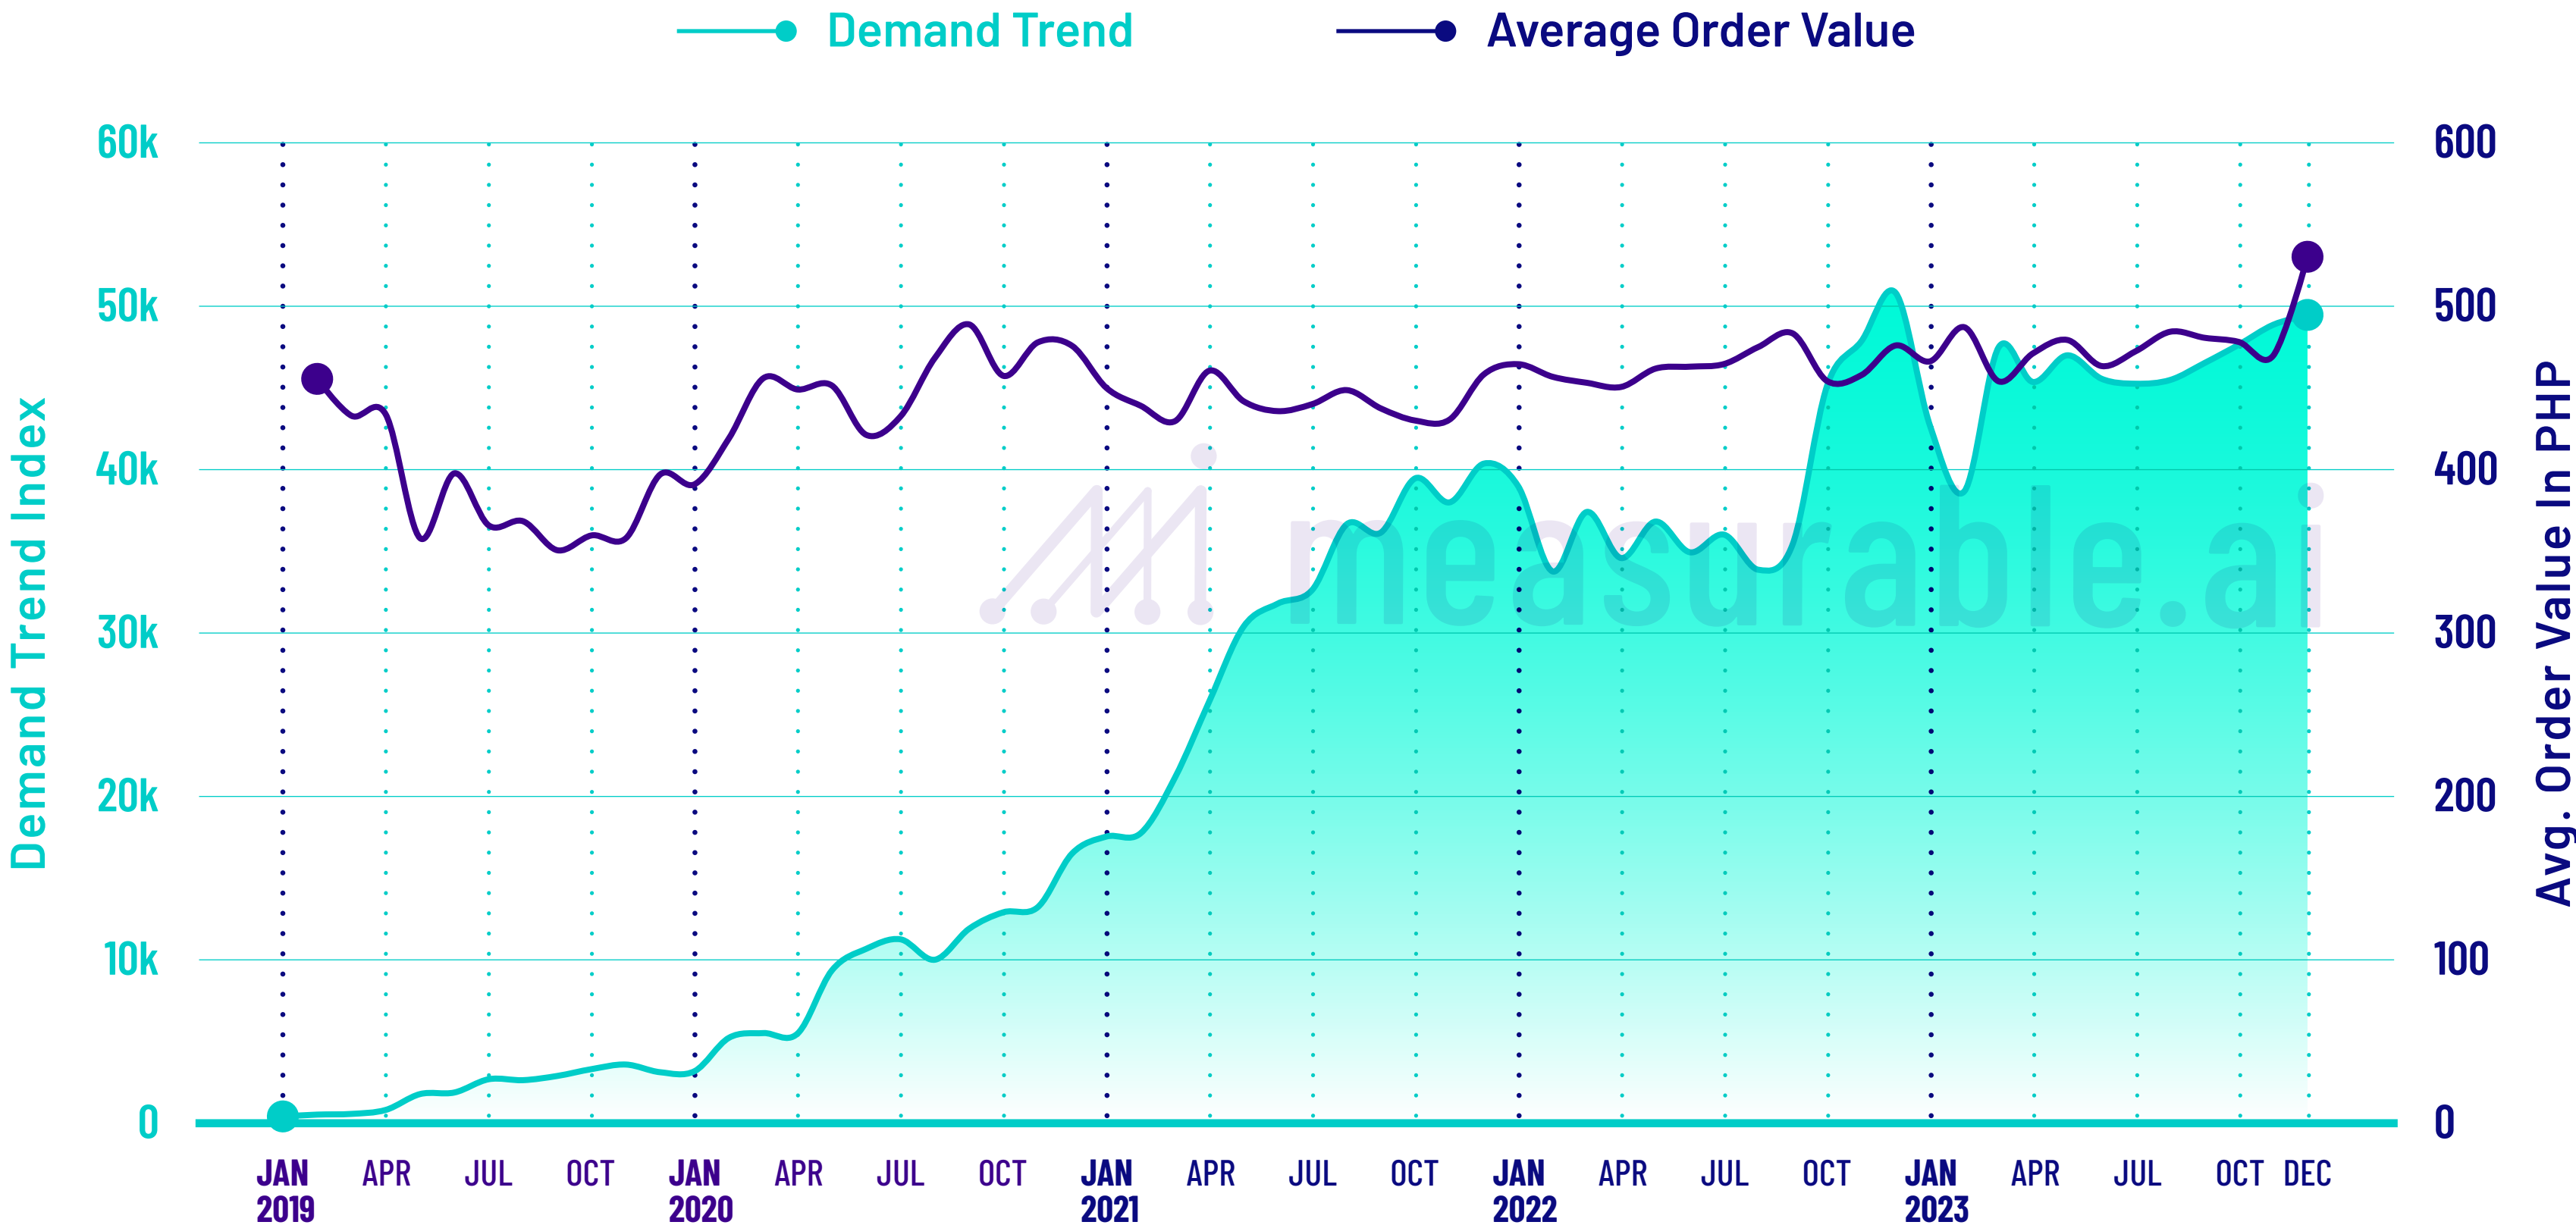

Thailand's market demand trend slowed down a bit in 2023, but the AOV witnessed an uptrend growth, from around 160 THB to almost 190 THB.

Measurable AI: Thailand Online Delivery Demand Trend *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Online delivery orders include both food and grocery deliveries. Data range 2019 January to 2023 December. Food delivery companies included in this chart: Grab, Foodpanda

PHILIPPINES ONLINE DELIVERY DEMAND & CONSUMPTION TREND

2019 2023

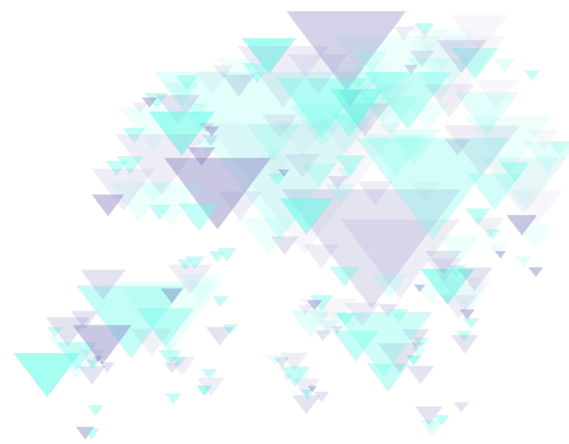

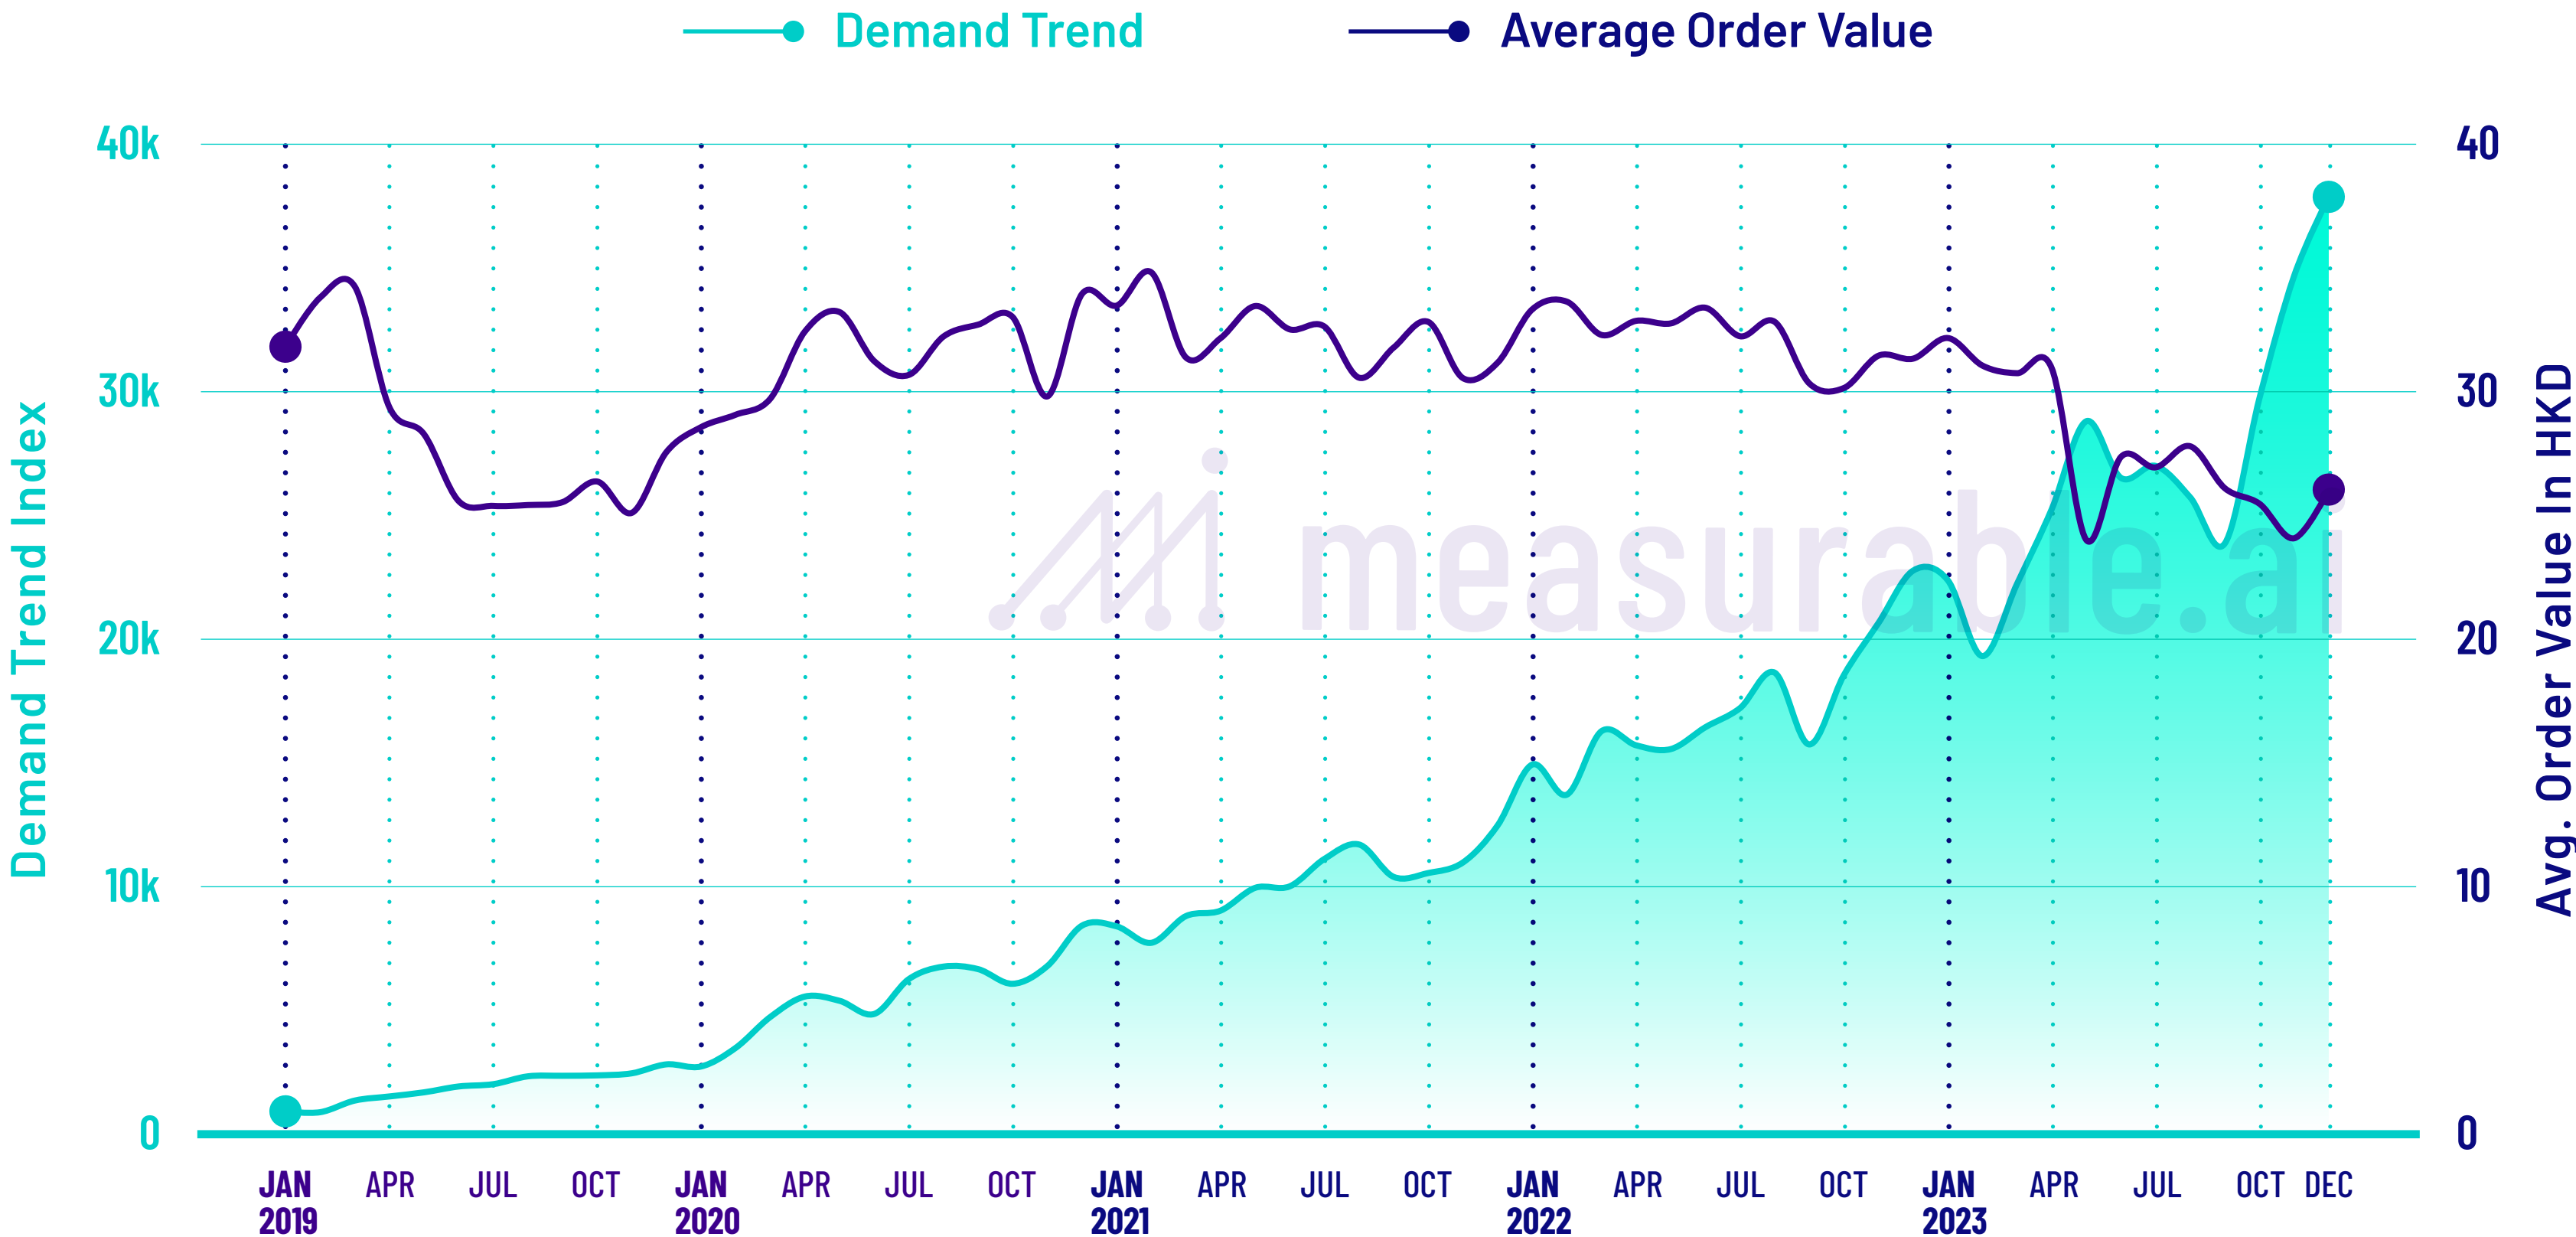

Philippines is among the fastest growing markets for online delivery in Southeast Asia with around 87% CAGR growth over the past five years in terms of market demand. In 2023, the order volume saw some slackening with around 18% YOY growth rate. The AOV has risen slightly from around 460 to 470 PHP over the year 2023.

Measurable AI: Philippines Online Delivery Demand Trend *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Online delivery orders include both food and grocery deliveries. Data range 2019 January to 2023 December. Food delivery companies included in this chart: Grab, Foodpanda

HONG KONG ONLINE DELIVERY DEMAND & CONSUMPTION TREND

2019 2023

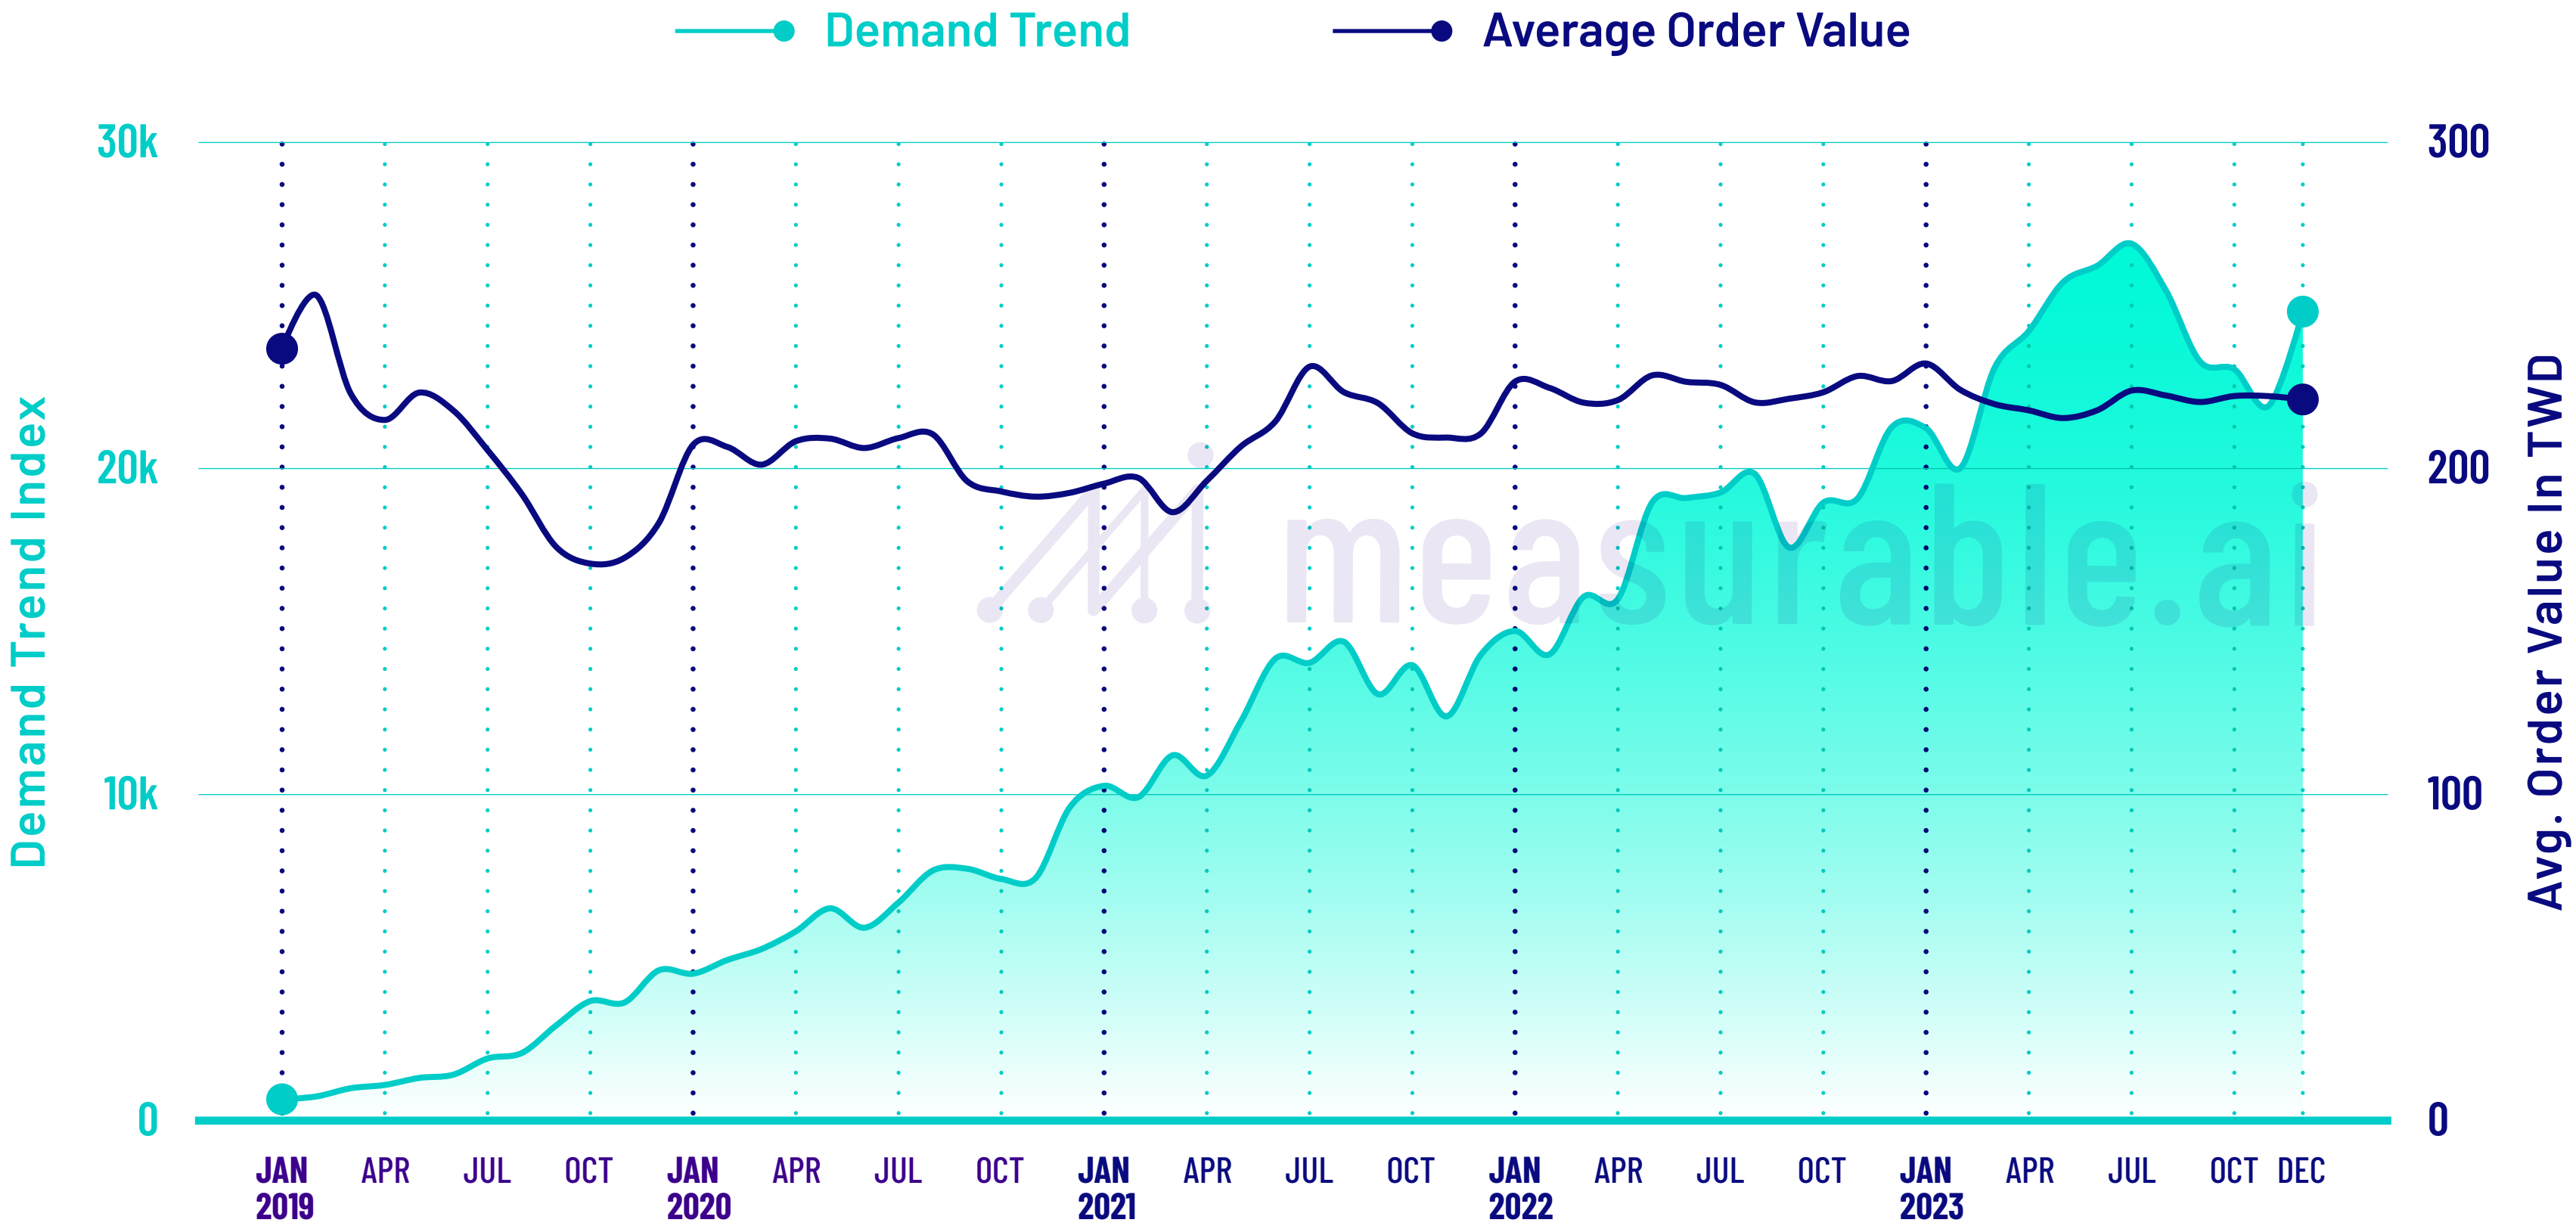

Hong Kong experienced remarkable market demand growth, boasting a YOY growth rate of approximately 57%. Nonetheless, the AOV of Hong Kong users plummeted significantly in 2023 due to the entry of a new and fierce competitor.

Measurable AI: Hong Kong Online Delivery Demand Trend *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Online delivery orders include both food and grocery deliveries. Data range 2019 January to 2023 December. Food delivery companies included in this chart: UberEats, Deliveroo, Keeta, Foodpanda

TAIWAN ONLINE DELIVERY DEMAND & CONSUMPTION TREND

2019 2023

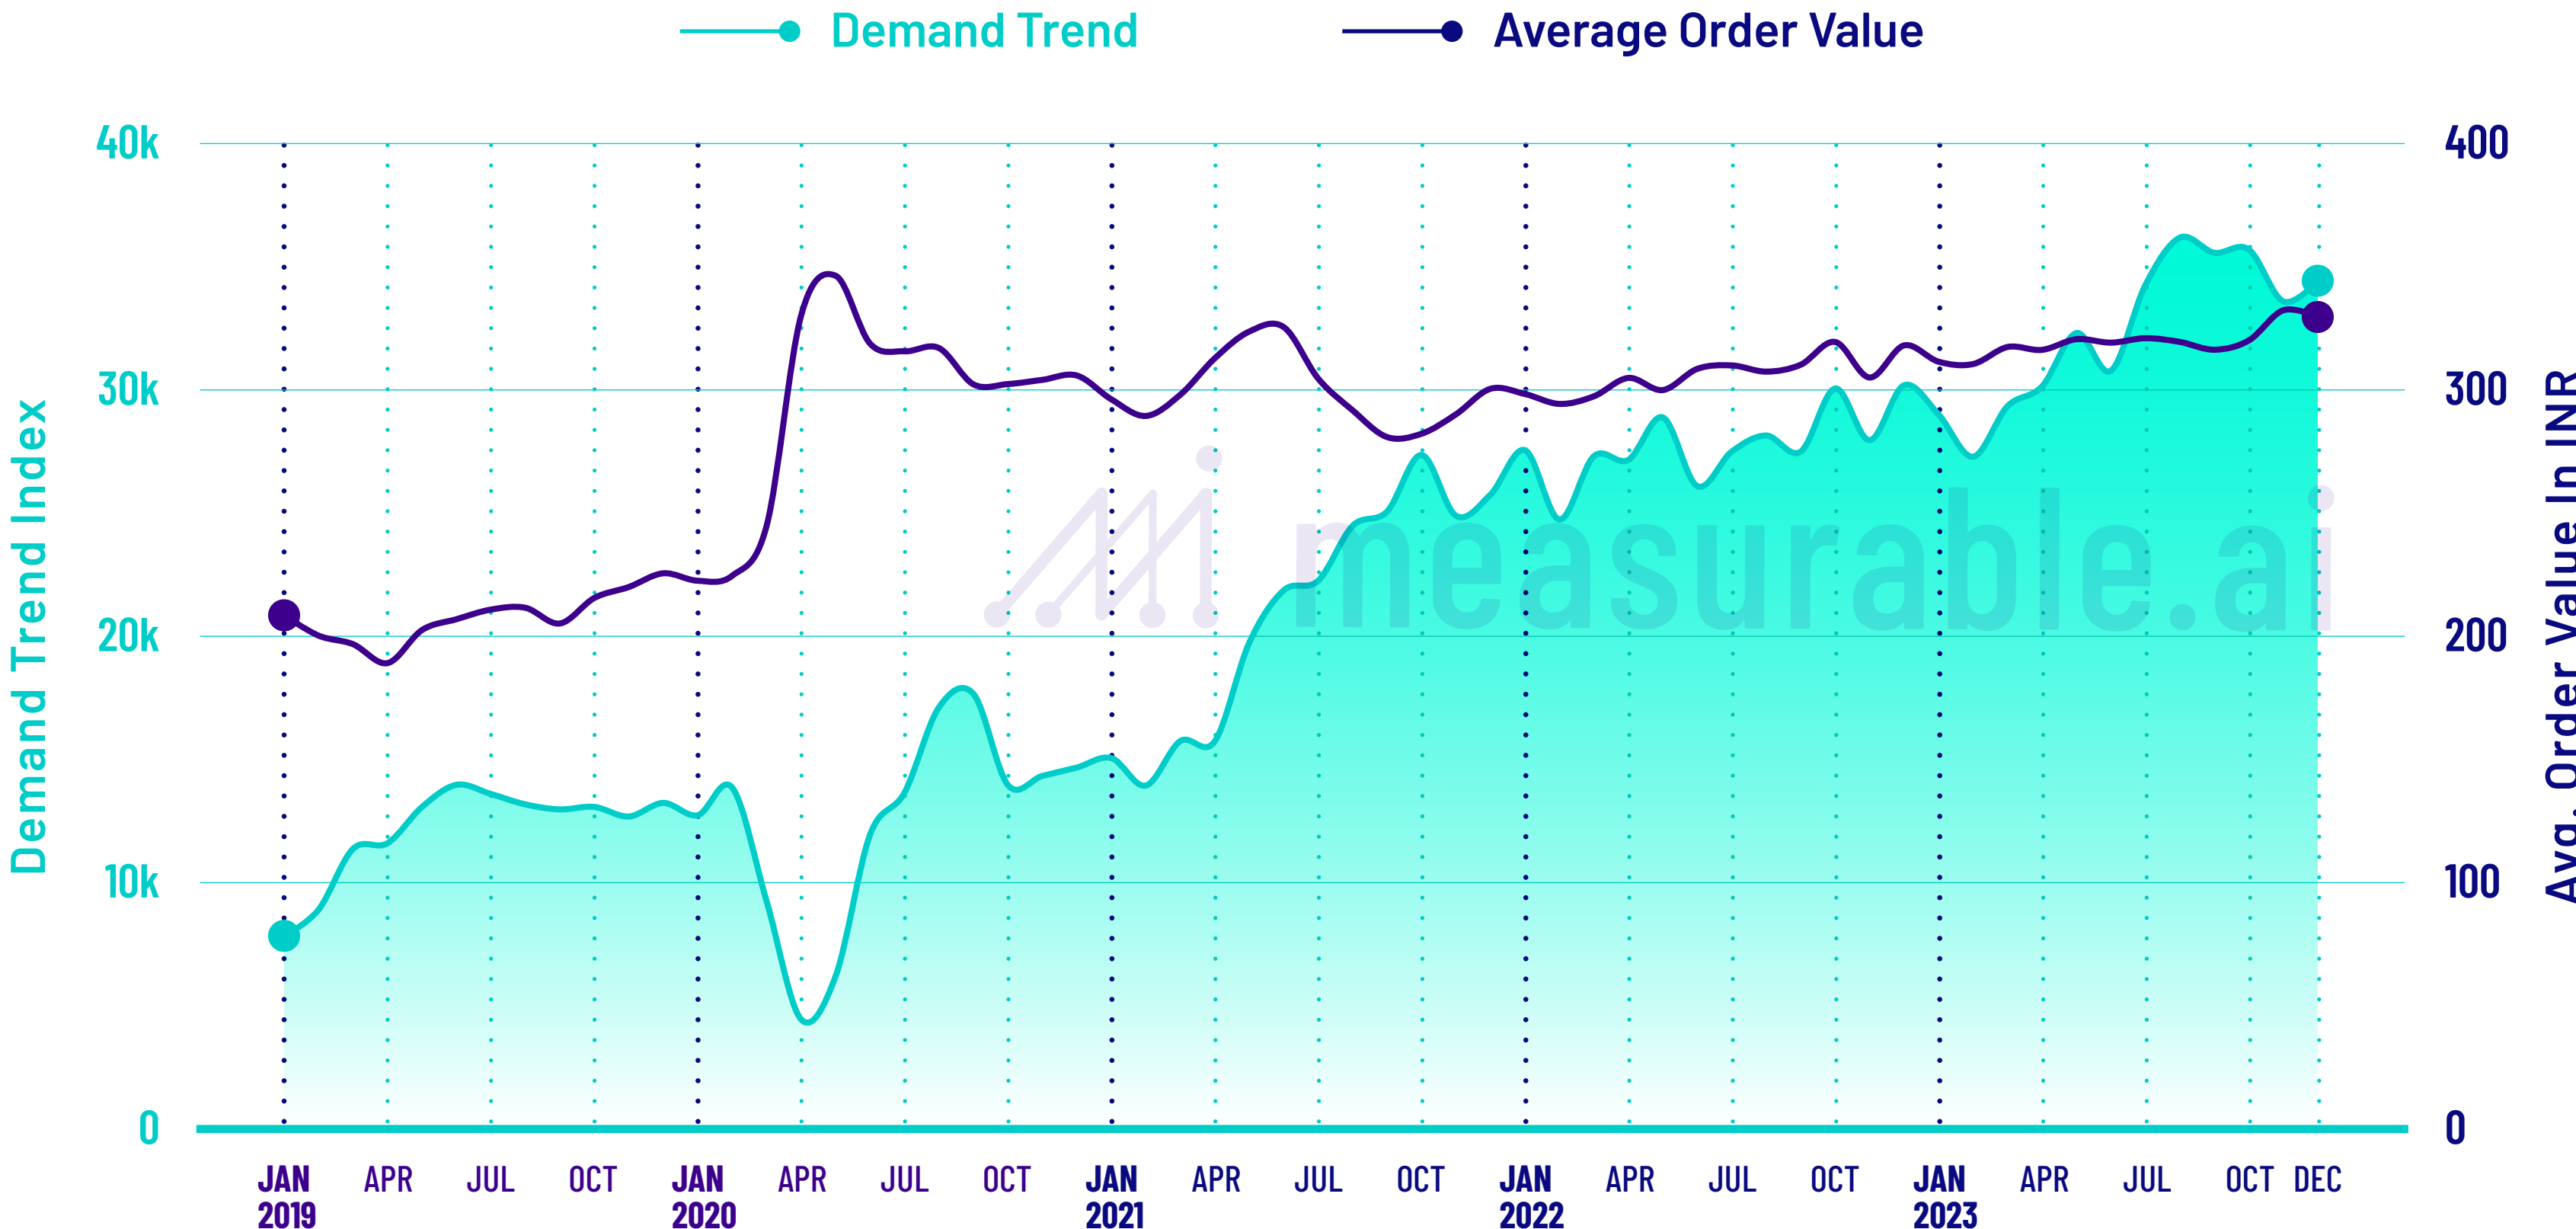

Market demand in the Taiwanese online delivery market has been steadily growing over the past five years with around 62.8% CAGR in terms of order volume. In 2023 the momentum continued with around 32.7% YOY growth rate. The AOV(after incentives) in Taiwan has been mostly stable, and hovers around 220 TWD.

Measurable AI: Taiwan Online Delivery Demand Trend *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Online delivery orders include both food and grocery deliveries. Data range 2019 January to 2023 December. Food delivery companies included in this chart: UberEats, Foodpanda

INDIA RIDE-HAILING DEMAND & CONSUMPTION TREND

2019 2023

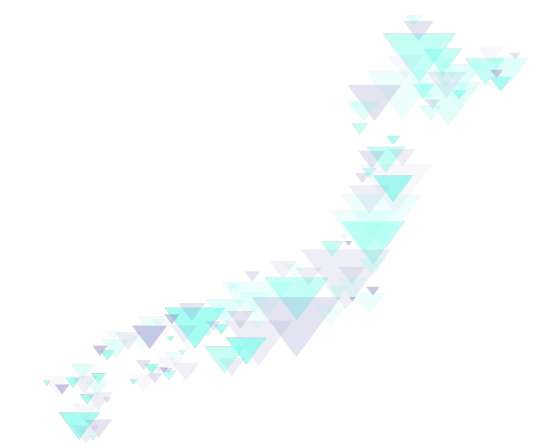

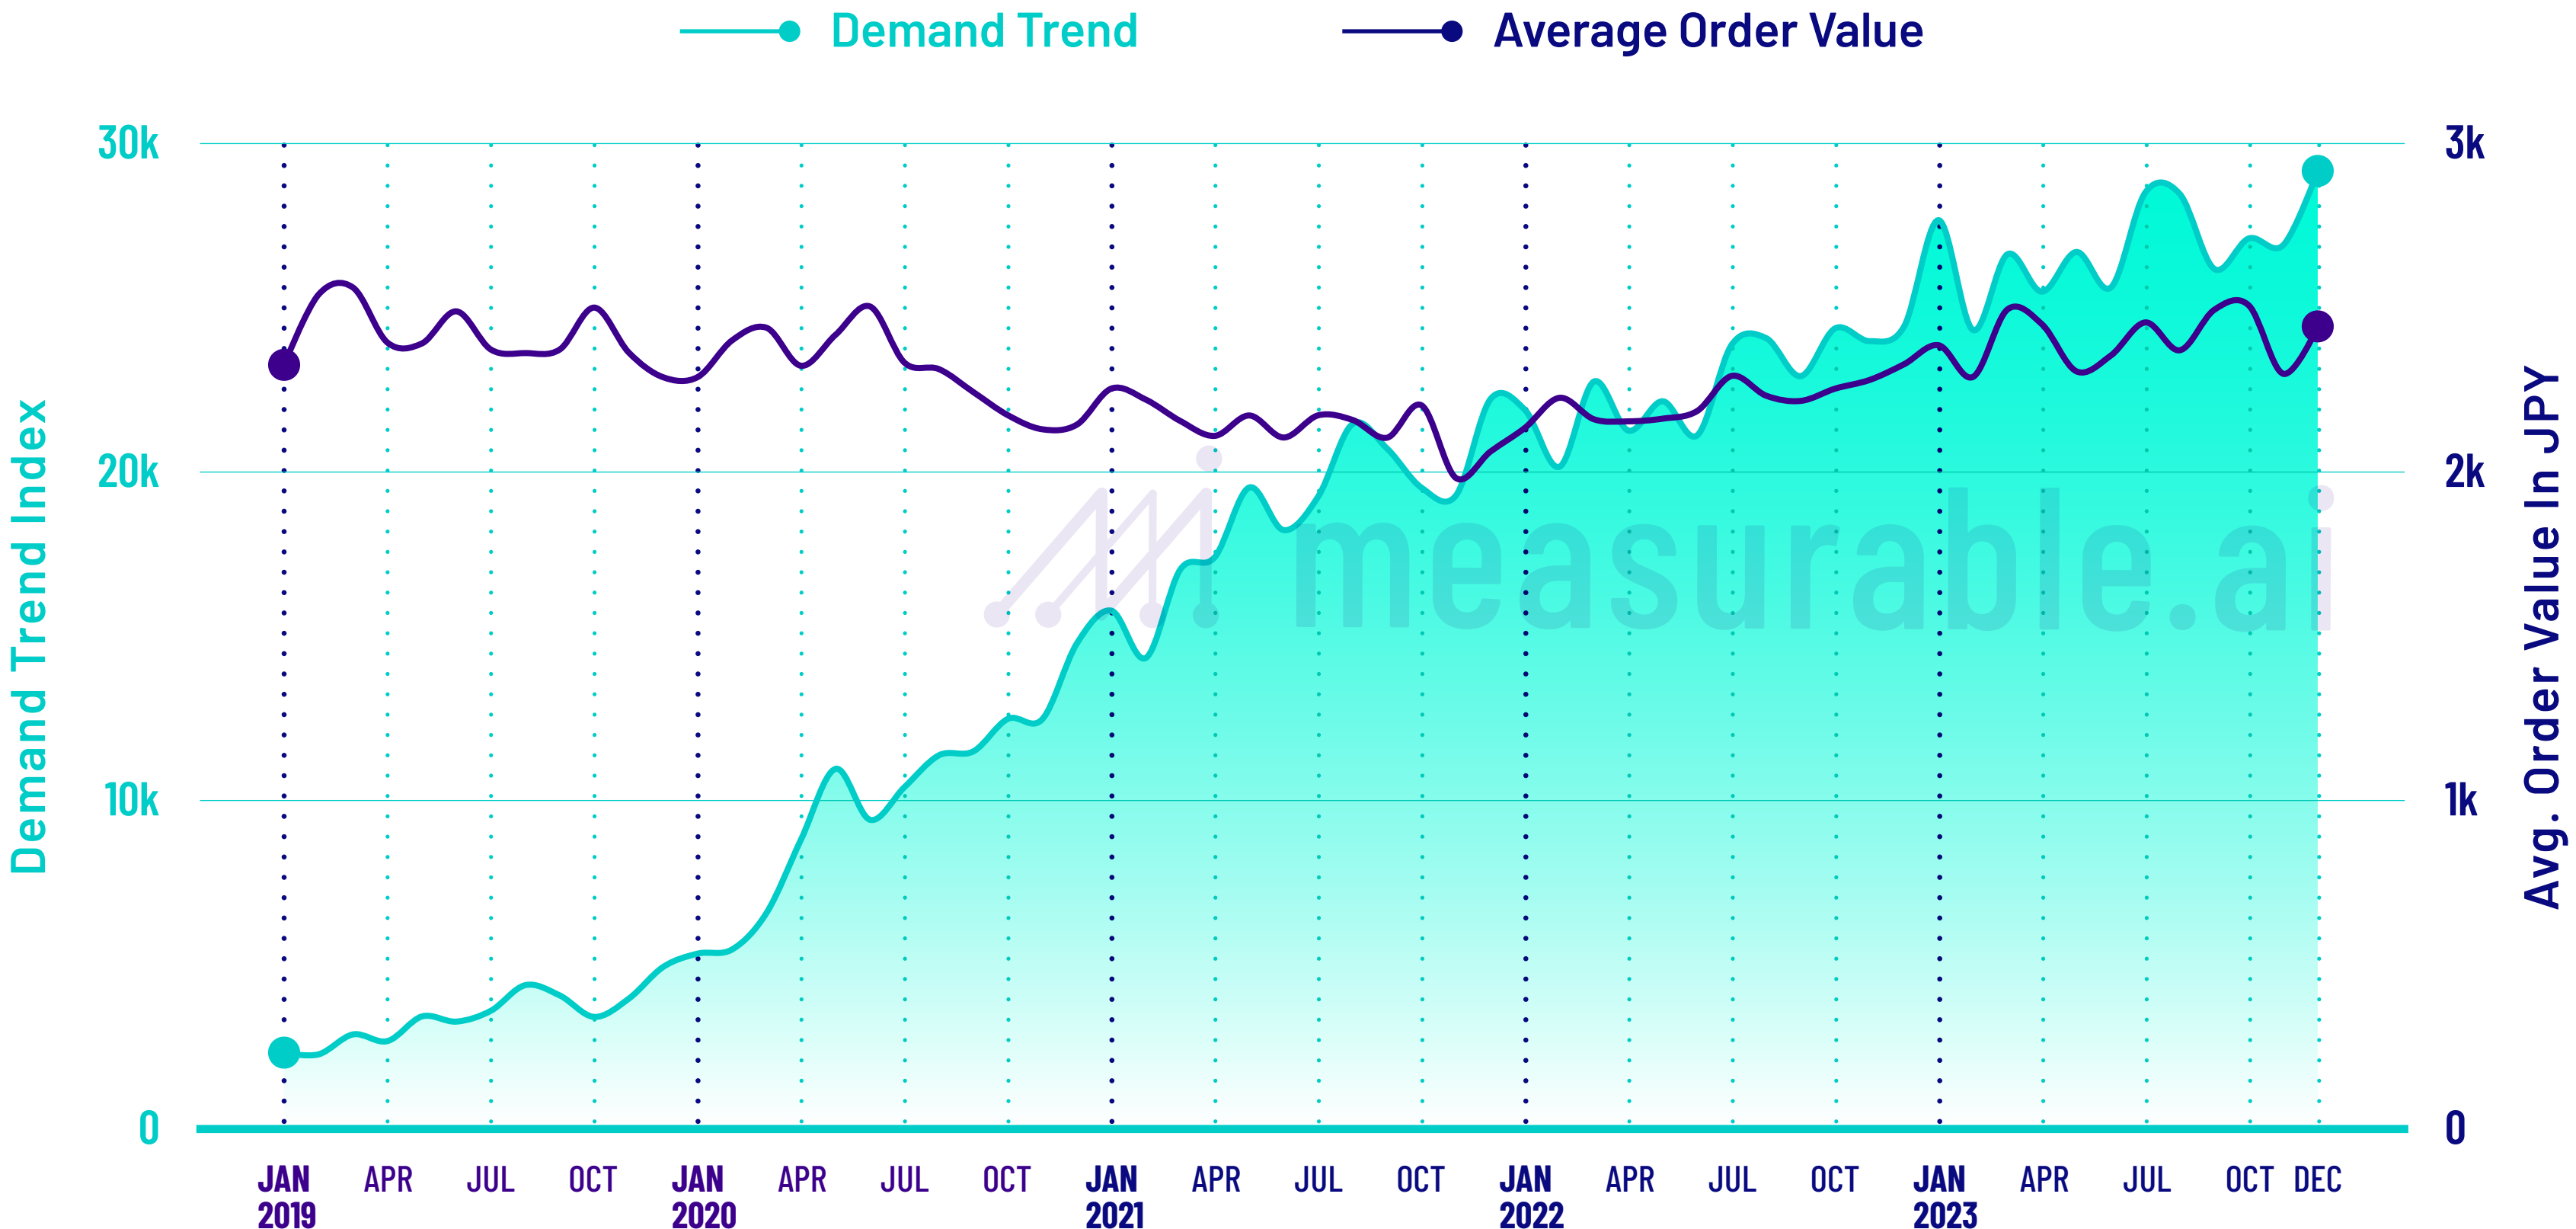

Except for the sharp drop during the pandemic, the overall market demand in India online delivery remains a steady growth, with a CAGR of 21.7% based on order volume from 2019 to 2023, and 16.6% YOY growth in 2023. The AOV in India peaked around April 2020 and has remained around 300 - 320 INR since.

Measurable AI: India Online Delivery Demand Trend *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Measurable AI: Indonesia Online Delivery Demand Trend *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Only Food delivery orders (without grocery) are included in this chart. Data range 2022 April to 2023 December. Food delivery companies included in this chart: Grab, Goto

PART II

ALTASIA ONLINE DELIVERY MARKET INCENTIVE TREND OVERVIEW 2023

INTRODUCTION

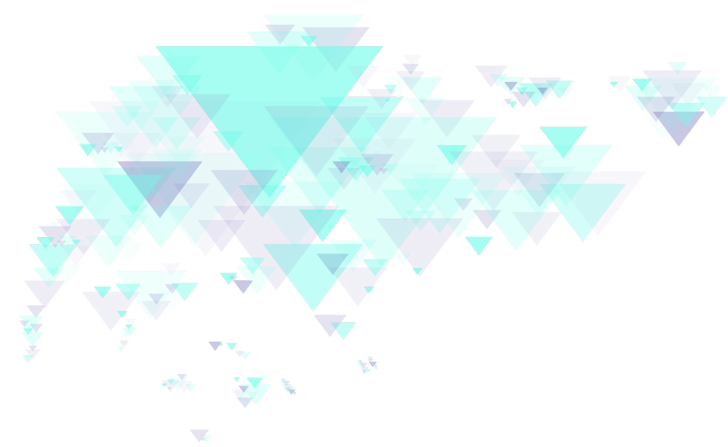

After years of competition and market consolidation, some of the major players in AltAsia online food delivery have witnessed bottom-line growth in food delivery for the first time in 2023 thanks to steady consumer demand and user loyalty.

Profitability has become the key goal for most of the players across AltAsia markets. In this analysis, we leverage Measurable AI's e-receipt data to examine the incentive trends in each market.

In certain markets like Japan and Taiwan, the share of orders with incentives gradually declined. However, in some highly competitive markets like Indonesia and Hong Kong, the incentive rate remains high, with some growth observed in 4Q23.

SINGAPORE ONLINE DELIVERY MARKET INCENTIVE TREND

2023

In Singapore, the overall incentive trend in online food delivery has grown throughout 2023, from around 38% to 45%.

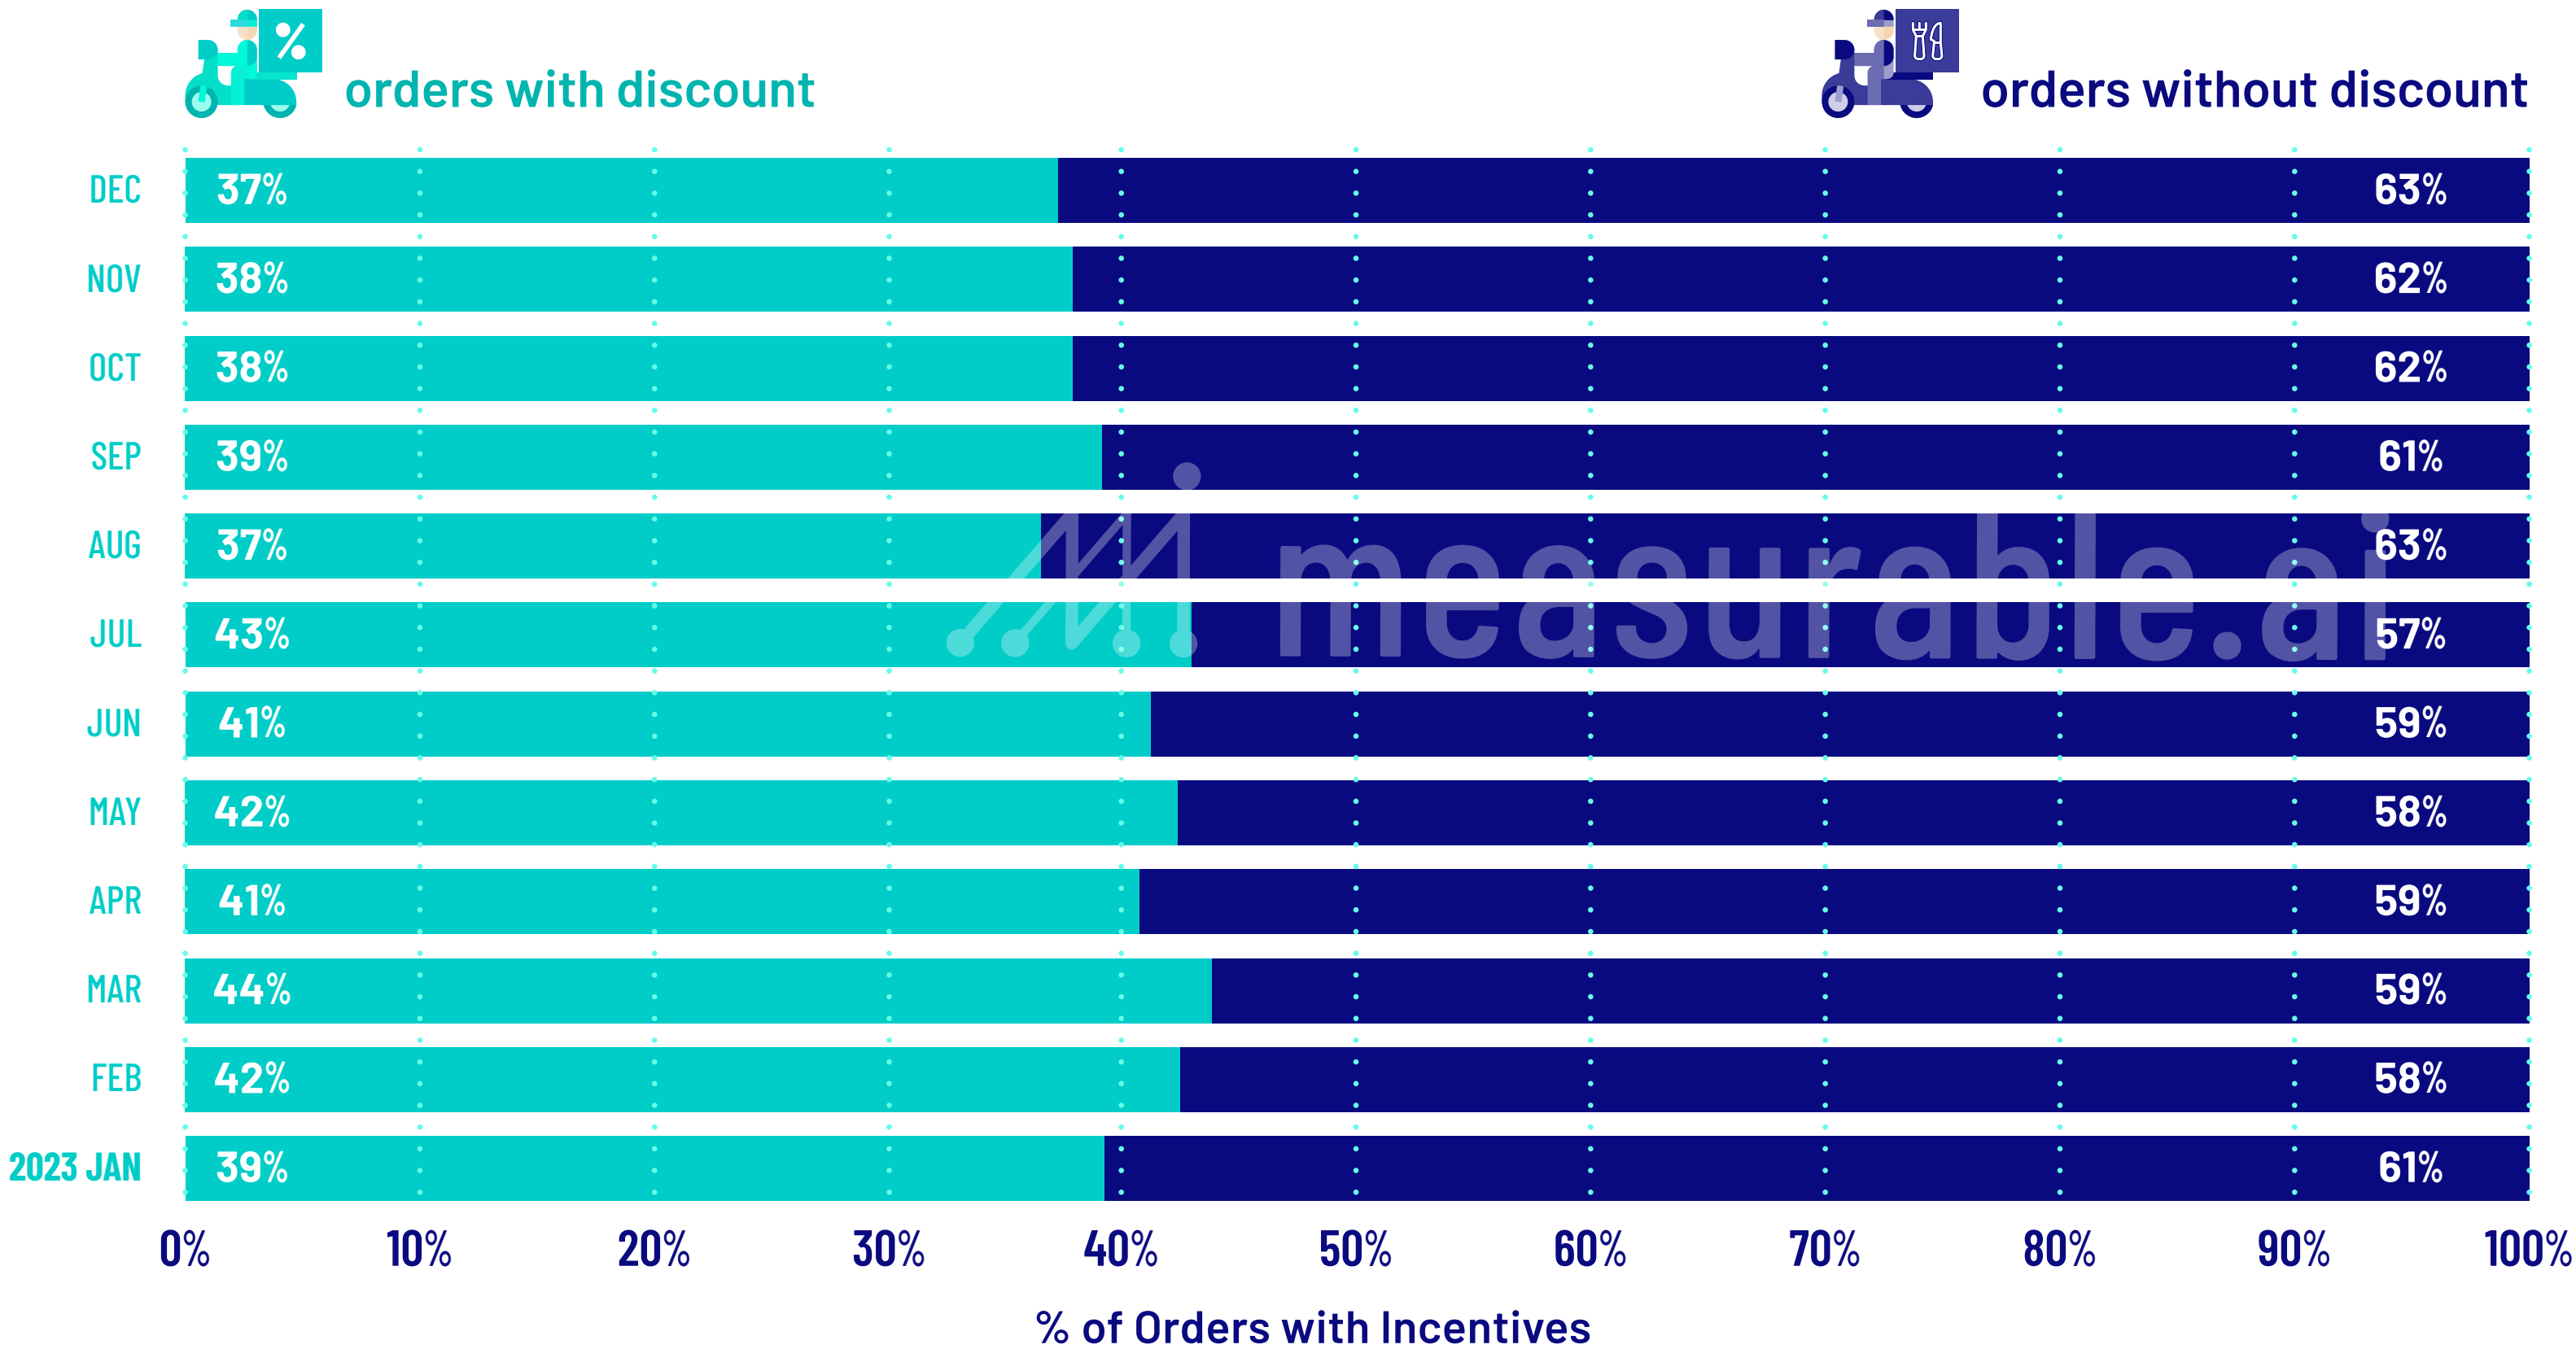

Measurable AI: Singapore Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: Foodpanda, Grab

MALYASIA ONLINE DELIVERY MARKET INCENTIVE TREND

2023

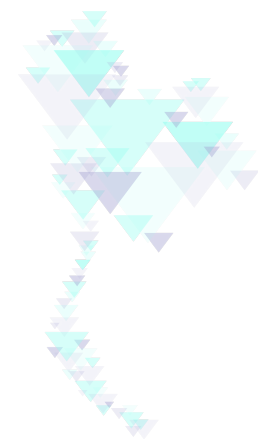

In Malaysia, the incentive rate has dropped throughout 2023, from around 42% in 1Q to 38% in 4Q. Also, the majority of the online food delivery orders came with no promotions in 2023.

Measurable AI: Malaysia Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: Foodpanda, Grab

THAILAND ONLINE DELIVERY MARKET INCENTIVE TREND

2023

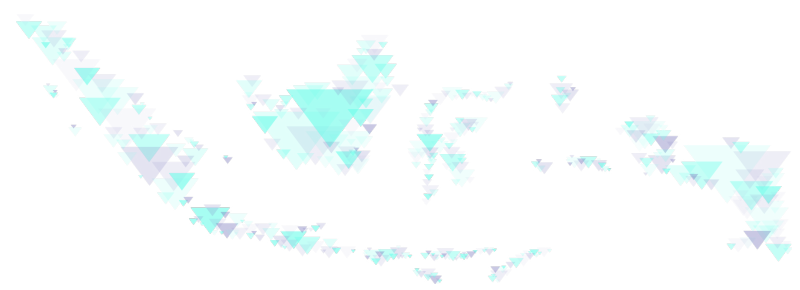

Despite the intense competition in Thailand's online food delivery industry, the incentive rate has remained stable, hovering at around 33% in 2023. This is relatively low compared to all the other AltAsia markets discussed in this report.

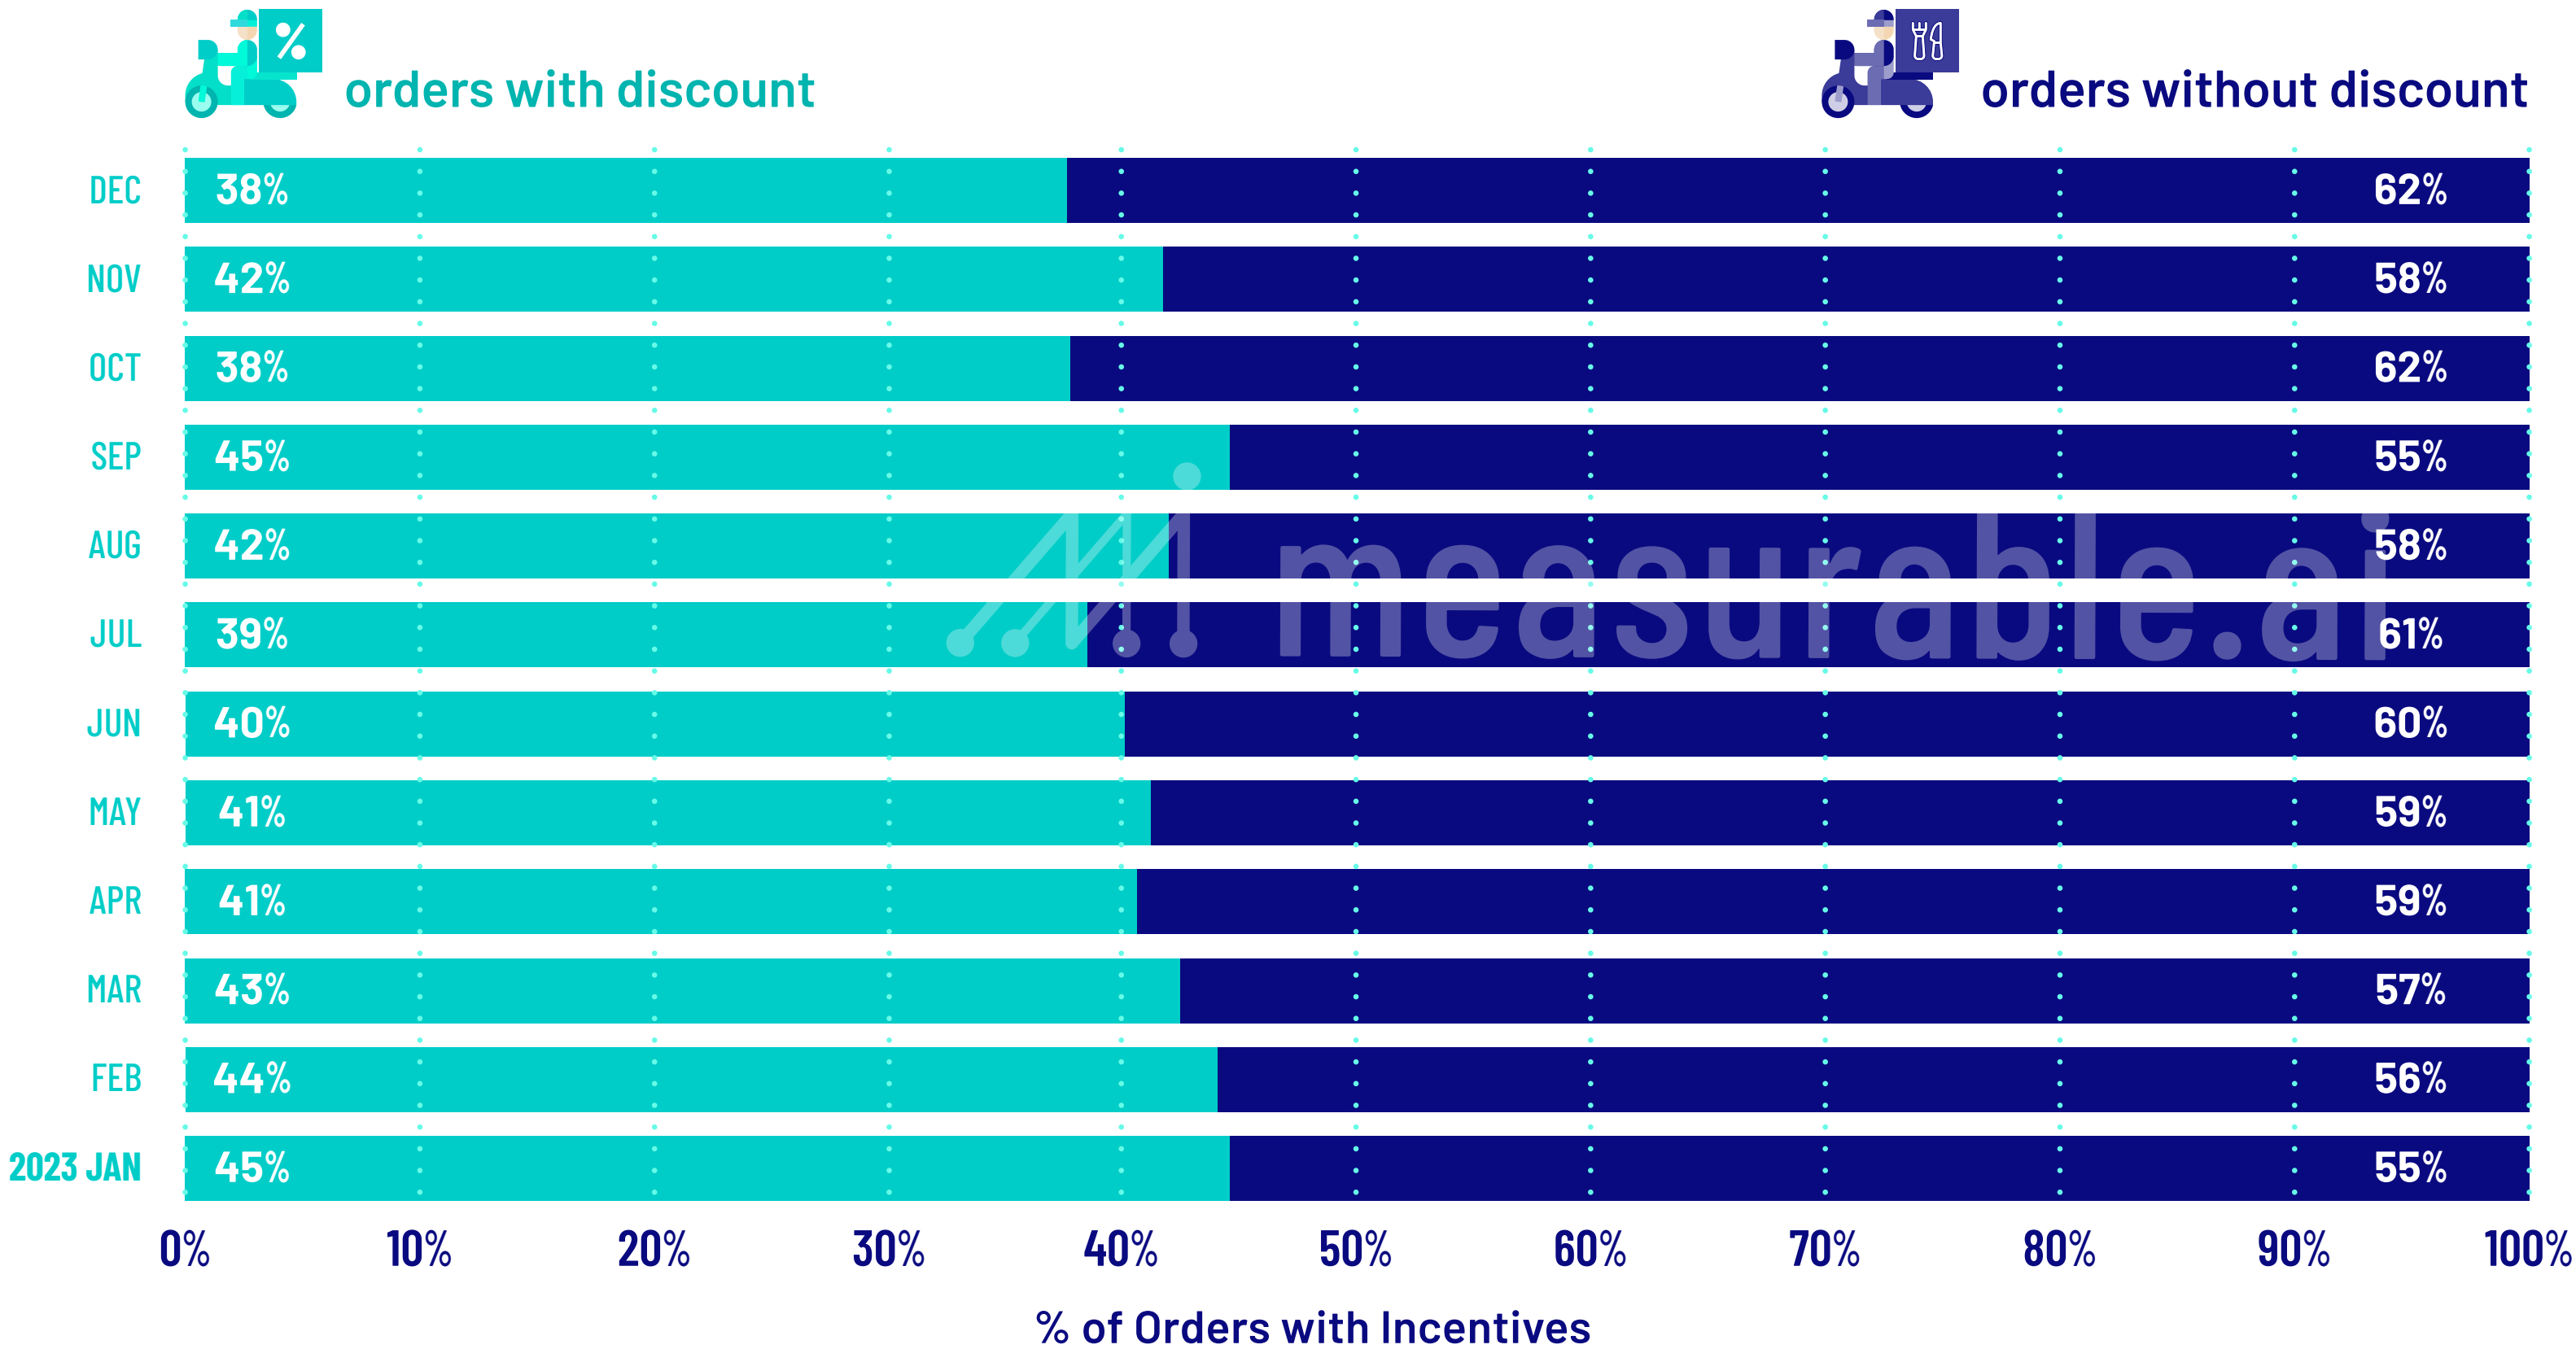

Measurable AI: Thailand Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: Foodpanda, Grab

PHILIPPINES ONLINE DELIVERY MARKET INCENTIVE TREND

2023

A slight downtrend in incentive rate is seen in Philippines online food delivery orders throughout 2023. As of 4Q, it's around 39%. Overall, the majority of the orders do not come with any promotions.

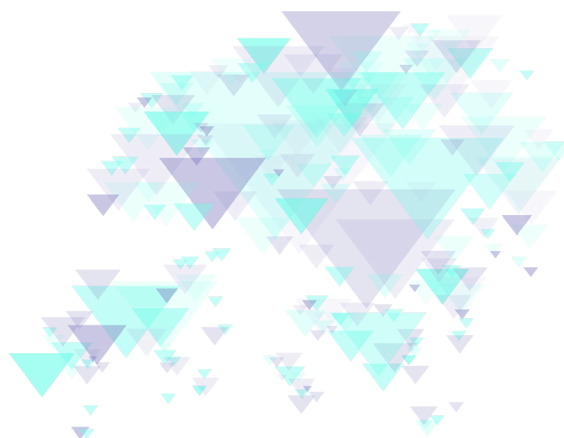

Measurable AI: Philippines Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: Foodpanda, Grab

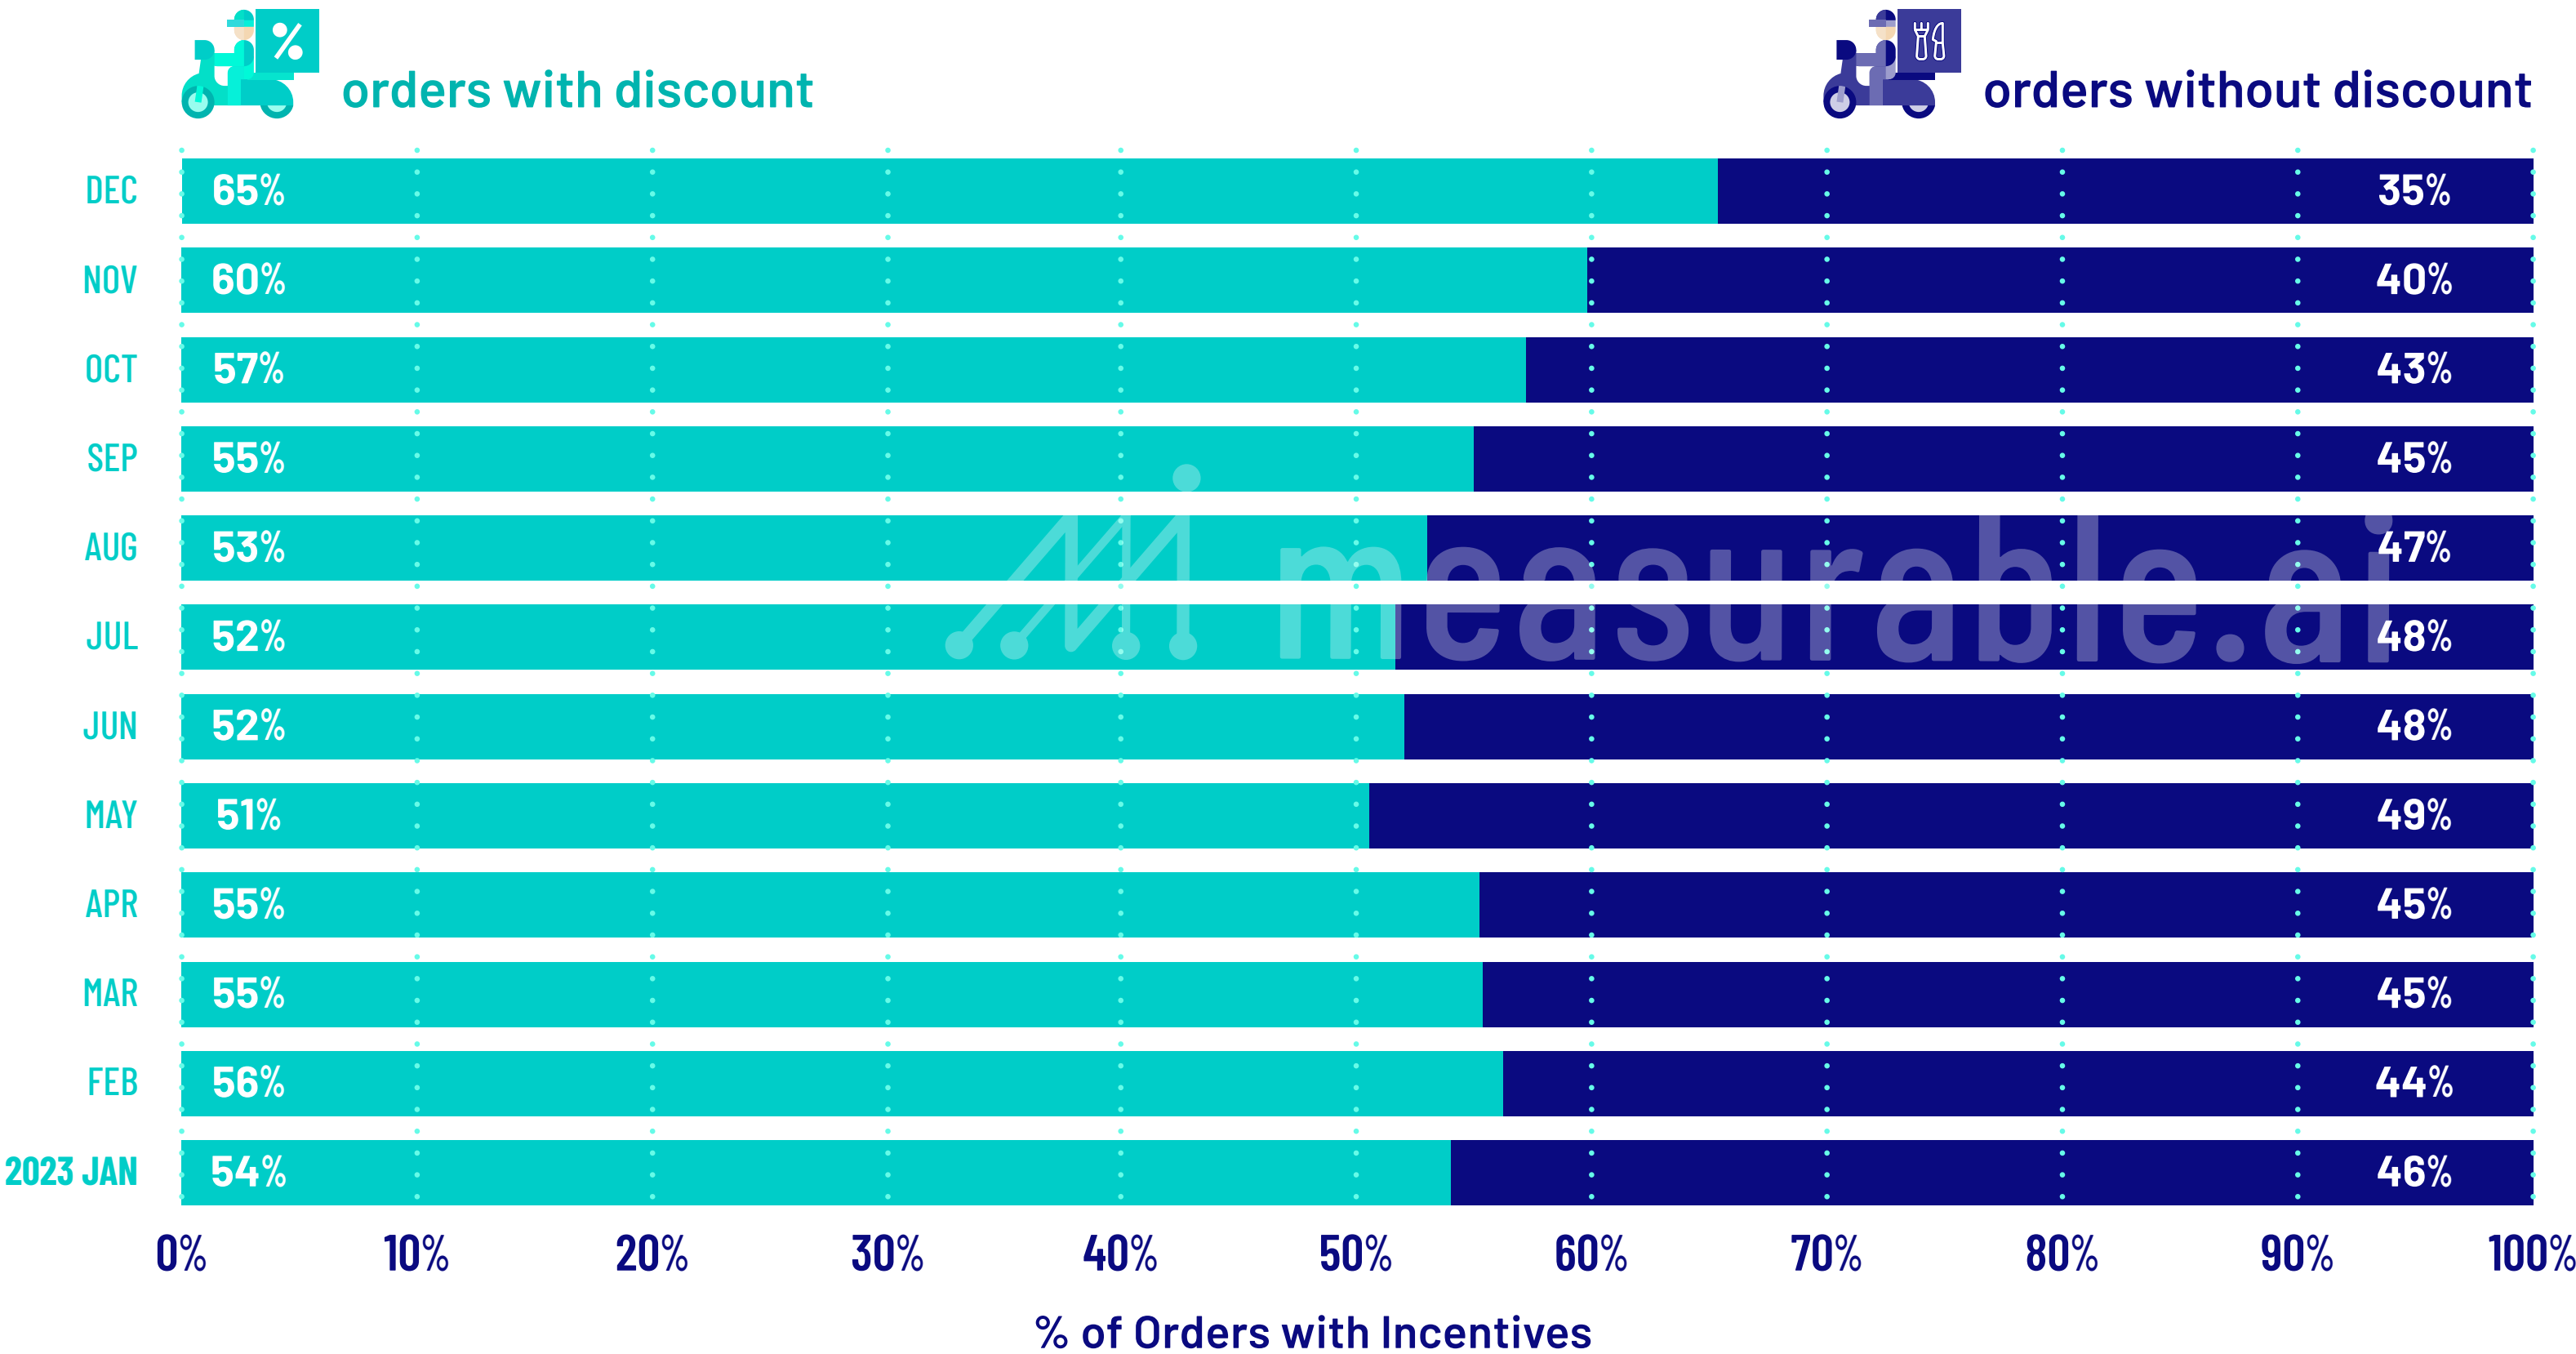

HONG KONG

ONLINE DELIVERY MARKET INCENTIVE TREND

2023

In Hong Kong, the share of orders with promotions and incentives saw a rapid increase since 4Q with new player Keeta entering the market and heating up the competition. As of December 2023, over 60% of the food delivery orders came with promotions.

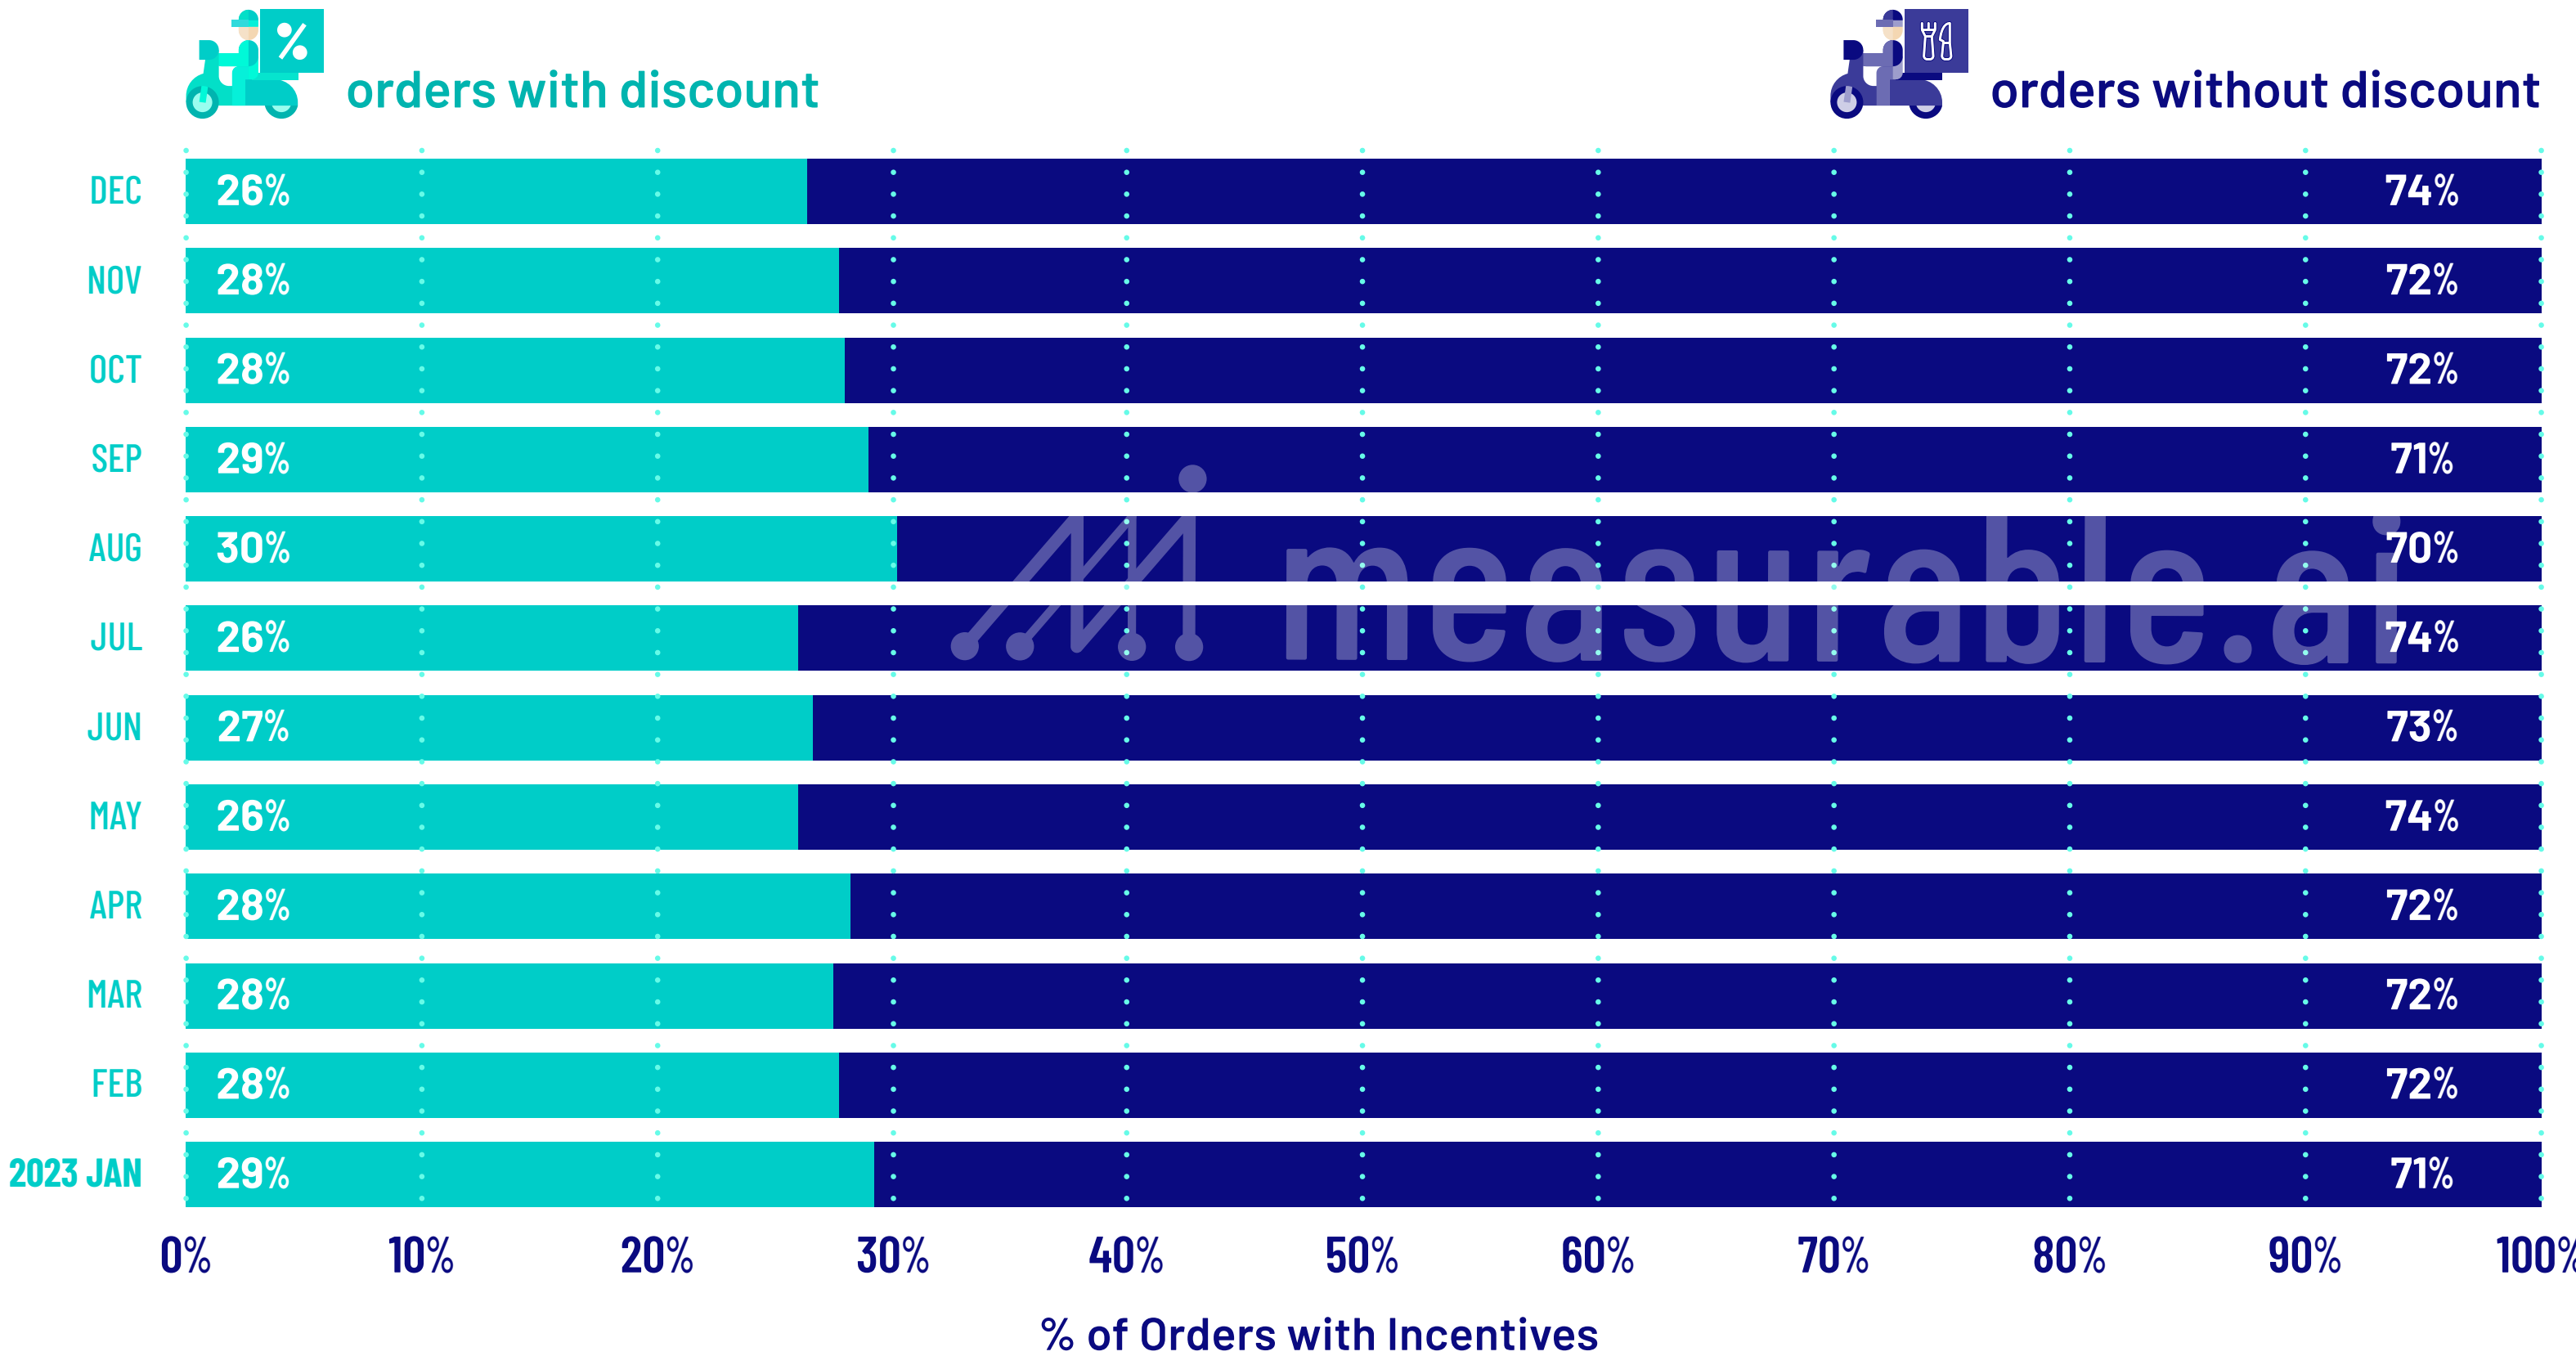

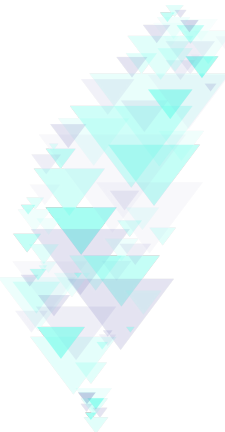

Measurable AI: Hong Kong Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: Deliveroo, Foodpanda, Keeta

TAIWAN

ONLINE DELIVERY MARKET INCENTIVE TREND

2023

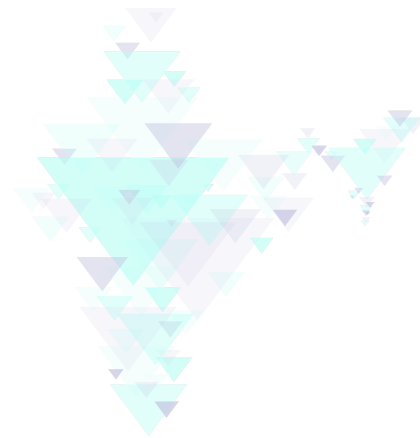

The incentive trend in Taiwan remained stable in 2023. Around 28% of the orders came with promotions throughout the year.

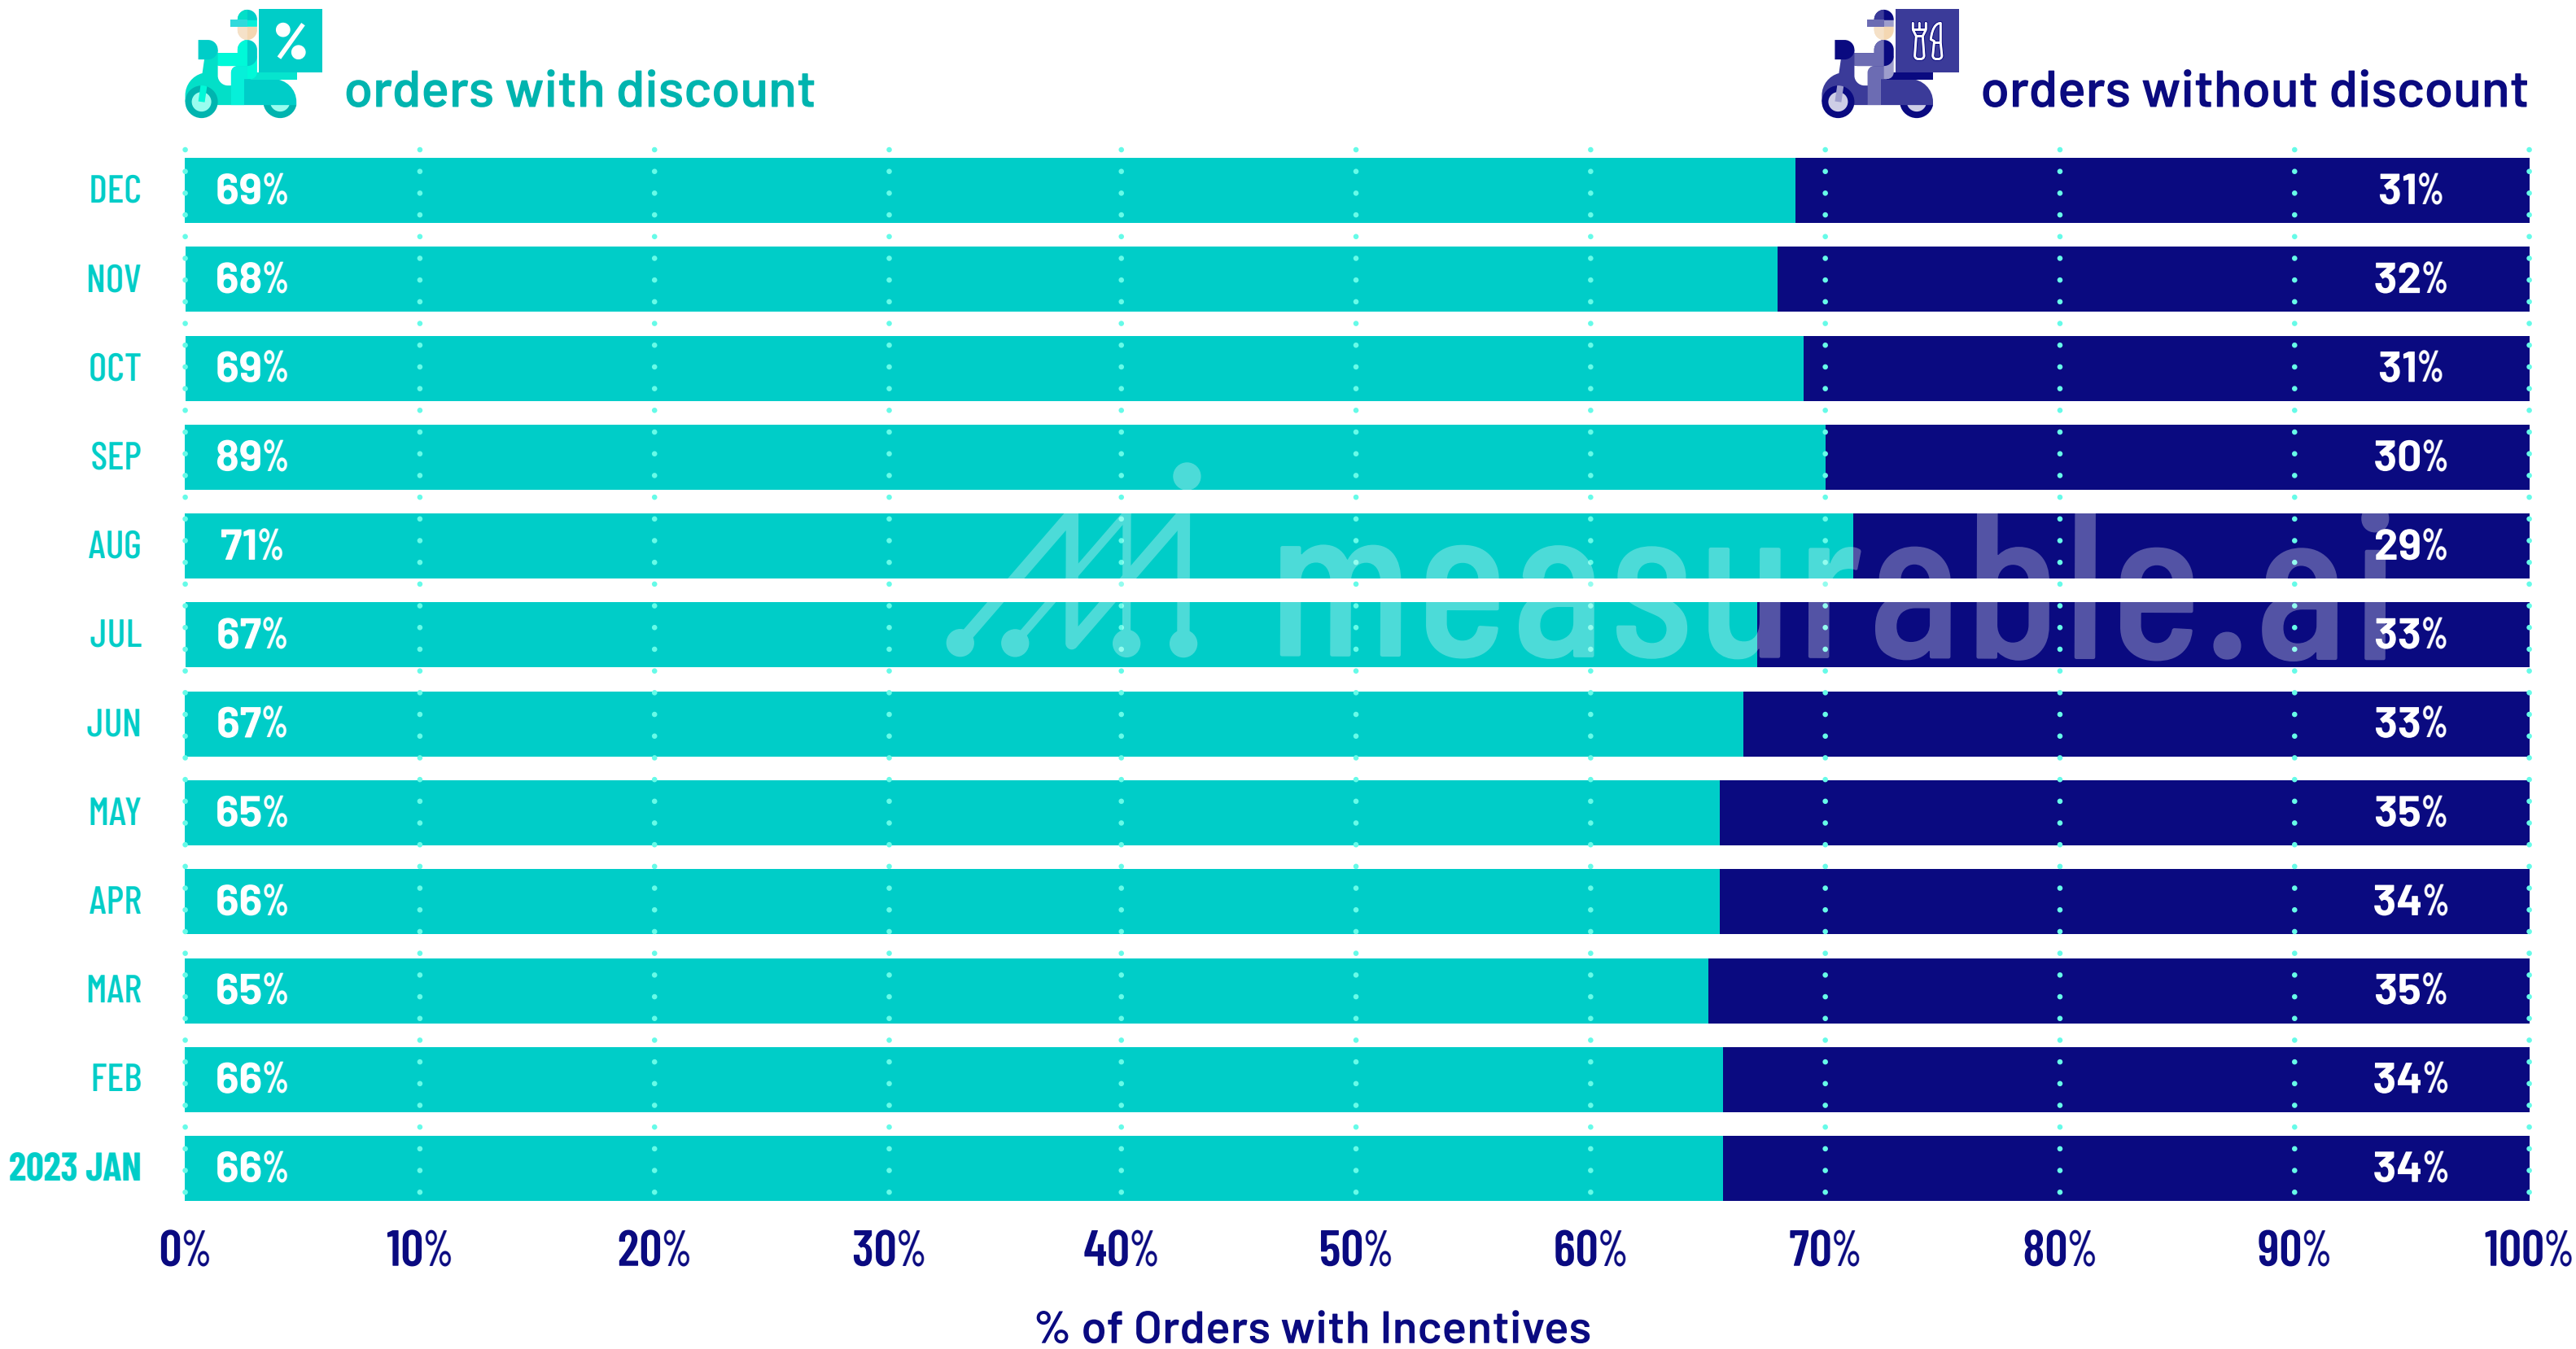

Measurable AI: Taiwan Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: UberEats, Foodpanda

INDIA ONLINE DELIVERY MARKET INCENTIVE TREND

2023

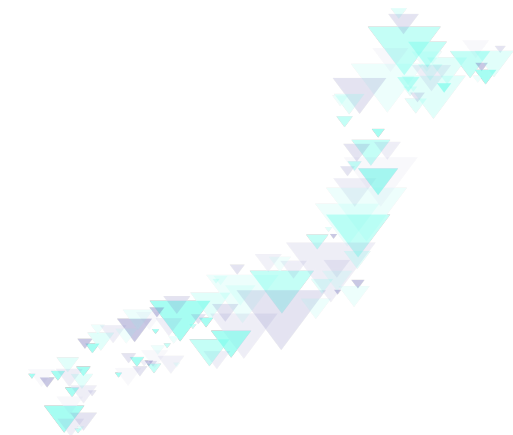

India's online food delivery still relies heavily on incentives. In 2023, around 69% of orders on average come with promotions.

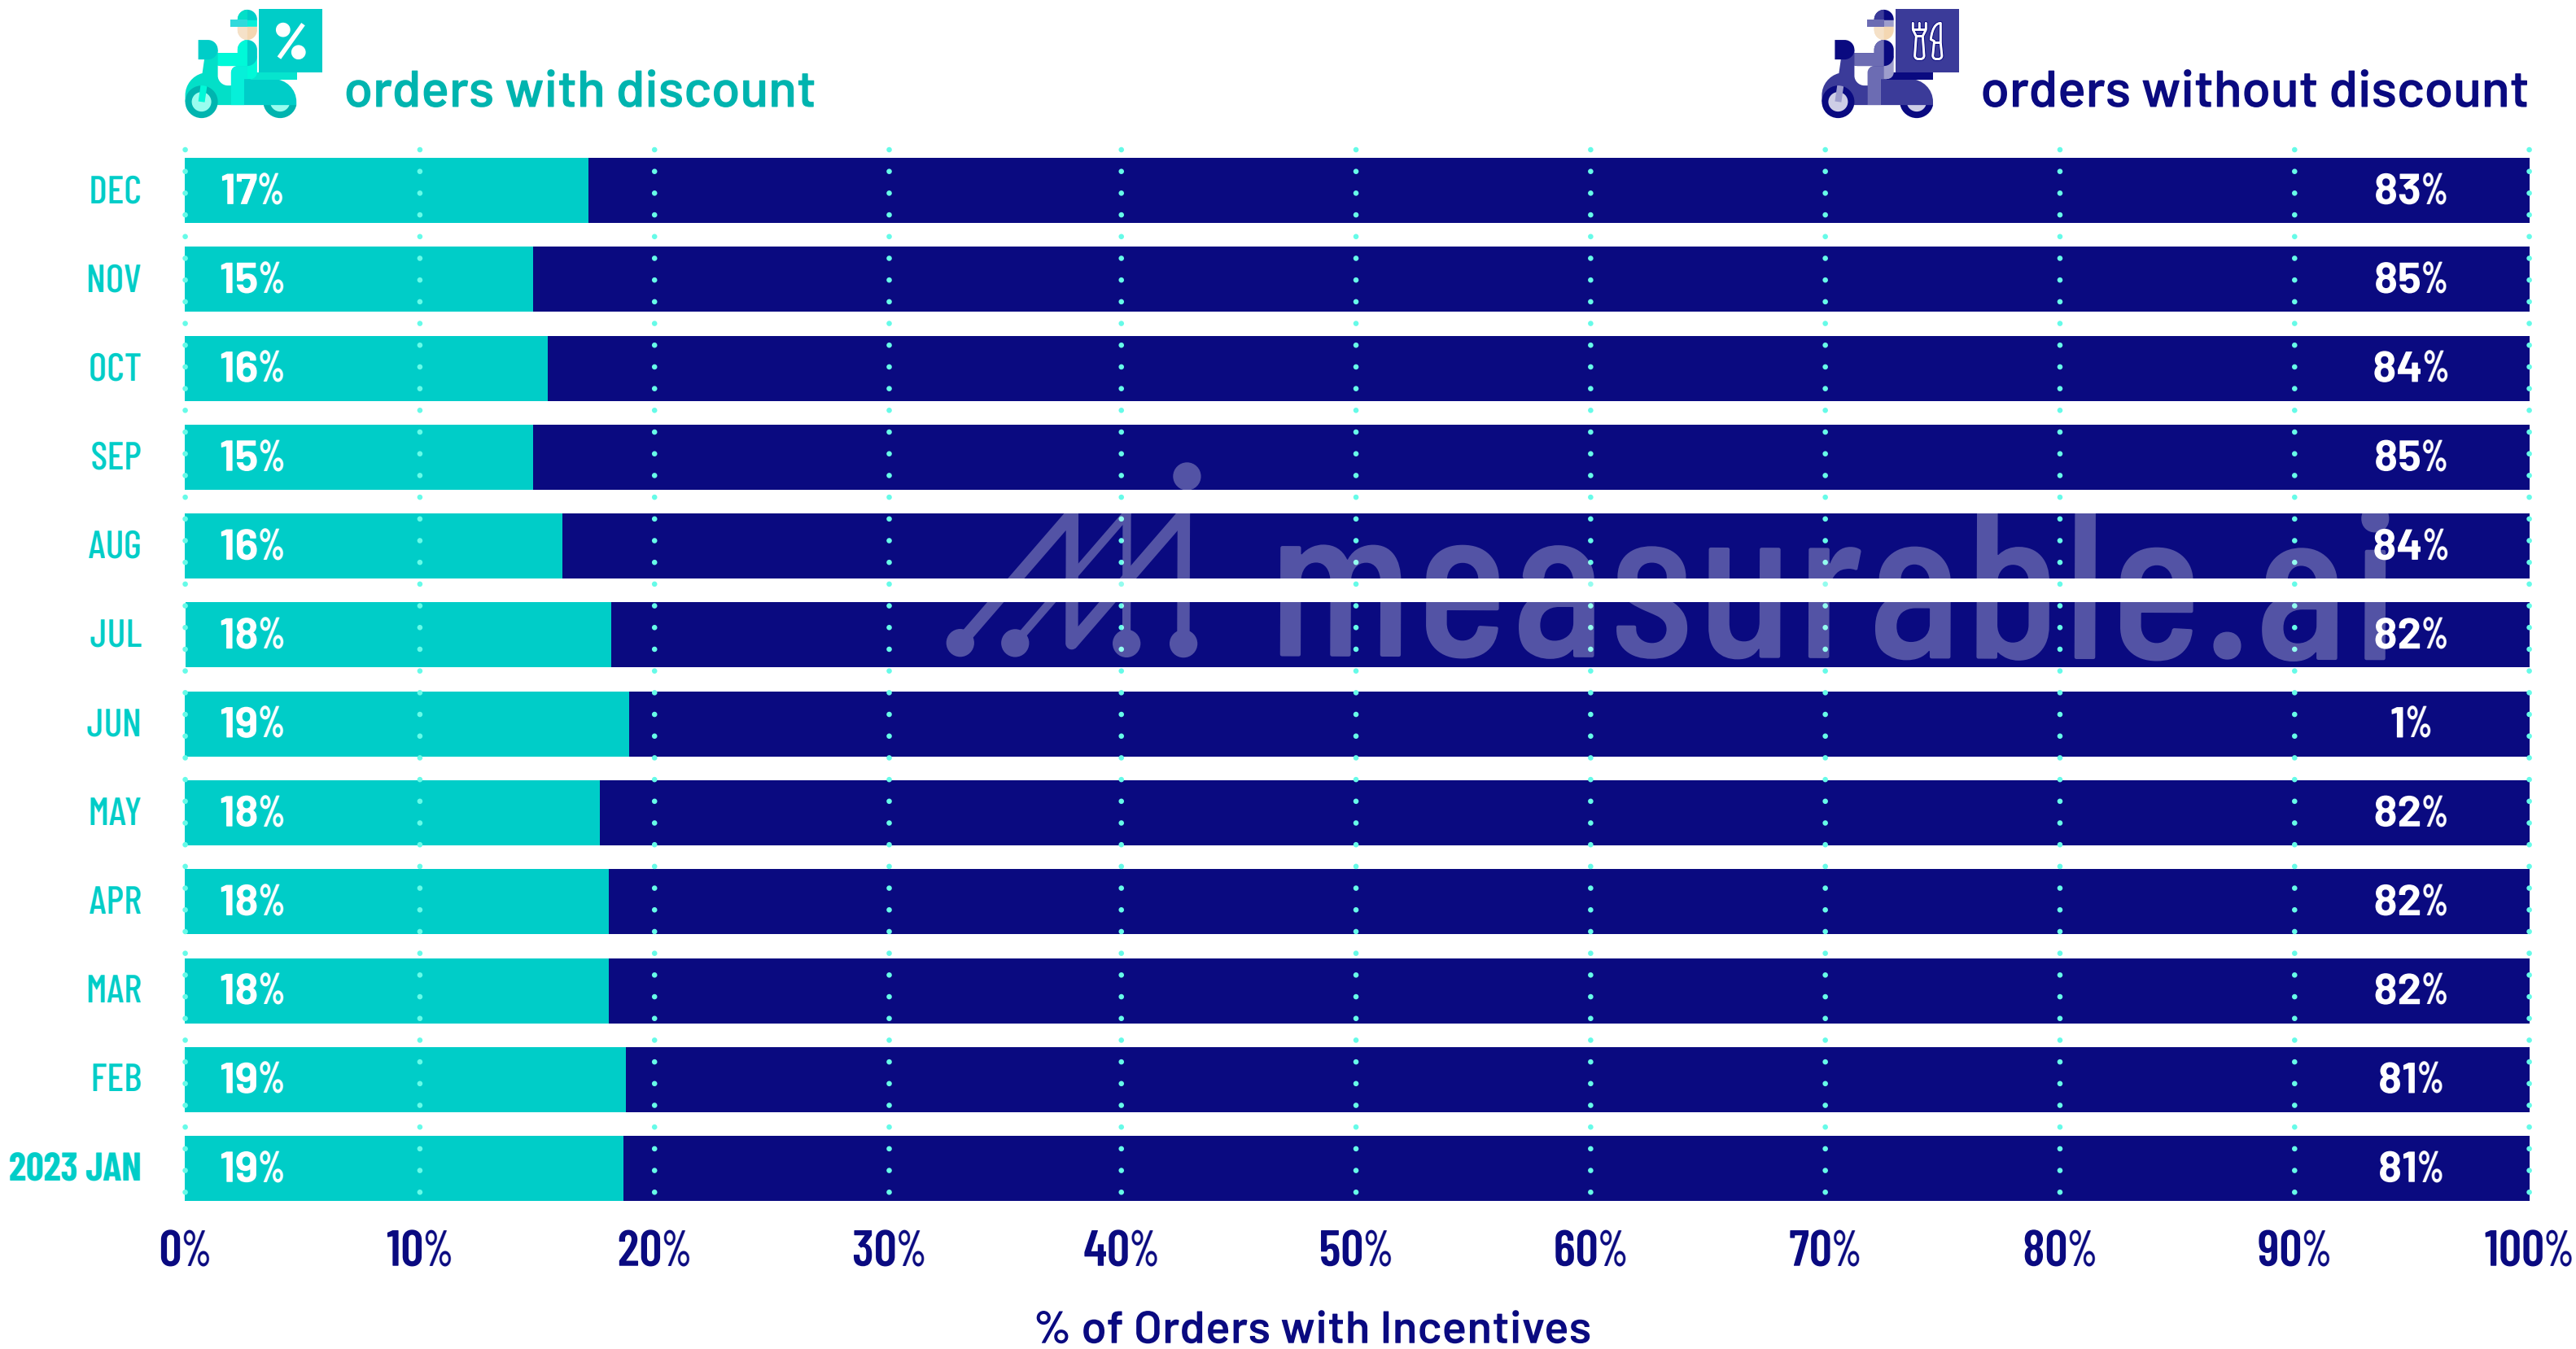

Measurable AI: India Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: Zomato, Swiggy

JAPAN ONLINE DELIVERY MARKET INCENTIVE TREND

2023

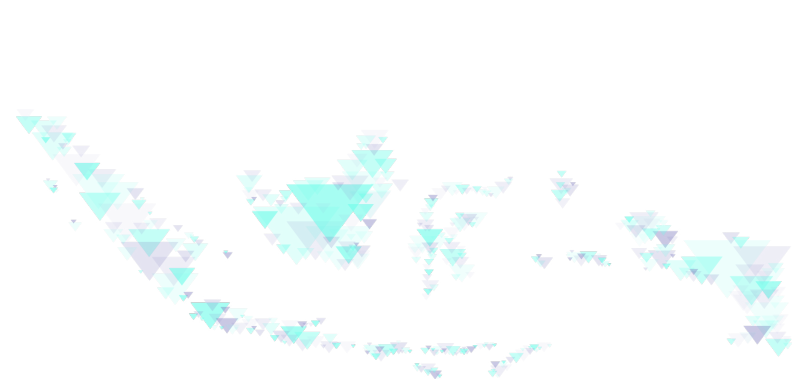

In Japan, only a small portion of online delivery orders come with promotions. In 2023, the incentive rate fluctuated at around 17%. It seems that the Japanese are already used to ordering without incentives.

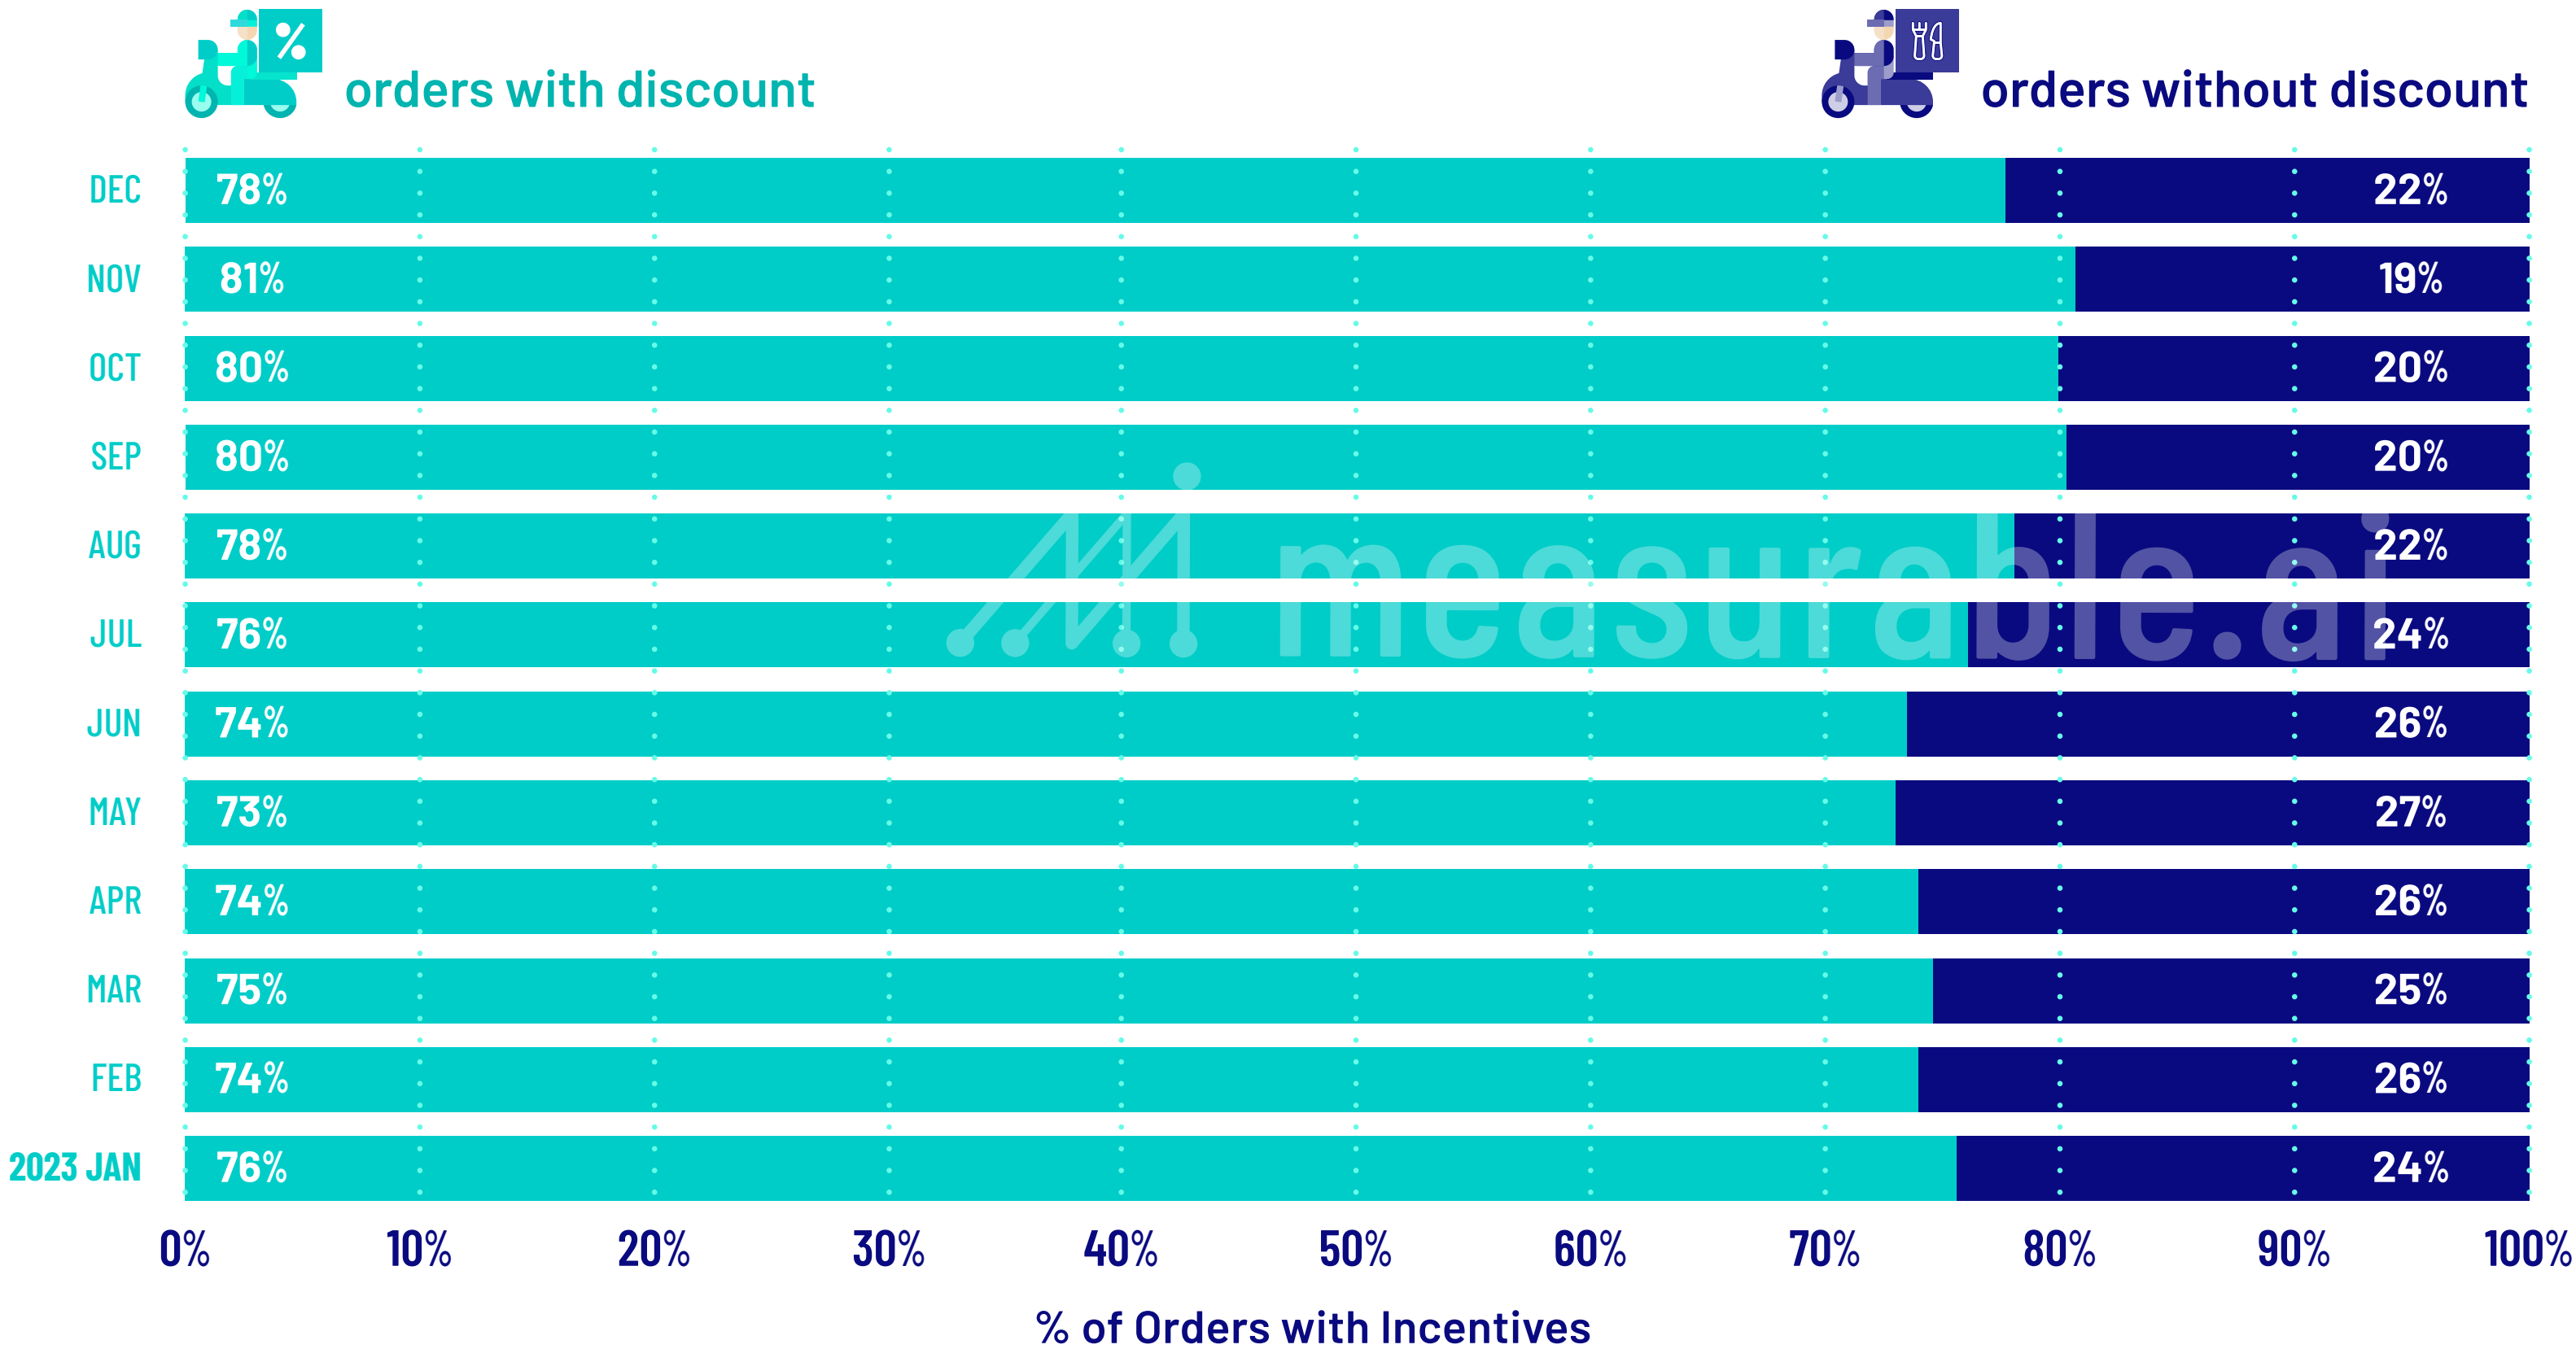

Measurable AI: Japan Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: UberEats, Demaecan

INDONESIA ONLINE DELIVERY MARKET INCENTIVE TREND

2023

The incentive rate in Indonesia online food delivery remains relatively high, almost over 75% of the orders come with promotions, and over the year 2023 it continues to grow.

Measurable AI: Indonesia Online Food Delivery Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2023 January to 2023 December. Food Delivery companies included in this chart: Gojek, Grab

PART III

ALTASIA ONLINE DELIVERY MARKET HEATMAP2023

INTRODUCTION

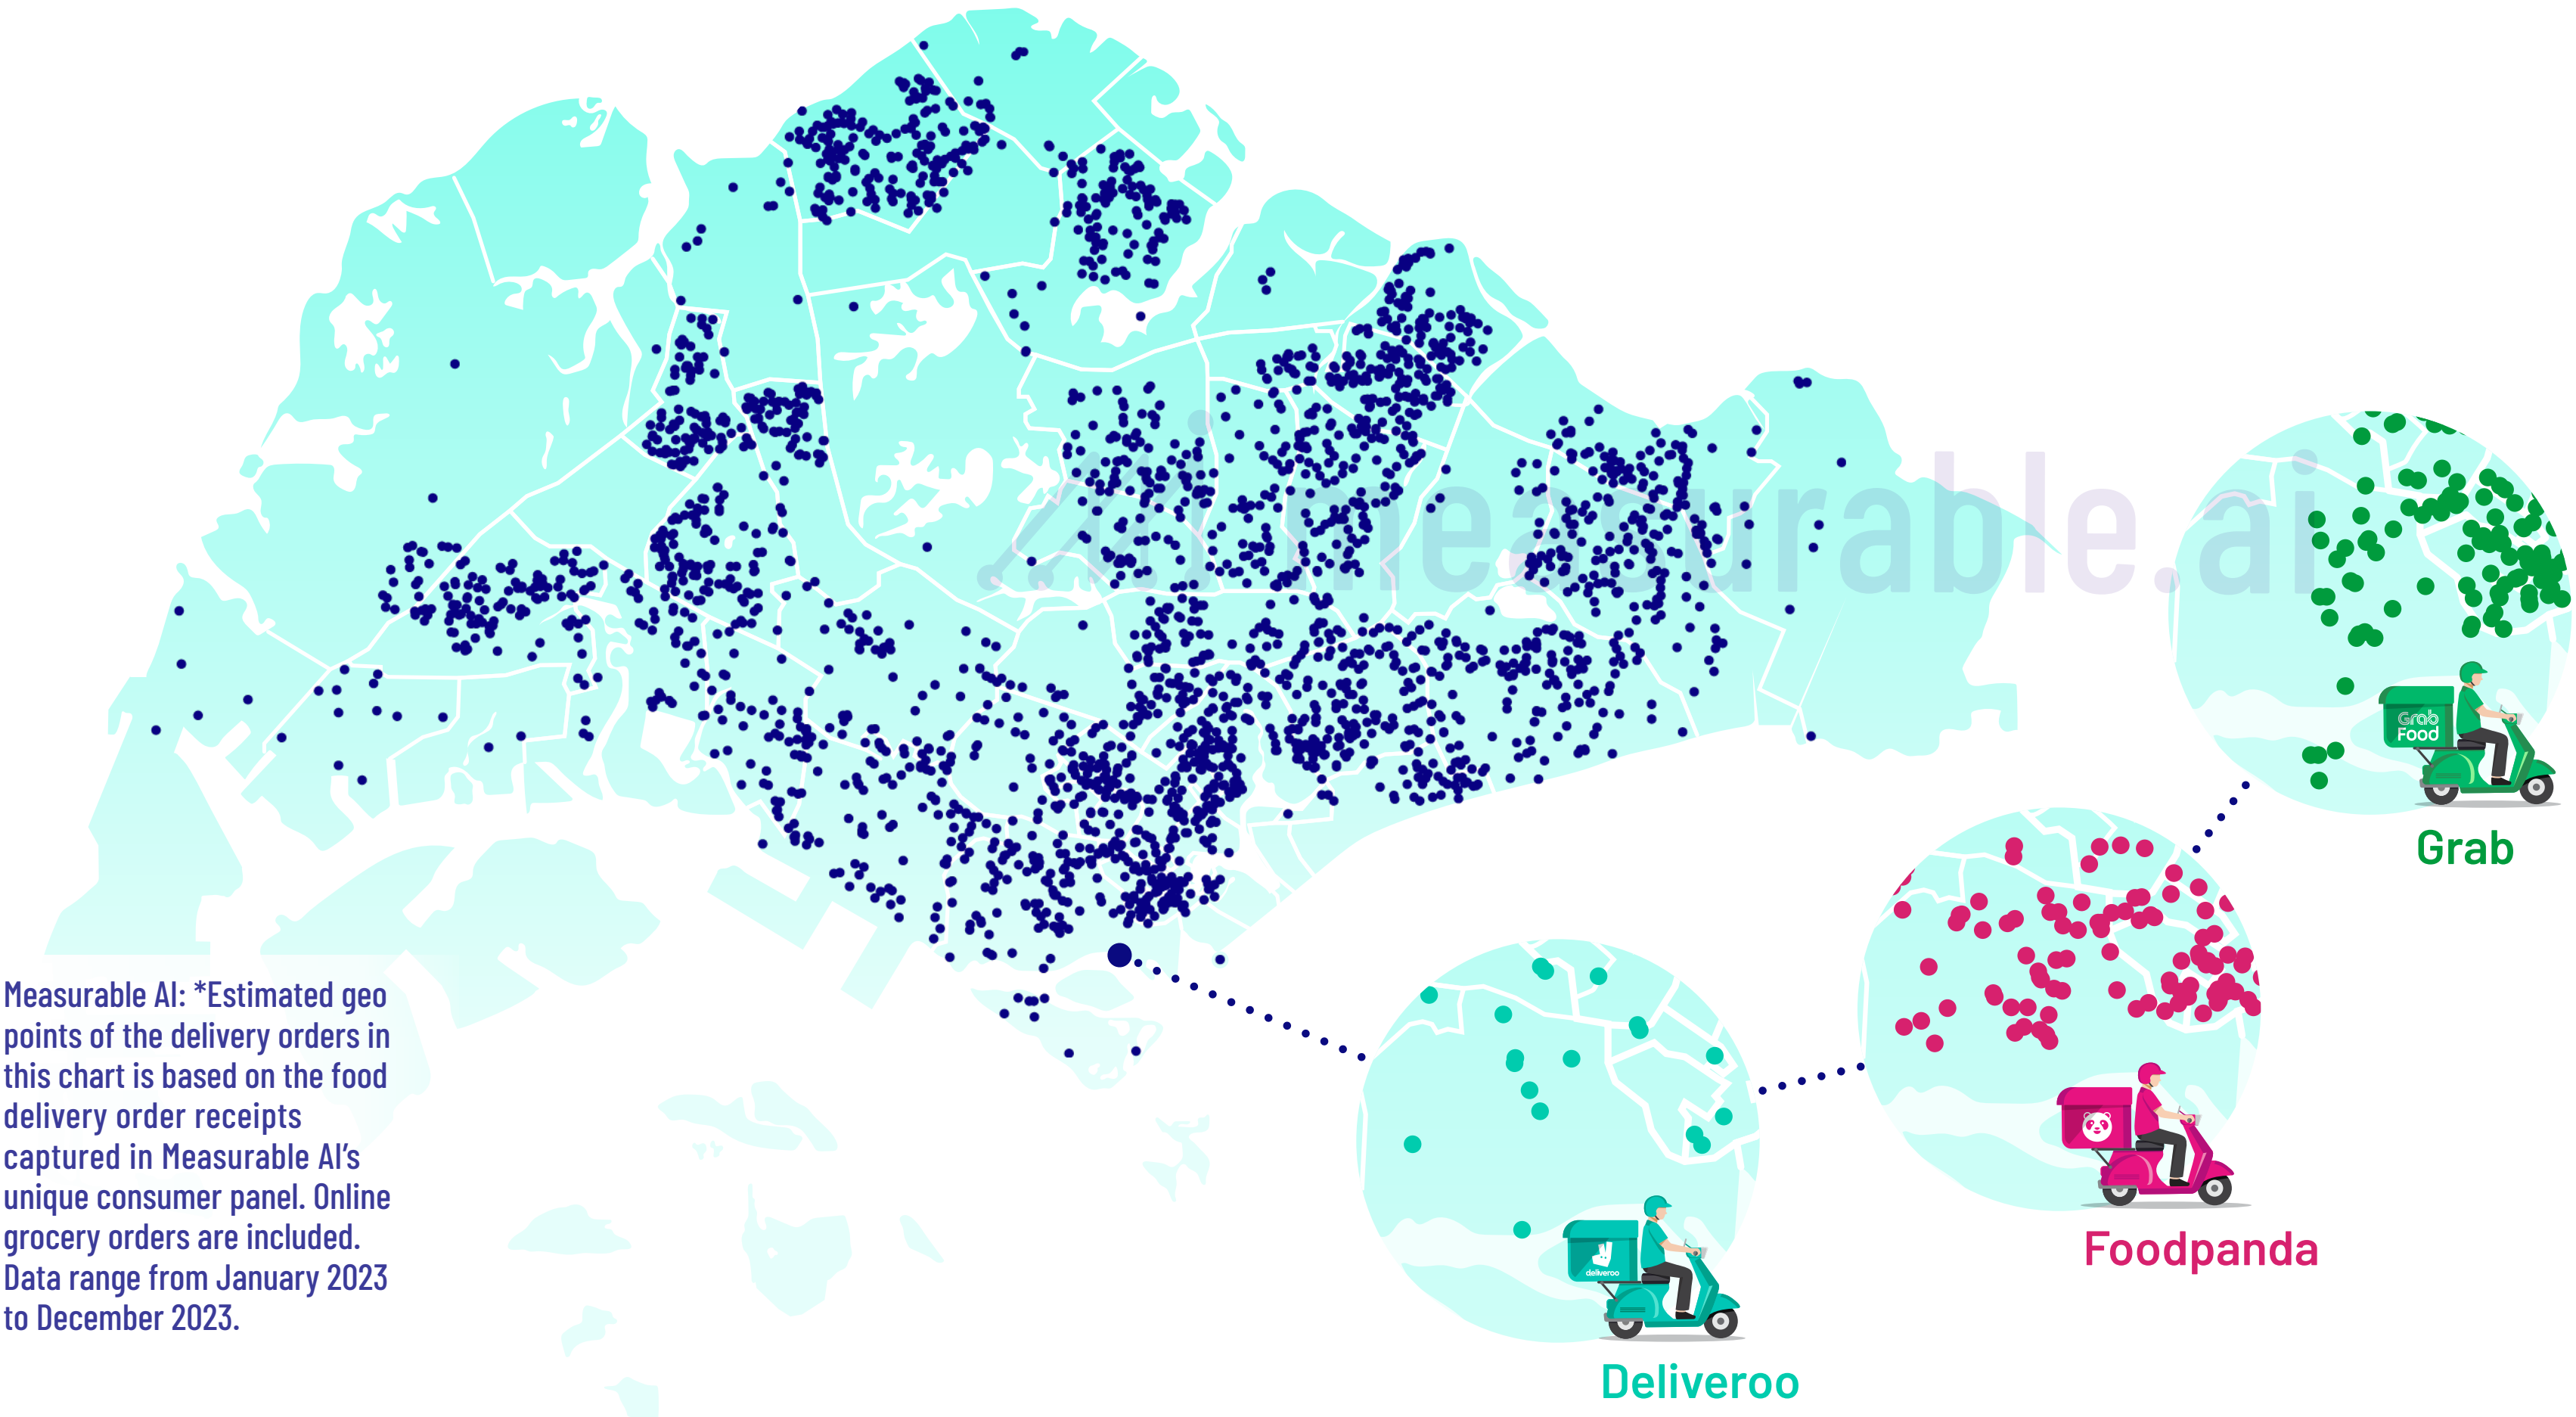

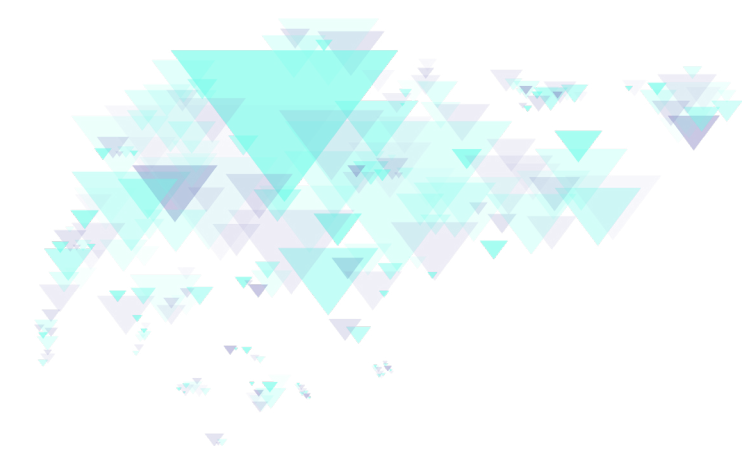

In this section, we leverage Measurable AI's granular transactional e-receipts data to create a heatmap visualization of online food delivery orders across various markets.

In many of the emerging markets, the penetration of online food delivery services is still relatively low.

The heatmap derived from Measurable AI's data illustrates that the online food delivery sector still represents a significant opportunity— a "blue ocean" — for many companies in the industry.
