RIDE-HAILING

DEMAND AND CONSUMPTION

OVERVIEW 2019-2023

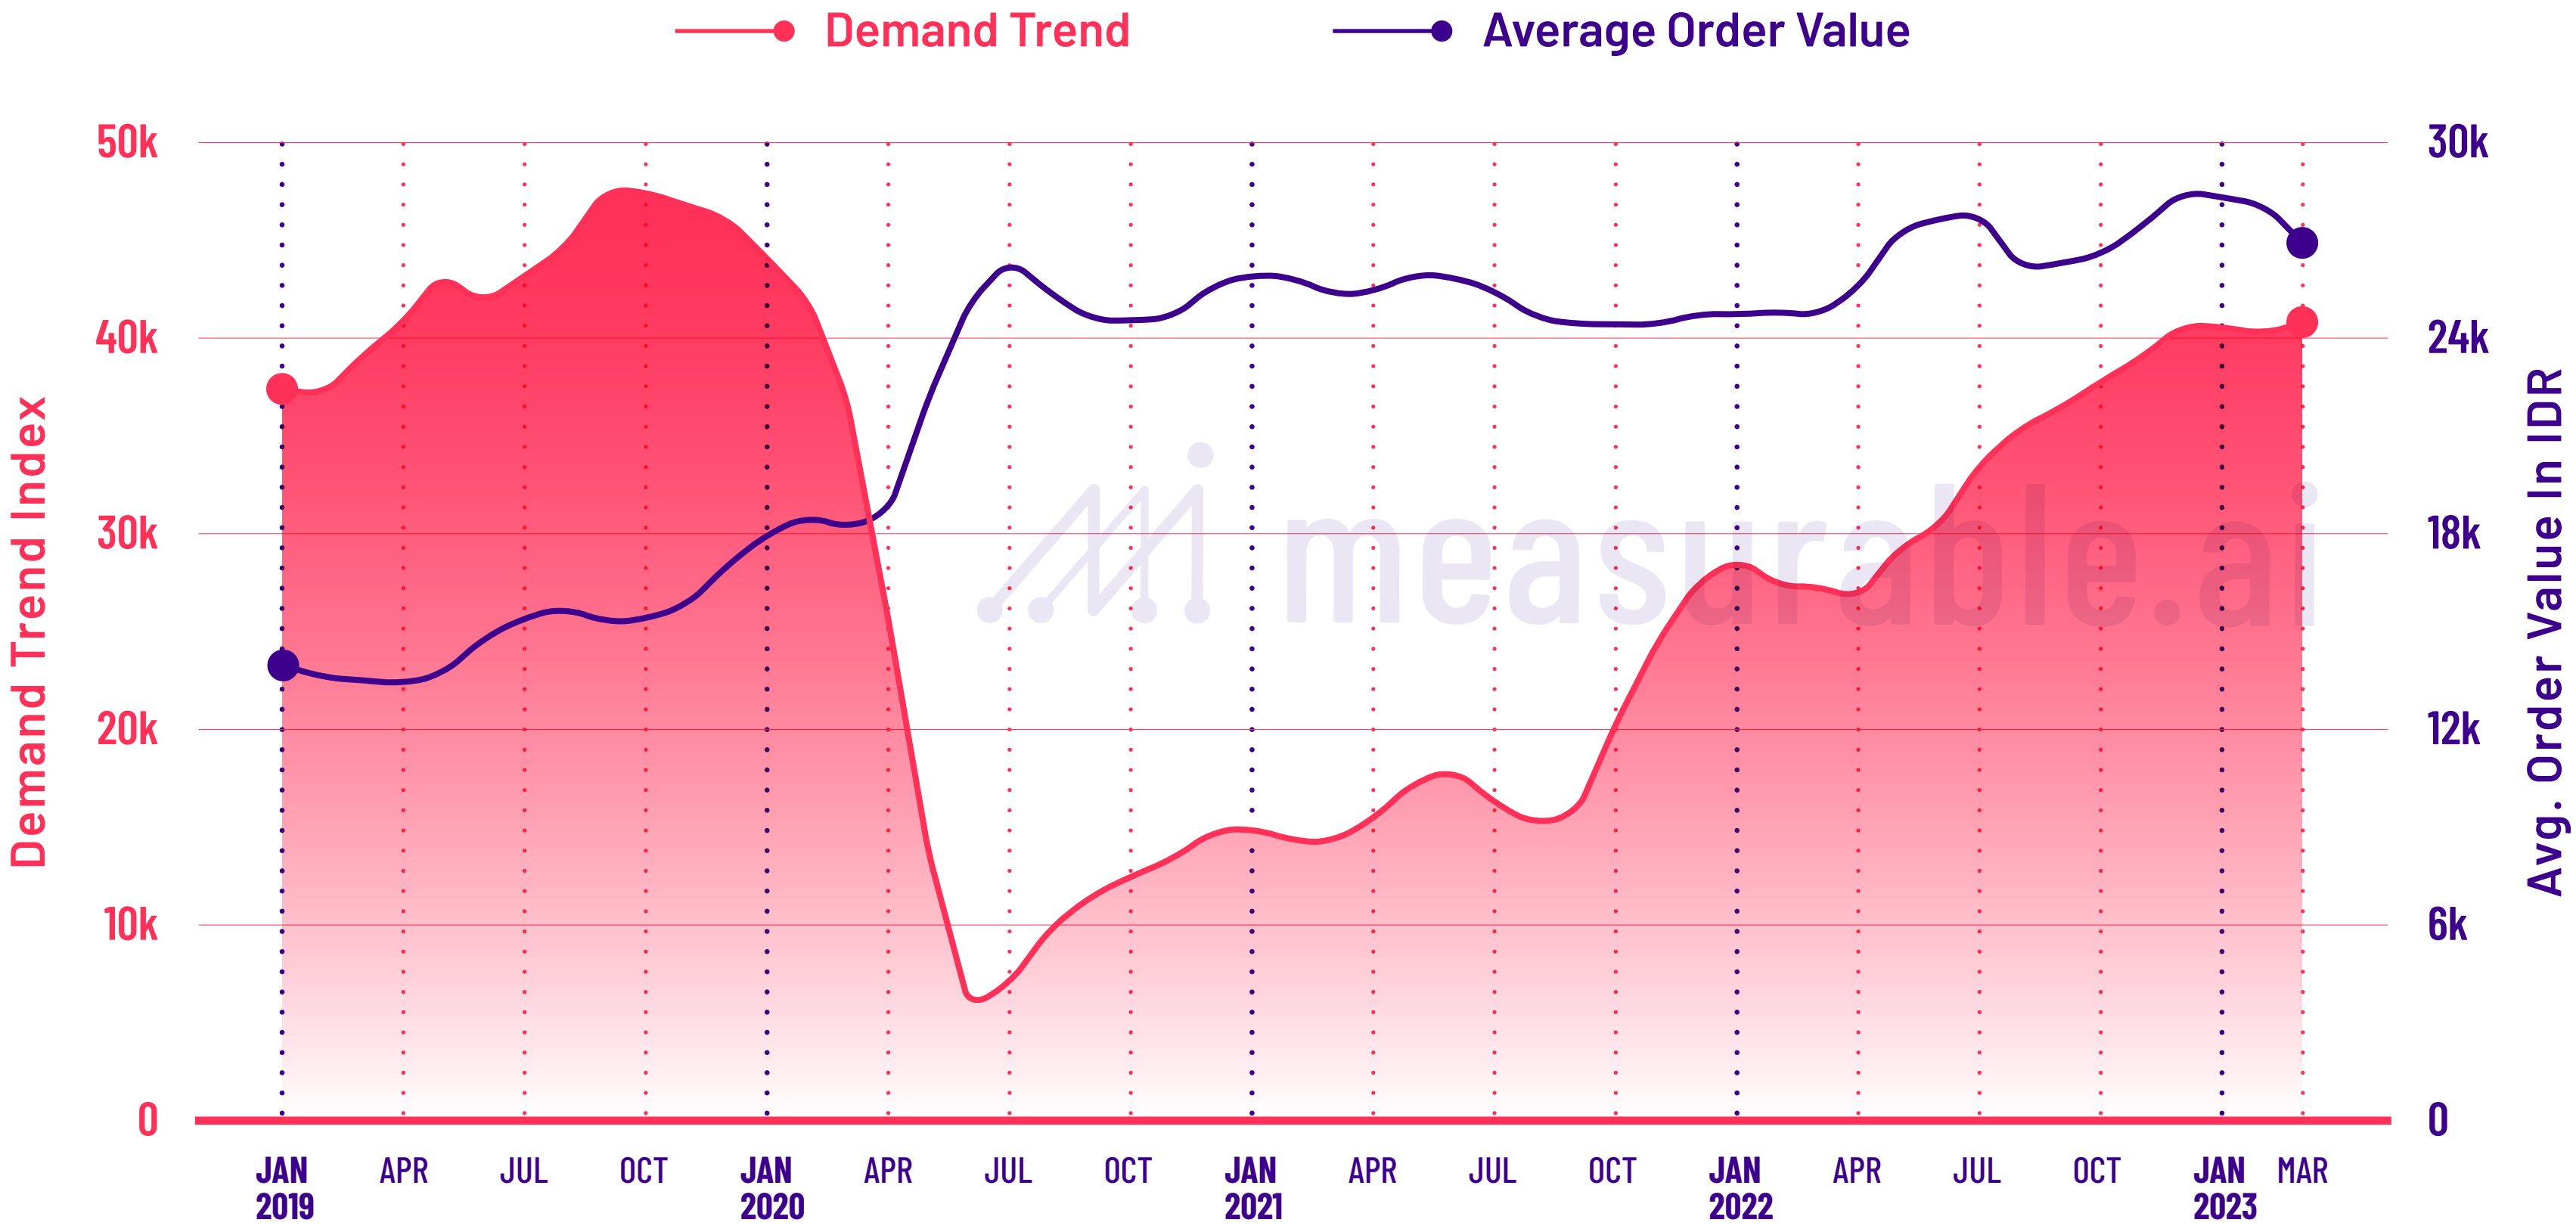

INTRODUCTION

This report aims to provide an overview of the ride-hailing industry in five key markets in Asia across India, Indonesia, Singapore, Vietnam and Thailand over the past four years, revealing notable shifts in market demand, consumer behavior, and the fluctuating market share.

The Asia ride-hailing market is significantly driven by several key players in the region namely Ola Cabs, Uber, Grab and Gojek. In addition to these prominent players, numerous emerging ride-hailing apps from both the digital economy and traditional taxi industry continue to surface. Following a dip due to the pandemic, the overall ride-hailing demand has recovered in most Asian markets, leading to more market dynamism and competition for all players.

INDONESIA RIDE-HAILING DEMAND & CONSUMPTION TREND

2019-2023

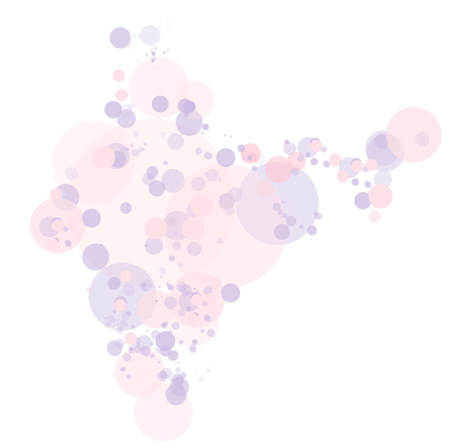

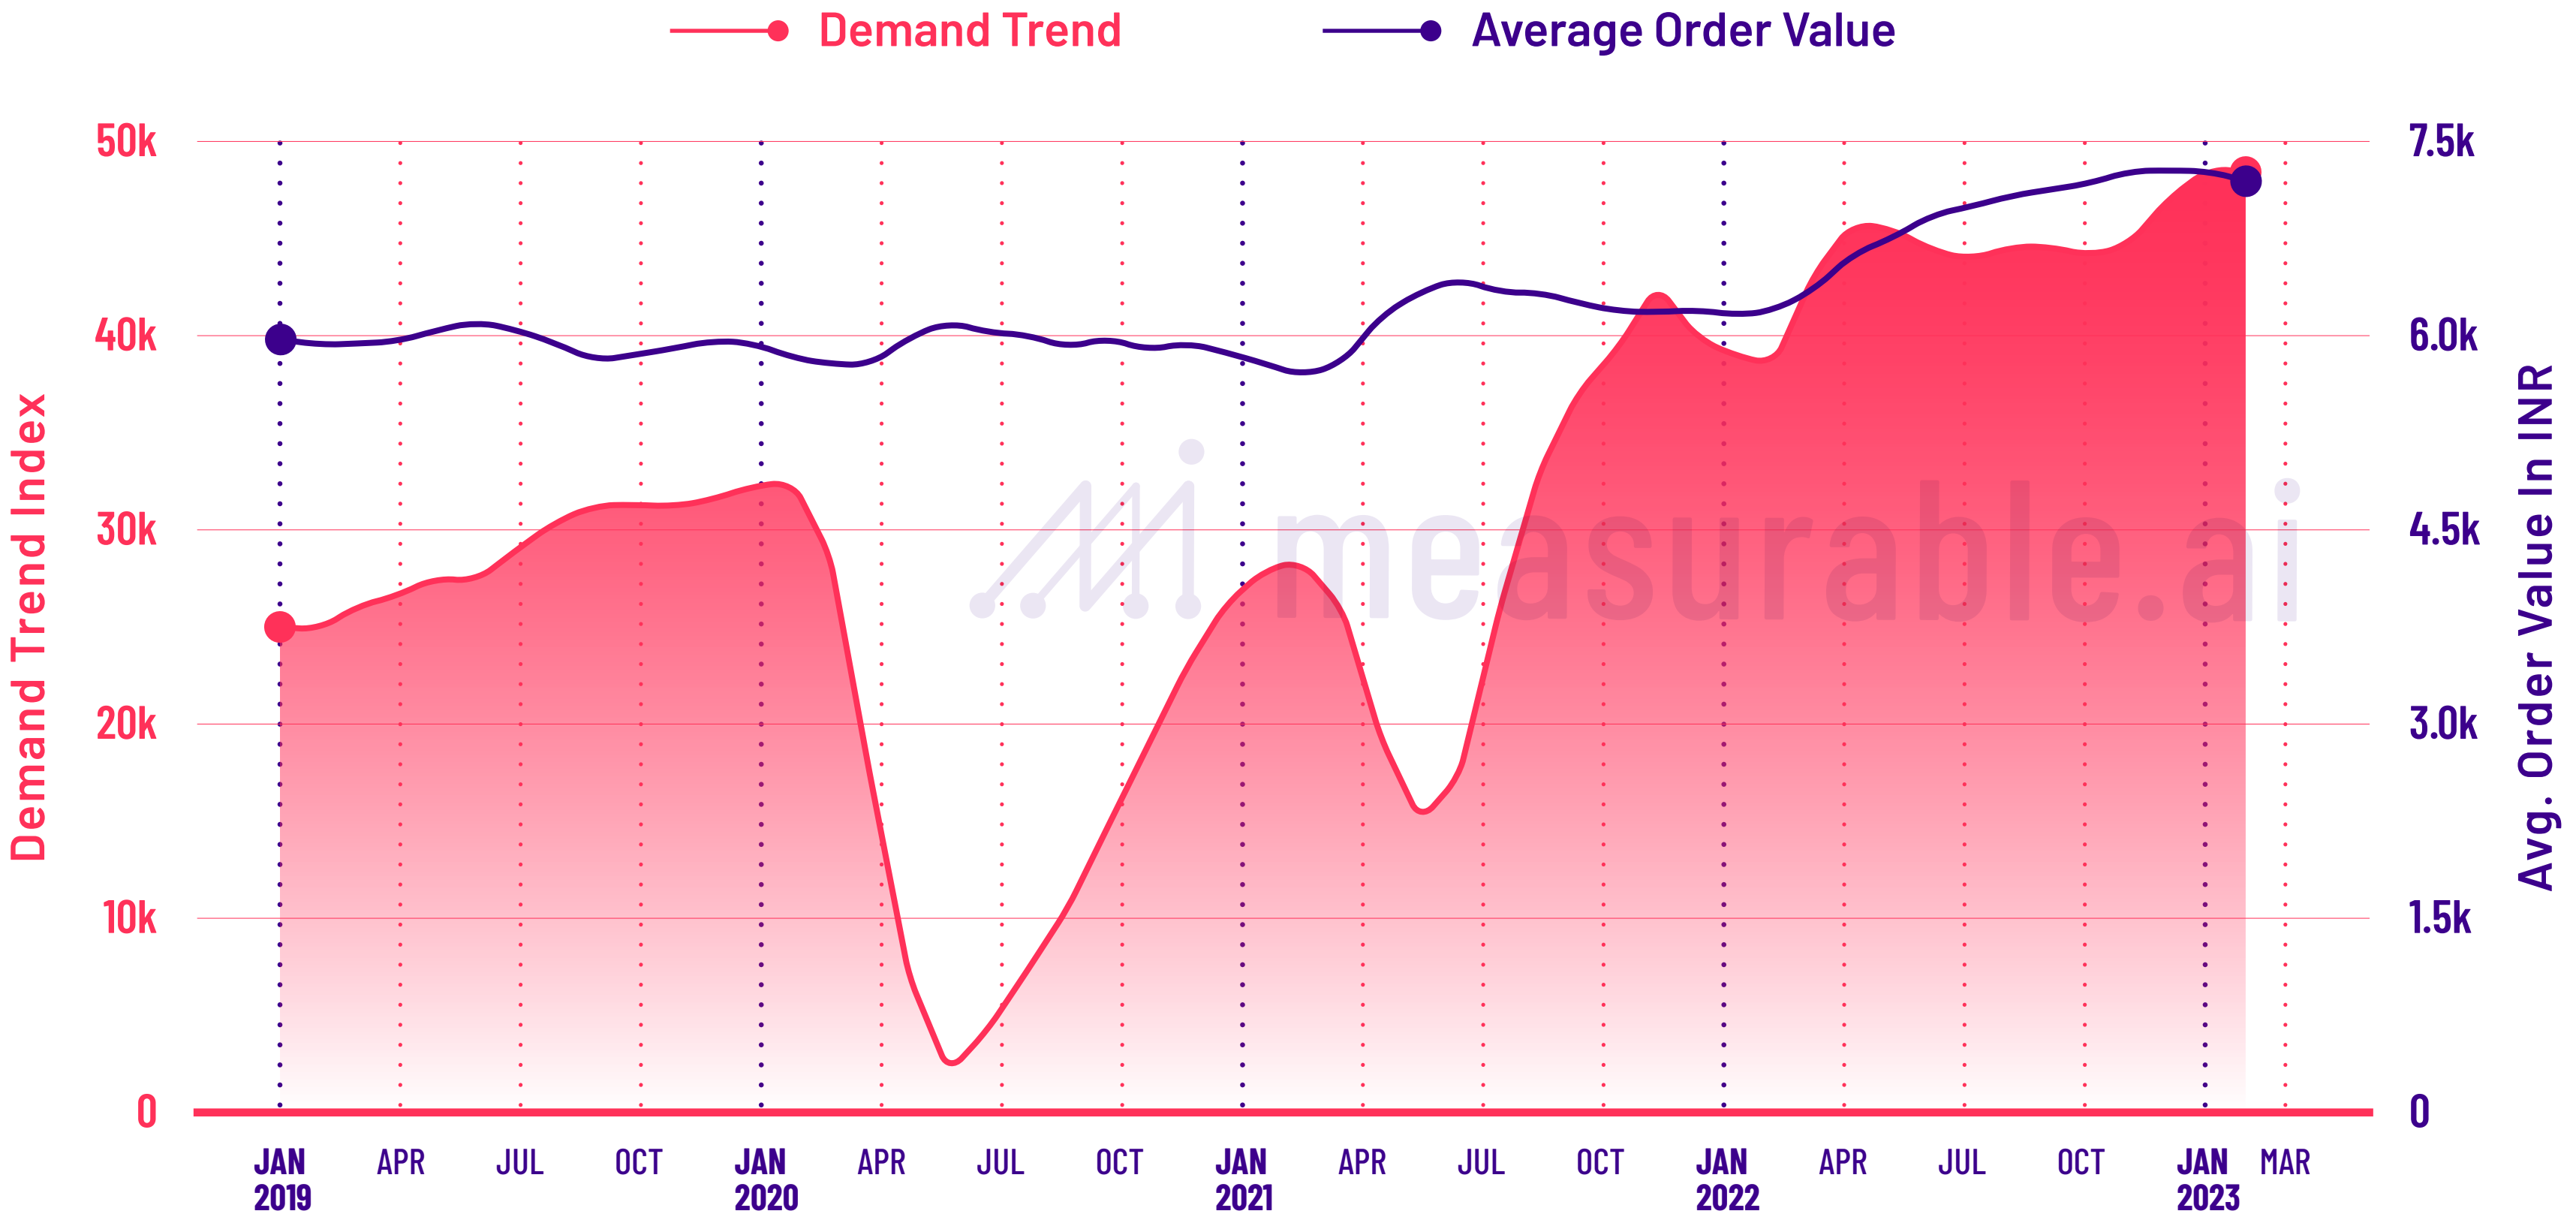

As of 2023 Q1, despite consistent growth observed since mid-2020, Indonesia's consumer demand in ride-hailing hasn't fully rebounded to pre-pandemic levels. The average order value has seen a significant surge from around 15,000 IDR back in 2019 to a substantial 26,000 IDR. While the frequency of rides remained slow growth, the value of individual transactions saw an increase.

Measurable AI: Indonesia Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Gojek, Grab. Both two-wheelers and four-wheelers are included.

INDIA RIDE-HAILING DEMAND & CONSUMPTION TREND

2019-2023

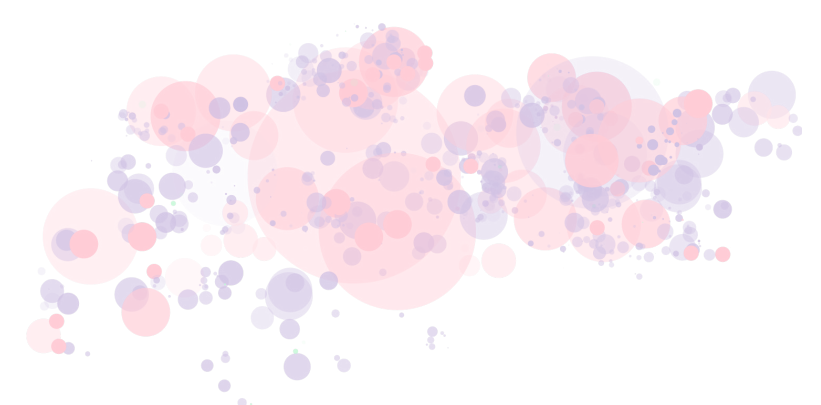

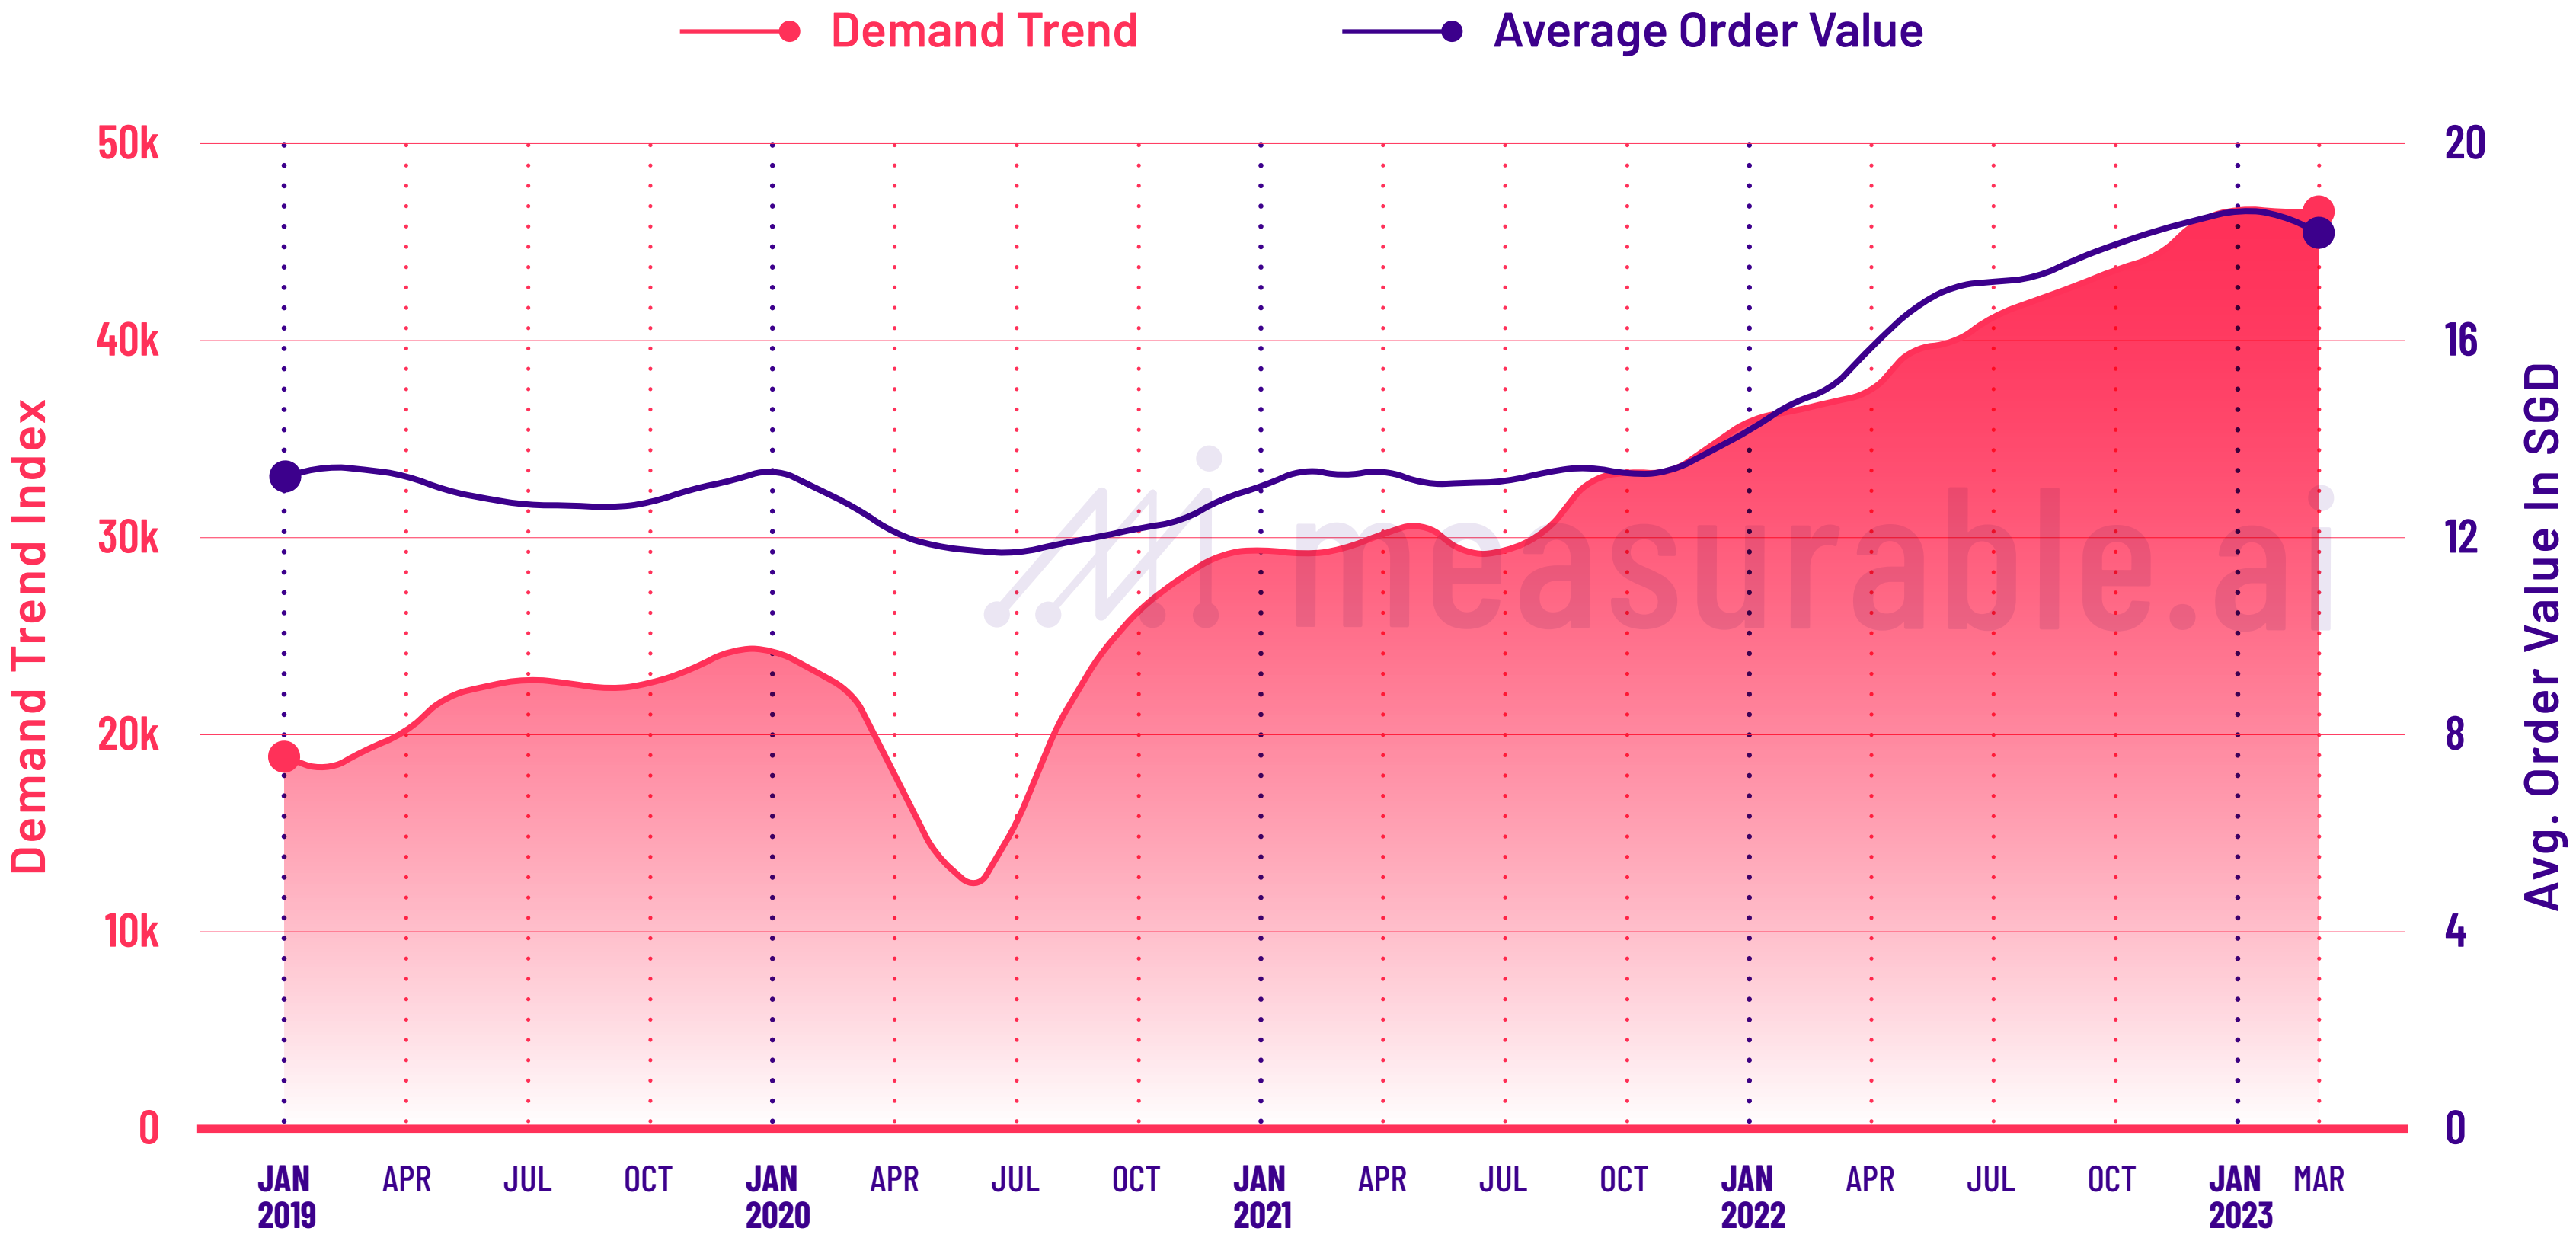

The ride-hailing industry in India experienced substantial fluctuations during the pandemic, with a slower recovery compared to other markets. However, an upward trend was noted in the average order value of Indian riders. This value, which started at around 180 INR in 2019, saw a gradual increase at around 200 INR by 2023 Q1.

Measurable AI: India Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Ola Cabs, Uber

SINGAPORE RIDE-HAILING DEMAND & CONSUMPTION TREND

2019-2023

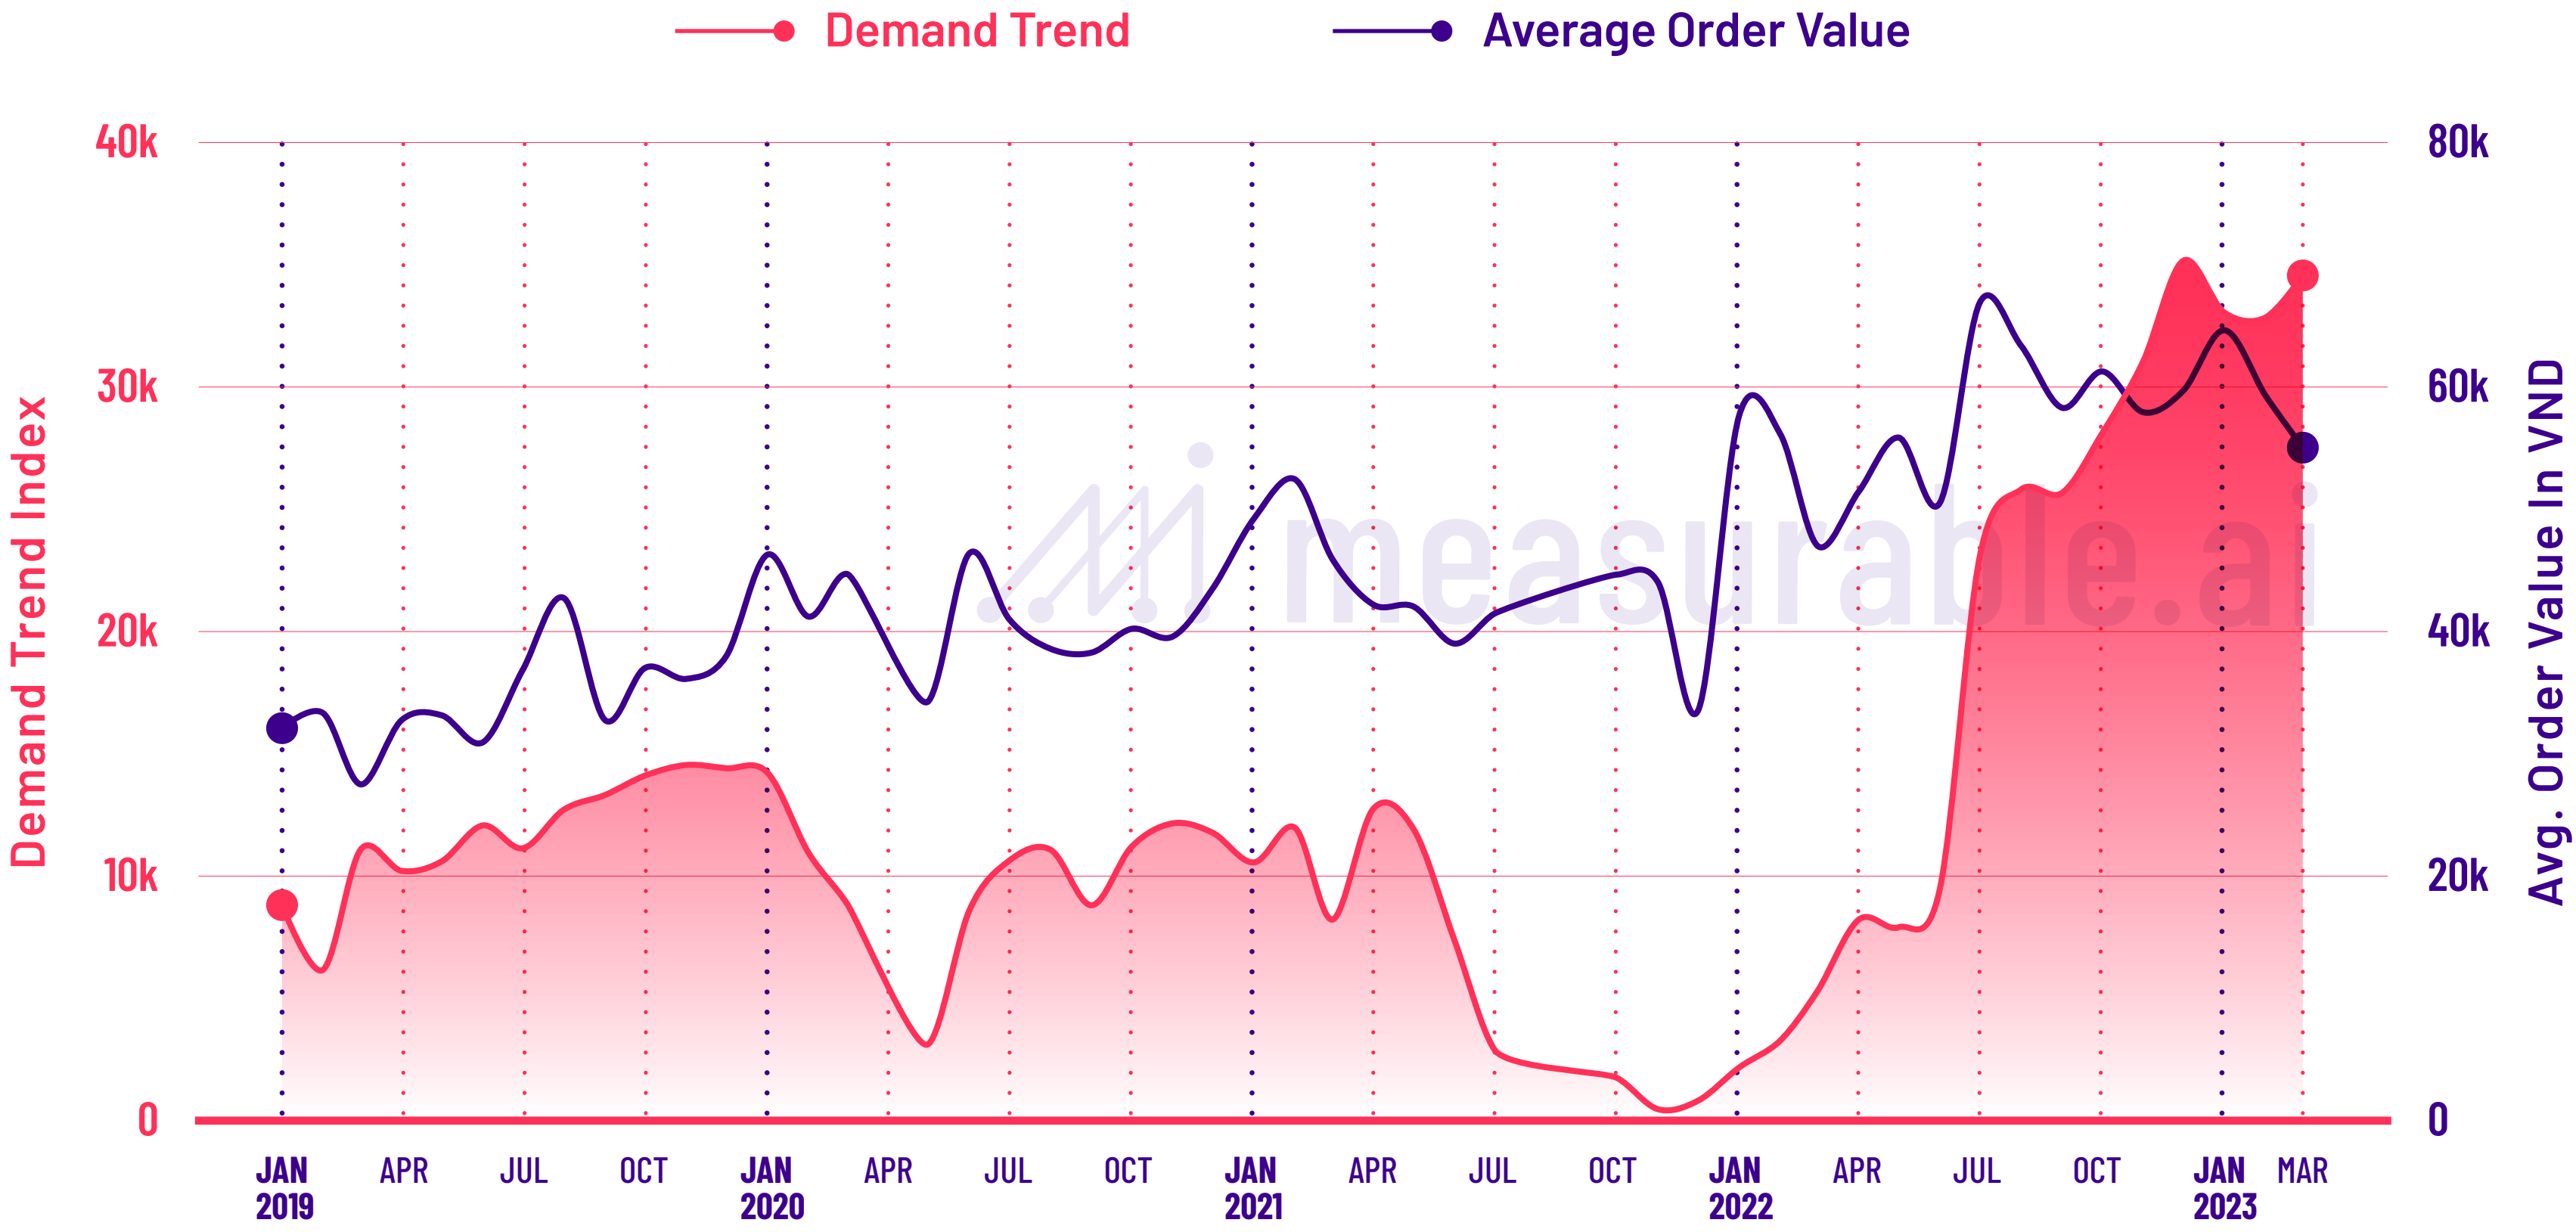

The ride-hailing market in Singapore saw a minor downturn in Q2 2020. It has since rebounded to pre-pandemic levels, showing a strong growth trend from 2022 onwards. Over these four years, order volume grew at a CAGR of 9.4%. As the market stabilized, average order values have consistently risen.

Measurable AI: Singapore Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Grab, Gojek, ComfortDelGro Ryde, Tada. Both Taxi- booking and Ride-hailing orders booked through these mobile apps are included in this chart.

VIETNAM RIDE-HAILING DEMAND & CONSUMPTION TREND

2019-2023

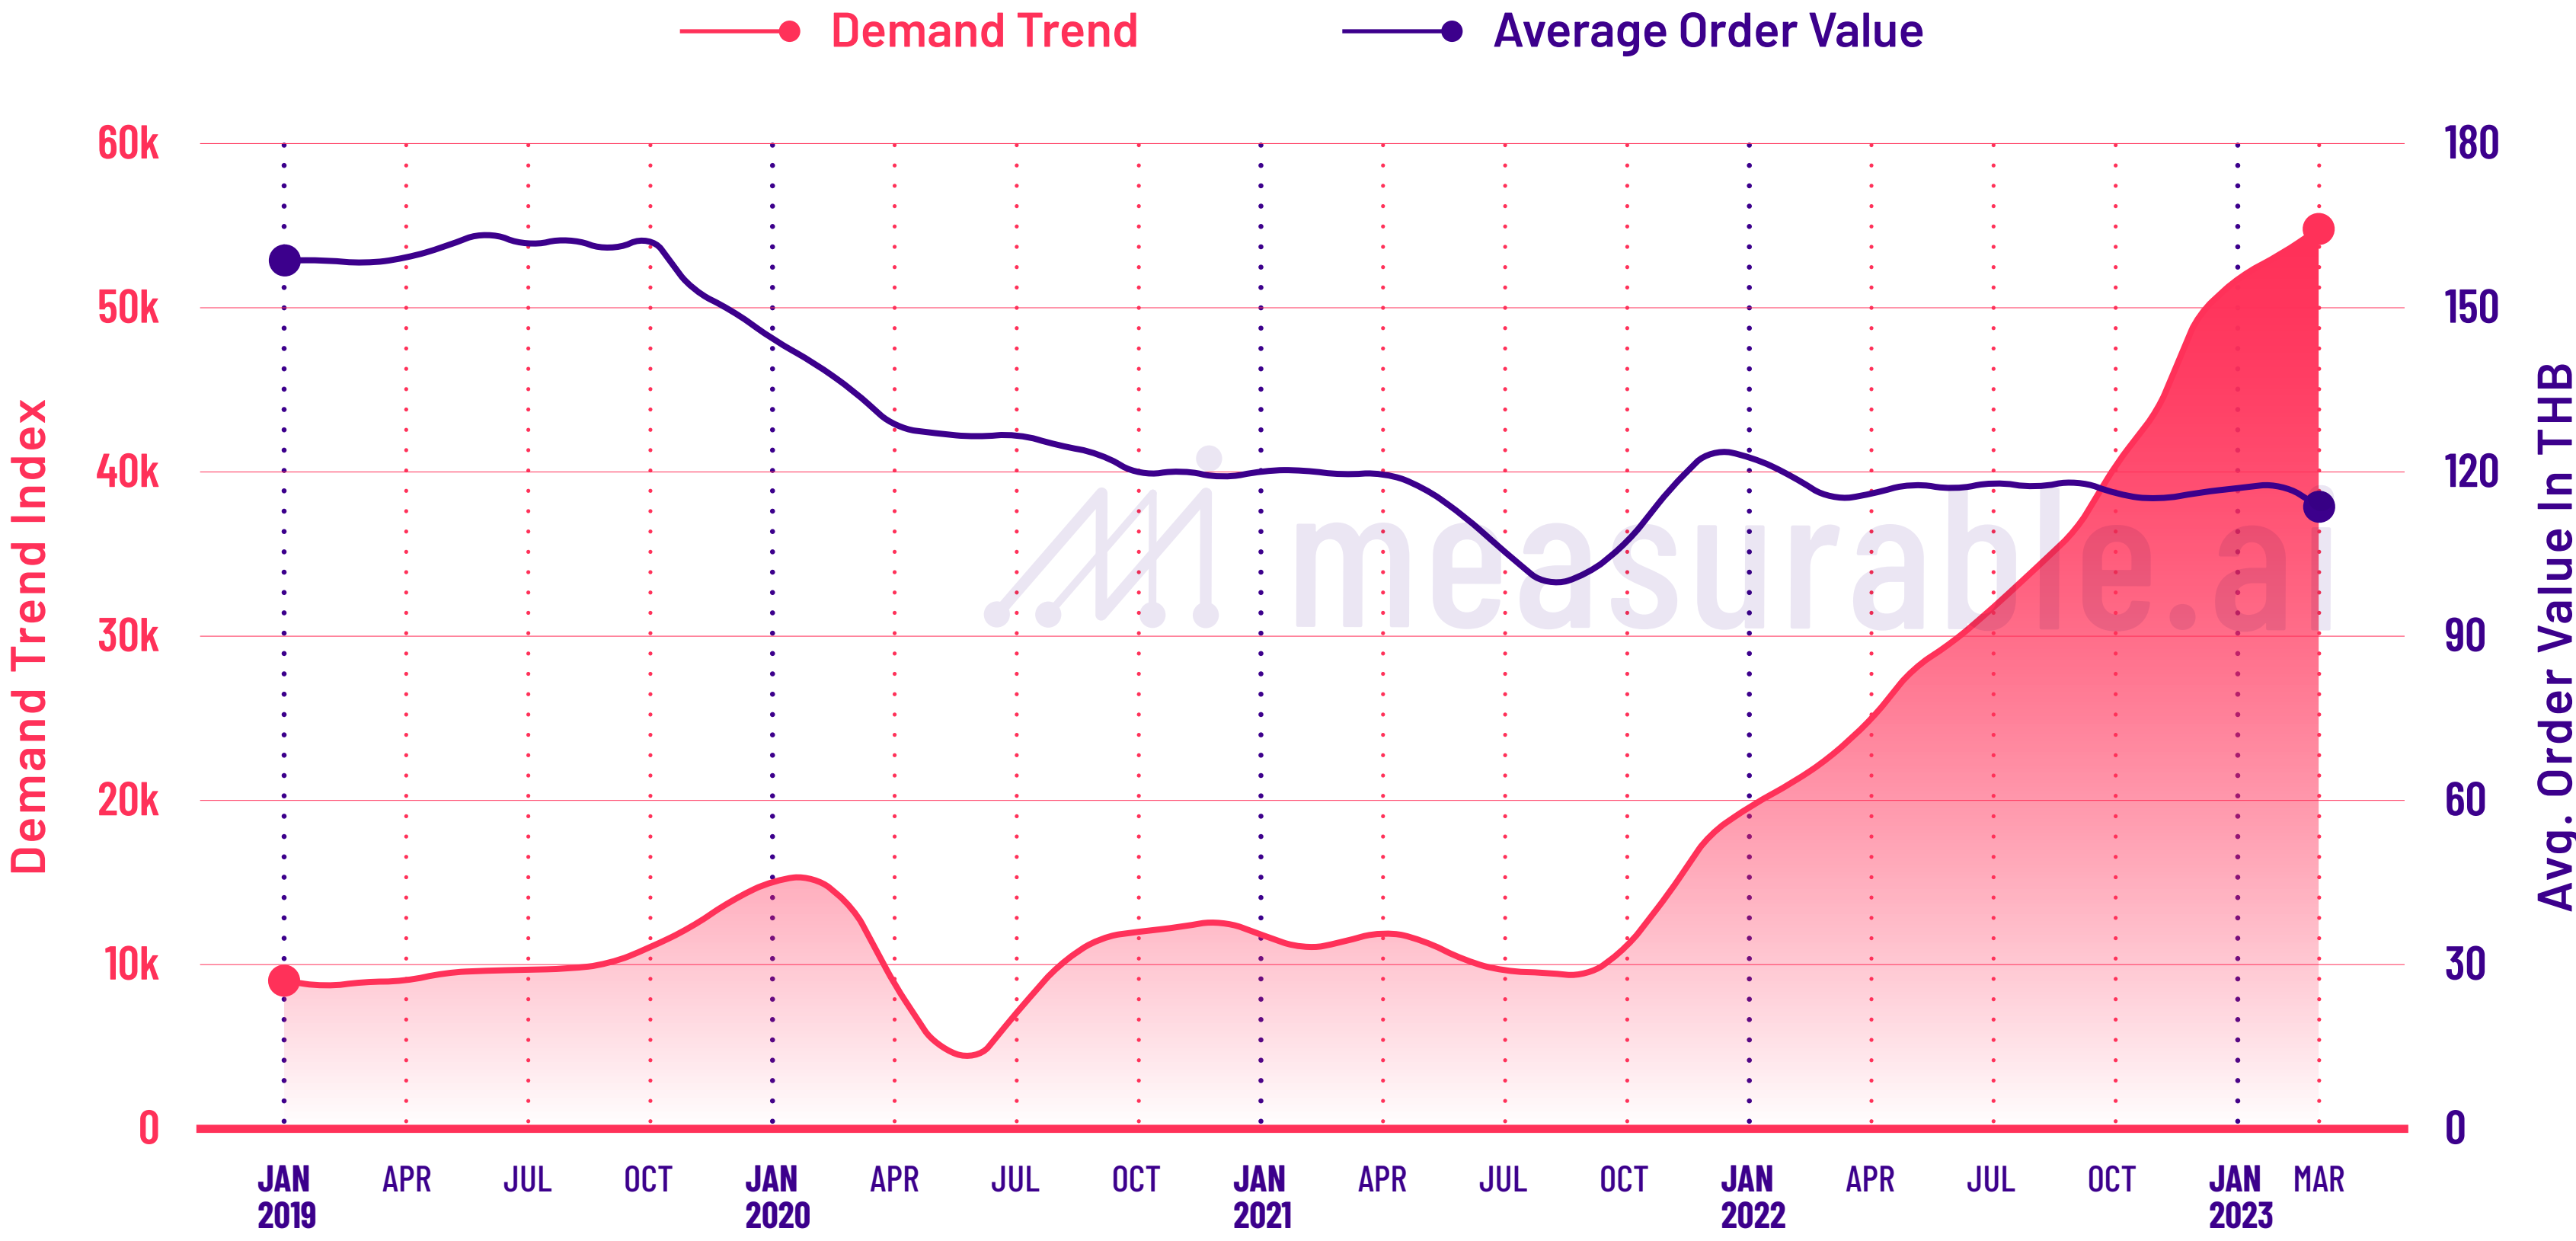

Similar to Indonesia, Vietnam's ride-hailing market also experienced a period of subdued demand. However, a distinct surge was observed in 2022, marking a swift recovery and growth in demand. The average order value witnessed a considerable rise, increasing from around 34,000 VND to almost 60,000 VND by Q1 2023.

Measurable AI: Vietnam Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Gojek, Grab. Both two-wheelers and four-wheelers are included.

THAILAND RIDE-HAILING DEMAND & CONSUMPTION TREND

2019-2023

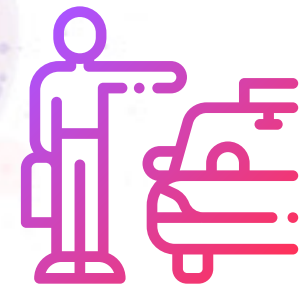

Thailand's ride-hailing market exhibited a strong rebound post-pandemic, with the demand trend growing rapidly at a CAGR of 15.7% based on order volume from 2019 to 2022. Despite this increase in usage, the average order value experienced a slow yet steady decline, falling from around 157 THB in 2019 to just under 120 THB in Q1 2023.

Measurable AI: Thailand Ride-hailing Demand & Consumption *Demand Trend = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Grab, Bolt. Both two-wheelers and four-wheelers are included.

PART II

ASIA

RIDE-HAILING

CONSUMER BEHAVIOUR 

OVERVIEW 2019-2023

INTRODUCTION

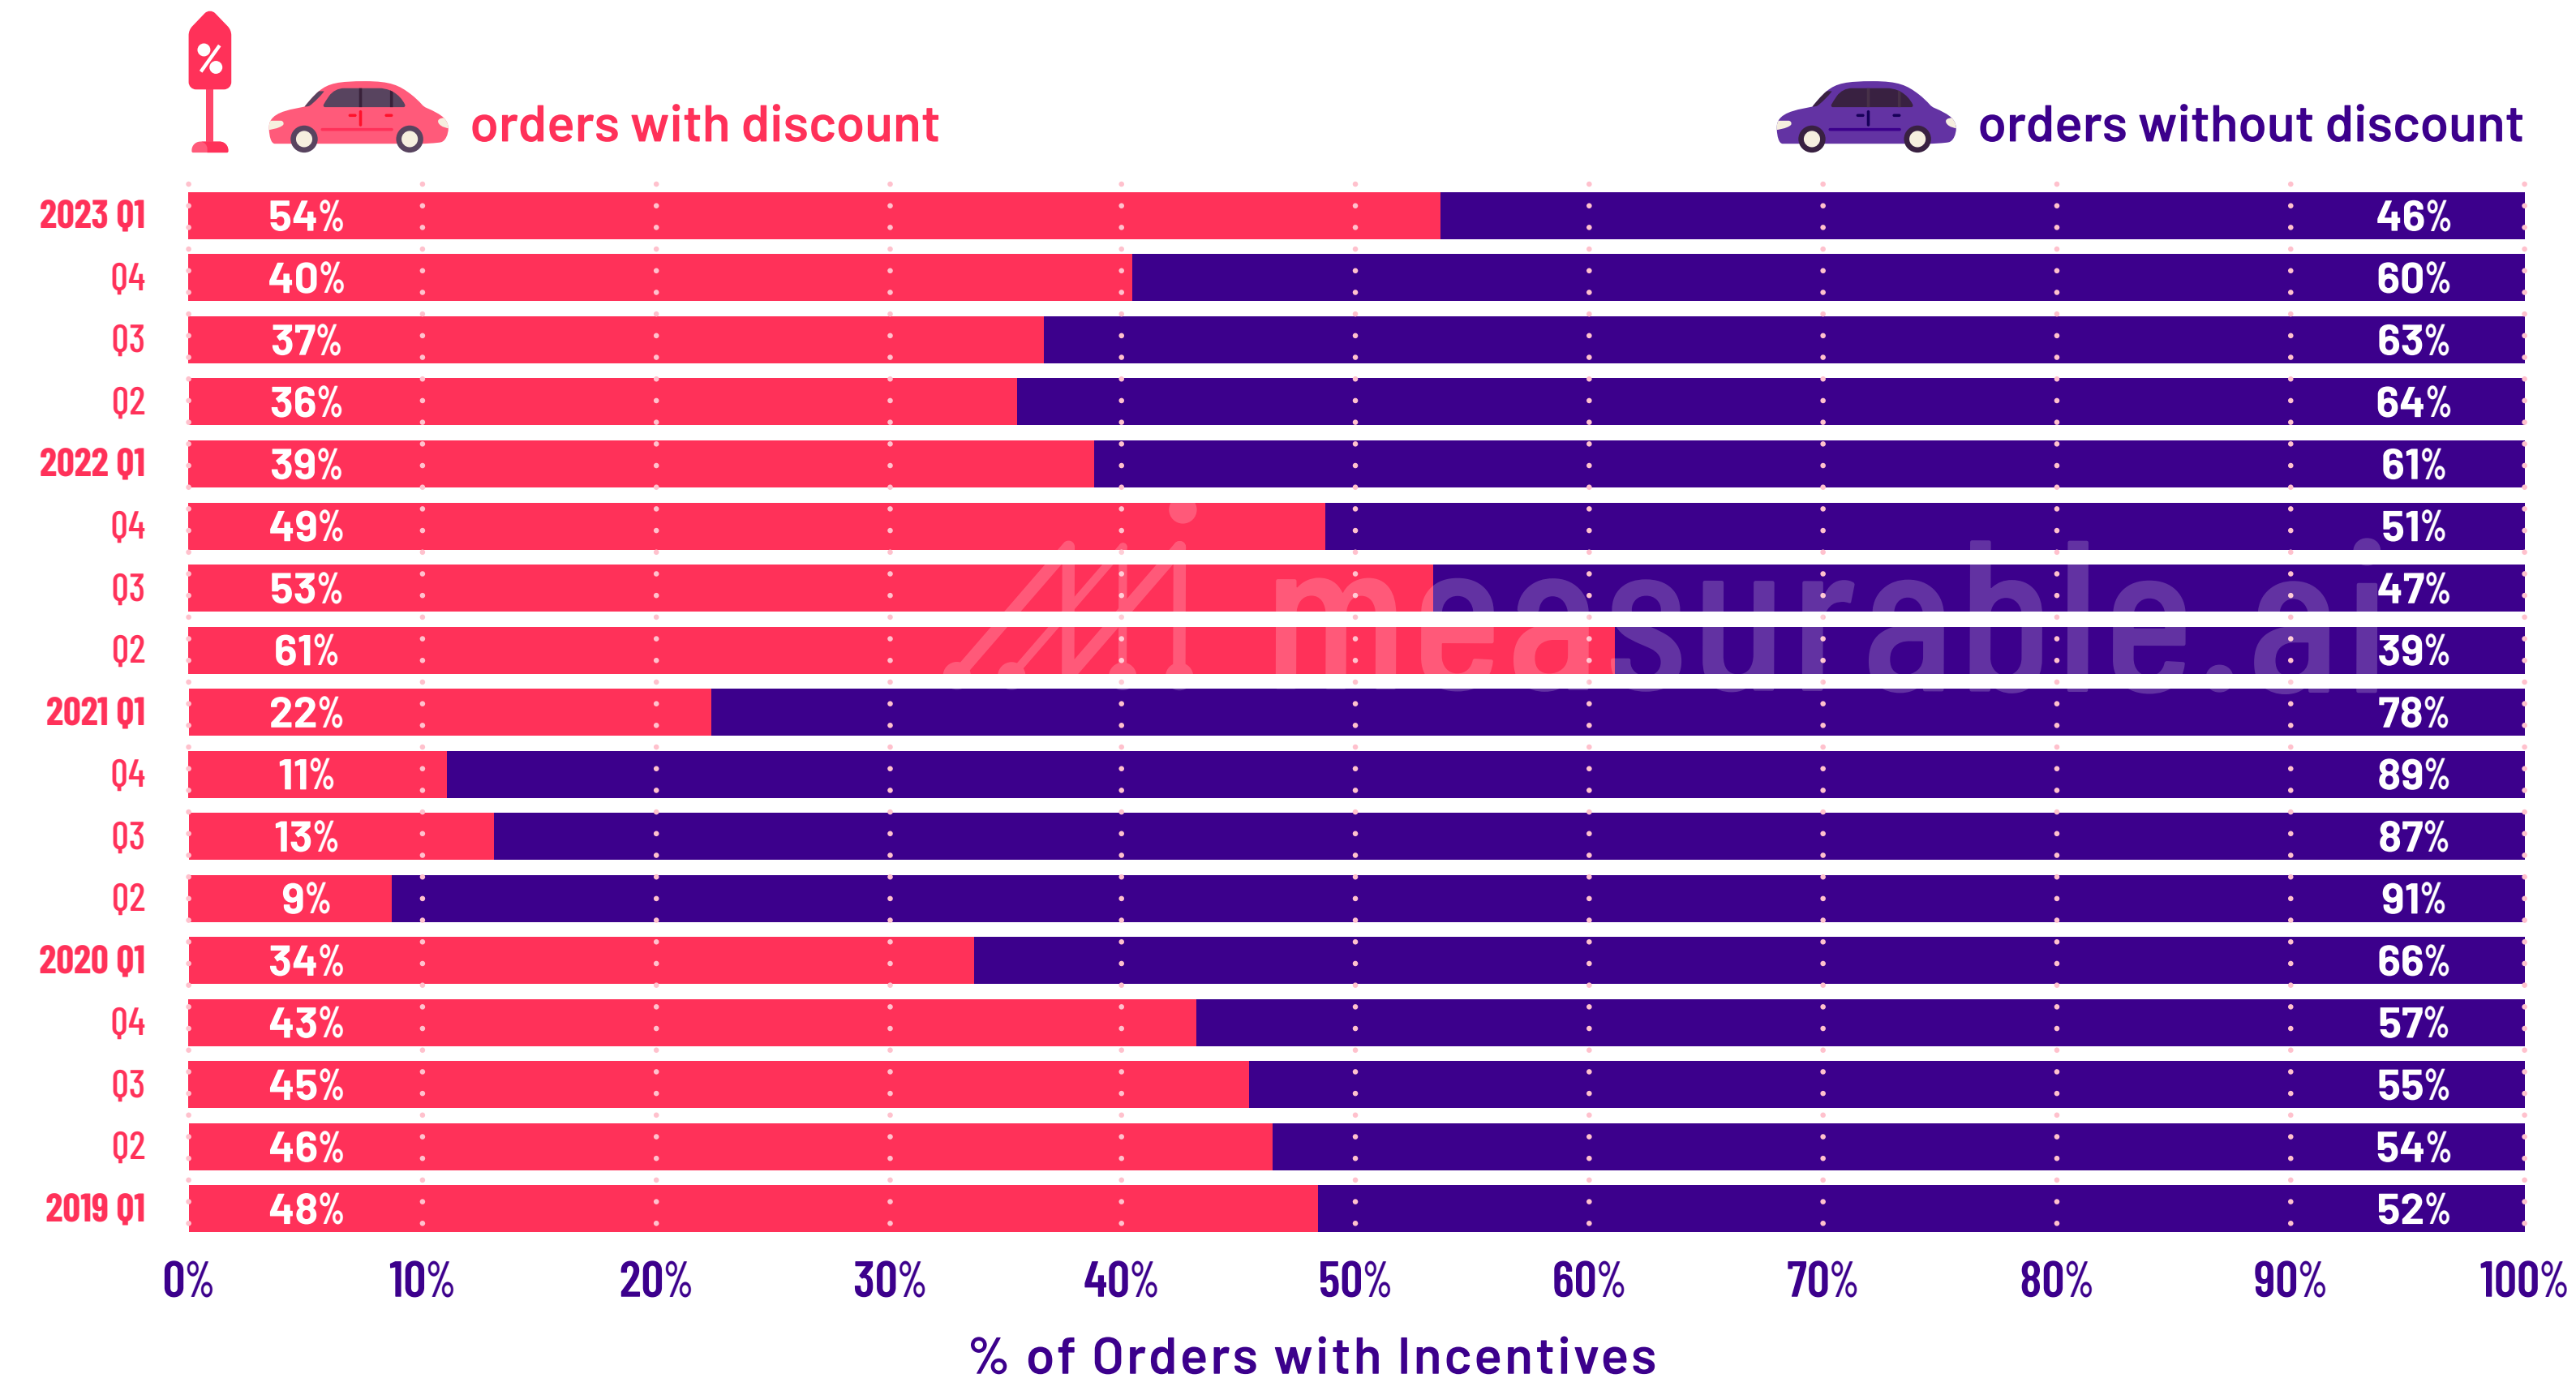

In this section, we analyze ride-hailing users in Asia by examining three key metrics: Incentive and Promotion Trends, Growth Trend and User Loyalty.

The strategic use of promotions and incentives significantly impacts customer choices and the revenue streams in the ride-hailing industry, especially in a competitive landscape and in the face of demand rebound post-pandemic. This prompts the question: How has the rate of ride-hailing promotions fluctuated over time?

In this segment, we present findings derived from Measurable AI's e-receipt data, illustrating the evolving proportion of incentivized ride-hailing orders across five major Asian markets.

INDONESIA RIDE-HAILING INCENTIVE TREND

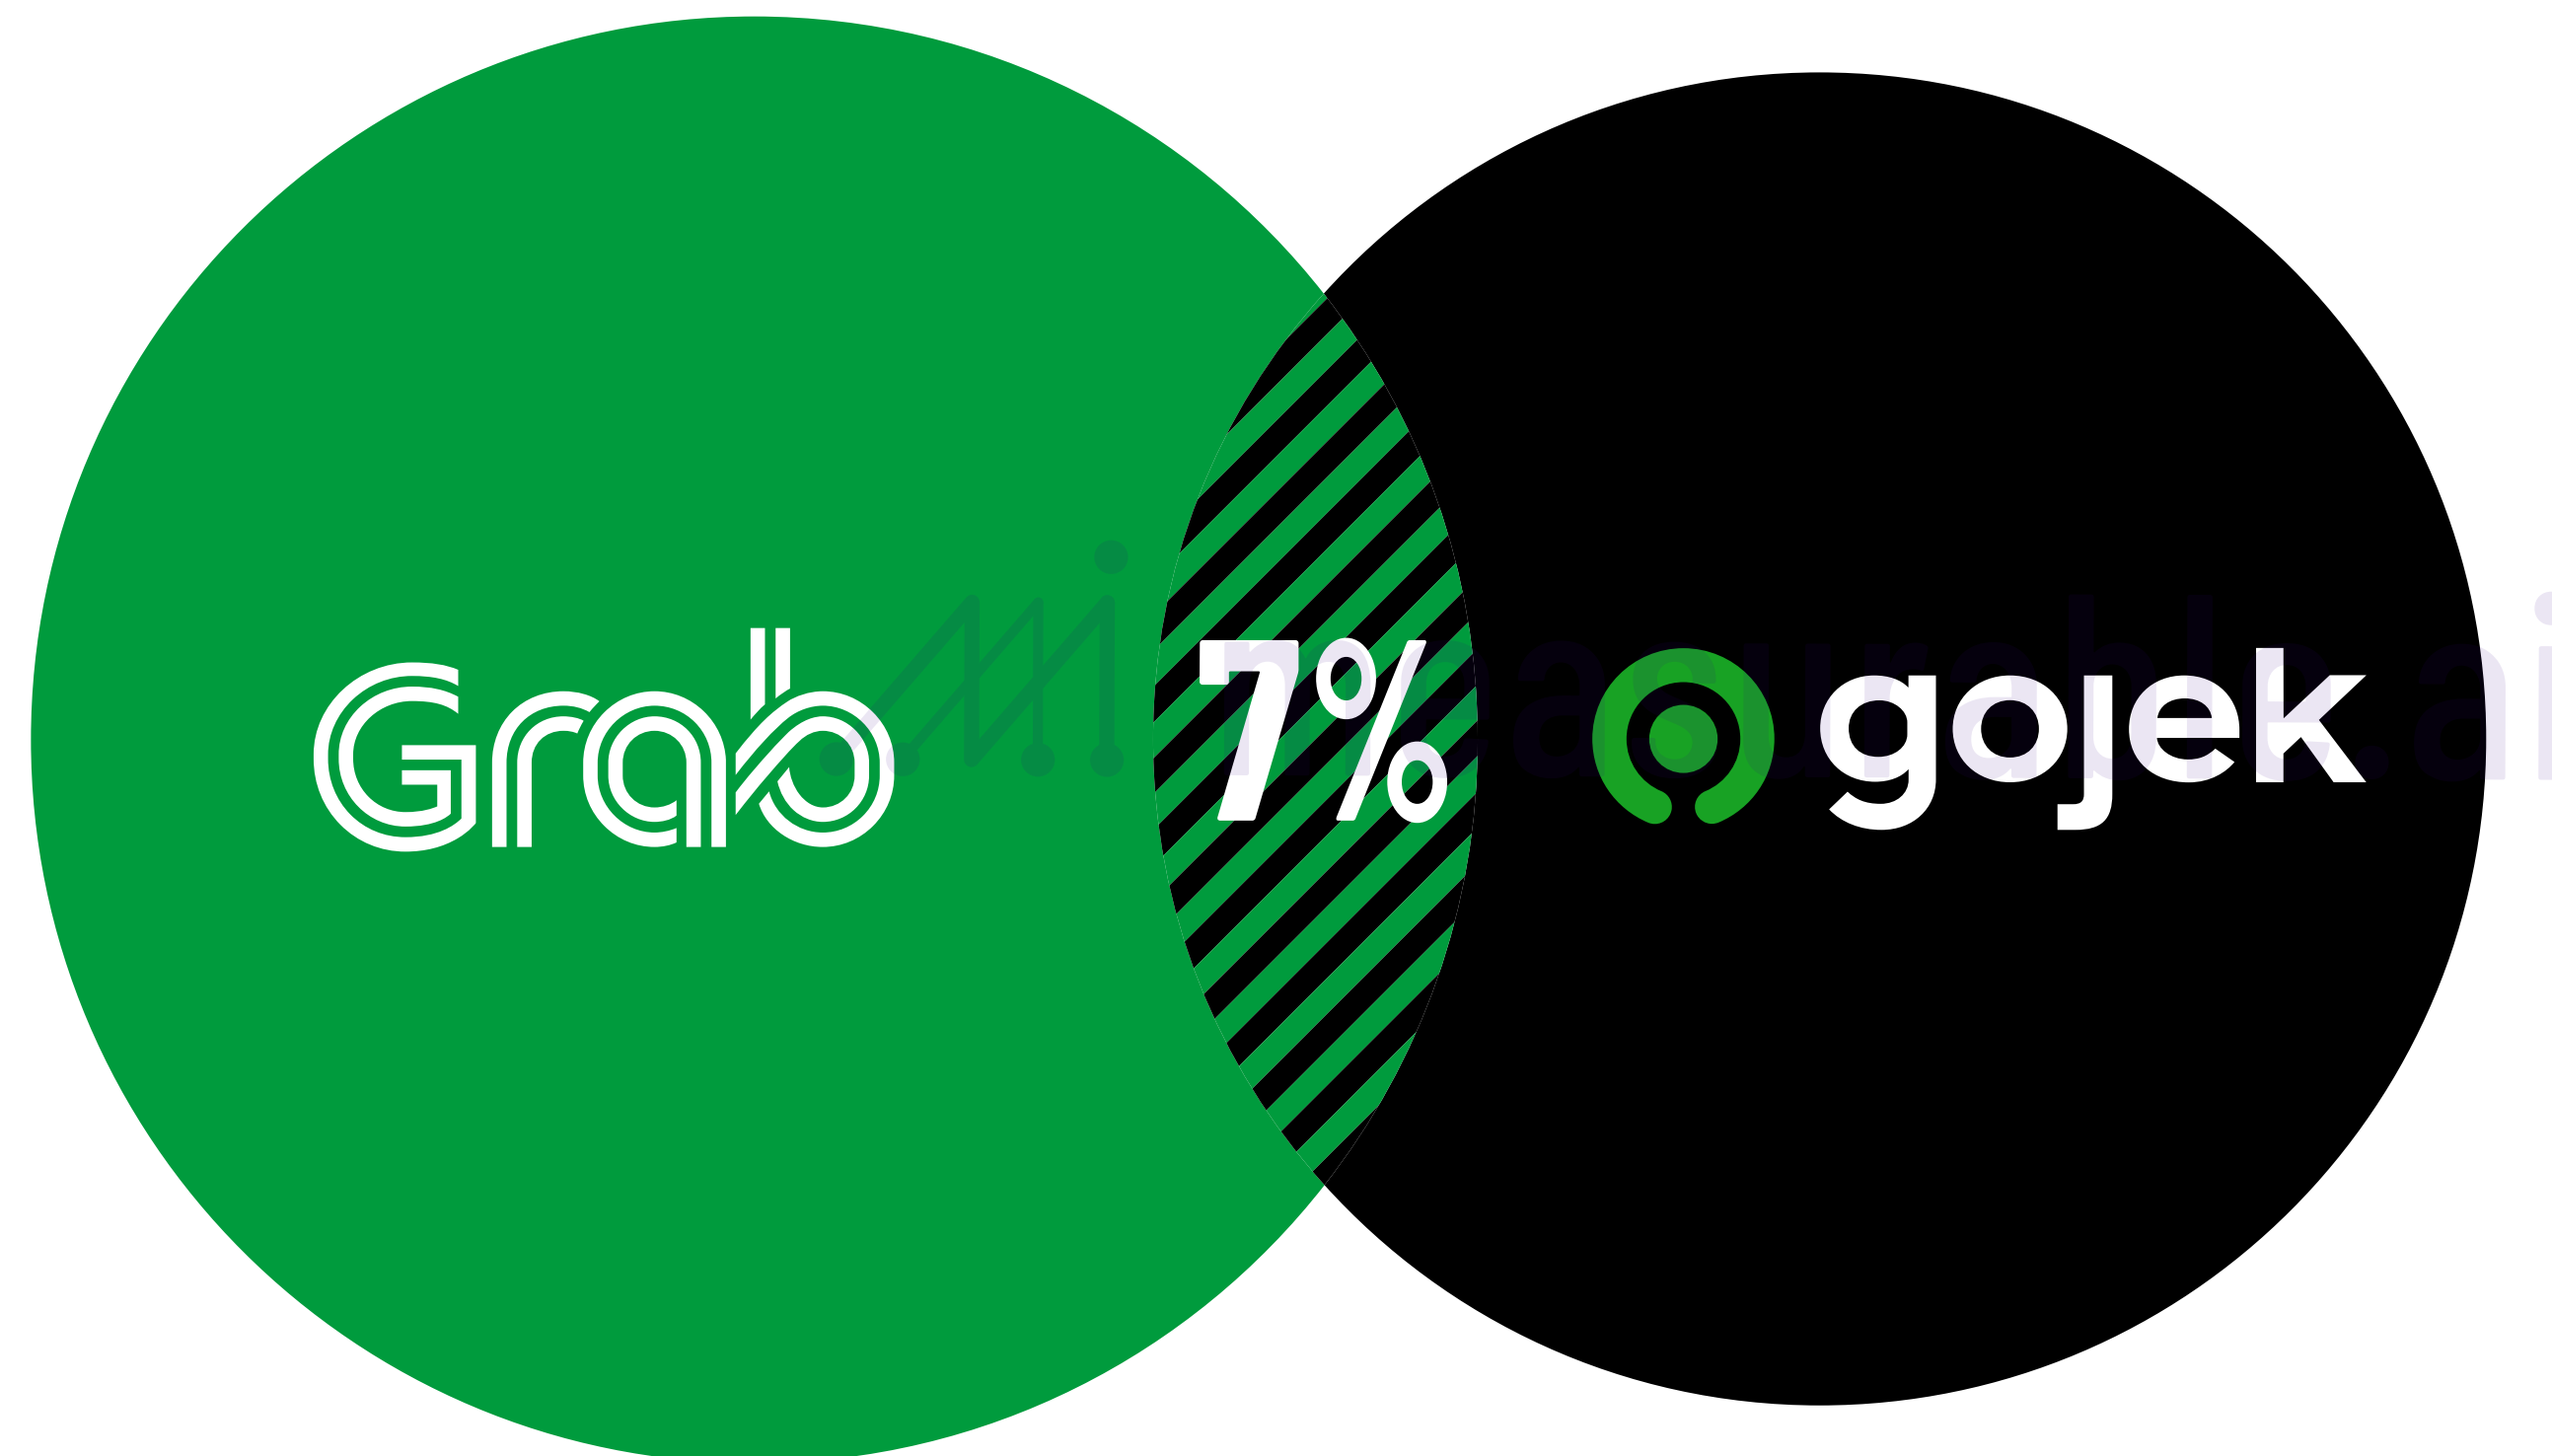

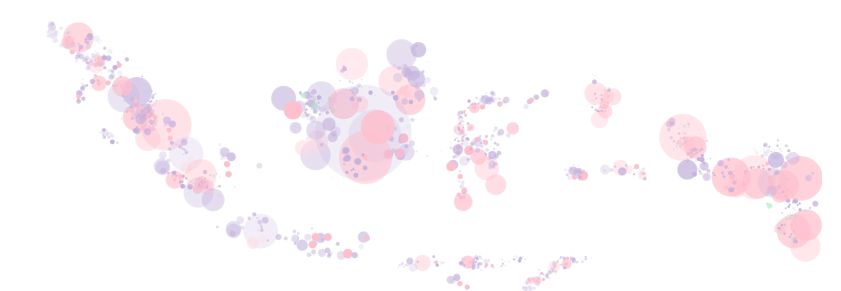

2019 2023

Apart from the period of the pandemic breakout, the incentive rate for ride-hailing has consistently held a high position in Indonesia compared to other Asian markets. Back in 2019, approximately 45% of orders were coupled with incentives. Though it slightly dipped to 38% in 2022, by Q1 2023, the rate saw an uptick, reaching around 54% among all orders.

INDONESIA RIDE-HAILING LOYALTY OVERVIEW

2022 Q4
2023 Q1

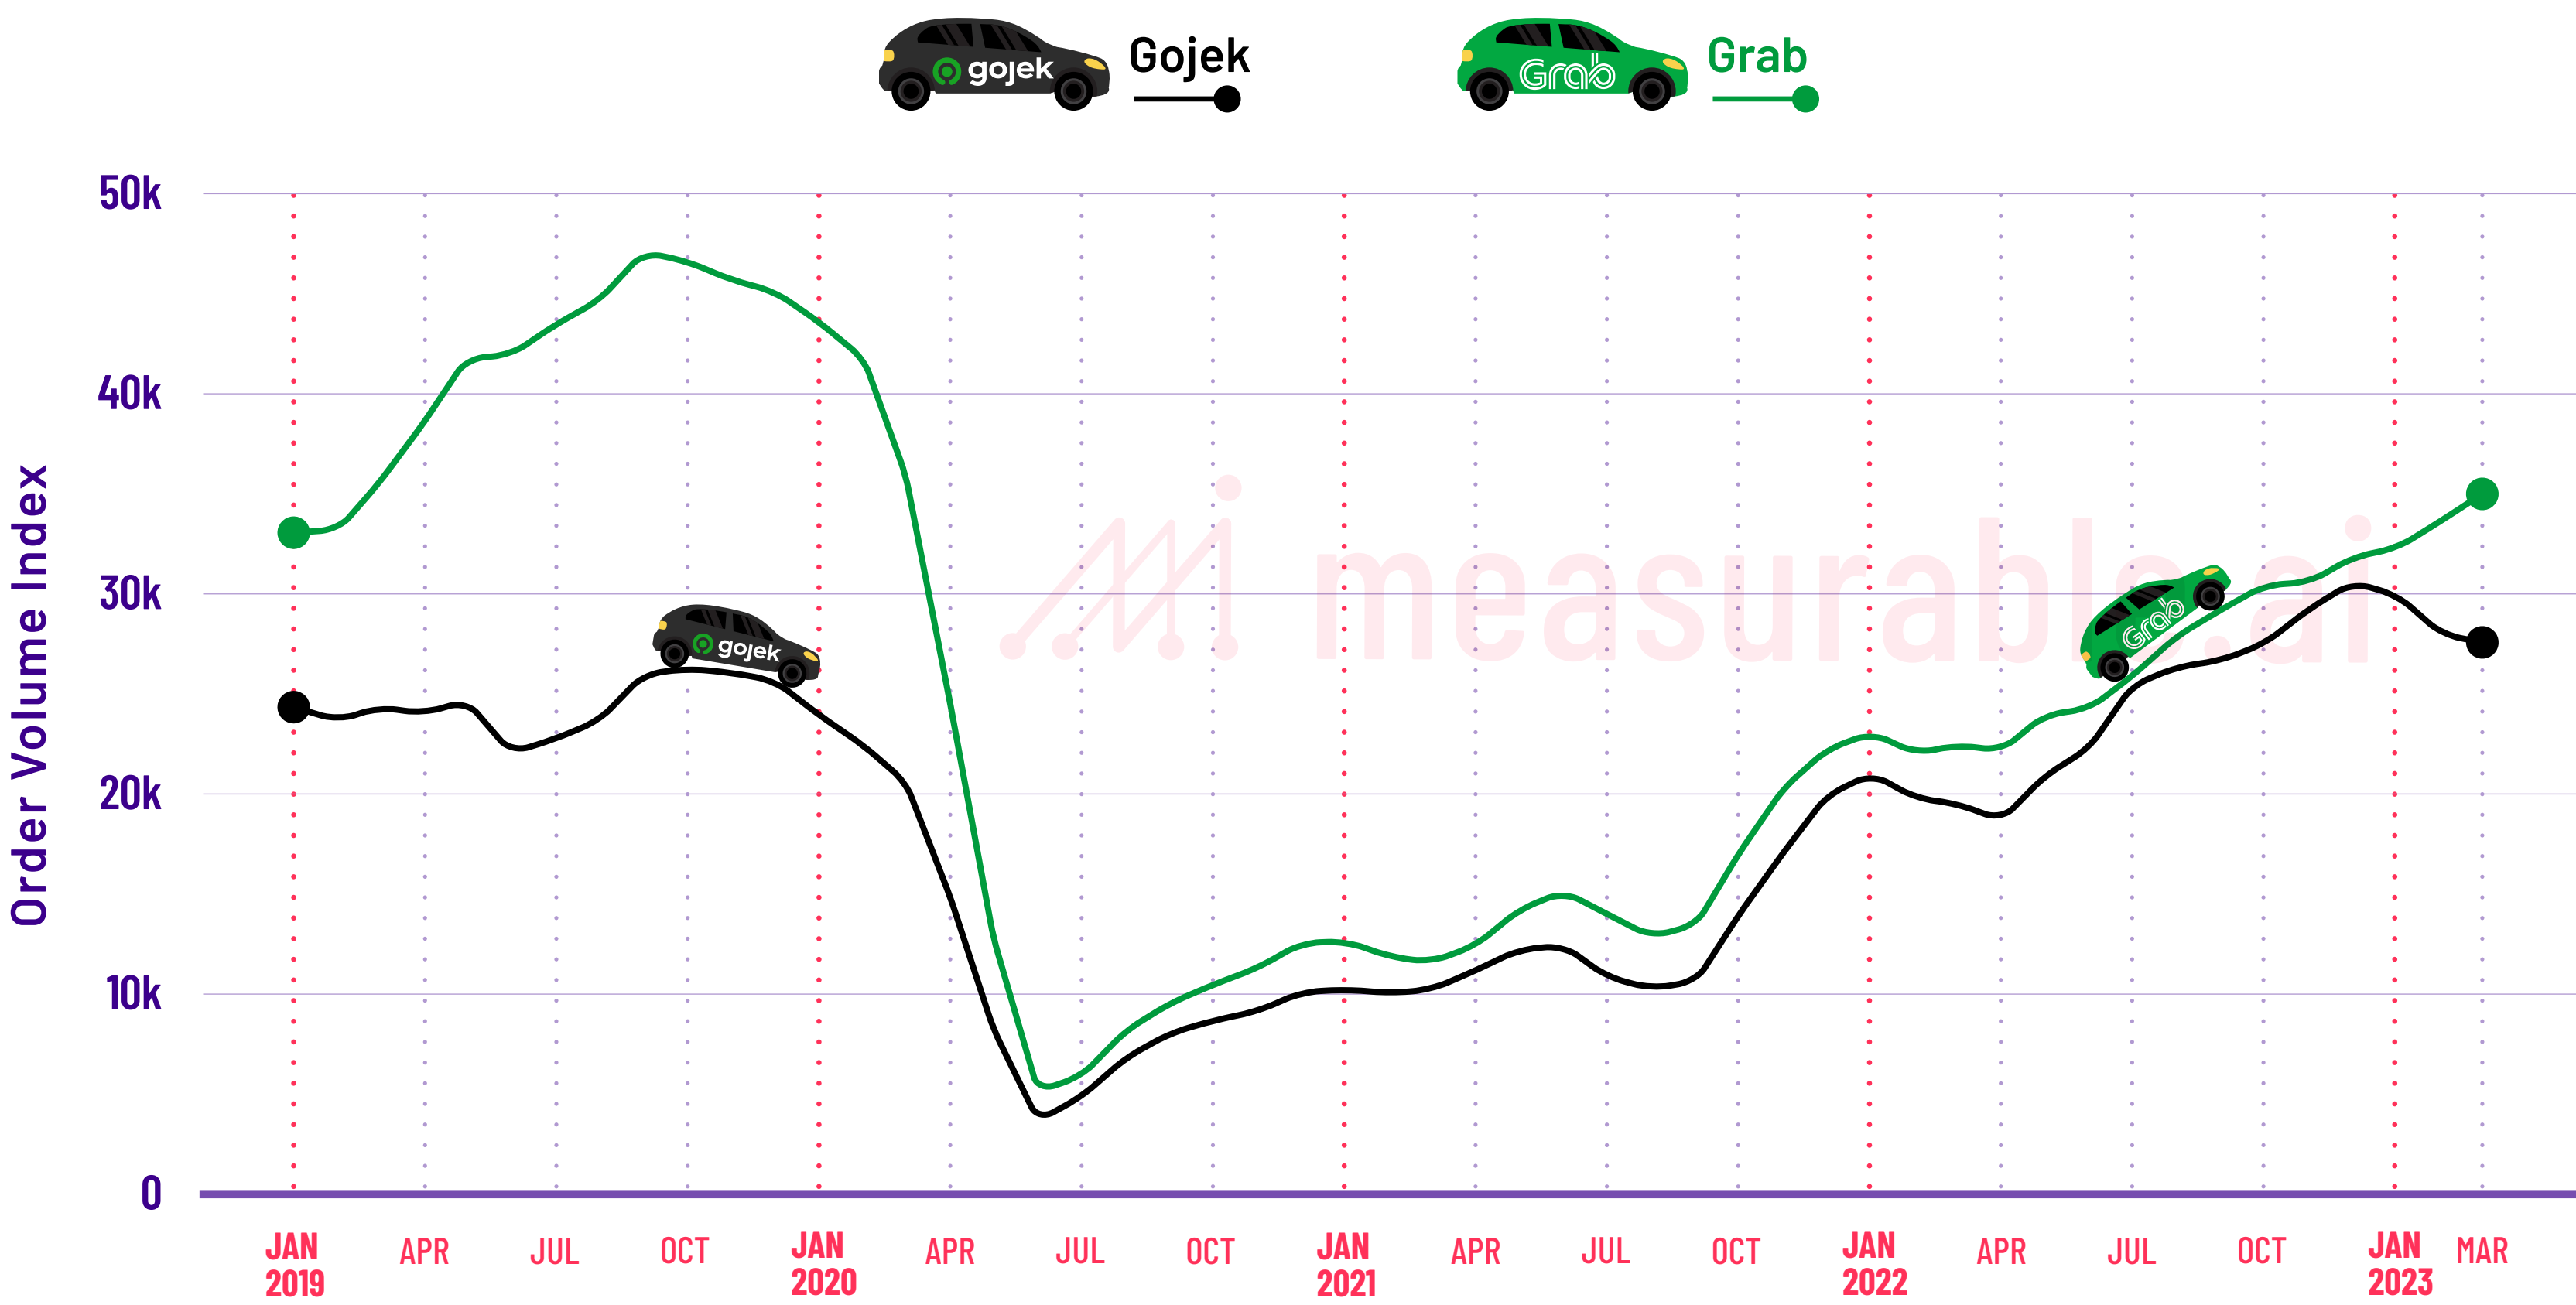

The Indonesia ride-hailing market is a duopoly between Grab and Gojek. From Measurable AI's e-receipt panel, there is a 7% user overlap between the two players across Q4 2022 - Q1 2023.

Measurable AI: Indonesia Ride-hailing Overlap (Grab vs Gojek); *Estimated orders in this chart are captured in Measurable AI's unique consumer panel. Data range 2022 October - 2023 March. Both two-wheelers and four-wheelers are included.

INDONESIA RIDE-HAILING GROWTH TREND OVERVIEW

2019-2023

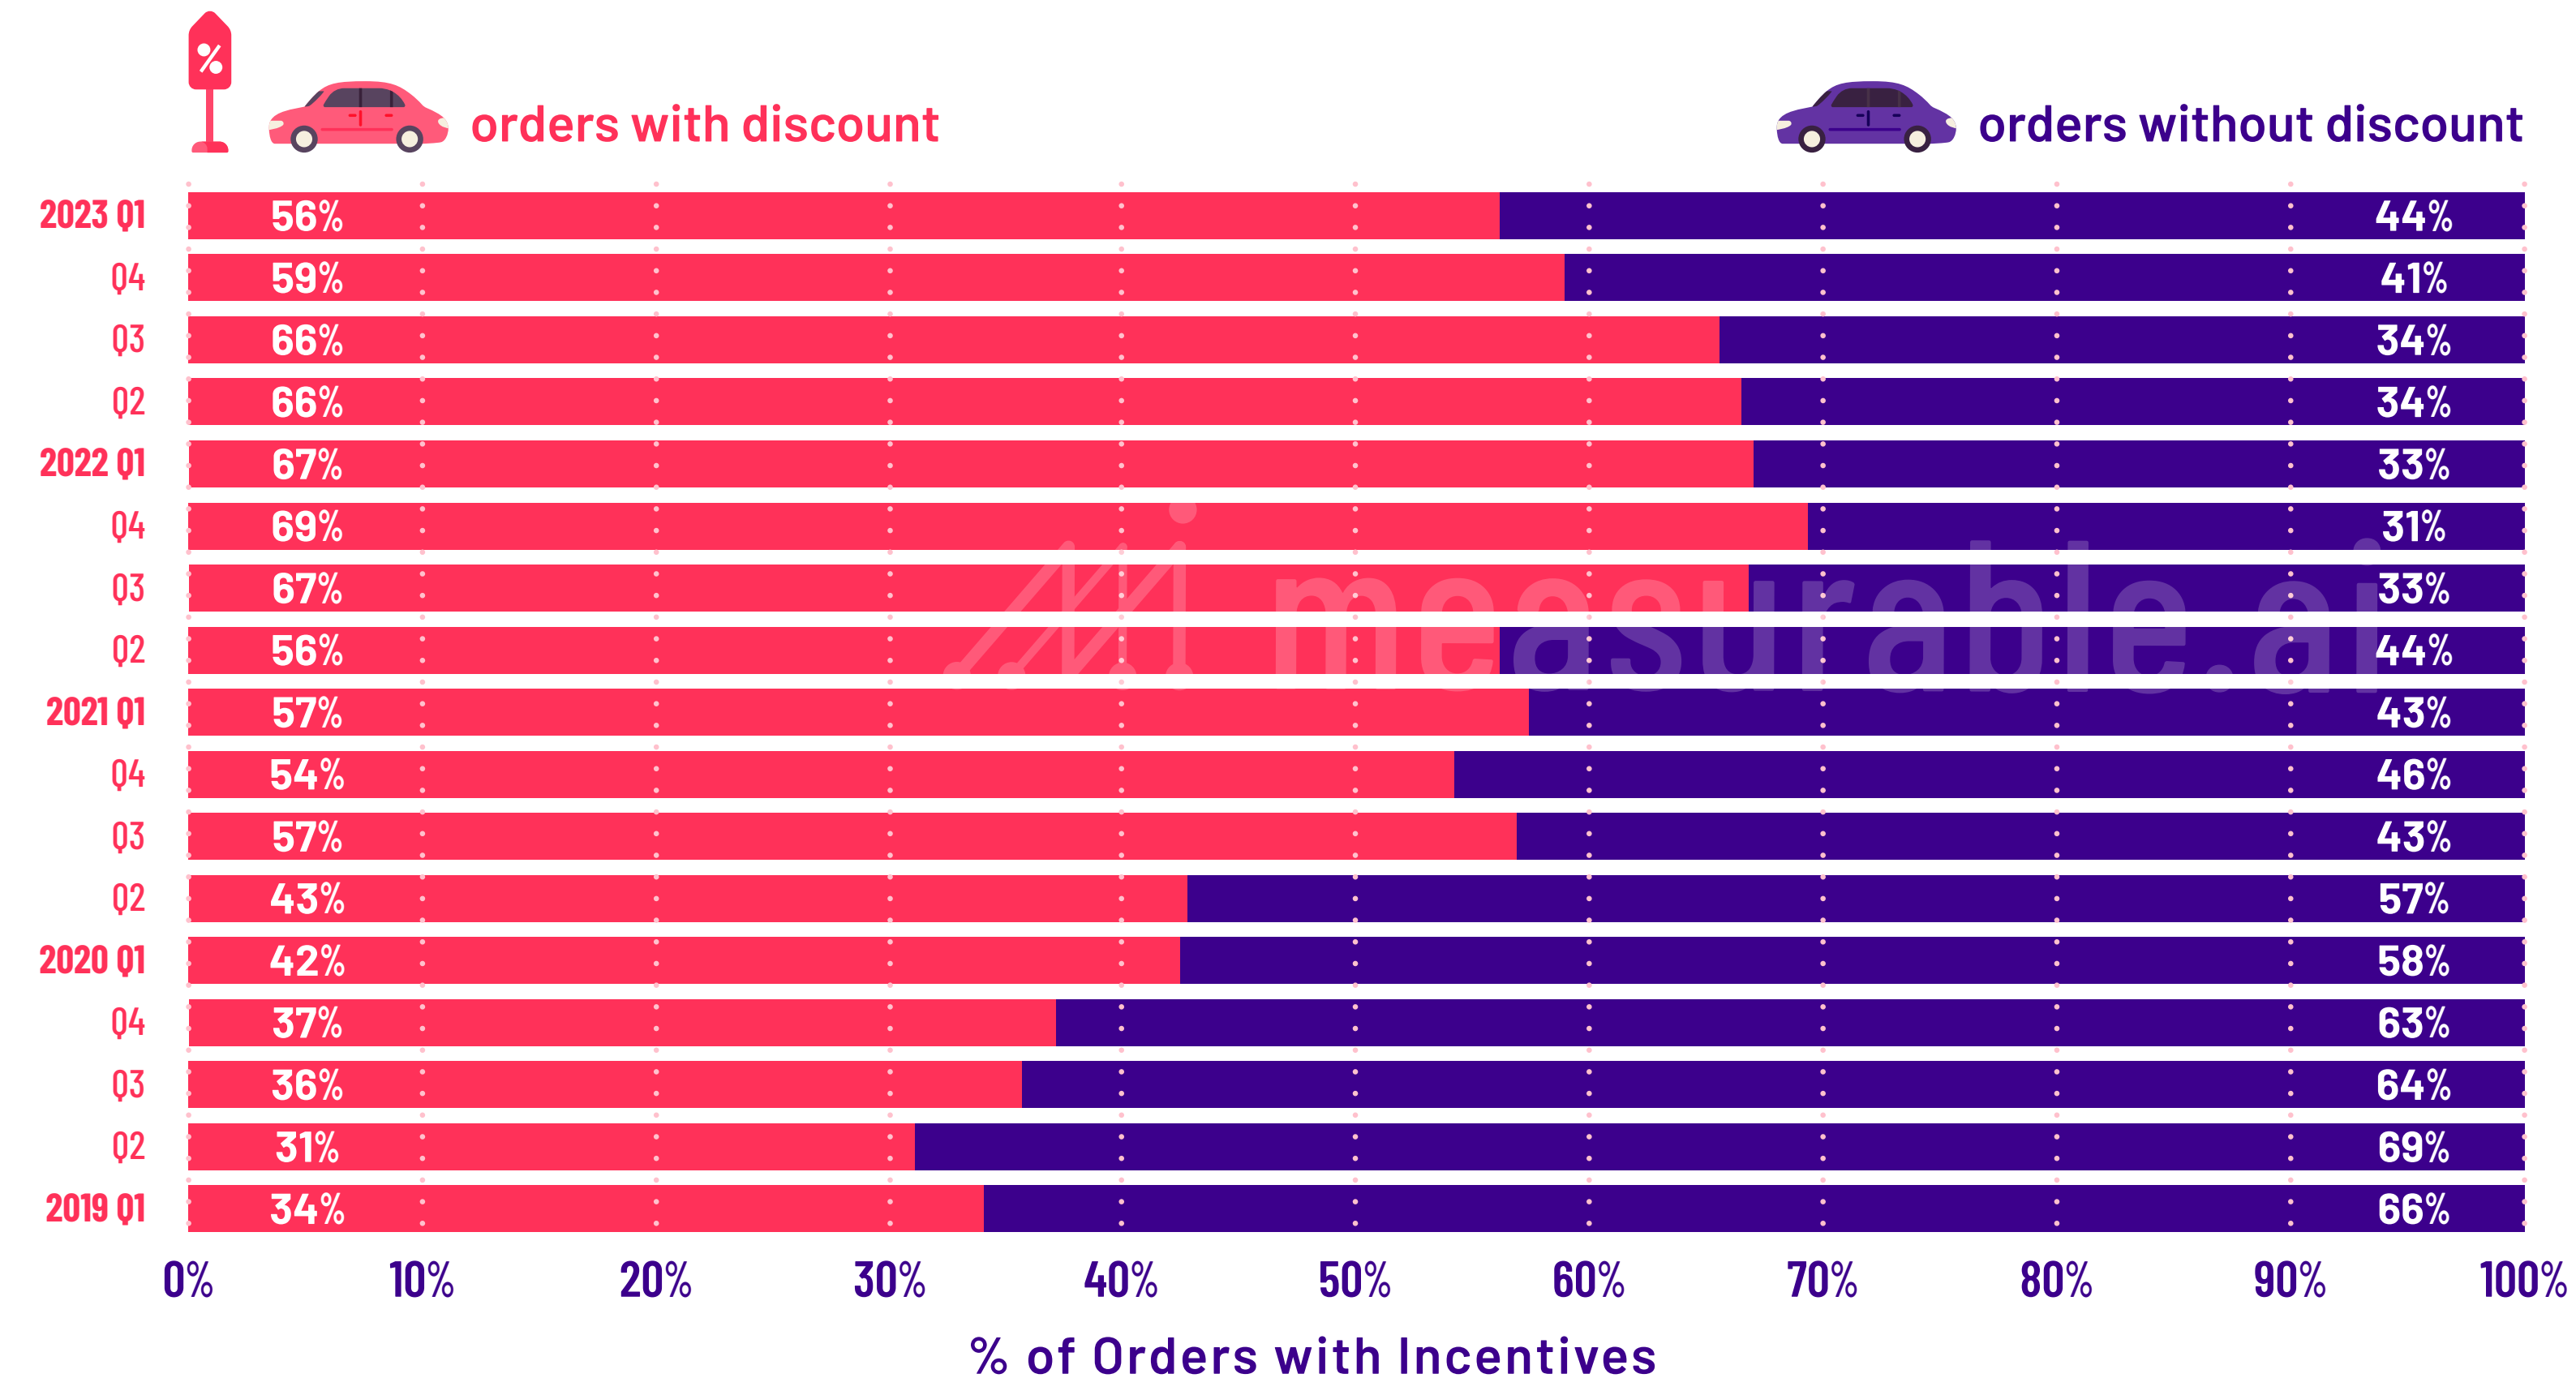

In the Indonesian market, Gojek and Grab persist as the leading contenders in ride-hailing. Their fierce competition has remained evenly matched since the onset of the pandemic, with neither able to claim clear victory. As we entered 2023 in Q1, Grab has seen a slight edge, processing a marginally larger volume of orders, which encompasses both two-wheelers and four-wheelers.

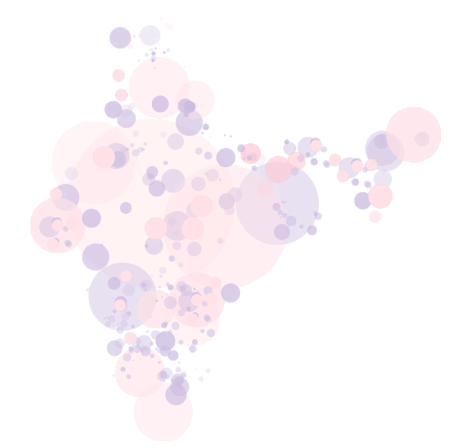

Measurable AI: Indonesia Ride-hailing Growth Trend Overview *Order Volume = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Gojek, Grab. Both two-wheelers and four-wheelers are included.

INDIA RIDE-HAILING INCENTIVE TREND

2019 2023

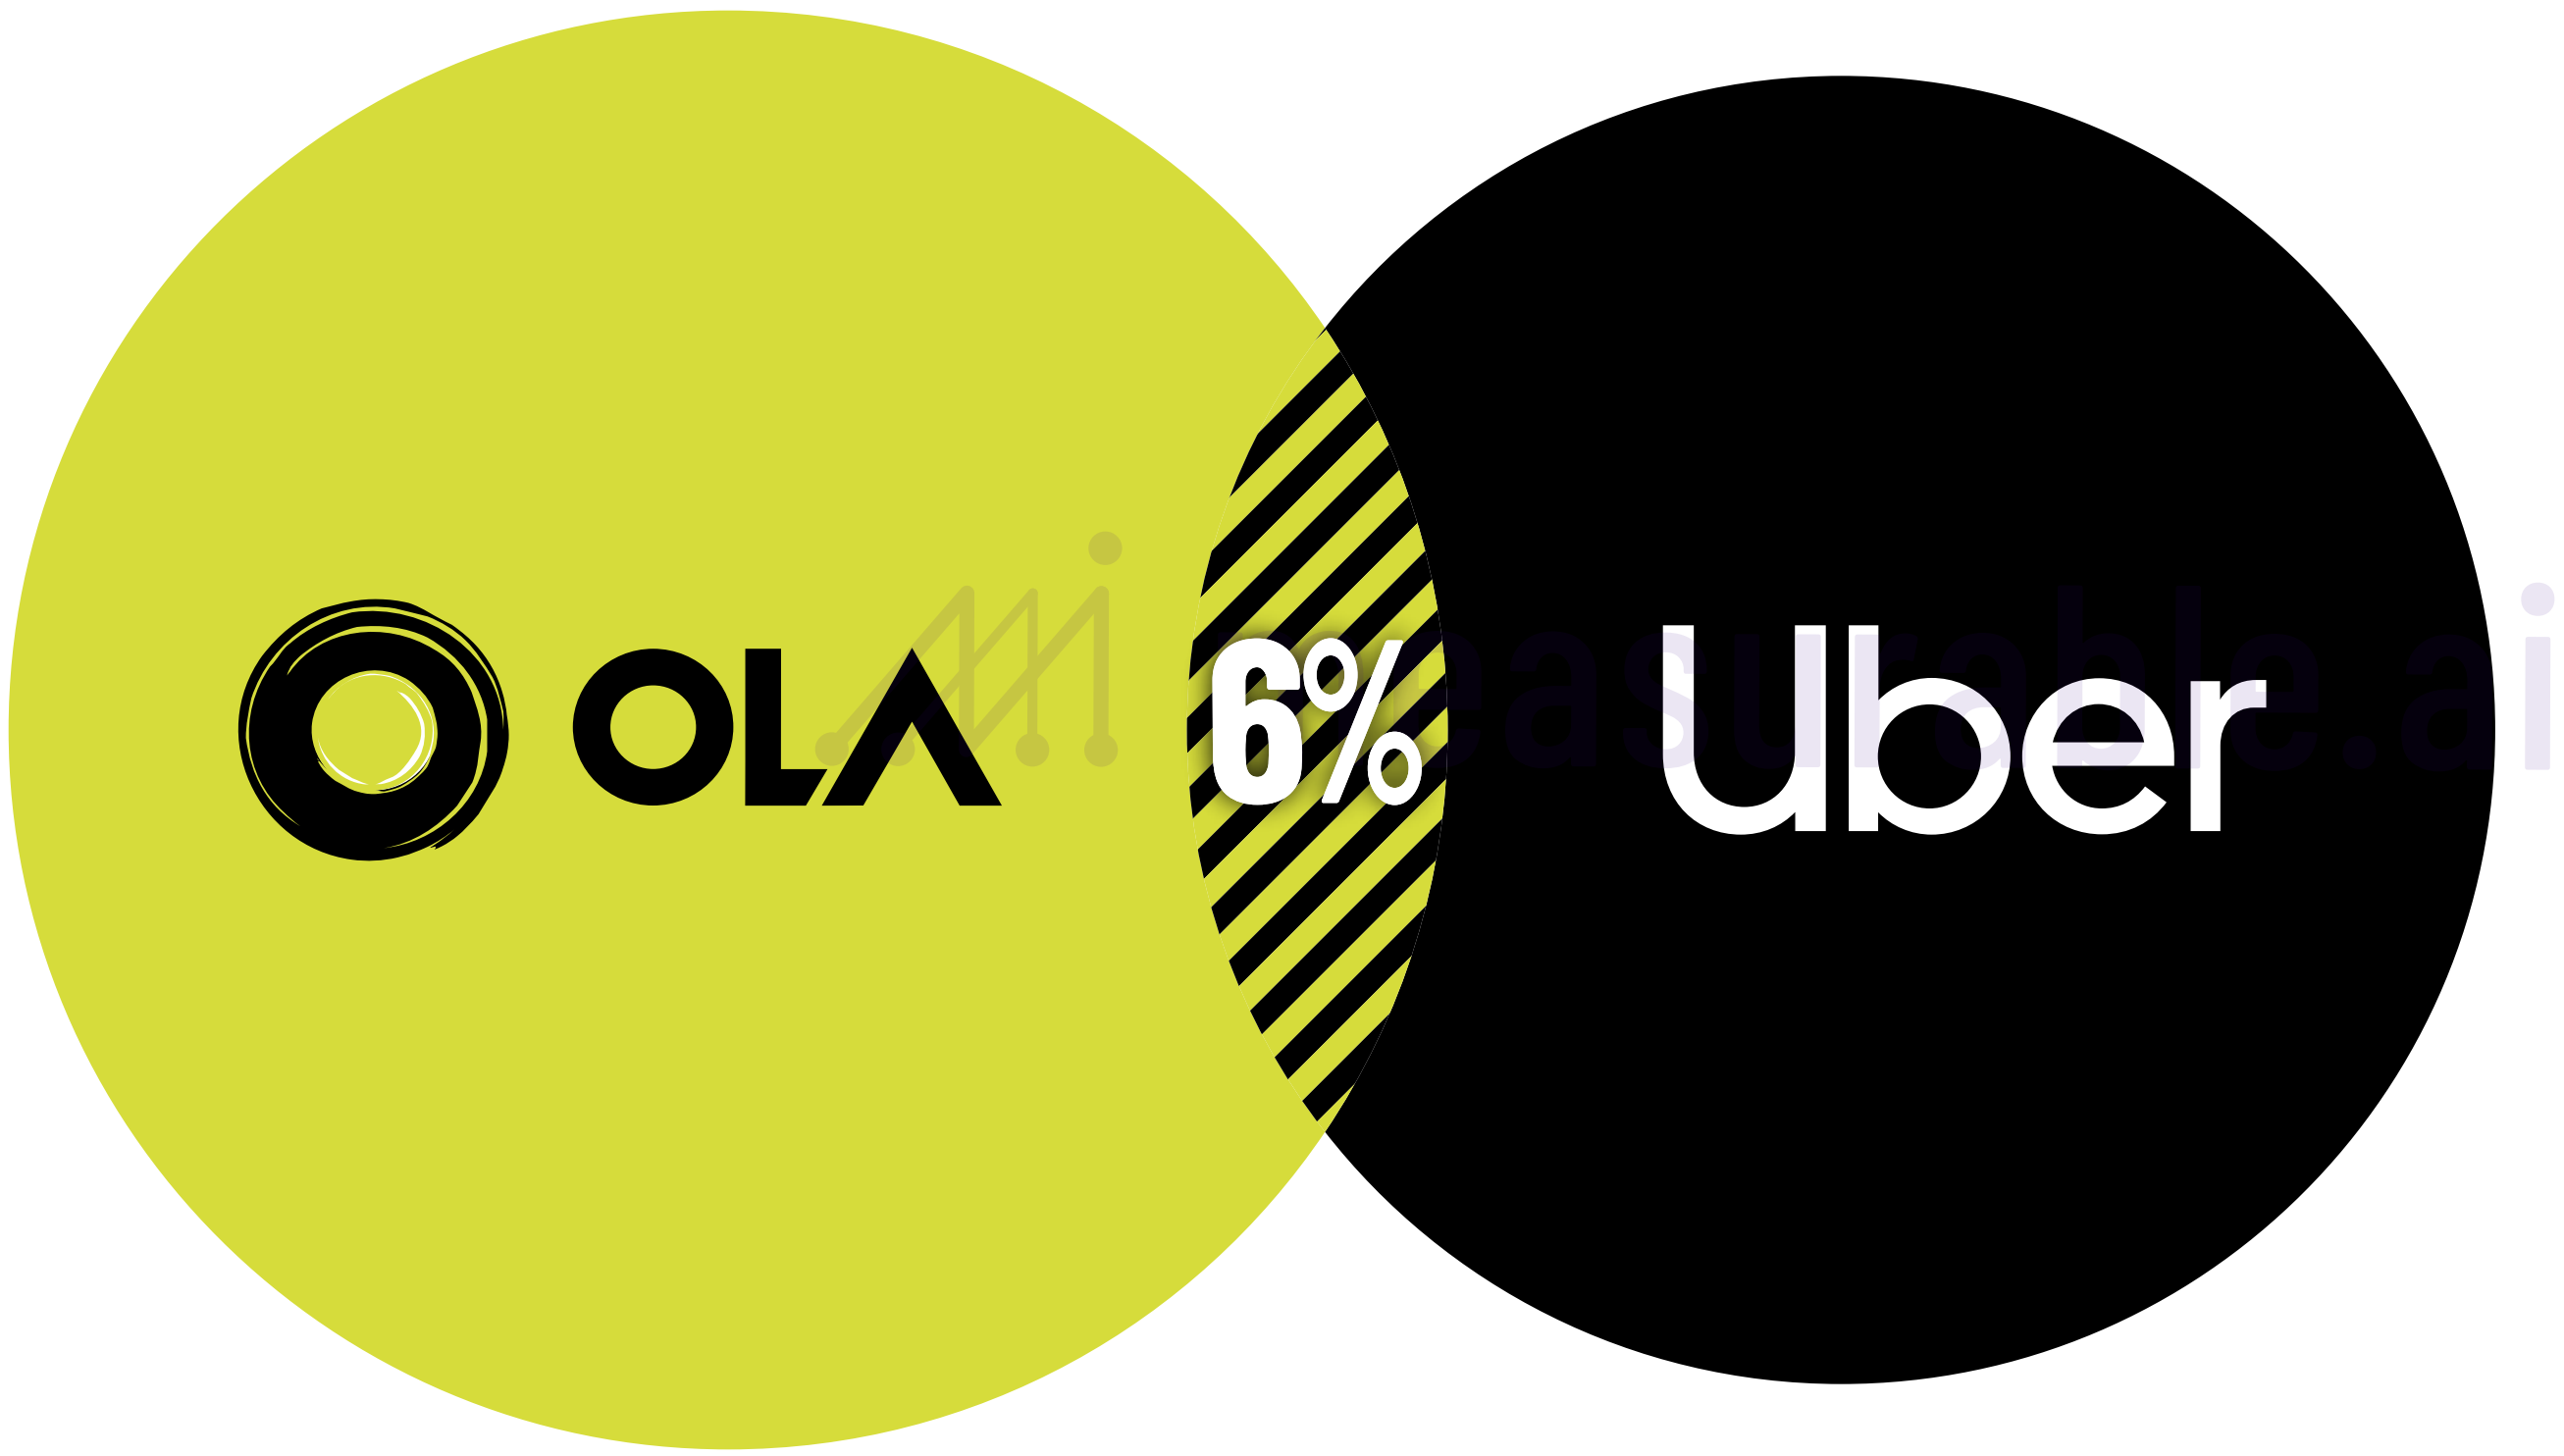

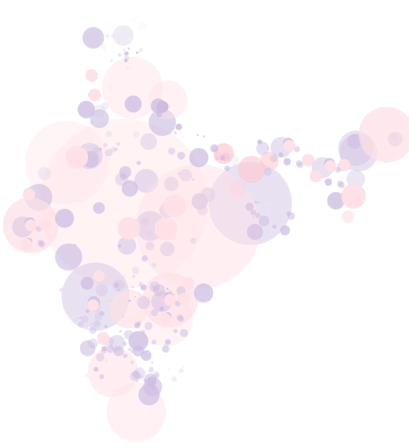

Measurable AI: India Ride-hailing Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Ola Cabs, Uber

Incentives have a major presence in India's ride-hailing market, and this presence is only growing. Back in 2019, incentives were a part of around 35% of ride-hailing orders. Fast forward to 2022, and this figure has nearly doubled to about 65%. This signifies that over half of the ride-hailing services utilized in India come with some form of incentive.

INDIA RIDE-HAILING LOYALTY OVERVIEW

2022 Q4
2023 Q1

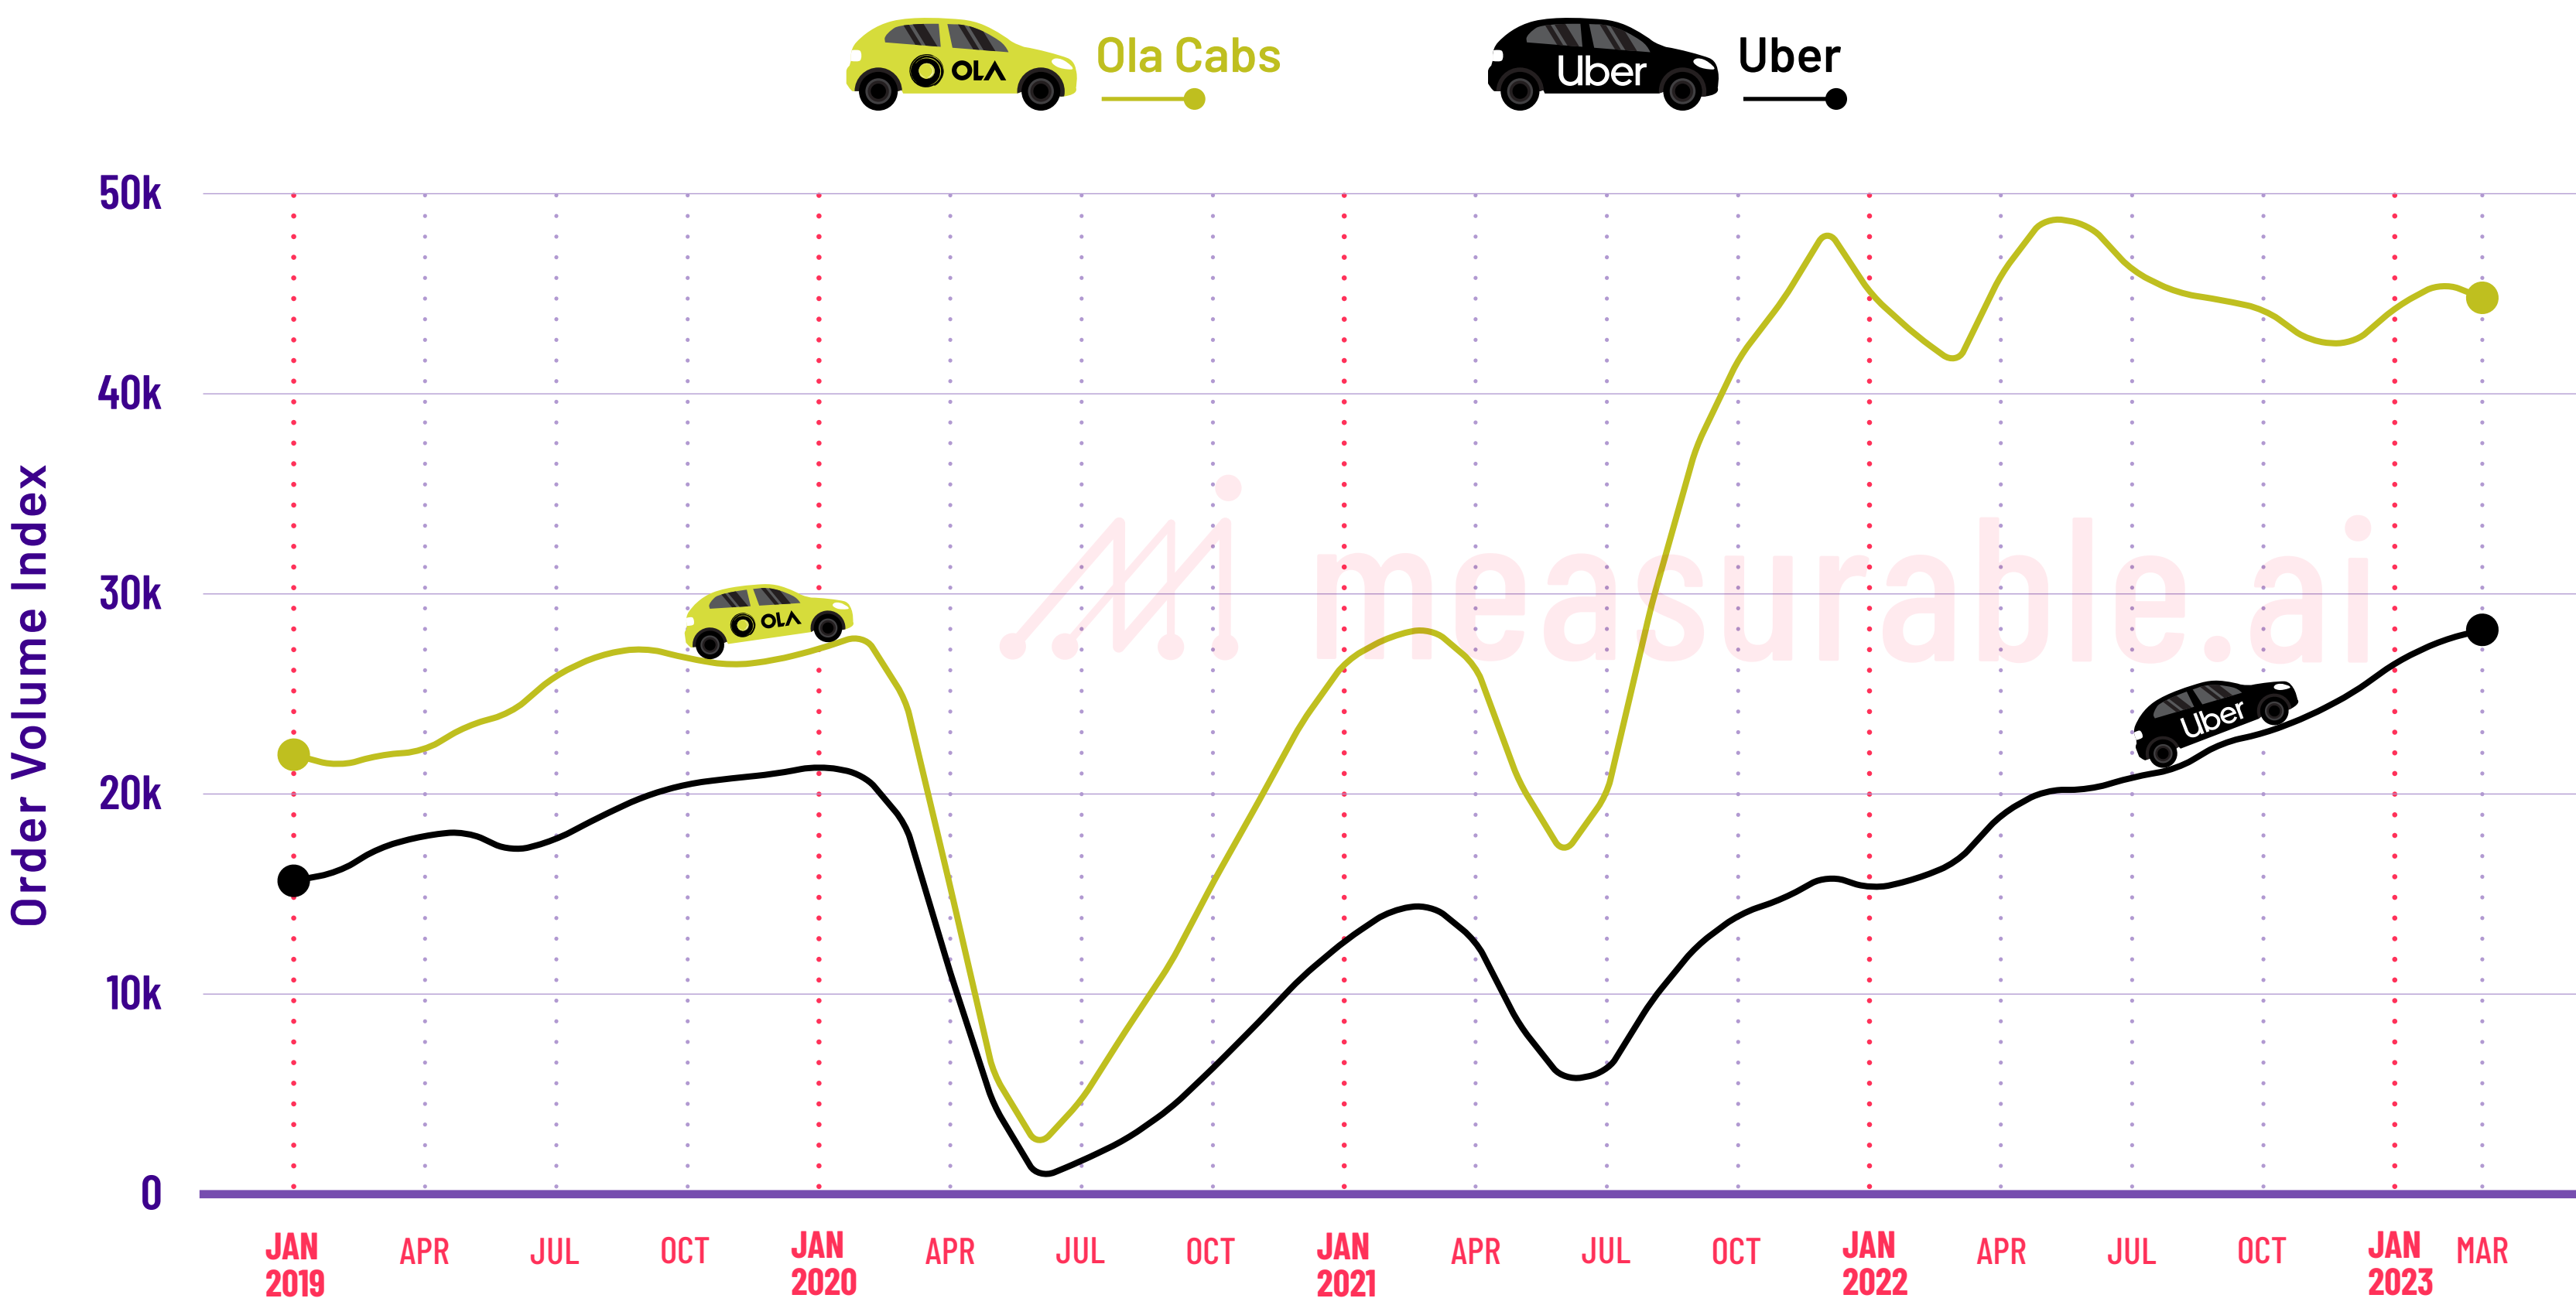

In India, over the past two quarters, Ola Cabs and Uber share a user overlap of around 6%.

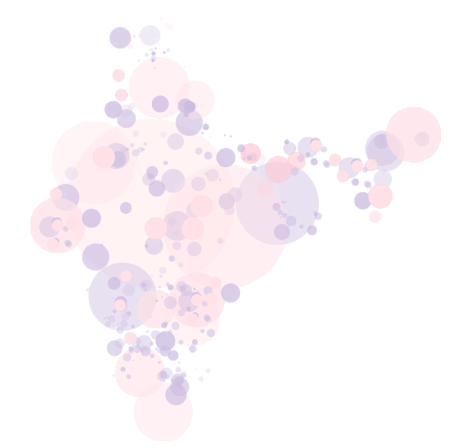

Measurable AI: India Ride-hailing Overlap (Ola vs Uber); *Estimated orders in this chart are captured in Measurable AI's unique consumer panel. Data range 2022 October - 2023 March

INDIA RIDE-HAILING GROWTH TREND OVERVIEW

2019-2023

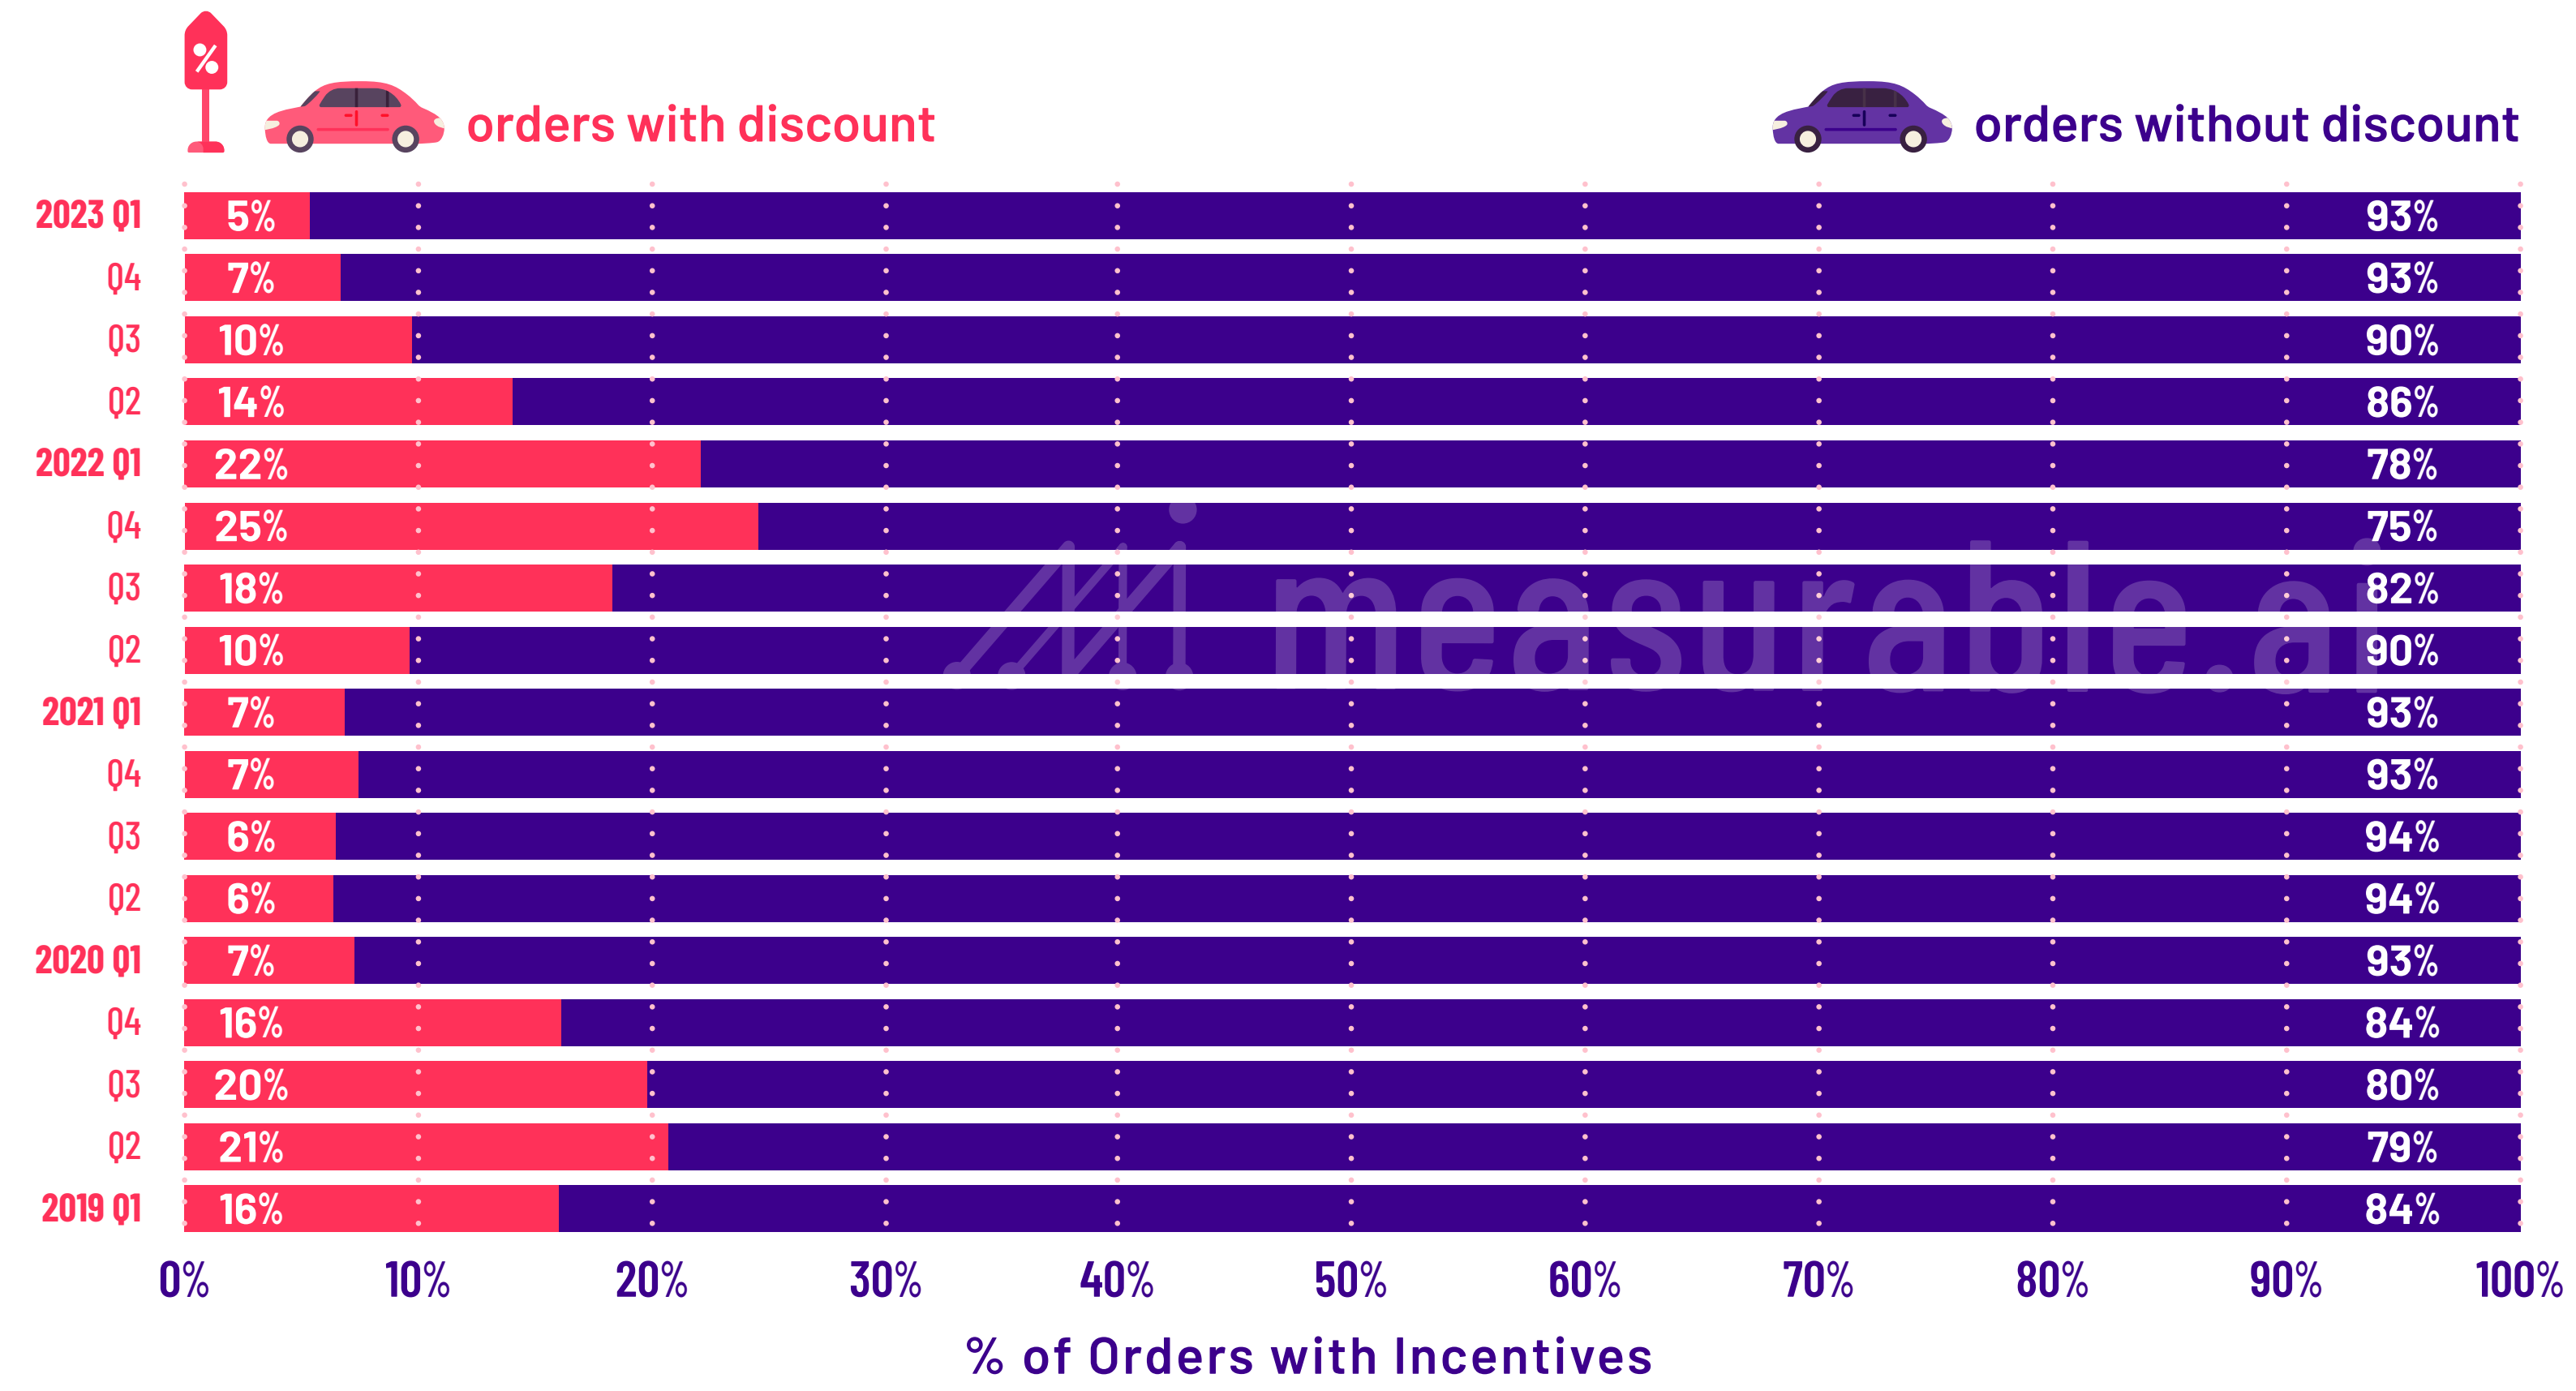

Measurable AI: India Ride-hailing Growth Trend Overview *Order Volume = Estimated order volume index, which is based on the monthly order volume captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Ola Cabs, Uber

Ola Cabs and Uber have been the primary players in India's ride-hailing market since 2019, establishing a powerful duopoly. The competition between these two juggernauts has remained relatively stable throughout this time. Before the pandemic, the two companies were neck and neck in market share, duking it out for the top spot. After 2022, Ola Cabs started to pull ahead slightly, demonstrating a larger market share in terms of order volume.

SINGAPORE RIDE-HAILING INCENTIVE TREND

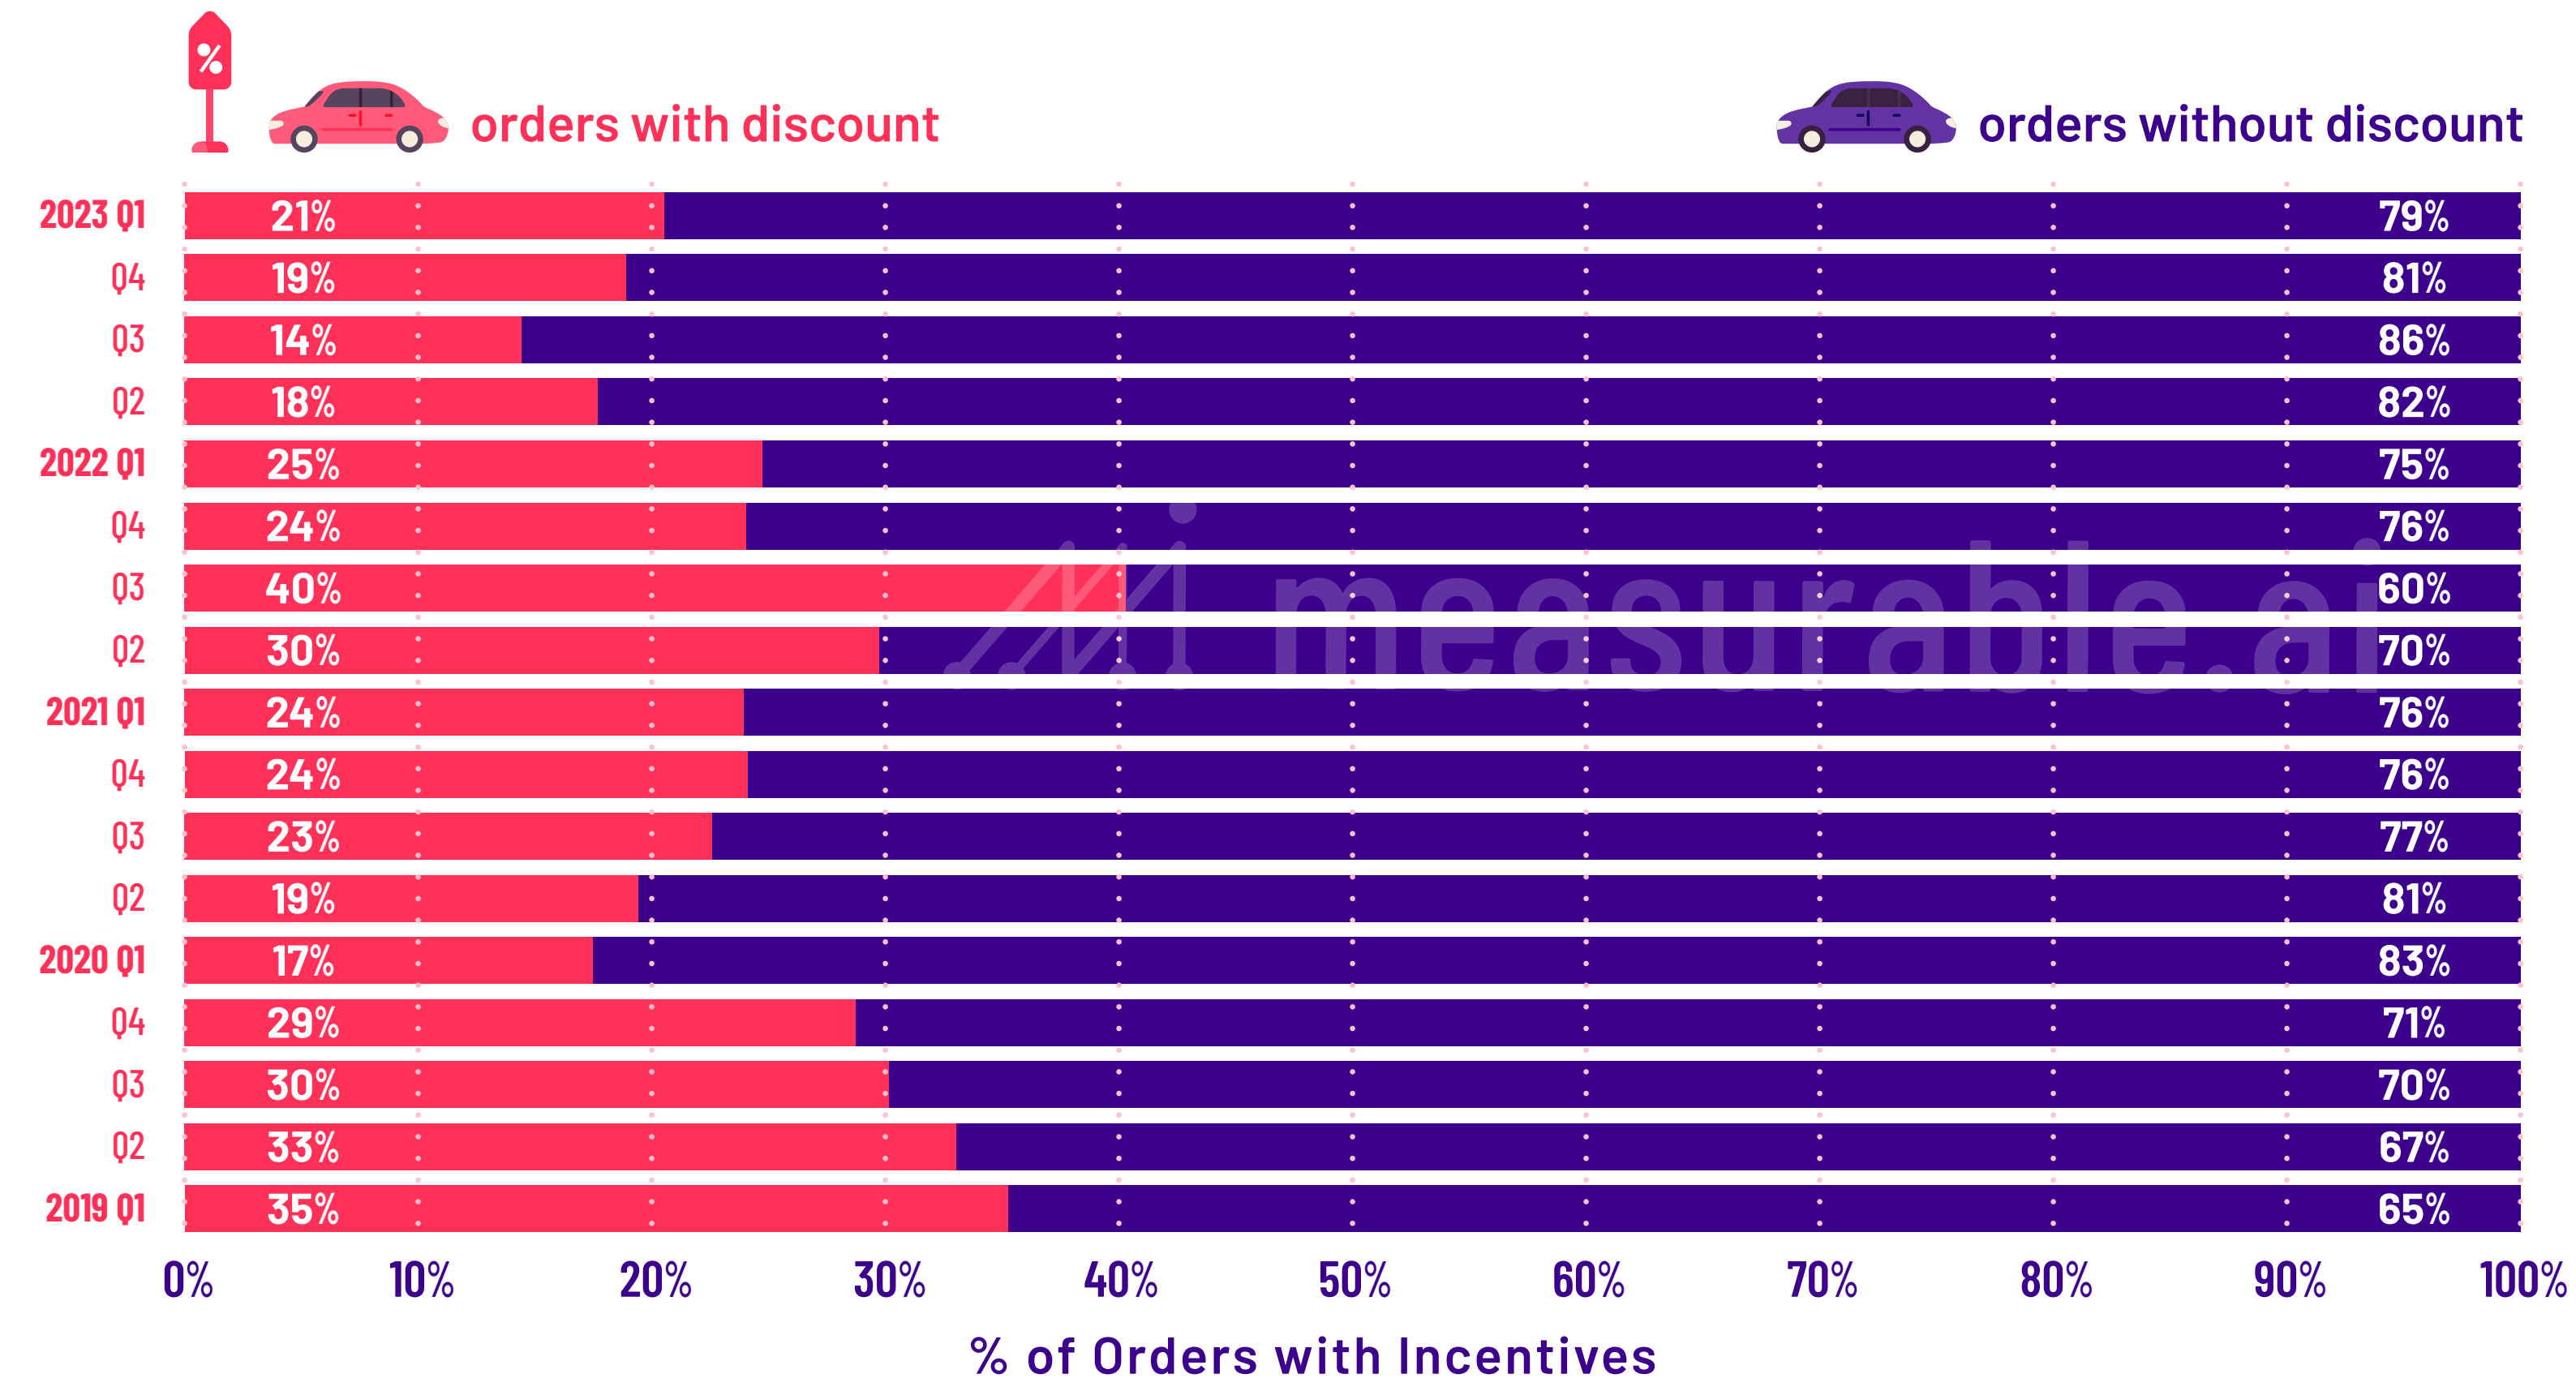

2019 2023

Among all the Asian markets monitored by Measurable AI, Singapore has a relatively low incentive rate in its ride-hailing industry, as observed from our consumer panel data. Over the past four years, the incentive rate has fluctuated between a low of 5% and a high of about 25%. As of the first quarter of 2023, only about 5% of ride-hailing orders in Singapore were paired with incentives.

VIETNAM RIDE-HAILING INCENTIVE TREND

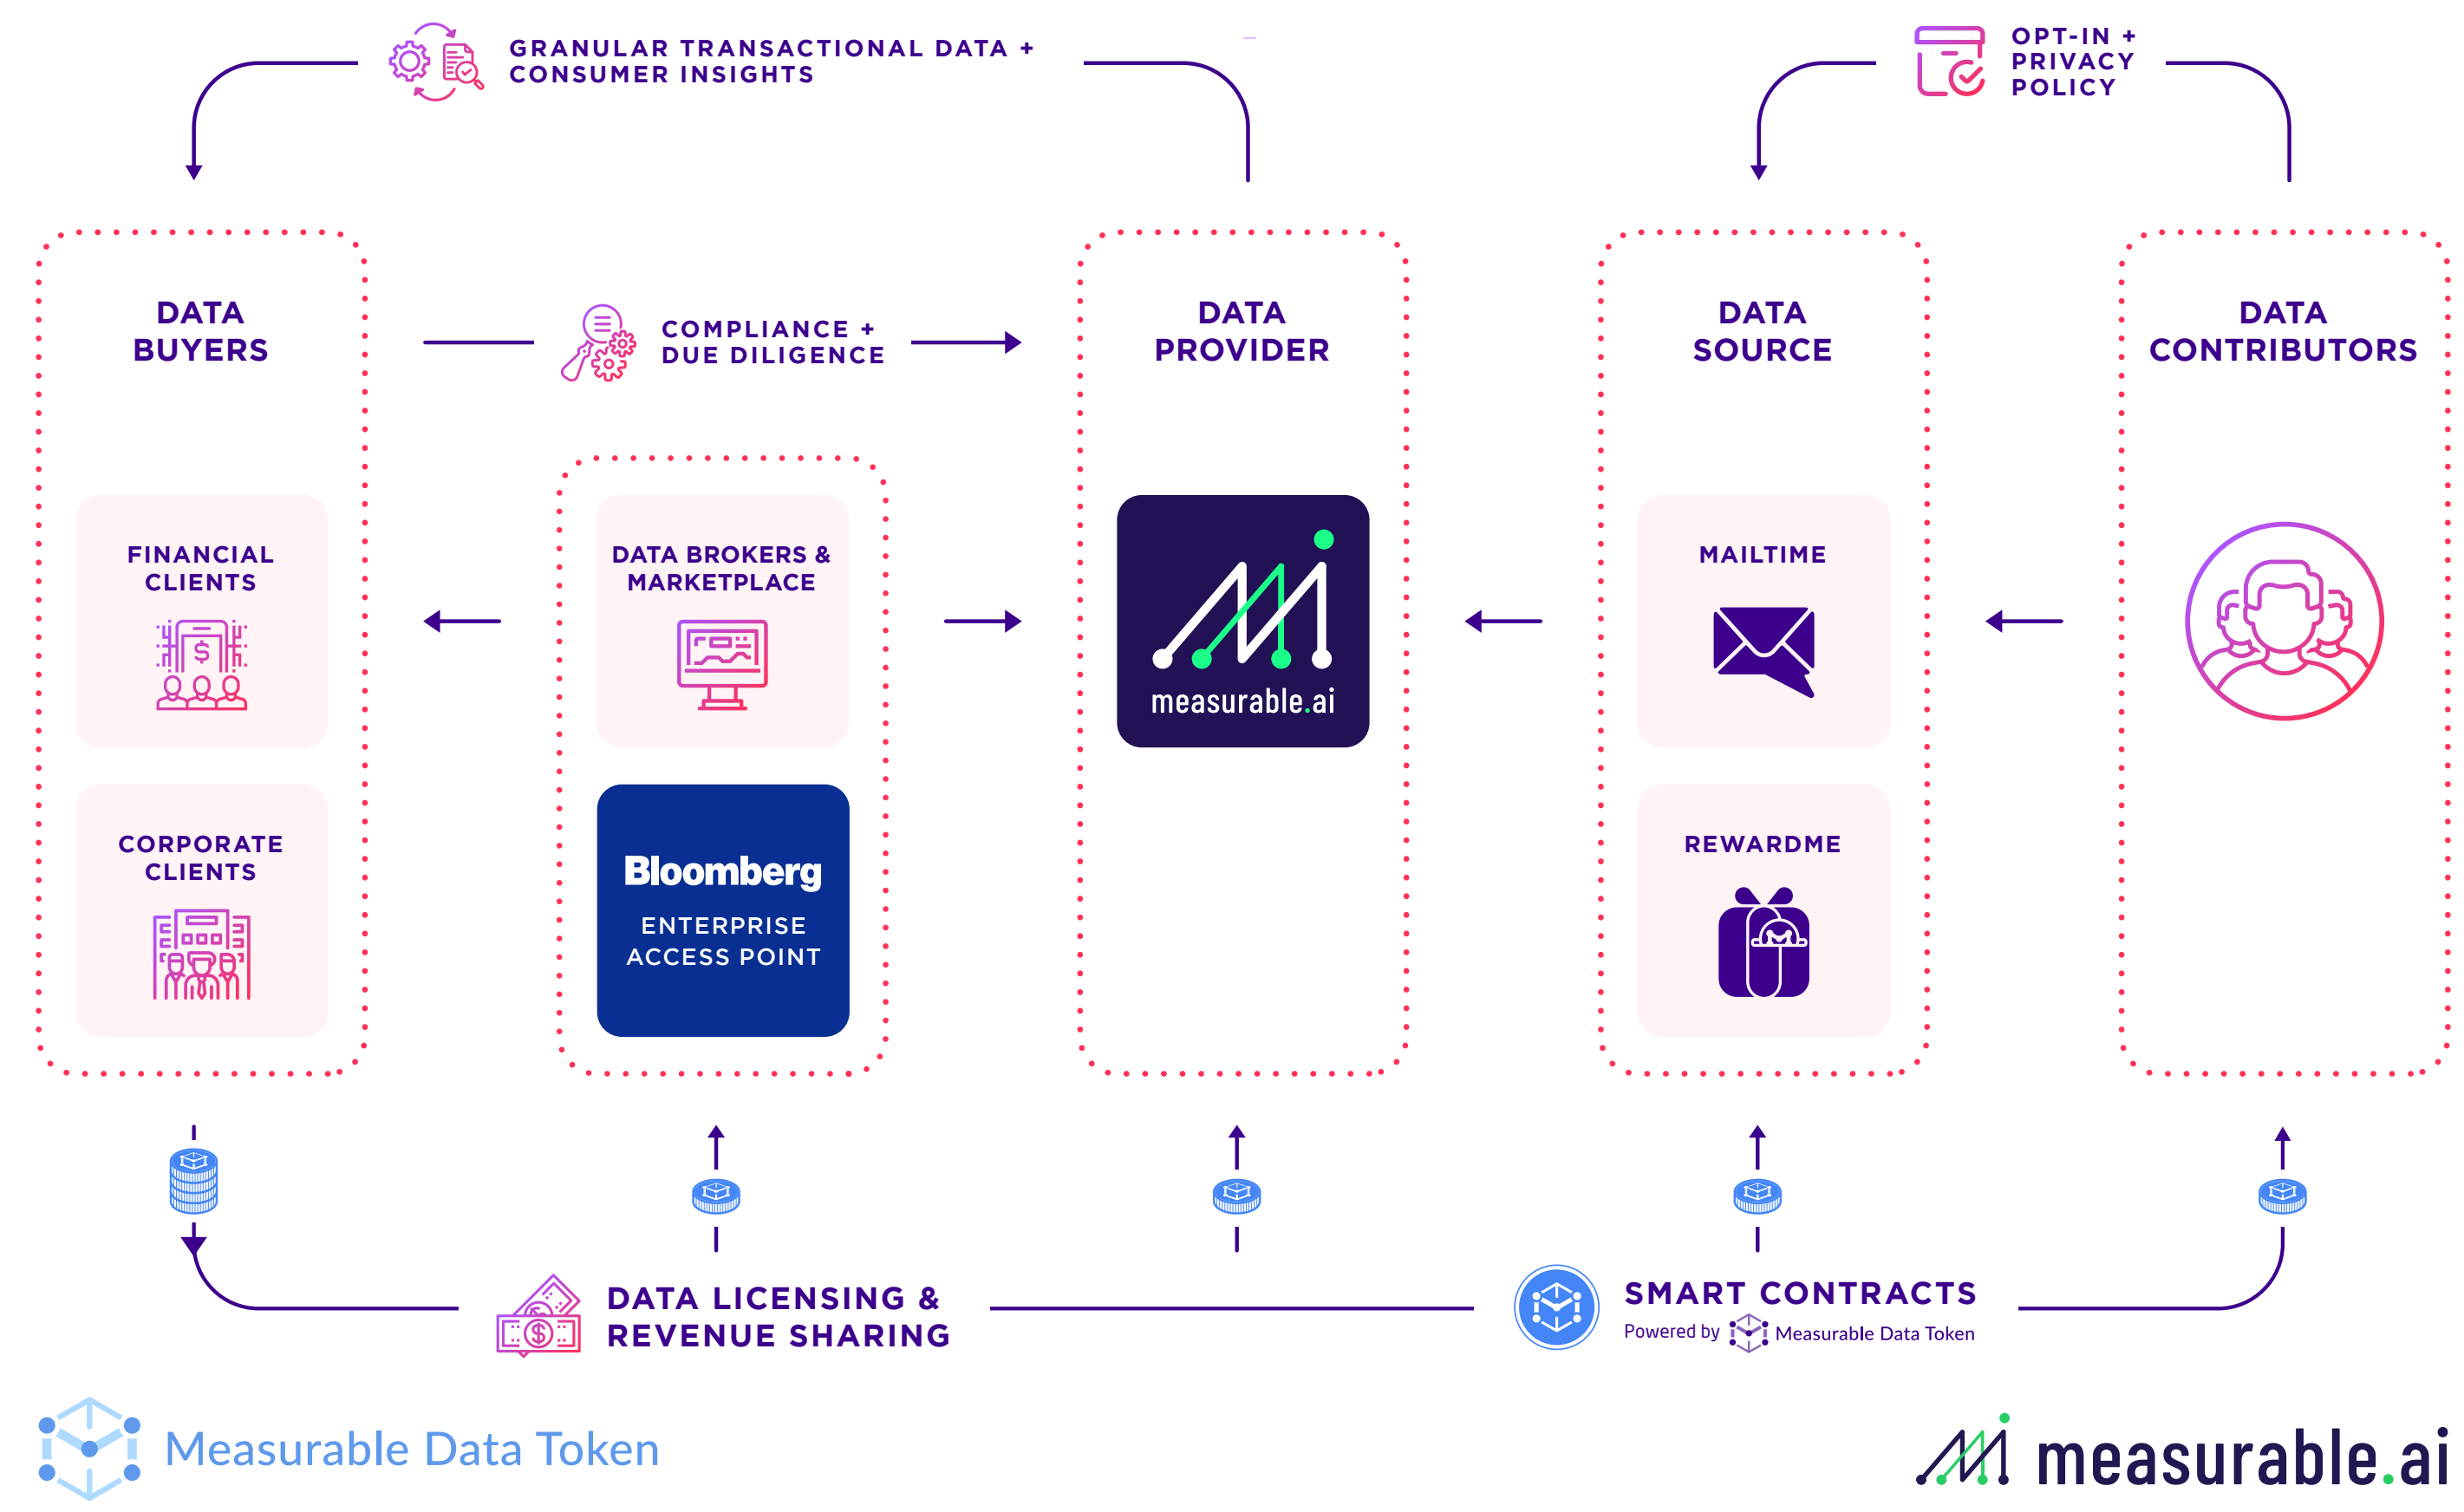

2019 2023

The ride-hailing industry in Vietnam continues to exhibit a healthy use of incentives and promotions, as reflected in the proportion of orders accompanied by these offers. Back in 2019, about 32% of ride-hailing orders came with incentives. However, this percentage witnessed a slight dip, settling around 19% in 2022.

Measurable AI: Vietnam Ride-hailing Incentive Trend *Incentive Trend = Estimated orders come with at least one type of promotions including coupons, credits, discounts, which is based on the orders captured in Measurable AI's unique consumer panel. Data range 2019 January to 2023 March. Ride-hailing companies included in this chart: Grab, Gojek, BE. Both two-wheelers and four-wheelers are included.
